**APPLICATION**

Ohio Edison Company ("OE"), The Cleveland Electric Illuminating Company ("CEI") and The Toledo Edison Company ("TE"), (collectively, "Companies"), each of which is an electric light company and a public utility as defined in Sections 4905.02 and 4905.03 of the Ohio Revised Code, respectively, hereby state:

**I. GENERAL BACKGROUND**

1. The Companies are each an Ohio corporation in the business of supplying electric distribution services to their respective customers, the total number of which are approximately 1 million, 0.8 million, and 0.3 million for OE, CEI, and TE, respectively.
2. This Application is made pursuant to R.C. 4909.18 and related sections of the Ohio Revised Code for authority to make changes and increases in electric distribution rates applicable to customers within the Companies' respective service territories and to make modifications to the Companies' tariffs and accounting practices.
3. The Companies currently provide retail distribution services to incorporated communities and unincorporated areas within the Companies' respective service

territories that are comprised of all or part of the counties set forth on Attachment No. 1 of this Application.

4. In its May 30, 2007 Entry in the above case numbers, the Public Utilities Commission of Ohio ("Commission") approved the proposed test year period as the 12 months ending February 29, 2008 and a date certain of May 31, 2007.

## **II. FINANCIAL IMPACTS**

5. OE's current rates, authorized by the Commission in Case No. 89-1001-EL-AIR, *et seq.*, and further approved in Case No. 99-1212-EL-ETP, *et seq.*, are based on a date certain of June 30, 1989, and on an accounting test year for the twelve months ended December 31, 1989. Current rates for CEI and TE were authorized by the Commission in Case Nos. 95-300-EL-AIR, and 95-299-EL-AIR, respectively, and further approved in Case No. 99-1212-EL-ETP, *et seq.*, and are based on a date certain of March 31, 1995, and on an accounting test year for the twelve months ended December 31, 1995. Since the Companies' respective test years and dates certain, the Companies' operating costs and the property used and useful in the rendition of electric distribution service to customers affected by this Application have increased significantly. Moreover, pursuant to the Commission's Orders in Case Nos. 99-1212-EL-ETP *et seq.*, 01-2708-EL-COI, *et seq.*, 05-1125-EL-ATA, *et seq.*, and 05-704-EL-ATA, the Companies have been deferring certain costs that are included for recovery in this proceeding. The Companies' current rates are insufficient to yield reasonable compensation for the distribution service rendered by the Companies and do not provide the Companies a fair return on their

respective property used and useful in rendering electric distribution services. They are, therefore, unjust and unreasonable.

6. Based on projected sales, current rates generate distribution related revenues of approximately \$516 million for OE; \$446 million for CEI; and \$157 million for TE. Based on current data, the Companies are currently earning a rate of return of 2.26% for OE; 3.61% for CEI; and 0.04% for TE on the distribution related business. These returns are below the rates of return which are commensurate with returns on investments in other enterprises having corresponding risks or which are sufficient to assure confidence in the financial integrity of the Companies, so as to maintain their credit and to attract capital.
7. This Application is being filed so as to generate sufficient revenues for the Companies to pay their respective distribution-related operating expenses, service their respective outstanding debt balances, and earn adequate returns on their property used and useful in providing electric distribution service to their respective customers. OE, CEI and TE are proposing overall rates of return of 9.06%, 9.15% and 8.95%, respectively, and annual distribution revenue increases of \$ 162 million for OE, \$ 107 million for CEI and \$ 71 million for TE.
8. Pursuant to the Commission's ruling in Case No. 05-1125-EL-ATA *et seq.*, commencing on January 1, 2009, the regulatory transition charge ("RTC") for OE and TE will no longer be included in rates, a fact that is reflected in the Companies' proposed tariffs. Pursuant to the same order, the RTC for CEI will continue until December 31, 2010, but will be reduced by approximately 30% in or around May 2009, depending on the level of actual kWh sales. This reduction occurs at the same time the new distribution rates go into effect. Upon such elimination or

reduction of RTC, as described above, annual revenues received from customers will decrease by approximately \$262 million for OE; \$192 million, for TE; and \$140 million for CEI. These RTC decreases will offset all or a portion of the proposed distribution revenue increases described above.

### **III. RATE SCHEDULES AND RATE DESIGN**

9. The Companies each propose through this Application to change their respective Current Rate Schedules (included in Schedule E-2) to the Proposed Rate Schedules (included in Schedule E-1) -- the Current Rate Schedules being those in effect as of the date of this Application and the Proposed Rate Schedules being those that will be placed into effect on January 1, 2009 for OE and TE and in or about May 2009 for CEI if the Application is approved as submitted. The E-1 and E-2 schedules are included in Volume 2 as part of this filing.
10. The Companies each propose through this Application to eliminate their current rate schedules and replace them with rate schedules available to customers based upon their service voltage. Accordingly, many of the Current Rate Schedules for each of the Companies are being eliminated, with customers currently taking service under these schedules being transferred to one of the newly created Proposed Rate Schedules. A comparison between the Current Rate Schedules under which customers are now taking service and those Proposed Rate Schedules under which customers will take service in the future is set forth on Attachment No. 2 to this Application. Explanations for the changes to the current rate schedules can be found in the E-3 Schedules included in Volume 2 of this filing.

11. In addition to the elimination of many of the Current Rate Schedules, and the creation of the Proposed Rate Schedules addressed in Paragraph 10 above, the Companies are also proposing the following new riders:

- Residential Distribution Credit ("RDC") Rider, which provides a reduction to distribution charges for certain electric loads as identified in each of the Companies' RDC Riders so as to mitigate rate impacts through gradualism.
- Business Distribution Credit ("BDC") Rider, which provides a reduction to distribution charges for certain electric loads as identified in each of the Companies' BDC Riders so as to mitigate rate impacts through gradualism.
- Demand Side Management ("DSM") Rider, which creates a mechanism through which certain DSM costs are to be recovered and reconciled semi-annually as approved in Case No. 05-1125-EL-ATA et seq. The details of this rider are set forth in each of the Companies' DSM Riders.

12. For the reasons set forth in the E-3 Schedules, included in Volume 2 as part of this filing, the Companies are also proposing certain modifications to their respective Electric Service Regulations and the following riders currently in effect:

- State kWh Tax Rider, which modifies and renames each Company's current State and Local Tax Rider and eliminates charges for municipal taxes, which are proposed to be included in base rates.
- Toledo Edison Economic Development Rider (Rider 4a), which is modified to disallow any new customers to take service under this Rider after December 31, 2008.

#### IV. ACCOUNTING TREATMENT

13. In addition to the rate relief described above, the Companies also ask the Commission to authorize the following accounting treatment:

- Depreciation: The Companies performed depreciation studies, which are more fully described in supporting testimony (Co. Exh. 5) and included in Volume 4B of this filing. Pursuant to these studies, certain modifications to depreciation accrual rates are warranted. Based upon the results of the depreciation studies and the explanations set forth in the supporting testimony, the Companies request that the depreciation rates proposed in this proceeding be approved by the Commission.

- Deferral of Storm Related Costs: The Companies request permission to defer storm restoration and repair costs in excess of those included in base rates that are incurred as a result of storms that damage the Companies' distribution facilities. Conversely, in the event that actual storm costs in any calendar year are less than the annual costs included in base rates, the Companies would reduce the costs recoverable from customers in future years. Given the inability to predict or control the weather and the level of damage produced by storm, coupled with desire of customers, regulators, and the Companies to quickly and safely restore service, the granting of this request is reasonable and allows for the deferral for later recovery (or credit) of actual storm restoration and repair costs incurred by the Companies. A separate account will be established for this deferral so that the costs recorded may be appropriately reviewed.

## V. PROCEDURAL COMPLIANCE

14. On May 8, 2007, the Companies, pursuant to R.C. 4909.43(B) and consistent with the Standard Filing Requirements set forth in Chapter 4907-1 of the Ohio Administrative Code, served upon the Commission and the mayor and legislative authority of each municipality affected by this Application, their Notice of Intent to file this case ("Notice"). A list of the individuals to whom such Notice was sent is included in the Notice under Tab 2 for each of the Companies, which was docketed in this proceeding.
15. At the time of the filing of this Application, no municipal corporation has in effect any ordinance or franchise that does, or will, regulate the rates or charges to any customer affected by this Application.
16. As required by R.C. 4909.18 and the Standard Filing Requirements set forth in Chapter 4901-7 of the Ohio Administrative Code, the Companies are also attaching the following information in Volumes 1 through 5 as part of this filing:
  - Volume 1: Schedules A, B, C, D, F, I, and Schedules S-1, S-2 and S-3
  - Volume 2: E Schedules, excluding Schedule E-3.2
  - Volume 3: Schedule E-3.2 (Cost of Service Study)

Volume 4A: Direct Testimony of Company Witnesses,  
excluding Paulette R. Chatman (Co. Exh. 5)

Volume 4B: Direct Testimony of Paulette R. Chatman with depreciation studies

Volume 5: Schedules S-4.1 and S-4.2

17. Pursuant to the Commission's granting of the Companies' request for waivers on May 30, 2007 Entry, certain Standard Filing Requirements ("SFR") information described in said Entry is not included with this filing. Further, the Companies have not included certain information related to plant in service and depreciation reserves as required by Appendix A, Chapter II, Supplemental Information (C)(21), and Appendix A, Chapter II, Section B (C)(4) of the SFRs pending Commission reconsideration of the Companies' request for waiver of these requirements. The Companies will supplement this filing as appropriate after the Commission rules on such reconsideration request.
18. Concurrent with this filing, the Companies are also submitting direct testimony in support of the Application, which is included in Volumes 4A and 4B included with this filing.
19. Concurrent with this filing, the Companies delivered four copies of the information required by Section 4901-7-01, Appendix A, Chapter II(C) of the Ohio Administrative Code to the Commission's utilities department, office of the rate case manager.

**WHEREFORE**, the Companies pray that the Commission:

1. Find that the rates and charges currently collected by the Companies for the distribution services provided under the Current Rate Schedules included on Schedule E-2 are insufficient to provide them with reasonable compensation for

such services rendered by each of the Companies and are, therefore, unjust and unreasonable;

2. Find that the rates, charges and other provisions of the Proposed Rate Schedules included in Schedule E-1 are just and reasonable and approve the same;
3. Find that the requested accounting treatment related to depreciation rates and storm damage costs is reasonable and approve the same;
4. Order the Companies to file the Proposed Rate Schedules included in Schedule E-1, superseding the Current Rate Schedules, and becoming effective on January 1, 2009 for OE and TE, and upon the reduction of CEI's regulatory transition charge as authorized in Case No. 05-1125-EL-ATA *et seq.* which based on current kWh sales projections, is expected to be in May, 2009.

Respectfully submitted,

See Note 1

NOTE 1: Due to the length of time elapsed since the last rate case (12 years), FirstEnergy has received a waiver on explaining transfers and reclassifications to Plant-in-Service, but will investigate on an individual basis as requested.

NOTE 2: FAS 109 was transferred into Account 303 Intangible in 1997.

Note (1) Accruals rates for depreciable property are based on the depreciation study

Note (2): Account 370 - The 10 year remaining life reflects the remaining life of meters due to rapidly changing technology

Remaining Life Depreciation is calculated on a net plant basis and ensures that all plant, including any new additions are fully depreciated in a 10 year period  
The depreciation rate increases monthly with the average rate of Year 1 being 10.5% The Calculated Depr. Expense formula for this account is  $(L-(D-E)*K$

Note (3): Account 371 - The Company intends to exit the outdoor lighting installed on customer premises in 5 years

Remaining Life Depreciation is calculated on a net plant basis and ensures that all plant, including any new additions are fully depreciated in a 5 year period  
The depreciation rate increases monthly with the average rate of Year 1 being 22.5% The Calculated Depr. Expense formula for this account is  $(L-(D-E)*K$

Note (4): Account 390.3 - Leasehold Improvements uses an end of life date consistent with the expiration of the Lease Agreement of the Leased Property. The depreciation rate increases monthly with the average rate of this year being 22.34%

NOTE 1: The Illuminating Company obtained a waiver related to accumulated depreciation and amortization prior to 1999 because the book accumulated depreciation and amortization was maintained on a functional basis. The beginning and ending balances by function from the last rate case date certain through 12/31/98 are available in Supplemental Information Item C-21.

NOTE 2: Due to the length of time elapsed since the last rate case (12 years), The Illuminating Company has received a waiver on explaining transfers and reclassifications to Plant-in-Service but will investigate on an individual basis as requested.

Note:

(1) O&M change equals the proposed revenue increase multiplied by the sum of the Uncollectible Accounts, PUCO Annual Assessment and OCC Annual Assessment percent of Incremental Gross Revenues, as shown on Schedule C-10.

$$\$106,882,116 \times (0.00625969 + 0.00134184 + 0.0002965) = \$844,158$$

Taxes Other Than Income Taxes change equals the proposed revenue increase multiplied by the CAT tax factor as a percent of Incremental Gross Revenues, as shown on Schedule C-10.

$$\$106,882,116 \times 0.00156 = \$166,736$$

Income Tax changes are calculated on Schedule C-4.

| (4)      | Amount Charged Against Reserve                  | \$ 14,751,217                    | \$ 13,897,843 | \$ 12,522,863 | \$ 15,503,502 *          |
| (5)      | Reserve at End of Year                          | \$ 4,221,243                     | \$ 3,345,668  | \$ 3,177,083  | \$ 4,226,111             |
| (6)      | Net Write-Off Ratio [(4) - (3)] / (5)           | 194.86%                          | 241.11%       | 246.98%       | 215.85%                  |
| (7)      | Uncollectible Expense/Provision Ratio (2) / (5) | 215.60%                          | 246.15%       | 238.10%       | 221.71%                  |

Explain reason for difference, if lines (6) and (7) differ:

For 2004-2006, Recoveries and Amounts Charged Against the Reserve (Write-offs) reflect actual customer activity, while the provision is calculated, in part, based on a three year rolling average of net write-offs (Write-offs minus Recoveries) to billed electric revenues.

\* The Cleveland Electric Illuminating Company does not budget for Recoveries or Write-offs. Recoveries for the test period are estimated based on the average of Recoveries as a percentage of Provisions from 2004 - 2006. Write-Offs for the test period are estimated based on the average of Write-Offs as a percentage of Provisions from 2004-2006. Please see WPC-13b for more detail behind these calculations.

Waiver Granted for Mix of Fuel

(1) Completed Construction Not Classified is included with Plant in Service by function.

(2) Includes FAS 109.

(3) Test Year Net Plant Includes \$1,864,771 of working capital allowance and \$111,549,258 of other rate base (see Sch. B-1)

(4) Test Year Capital Structure represents projected end of test year values.

(5) Net Income includes any Extraordinary Items After Taxes. Net Income for the test year represents Operating Net Income.

(6) Test Year Cost of Debt calculated using the Staff methodology. Historical costs were calculated using the Company's methodology, which differs by only utilizing outstanding debt balances (i.e. Company does not take into account amortization of gains/losses on reacquired debt).

(7) Defined as the ratio of Net Earnings (as specified in the indenture) divided by annualized interest charges on First Mortgage Bonds. The minimum coverage required is 2.0 times.

(8) Test Year Composite Depreciation Rate represents a proposed rate.

\* Test Year data represents adjusted jurisdictional amounts, as determined in Schedules B & C.

\*\* Year excludes transition revenue and expense and the associated impact on income taxes. 2006 includes incremental fuel expense and associated impact on income taxes.

## Schedule S-3

**FORM OF PROPOSED NOTICE  
FOR NEWSPAPER PUBLICATION**

**NOTICE OF APPLICATION TO  
THE PUBLIC UTILITIES COMMISSION OF OHIO  
FOR AN INCREASE IN ELECTRIC DISTRIBUTION RATES  
TO ALL JURISDICTIONAL CUSTOMERS  
OF THE CLEVELAND ELECTRIC ILLUMINATING COMPANY**

**TO WHOM IT MAY CONCERN:**

Pursuant to the requirements of Ohio Revised Code Section 4909.19, The Cleveland Electric Illuminating Company ("Company") gives notice that on June 7, 2007, it filed with The Public Utilities Commission of Ohio ("Commission") an Application for authority to change its electric rates and charges in incorporated communities and the unincorporated territory within its service area, which includes all or part of Ashtabula, Cuyahoga, Geauga, Lake, Lorain, Medina, Portage, Summit, and Trumbull Counties in Ohio. Such Application has been assigned Case Nos. 07-551-EL-AIR, 07-552-EL-ATA, 07-553-EL-AAM and 07-554-EL-UNC by the Commission. The substance of the Application follows.

In this Application the Company proposes to make changes and increases in electric distribution rates applicable to customers within the Company's service territory effective May 2009. Since the Company's last request for an increase in distribution rates in 1996, the Company's operating costs to provide electric service to customers have increased significantly. Moreover, pursuant to prior Commission Orders, the Company has been deferring recovery of certain costs. As a result, this filing includes expenses related to distribution operations, recovery of investments in distribution infrastructure and fuel charges that were deferred under prior rate orders.

The average increase in total rate that each rate schedule would bear over the present rates if the proposed increase is granted in full would be:\*\*\*

|                   |             |
|-------------------|-------------|
| Residential       | 3.9%        |
| Commercial        | 8.4%        |
| <u>Industrial</u> | <u>5.9%</u> |
| Total Company     | 6.0%        |

\*\*\* This increase would be offset by a reduction in charges related to electric restructuring in Ohio.

This Application is being filed so as to generate sufficient revenues for the Company to pay distribution-related operating expenses, service outstanding debt balances, and earn an adequate return on property used in providing electric distribution service to customers. However, when combined with other previously approved changes

in regulatory charges, the rates requested in this Application would result in an overall reduction in the regulated portion of customer bills.

The Company proposes to change its current rate schedules to those shown below and among other things, eliminate customer class specific rate schedules and replace them with voltage based schedules. The proposed schedules better match how the distribution system is designed, built and operated and reflects how customers are physically connected to and take service from our system. Accordingly, many of the current rate schedules are being eliminated, with customers currently taking service under these schedules being transferred to one of the new proposed schedules.

The new rate classifications proposed in the Application are as follows:

Residential schedule (RS)

General Service schedules:

General Service Secondary (GS)

General Service Primary (GP)

General Service Sub-transmission (GSU)

General Service Transmission (GT)

Lighting schedules:

Street Lighting (STL)

Traffic Lighting (TRF)

Private Outdoor Lighting (POL)

In addition to these changes, the Company is proposing the following new electric service riders:

- Residential Distribution Credit Rider, which provides a reduction to distribution charges for certain electric loads so as to mitigate the affects of changes in rate design.
- Business Distribution Credit Rider, which provides a reduction to distribution charges for certain electric loads so as to mitigate the affects of changes in rate design.
- Demand Side Management ("DSM") Rider, which creates a mechanism through which certain approved DSM costs are to be recovered and reconciled semi-annually.

The Company is also proposing certain modifications to the following rider currently in effect:

- State kWh Tax Rider, which modifies and renames the Company's current State and Local Tax Rider and eliminates charges for local taxes that are currently included in base rates.

In addition to the rate relief described above, the Company also asks the Commission to authorize the following accounting treatment:

- **Depreciation:** The Company has determined that certain modifications to depreciation rates are warranted and requests that depreciation rates proposed in this proceeding be approved by the Commission.
- **Deferral of Storm Related Costs:** The Company requests permission to defer storm restoration and repair costs in excess of those included in base rates.

### **Changes in Rate Design**

The Company's basic rate design has been in place since its last base rate case in 1996. Accordingly, the Company is proposing to update the existing rate design with the goal of:

- simplifying distribution rate designs of the FirstEnergy Ohio utility companies from three different tariffs to one uniform set of schedules
- implementing rate designs that focus on distribution service and discontinue concepts inherent in the legacy bundled rate design
- implementing distribution rates that recover fixed costs associated with the infrastructure needed to deliver electricity to customers
- incorporating gradualism in managing customer impacts while simplifying and consolidating tariff design

### **Residential Rates**

The following is a list of key changes proposed for Residential rates:

- Creation of a single distribution rate schedule for all residential customers
- Creation of a Residential Distribution Credit Rider (mentioned above)
- Conversion from existing multiple block and declining block designs to a simple two block structure that is consistent across all companies
- Elimination of the Percentage of Income Payment Plan ("PIPP")

Note - Customers participating in the PIPP program will continue to have their PIPP payment calculated based on income

### **General Service Rates**

The following is a list of key changes proposed for General Service rates:

- Simplification of distribution rates to one uniform tariff design for the FirstEnergy Ohio utility companies
- Reduction in the number of rate blocks
- Conversion from a declining block structure to a flat structure
- Creation of a Business Distribution Credit Rider (mentioned above)
- Standardization of Service Charges and power factor charges across the FirstEnergy Ohio utility companies
- Standardization on demand-only distribution pricing
- Changes in rate applicability based on service voltage rather than usage

### **Changes in Electric Service Regulations** *(formerly Standard Rules and Regulations)*

There are three categories of changes made to the Electric Service Regulations ("Regulations"). The first category is changes made in order to make the Regulations uniform across the three FirstEnergy Ohio utility companies. The second category consists of changes made to clarify language and thereby aid customer understanding of the Regulations. The third category relates to changes that better align charges with actual costs. This last category includes an increase to the reconnection charge, the returned payment charge and the meter test charge. In addition, a provision for an annual automatic increase to certain charges based on the Consumer Price Index (CPI) has been added.

The above proposed provisions, rates, and charges are subject to changes, including changes as to amount and form, by the Commission following a public hearing on the filed Application. Recommendations which differ from the filed Application may be made by the Staff of the Commission or by intervening parties and may be adopted by the Commission.

Any person, firm, corporation or association may file, pursuant to Section 4909.19 of the Revised Code, an objection to such proposed increased rates by alleging that such proposals are unjust and discriminatory or unreasonable.

A copy of the Application, including a copy of the present and proposed rate sheets, may be inspected by any interested party at the office of the Commission, 180 East Broad Street, Columbus, Ohio 43266; or at the following business office of the Company: 76 S. Main St., Akron, Ohio 44308.

Since the rates, prices, charges and other provisions in the Company's current electric rate schedules do not yield just and reasonable compensation to the Company for supplying electric distribution service and do not yield a just and reasonable return to the Company on the value of the property used in furnishing such electric distribution service, the Company requests the Commission:

- (a) Accept this Application and Exhibits for filing;
- (b) Find that this Application and the attached Schedules filed herewith and incorporated herein, are in accordance with Sections 4909.18, Ohio Revised Code, and Section 4901-7-01 of the Commission's Rules and Regulations;
- (c) Find that the current rates, prices and charges for electric service are unjust, unreasonable and insufficient to yield reasonable compensation to the Company for the electric distribution service rendered;
- (d) Find that the proposed rates, prices and charges are just and reasonable based upon the test period for the twelve months ending February 29, 2008, and approve such schedules in the form tendered herewith;
- (e) Approve the Company's requested accounting treatment;

- (f) Fix the date on which applicable services provided to customers are subject to the proposed rates at May 2009.
