Re: American Transmission Systems, Inc. / Geauga County -138kV Transmission
Line Supply Project
Case No. 07-171-EL-BTX

Dear Mr. Garey:

Thank you for your concerns regarding the proposed American Transmission Systems, Inc. / Geauga County -138kV Transmission Line Supply Project. As with the consideration of all transmission projects, local and surrounding businesses, residents, municipalities and officials are invited to discuss the present and long-term economical and environmental feasibility of such projects. The response we receive from these entities convey an interest in environmental, ecological and social implications associated with the proposed transmission line.

To date, American Transmission Systems held public information meetings on both March 5-6, 2007 in Huntsburg and Thompson Ohio that residents might be informed on the proposed project. Still at this time, American Transmission Systems has not submitted an application for the project before the Ohio Power Siting Board.

As we appreciate all input into the siting process, once an application is filed, your document will be shared with members of the Board and placed in an official docket for the case. Further, should you wish to view activity involving this application, please visit our web site at www.OPSB.ohio.gov.

Very truly yours,

Klaus Lambeck, Chief
Ohio Power Siting Board

COMPLAINT DESCRIPTION:

As a property/homeowner I want to express my strong opposition to the proposed 138kV transmissions line along Clay street in Thompson township. We are moving from Solon Ohio to our beautiful 42 acres. Our farm is located on Thompson Rd. near the intersection of Clay Street. If this the route you choose you will adversely affect my life and my neighbors both aesthetically and financially (decreased property values). I do understand the need to get more power to the south, however you owe it to all the township residents to do so in such a manner that will disrupt the fewest residents. Thanks
