Revision for Ohio Tariff No. 1 (Interexchange)**

Dear Ms. Jenkins:

Enclosed are the original and ten (10) copies of a revision to Ohio Tariff No. 1 (Interexchange) filed on behalf of Americatel Corporation d/b/a 1010 123 Americatel, d/b/a Ametex, d/b/a 1 800 3030 123 Americatel Collect. This filing introduces additional Residential and Business Presubscribed Calling Plans, Dial-Around Code 10-10-123 Americatel, 1010-123 Prepaid Plan, LineaPais™ and LineaPais™ Prepaid. Domestic Rate Plans, an interstate rate plan option, is deleted from the tariff.

Additionally, as discussed with Melissa Scarberry of Staff, the Price List section, which was inadvertently filed along with the replacement tariff in September, 2004, Case No. 04-1368-TP-ZTA, is deleted. Rates for the services included in that section are redundant as they are also included in Section 4 - Rates of the current tariff.

The Company respectfully requests an effective date of July 25, 2007.

ORIGINAL SHEET 18

LONG-DISTANCE RESALE TARIFF

SECTION 3 - DESCRIPTION OF SERVICE

3.1. Timing of Calls

3.1.1. When Billing Charges Begin and Terminate for Phone Calls

The chargeable time for a long distance call is determined by the duration of the call. Chargeable time begins when connection is established between the calling station and the called station. When the called party picks up is determined by hardware answer supervision, in which the local telephone company sends a signal to the switch or the software utilizing digital format or audio tone detection. In any case, an unanswered call will not be billed. Chargeable time ends when the calling station hangs up or otherwise terminates the call. If the called station hangs up or otherwise terminates the call but the calling station does not, chargeable time ends when the connection is released either by automatic timing equipment in the telecommunications network or by the Underlying Carrier's operator.

3.1.2. Billing Increments

Unless otherwise specified in this tariff, the minimum call duration for billing purposes is 1 minute for a connected call. Customers will not be billed for calls of 6 seconds less. After the first 6 seconds of a call, the Customer will be billed for 1 minute. Calls beyond 1 minute are billed in 1 minute increments.

3.1.3. Per Call Billing Charges

Billing will be rounded up to the nearest penny for each call.

3.1.4. Uncompleted Calls

There shall be no charge for uncompleted calls.

All such promotions will be offered on a completely non-discriminatory basis with respect to each subscriber in the classification of service and area for which the promotion is offered and will allow each subscriber an equal opportunity for participation.

SECTION 3 - DESCRIPTION OF SERVICE

3.1. Timing of Calls

3.1.1. When Billing Charges Begin and Terminate for Phone Calls

The chargeable time for a long distance call is determined by the duration of the call. Chargeable time begins when connection is established between the calling station and the called station. When the called party picks up is determined by hardware answer supervision, in which the local telephone company sends a signal to the switch or the software utilizing digital format or audio tone detection. In any case, an unanswered call will not be billed. Chargeable time ends when the calling station hangs up or otherwise terminates the call. If the called station hangs up or otherwise terminates the call but the calling station does not, chargeable time ends when the connection is released either by automatic timing equipment in the telecommunications network or by the Underlying Carrier's operator.

3.1.2. Billing Increments

- A. Unless otherwise specified in this tariff, the minimum call duration for billing purposes is 1 minute for a connected call. Customers will not be billed for calls of 6 seconds less. After the first 6 seconds of a call, the Customer will be billed for 1 minute. Calls beyond 1 minute are billed in 1 minute increments.

SECTION 4 - RATES

4.2. Determining Applicable Rate in Effect

(M)

For the initial minute, the rate applicable at the start of chargeable time at the calling station applies. For additional minutes, the rate applicable is that rate which is in effect at the calling station when the additional minute(s) begin. That is, if chargeable time begins during the Day Period, the Day rate applies to the initial minute and to any additional minutes that the call continues during that rate period. If the call continues into a different rate period, the appropriate rates from that period apply to any additional minutes occurring in that rate period. If an additional minute is split between two rate periods, the rate period applicable at the start of the minute applies to that entire minute.

4.3. Promotions

The Company may from time to time engage in special promotional service offerings designed to attract new subscribers or to increase subscriber awareness of a particular service offering. Such promotional offerings will be limited to specific dates, times and locations. Except for the rates charged under such promotions and any other specified terms and conditions of those promotions, including eligibility requirements for the promotion and the actions customers must take in order to be eligible, all terms and conditions of service contained in this tariff shall apply to the Company's promotional service offerings. All promotional offerings of the Company will be filed with and approved by the FPSC with specific starting and ending dates. All such promotions will be offered on a completely non-discriminatory basis with respect to each subscriber in the classification of service and area for which the promotion is offered and will allow each subscriber an equal opportunity for participation.
