Re: American Transmission Systems, Inc. / Geauga County -138kV Transmission  
Line Supply Project  
Case No. 07-171-EL-BTX

Dear Mrs. Kendzierski:

Thank you for your concerns regarding the proposed American Transmission Systems, Inc. / Geauga County -138kV Transmission Line Supply Project. As with the consideration of all transmission projects, local and surrounding businesses, residents, municipalities and officials are invited to discuss the present and long-term economical and environmental feasibility of such projects. The response we receive from these entities convey an interest in environmental, ecological and social implications associated with the proposed transmission line.

To date, American Transmission Systems held public information meetings on both March 5-6, 2007 in Huntsburg and Thompson Ohio that residents might be informed on the proposed project. Still at this time, American Transmission Systems has not submitted an application for the project before the Ohio Power Siting Board.

As we appreciate all input into the siting process, once an application is filed, your document will be shared with members of the Board and placed in an official docket for the case. Further, should you wish to view activity involving this application, please visit our web site at [www.OPSB.ohio.gov](http://www.OPSB.ohio.gov).

Very truly yours,

Klaus Lambeck, Chief  
Ohio Power Siting Board

COMMENT DESCRIPTION:

In regards to 138kV Transmission Line Supply, case #07-0171 Would like to know how safe this line will be, and if there is any studies to show that the line is safe, if so be. What will be the deciding factor on the power line? Also since we will loose our trees and land for planting,when we go to sell our property are we allowed to claim this property or will we loose the footage?
