1.9.2 Deposits

A Applicants for service may be required prior to establishing service to provide the Company a security deposit. The deposit requested will be in cash or the equivalent of cash, and will be held as a guarantee for the payment of charges. A deposit does not relieve the Customer of the responsibility for the prompt payment of bills on presentation. Reestablishment of credit for service will be in accordance with Rule 4901:1-17-04.

B The deposit will not exceed an amount equal to two month's average monthly bill for all regulated local exchange services for ensuing twelve months, plus thirty percent (30%) of estimated monthly charges.

C Guarantee of Payment: The Company may accept, in lieu of deposit, a contract signed by a guarantor satisfactory to the Company whereby payment of a specified sum, not exceeding the deposit requirement is guaranteed. The term of such contract shall be for no longer than 12 months, but shall automatically terminate after the customer has closed and paid the account with the utility, or at the guarantor's request upon 30 days' written notice to the Company. Should the guarantee contract be insufficient according to (D) below, a cash deposit or a new or additional guarantee may be required for good cause upon reasonable written notice to the customer.

The service of any customer who fails to comply with these requirements may be disconnected upon notice as prescribed in Ohio Rules. The Company shall mail the guarantor copies of all disconnect notices sent to the customer whose account the guarantor has guaranteed unless the guarantor waives such notice in writing.

D Reestablishment of credit: An applicant for service who previously has been a customer of the utility and whose service was discontinued because of nonpayment of his bills may be required to pay such bill together with the reconnection charge, and to reestablish his credit by depositing the amount prescribed in Section 1.9.2.

1.9 Payment Arrangements (cont'd)

1.9.3 Refund of Deposits

A A deposit will be refunded to a customer after twelve consecutive months of prompt payments, as defined in "Explanation of Terms" and below, of telephone service invoices. A customer has paid his bills for service for twelve consecutive months without having had service discontinued for nonpayment of his bill, and without having had more than two occasions on which his bill was not paid by the time specified by the regulations of the utility regarding prompt payment of bills, and the customer is not currently delinquent in the payment of his bills. The Company will refund the deposit to the customer by direct payment, or, at the customer's request, apply deposit as a credit to the customer's account.

B When a service or facility is discontinued, the amount of a deposit, if any, will be applied to the Customer's account and any credit balance remaining will be refunded within 45 days from the date of termination. Before the service or facility is discontinued, the Company will return the deposit to the customer or, at the customer's request, apply deposit as a credit to the Customer's account.

- (ii) by payment to the Customer upon request, once annually;
- (iii) by adding accrued interest to the amount of the deposit when refunded to the customer;
- (iv) by applying interest to any unpaid bill of the Customer upon termination of service with the Company.

All requirements for establishment of credit will be consistent with Rules 4901:1-17 and 4901:1-5-13 & 14 of the Commission's Minimum Telephone Service Standards.

1.9.5 Bills and Collection of Charges

A Bills will be rendered monthly to Customer. Fixed monthly recurring charges are billed in advance. Usage charges and minimum charges for service are billed in arrears. Customer shall be liable for all accrued local charges, directory charges, long distance charges and other charges arising prior to the service commencement date, as defined herein, and shall pay the Company for any such charges which may be assessed against the Company in any manner.

B All service, monthly recurring charges and non-recurring charges are due and payable within 14 days of the post mark on the bill, provided however, that installation charges may be spread out over 3 months.

C The Company shall present bills for recurring charges monthly to the Customer, in advance of the month which service is provided.

1. Local Exchange Service Regulations (cont'd)

1.9 Payment Arrangements (cont'd)

1.9.5 Bills and Collection of Charges (cont'd)

E A late payment charge of 1.5% is not applicable to subsequent rebilling of any amount to which a late payment charge has already been applied. Late charges are to be applied without discrimination.

1.9 Payment Arrangements (cont'd)

1.9.6 Disputed Bills

A The Customer shall notify the Company of any disputed items on a bill within a reasonable period of time after receipt of the bill. The existence of a disputed amount does not relieve the customer of their obligation to pay current charges. If the Customer and the Company are unable to resolve the dispute to their mutual satisfaction, the Customer may file a complaint with the Commission in accordance with the Commission's rules of procedure.

B The date of the dispute shall be the date the Company receives sufficient documentation to enable it to investigate the dispute.

2.2 Feature Descriptions

- A The Company's local exchange services have a variety of available features that let the Customer design a service tailored to meet their needs. Below are feature descriptions.

Caller ID with Number

Allows for the automatic delivery of a calling party's number to the called customer. The telephone number is displayed on customer-provided equipment. If the Customer has call waiting on the same line, they will hear the call waiting tone, but the new incoming call number will not be displayed.

Caller ID with Name and Number

Allows for the automatic delivery of a calling party's name and number to the called party. The name and number are displayed on customer-provided equipment. If the Customer has call waiting on the same line, they will hear the call-waiting tone, but the new incoming name and number will not be displayed.

Caller ID Blocking Per Line

Provides default blocking of delivery of the calling customer's telephone number. Blocking can be deactivated by the customer by dialing an access code before each call. When the customer hangs up, the default blocking is reinstated.

Caller ID Blocking Per Call

Provides blocking of delivery of the calling customer's telephone number on a per call basis. Blocking can be activated by the customer dialing an access code before each call.

2 Service Descriptions and Rates (cont'd)

2.2 Feature Descriptions (cont'd)

**Call Forward**

This optional feature allows all calls directed to a telephone number to be routed to a user defined telephone number. The user can activate/deactivate Call Forward and define a telephone number where all calls will be forwarded. Calls cannot be forwarded to an International Direct Distance Dialing (IDDD) number.

**Call Forward Busy Line**

This optional feature forwards calls to a busy station to a predetermined number. Calls cannot be forwarded to an International Direct Distance Dialing (IDDD) number. The user is charged any applicable usage charges for the forwarded call.

**Call Forward Don't Answer**

Allows users to re-route a call to a predetermined station in the event that the call is not answered within a customer-specified number of rings. Users are charged for any applicable usage charges on the forwarded call.

**Call Pick Up**

This optional feature allows a call to be answered from a different line by dialing a code. All lines in the group must be equipped with this feature. The Customer can have an unlimited number of lines in a Call Pick Up group.

2 Service Descriptions and Rates (cont'd)

2.2 Feature Descriptions (cont'd)

Call Transfer

This optional feature allows the user to transfer any established call to another telephone number (inside or outside of the system) without the assistance of an attendant.

Call Waiting

This optional feature provides a tone to notify a Customer on an existing call that a second call is waiting.

Consultation Hold

This temporary hold feature is inherent in Call Transfer and Three Way Calling. It is activated by depressing the switch hook.

Direct Connect Hotline

This optional feature allows a Customer to automatically dial a designated number whenever the originating telephone goes off hook. This feature is assigned to a phone which is used only for this purpose.

Hunting

This standard feature routes a call to an idle line in a prearranged group when the called telephone number is busy. Typically this feature is used with the customer's main telephone number and several subtending lines so that the customer can receive calls on several lines, although all calls are placed to the same number. Hunting will not work with Call Forward Busy and Don't Answer.

Speed Dial

This optional feature allows a Customer to designate up to six numbers to be called by dialing a code.

2 Service Descriptions and Rates (cont'd)

2.2 Feature Descriptions (cont'd)

Speed Dial, Expanded

This optional feature allows Customer to designate up to thirty numbers to be called by dialing a code.

Speed Dial, Group

Allows up to five lines on a Customer's system to share a Speed Dial list. This can be either a six number or expanded speed dial list.

Three Way Calling

Allows a user to add a third party to an existing conversation without expensive conferencing equipment. This feature also allows a user to place a call on hold in order to make a consultation call on the same line. When the consultation call is completed the user hangs-up or depresses the flash key on the telephone and is reconnected to the original conversation.

B.     Measured Rate

1.     Measured Rate Services

The local usage charges are based upon four measured elements, i.e., the total number of outgoing local messages, the distance and the duration of each local message and the time of day each local message is originated, subject to the following:

a.     Distance

The charges for local messages vary based on the airline distance (i.e., rate mileage) between the rate centers of the central offices serving the calling and called stations, determined in the same manner as message toll rate distances.

b.     Duration

- (1) A charge applies for the initial minute, or fraction thereof, and for each additional minute, or fraction thereof.
- (2) A local message is considered as starting at the time telephone communication is established between the calling station and the called telephone number.
- (3) Chargeable time ends when the calling station "hangs up" thereby releasing the network connection. If the called station "hangs up" but the calling station does not, chargeable time ends when the network connection is released by the automatic timing equipment in the telephone network.
- (4) Chargeable time does not include time lost because of faults or

defects in the service.
