PUCO Chairman Andre Porter
OH

Dear PUCO Chairman Porter,

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

If these utility companies need money. The best way to get it is to STOP paying huge dividends to their share holders. Utility Companies are the highest dividend payers in the USA. They have a lot of profit but pay it to shareholders instead of reinvesting it back into their infrastructures. It's easier for them to put their money problems on the backs of their customers. This GREED needs to STOP.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Mr. Ronald Daly

Dear PUCO Chairman Porter,

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Mr. Atrhur Sturgill

Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Dr. Elaine Hiatt

Absolutely not!!! I should not have to bail out these companies when they have not properly managed their huge profits to anticipate necessary upgrades. That's part of doing business correctly. Let them and their stockholders take the hit this time, not vulnerable consumers. After all, they've already pocketed enough. Consider it making them do what they should have done to begin with.

As a constituent and a consumer I feel it is time to take action.

OH

Dear PUCO Chairman Porter,

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Mrs. sharon boyer

But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

This should not be allowed to happen. People are financially strapped enough as it is due to our government. They don't 'get' it either. So please don't contribute to our already impoverished society. These power companies should cut the six figure salaries of the people at the top
Let them live like the rest of us for a better understanding! I've worked all my life without any hand outs, maybe they should learn to manage what they have instead of sticking those of us who make do. Thank you.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

PUCO Chairman Andre Porter
OH

Dear PUCO Chairman Porter,

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Mr. John Anthony II

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. Maybe utilities need to be nationalized to operate in the public intersest.

We need to rally around renewables and phase out coal, gas, and nuclear plants.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Mr. Barry Harper

Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

I find this unacceptable. My electric bill is already too expensive.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Mrs. Kathryn Phelps

Dear PUCO Chairman Porter,

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

Dear PUCO Chairman Porter,

AEP wants me to subsidize inefficient power plants with rate increases that can cost consumers $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because AEP is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

It seems pretty simple. They are a company, a company pays for their repairs out of their profits. Sometimes repairs eat up more of the profits than they would like. Sometimes not all repairs can be done yesterday. Since when is this any different than any other for profit company?

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers on March 23 and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Sincerely,

Mr. Brian Lundin

But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

I am on a FIXED income and most certainly CAN NOT afford another increase. Just WHAT is causing all of these short falls? Greed, maybe? Or how about "The public are stupid, so let's just drop another fee hike on them".

As far as I'm concerned, PUCO and not done ONE thing to rein in the utility companies.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Ms. Joyce Cremeans

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

Tno do not pass an increase he utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

No increase

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Mr. Charles Scarberry

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Dear PUCO Chairman Porter,

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action.

PUCO Chairman Andre Porter
OH

Dear PUCO Chairman Porter,

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future. There should not be bailouts for any of these They control all the power sources and it's getting harder for the average person to afford anything!!!

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Ms. Ruth Ferguson

But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Until the utility companies are making O% profit, I am against any rate increases. For the last 20 to 30 yrs, energy suppliers have made enormous profits, they should have invested more in their generation plants and upkeep. Not lined their pockets with profits.

As a constituent and a consumer I feel it is time to take action.

Dear PUCO Chairman Porter,

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.
I am retired, single , hard up and see no relief in the near future.
Next month my sewage bill is to be raised by 38%, my cable bill goes up monthly. Interest on credit cards continues to rise, so I will die in credit card debt, because I have to use them to supplement my small pension. I worked for 30 years, raised 5 children by myself and was unable to save money like I should have. When do I get my bailout?
The electric companies need to live within their means. If my electric bills are any indication, they should have enough money to operate on.
Say no to bail outs.

Thank you. Patricia Kline

As a constituent and a consumer I feel it is time to take action.

The
I am writing you in an attempt to keep Aep from receiving any bailout money. I am a disabled person who lives on a fixed income and already have a hard time paying my electric bill. My last bill was $133.62 for February. Any increase would make it impossible for me to pay my bills. I consistently shop around for the best price for my electric power. I ask that you do not approve this bailout.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a senior living on social security, these rate hikes will be harder and harder to pay. Our income does not get raised - why should the utility company be allowed to continue to raise their rates when it is totally not unnecessary!

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Mrs. margaret bocci

But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

I'm single, ,live ob soc. Sec. Disability
I watch what power I use
I am still paying $190.00 a month for power.
What, they want to earn a billion five a day, instead of a billion?
I would love to see the true profit per day.
I'm suprised, they aren't hiring Chinese to work for them.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Dear PUCO Chairman Porter,

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Mr. Thomas Lindemann
1064 S. Lake St.

OH

Dear PUCO Chairman Porter,

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Ms. Carol Reider

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

The PUCO has already almost tripled my cost from $5.36 per month to $14.00 + per month with the PUCO last gift to AEP in the last year. This is for power to a lot with none or very little use. Yes, the cost is incremented when there is use. The meter is read by WIFI or however they do it, the billing is paid by auto Debit from Bank Accnt. What is there reason now for an increase?

Yes, I'm totally against another raise in rates.

I can't afford that extra amount. I'm already scraping by on Social Security and am a widow. I get help from PIPP. Please do not pass on the fees to us, the consumers. We pay enough already!

As a constituent and a consumer I feel it is time to take action.

PUCO Chairman Andre Porter
OH

Dear PUCO Chairman Porter,

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Mr. John Laws

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a governmental employee who has operated since 2008 with a major cut and NO increase in wages, I (and many others in this county) have NO $$ to pay our just bills much less waste on energy gluttons! We've pulled in our belts -- someone higher up on the food chain needs to, also!!

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Ms. Anna B Selfridge

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Mrs. Mary Mckillips

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Ms. Megan McEwen

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Ms. Jennifer Cale

Dear PUCO Chairman Porter,

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action.

PUCO Chairman Andre Porter
OH

Dear PUCO Chairman Porter,

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Mrs. eva mathias

But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

I can barely afford the current rates,any higher costs would really make it hard to maintain my household budget.As a retiree things costing more on the same money doesn't work well at all.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

PUCO Chairman Andre Porter
OH

Dear PUCO Chairman Porter,

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Mr. Joseph Tuscano

We are an elderly couple on a fixed income. We have a lot of medical issues and related bills. Food cost, prescription cost, taxes, and insurance keep rising. We cannot afford a $10.00 to $10.50 raise in rates. Give us a break.

As a constituent and a consumer I feel it is time to take action.

Dear PUCO Chairman Porter,

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Mr. John Faddis

But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Has anyone from your CEO down thought about the consequences in this utility bailout? It is time for more people to turn to other energy sources such as solar power which is what you will force upon the masses. Please do not agree to this bailout!

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

You are still making a profit. Will you bail me out? My electric bill has gone from 200+ 10 years ago to $590 this month. I have a fixed income. If I have to live within my means and do without to pay these high utility bills I feel you can do the same.

OH

Dear PUCO Chairman Porter,

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Ms. Crystal Clemens

But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Please say no to bailout. We senior citizens are on fixed incomes and cannot afford this high increase. How can they expect handouts when we have to decide between, eating, heating increases and medication right now? Please be considerate. Vote NO.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

AEP also wants its customers to pay for damage done during storms. Well, if they had strict maintenance rules and regulations, they wouldn't have all of the serious blackouts they have. The only time they do any maintenance is when there is damage because there is poor maintenance of their poles.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Dear PUCO Chairman Porter,

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Mr. Brian Nickey

OH

Dear PUCO Chairman Porter,

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Miss michele ossman

Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Ms. Elaine Bradley

Dear PUCO Chairman Porter,

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. If they are making threats that they will start cutting power to their customers. Then its time to END their monopolies!! They have been extorting the public long enough to fill their huge corporate pockets. They are not ENTITLED to a certain amount of profit to pocket. If they do not know how to run a business without Government assistance, then they should go out of business!!!! Make room for the next company that can.

As a constituent and a consumer I feel it is time to take action.

Dear PUCO Chairman Porter,

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Ohio cannot afford this....Please say NO

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Mrs. Margaret Keller

I am on a fixed income and already have to move due to my high Edison bill. Where is the help for the older people on Social security? Any increase of that nature will really hurt the low income families. Surely there is another way rather than a rate hike?

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Our electric bill is paid long before the due date every month. We have contracted in the past with other suppliers, should you ignore customer feedback and increase monthly bills, we will find another supplier that accommodates us.....and I imagine numerous other consumers will do like-wise!

PUCO Chairman Andre Porter
OH

Dear PUCO Chairman Porter,

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Ms. Pat McKelley

But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Seniors and low income families absolutely cannot afford this. Please say NO. What about the schools? They are all broke now.Not only will we be paying our increase, but all businesses will pass their increase on to consumers. Consumers have no one to pass it on to. PLEASE SAY NO.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

OH

Dear PUCO Chairman Porter,

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from $10.00 to $10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Mrs. Judith Roberts
