**SECTION 3 - SERVICE DESCRIPTIONS AND RATES, (CONT'D.)**

**3.5 Emergency Telephone Services (Cont'd)**

**3.5.3 Private Switch / Automatic Location Identification (PS/ALI)**

Private Switch/Automatic Location Identification (PS/ALI) is an Enhanced 911 (E911) service offering which allows a private telephone switch, Private Branch Exchange (PBX), or other telephone service switch located on the Customer Premises to send Automatic Number Identification (ANI) information to the Enhanced 911 database, identifying the individual station line to the appropriate Public Service Answering Point (PSAP). PS/ALI is also available via Centrex and ISDN-PRI.

The PS/ALI service is only available to multi-tenant customers and to customers in a campus environment.

The PS/ALI system enables the Customer to interface with a third party vendor's (Vendor) software which updates an E911 database. Through the interface, the Customer is able to enter and update the specific address and location of each extension or station. Communication between the Customer's computer system running PS/ALI and the Vendor is initiated by the Customer and occurs through the Internet.

**3.5.3.1 Requirements**

- (a) The Customer must indicate in writing that the Customer has agreed to any potential changes in calling patterns or volumes resulting from the implementation of PS/ALI.
- (b) Service availability is dependent upon the availability of facilities and the type and configuration of the 911 system in place for the service area.
- (c) The Customer must provide a single point of contact and written documentation to the Company stating that the Customer or its affected PSAPs will:
  - Accept and dispatch calls for those PBX stations,
  - Assign appropriate Emergency Service Numbers, and
  - Provide any Master Street Address Guide additions or modifications that are required.
- (d) Customer will provide full ten-digit ANI for every station or extension within the private switch. This information must be approved by the Company prior to implementation to assure that no conflict exists between the PBX numbering plan and the Company's overall numbering plan.
- (e) PBX ANI multifrequency signaling must conform to the Company's and Company's Vendor's specifications for Private Switch/Automatic Location Identification Service Network Interface Specification.
