THE PUBLIC UTILITIES COMMISSION OF OHIO

In the Matter of the Application of)
XO Communications Services, Inc.) Case No. 07-701-TP-EMG
to Introduce Private Switch/ Automatic)
Location Identification.)

FINDING AND ORDER

The Commission finds:

- (1) On June 13, 2007, XO Communications Services, Inc. (Applicant) filed an application seeking authority from the Commission to revise its Ohio Tariff P.U.C.O. No. 1 to introduce Private Switch/ Automatic Location Identification (PS/ ALI). PS/ ALI is an Enhanced 911 service offering which allows a private telephone switch, Private Branch Exchange, or other telephone service switch located on the customer premises to send Automatic Number Identification information to an Enhanced 911 database, identifying the individual station line to the appropriate Public Service Answering Point.

The PS/ ALI service is only available to multi-tenant customers and to customers in a campus environment. The PS/ ALI system enables the customer to interface with a third party vendor's software which updates an E911 database. Through the interface, the customer is able to enter and update the specific address and location of each extension or station. Applicant is providing this service as an enhancement to their current customer base.

- (2) After reviewing Applicant's application, the Commission concludes that Applicant should be granted authority to provide PS/ ALI.
- (3) This application has been filed pursuant to Section 4909.18, Revised Code, and the Commission finds, as the Applicant alleges, that it is not for an increase in any rate, joint rate, toll classification, charge, or rental and does not appear to be unjust or unreasonable and should be approved. Therefore, the Commission finds it unnecessary to hold a hearing in this matter.
