I attest that these tariffs comply with all applicable rules, including the Minimum Telephone Service Standards (MTSS) for the state of Ohio. We will fully comply with the rules of the state of Ohio and understand that noncompliance can result in various penalties, including the suspension of our certificate to operate within the state of Ohio.

I declare under penalty of perjury that the foregoing is true and correct.

TELEPHONE SERVICE REQUIREMENTS FORM

Pursuant to Case Nos. 95-845-TP-COI, 99-998-TP-COI, 99-563-TP-COI, and 04-1785-TP-ORD

The provider affirms that it is in compliance with Commission directives concerning the following checked items, and that this represents an up-to-date listing of applicable "generic" service requirements. The provider understands that this in no way supersedes the context of the applicable Commission orders described below. Unless otherwise specified, this language replaces the need for related language to be contained in the provider's tariff.

A. MANDATORY REQUIREMENTS FOR BASIC LOCAL EXCHANGE AND CTS PROVIDERS (unless otherwise noted):

[x] 1. SALES TAX (See also Case No. 87-1010-TP-UNC)

Certain telecommunication services, as defined in the Ohio Revised Code, are subject to state sales tax at the prevailing tax rates, if the services originate, or terminate in Ohio, or both, and are charged to a subscriber's telephone number or account in Ohio.

[x] 2. MTSS TARIFF REQUIREMENTS

[x] The provider attests that its tariffs include:

- provider-specific language addressing the deposit method (as cited in 4901:1-5-13) adopted by the company and approved by the Commission;
- Toll Caps (choose one):
 - ☐ language addressing the provider-specific parameters of toll caps approved by the Commission, OR
 - ☒ not applicable since the provider has not chosen to incorporate toll caps.
- language regarding establishment of service, including requirements to establish creditworthiness, as cited in 4901:1-5-13;
- language regarding residential service guarantors, as cited in 4901:1-5-14;
- language regarding subscriber bills, as cited in 4901:1-5-15;
- language regarding subscriber billing adjustments for local exchange service, as cited in 4901:1-5-16; and,

- language regarding denial or disconnection of local and/or toll service, including the requirements for the reconnection of local and/or toll service, as cited in 4901:1-5-17.

Check the boxes below to attest that the provider shall adhere to the following criteria when the provider implements cancellation of service policies and/or requests an advance payment:

■ Cancellation of Service:

When a customer cancels an application for service prior to the start of service or prior to any special construction, no charges will be imposed except for those specified below:

Where the company has notified a customer or prospective customer of the possibility that special expenses may be incurred in connection with provisioning the customer's service, and then the company does incur such expenses. Expenses could include special construction, or where special arrangements of facilities or equipment have begun before the company received a cancellation notice. The charge will be equal to the costs actually incurred, less net salvage;

■ Advance Payment:

Advance Payment means a payment that may be required by the company as a means of being compensated for extraordinary expenses, including, but not limited to, special construction costs associated with a particular service installation.

[x] 3. **SURCHARGES**

The company shall not assess separately any taxes, fees or surcharges, other than government-approved sales taxes imposed directly on the end users, without seeking Commission approval under the appropriate procedures required by the Commission. Generally, the Commission will not grant the inclusion of gross receipts tax as a separate item on the bill unless special circumstances so warrant and the Commission

Case No. 07- -TP- ACE

Case No. - - - - TRF

Issued: October 22, 2007

(Date Filed)

specifically approves same. The company shall not place a separate line item on a customer's bill without sending notice to all customers informing them of the new line item charges in accordance with Commission-adopted notice procedures.

The customer is responsible for the payment of all state, local and E9-1-1 taxes, surcharges, utility fees, or other similar fees for which the end user is directly responsible and that may be levied by a governing body or bodies in conjunction with or as a result of a service furnished under a tariff on file with the Public Utilities Commission of Ohio. These charges may appear as separate line items on the customer's bill, as opposed to being included in the rates contained in a tariff. Any such line item charges will be reflected in the company's tariff.

[x] 4. **1+ INTRALATA PRESUBSCRIPTION – Basic Local Exchange Providers Only** (See Also Case No. 95-845-TP-COI, Guideline X.)

a. General

IntraLATA Presubscription is a procedure whereby a subscriber designates to the Telephone Company the carrier which the subscriber wishes to be the carrier of choice for intraLATA toll calls. Such calls are automatically directed to the designated carrier, without the need to use carrier access codes or additional dialing to direct the call to the designated carrier. IntraLATA presubscription does not prevent a subscriber who has presubscribed to an intraLATA toll carrier from using carrier access codes or additional dialing to direct calls to an alternative intraLATA toll carrier on a per call basis.

IntraLATA Presubscription will become effective upon the initial offering of certified local exchange service.

b. IntraLATA Presubscription Options

Option A: Subscriber may select the Telephone Company as the presubscribed carrier for intraLATA toll calls subject to presubscription.

Option B: Subscriber may select her/his interLATA toll carrier as the presubscribed carrier for intraLATA toll calls subject to presubscription.

Provider's Name: Clear Rate Communications, Inc.

Case No. 07- -TP- ACE

Case No. - - - - TRF

Issued: October 22, 2007

(Date Filed)

Option C: Subscriber may select a carrier other than the Telephone Company or the subscriber's interLATA toll carrier as the presubscribed carrier for intraLATA toll calls subject to presubscription.

Option D; Subscriber may select no presubscribed carrier for intraLATA toll calls subject to presubscription which will require the subscriber to dial a carrier access code to route all intraLATA toll calls to the carrier of choice for each call.

c. Rules and Regulations

Subscribers of record will retain their current dialing arrangements until they request that their dialing arrangements be changed.

Subscribers of record or new subscribers may select either Options A, B, C, or D for intraLATA Presubscription.

Subscribers may change their selected Option and/or their presubscribed intraLATA toll carrier at any time subject to charges specified in Paragraph E, below.

d. IntraLATA Presubscription Procedures

New subscribers will be asked to select an intraLATA toll carrier(s) at the time the subscriber places an order to establish local exchange service with the Telephone Company. The Telephone Company will process the subscriber's order for intraLATA service. The selected carrier(s) will confirm their respective subscribers' verbal selection by third-party verification or return written confirmation notices. All new subscribers' initial requests for intraLATA toll service presubscription shall be provided free of charge.

If a new subscriber is unable to make a selection at the time the new subscriber places an order to establish local exchange service, the Telephone Company will read a random listing of all available intraLATA carriers to aid the subscriber in selection. If selection is still not possible, the Telephone Company will inform the subscriber that he/she will be given 90 calendar days in which to inform the Telephone Company of an intraLATA toll carrier presubscription selection free of charge. Until the subscriber informs the Telephone Company of his/her choice for intraLATA toll carrier, the subscriber will not have a presubscribed intraLATA toll carrier, but rather will be

required to dial a carrier access code to route all intraLATA toll calls to the carrier(s) of choice. Subscribers who inform the Telephone Company of a choice for intraLATA toll presubscription within the 90-day period will not be assessed a service charge for the initial subscriber request.

Subscribers of record may initiate an intraLATA presubscription change at any time subject to the charges specified in e.ii. below. If a customer of record inquires of the Telephone Company of the carriers available for intraLATA toll presubscription, the Telephone Company will read a random listing of all available intraLATA carriers to aid the subscriber in selection.

e. IntraLATA Presubscription Charges

i. Application of Charges

After a subscriber's initial selection for a presubscribed intraLATA toll carrier and as detailed in Paragraph D above, for any change thereafter, an IntraLATA Presubscription Change Charge will apply. The IntraLATA Presubscription Change Charge shall be applied as follows:

- a. The charge shall be no greater than those set forth in Paragraph (e)(ii), unless modified by a company-specific Commission-approved tariff.
- b. If a Subscriber changes both the InterLATA and IntraLATA Presubscribed Interexchange Carrier at the same time, 50% of the otherwise applicable IntraLATA Presubscription Change Charge will apply.

ii. **Nonrecurring Charges IntraLATA Presubscription Change Charge**

Per business or residence line, trunk, or port:

■ 2. EMERGENCY SERVICES CALLING PLAN

Applicable to all CLECs and CTSS offering MTS (See also Case Nos. 85-1466-TP-COI and 89-54-TP-COI):

Message toll telephone calls to governmental emergency service agencies, as set forth in (a) following, having primary or principal responsibility with respect to the provision of emergency services to persons and property in the area from which the call is made, meeting the definition and criteria of an emergency call as set forth in (b) following, are offered at no charge to customers:

agencies provided they answer emergency service calls on a personally attended (live) 24-hour basis, 365 days a year, including holidays.

- b. An emergency is an occurrence or set of circumstances in which conditions pose immediate threat to human life, property, or both, and necessitate that prompt action be taken. An emergency call is an originated call of short duration to a governmental emergency service agency in order to seek assistance for such an emergency.

☐ **3. ALTERNATIVE OPERATOR SERVICES**

By checking this box, the provider attests that it will provide alternative operator services (AOS) as defined in Rule 4901:1-6-01(A) of the Ohio Administrative Code (O.A.C.) in compliance with all of the AOS service parameters set forth in Rule 4901:1-6-23, O.A.C.

☒ **4. LIMITATION OF LIABILITY**

The following is applicable to all telephone companies that choose to include in their tariffs language which may limit their liability (See also Case No. 85-1406-AU-COI):

Approval of limitation of liability language by the PUCO does not constitute a determination by the Commission that the limitation of liability imposed by the company should be upheld in a court of law. Approval by the Commission merely recognizes that since it is a courts responsibility to adjudicate negligence and consequent damage claims, it is also the court's responsibility to determine the validity of the exculpatory clause.

☒ **5. TERMINATION LIABILITY**

The following is applicable to all telephone companies who choose to include in their tariffs language which imposes early termination liability on a customer for termination of service prior to the designated term of service:

Inclusion of early termination liability by the company in its tariff or a contract does not constitute a determination by the Commission that the termination liability imposed by the company is approved or sanctioned by the Commission. Customers shall be free to pursue whatever legal remedies they may have should a dispute arise.

■ 6. **SERVICE CONNECTION ASSISTANCE (SCA)**

The following is applicable to all LECs that offer local service to residential customers:

SCA is targeted to help defray the one-time, up-front costs of connecting to the local exchange network for qualified customers. It provides a waiver of the deposit requirement, full or partial waiver of the service connection charges.

□ 7. **LOCAL NUMBER PORTABILITY and NUMBER POOLING**

See Case No. 95-845-TP-COI Guideline XIV, FCC Dockets 95-116 and 99-200. NOTE: LNP and number pooling are required of all facilities-based LECs, regardless of size, and CMRS where currently rolled-out by the FCC or as a result of a bona fide request unless granted an extension, exemption, or waiver by the Commission or the FCC.

□ 8. **TARIFFING AND DISCONNECTION PROCEDURES FOR SERVICE PACKAGES OR BUNDLES**

Applicable to all LECs packaging or bundling regulated local services with toll service and/or unregulated services. See Rule 4901:1-6-21(C), Ohio Administrative Code.

□ **Option 1**

Tariffing

Under option 1, LECs that package or bundle regulated local services with toll and/or unregulated services shall tariff only the regulated components of a package or bundle of services either as a package at a separate, single rate for the regulated components or individually at individual tarified rates. The unregulated services and any rate(s) associated with the unregulated service components of any package or bundle of services shall not be tarified.

Disconnection Procedures

Under option 1, if a customer fails to submit timely payment sufficient to cover the amount of the regulated charges, the LEC may discontinue the provision of the regulated services in compliance with Rule 4901:1-5-17, Ohio Administrative Code.

Staff Notice

Under option 1, LECs shall keep the Director of the Consumer Services Division and the Chief of Telecommunications of the Utilities Department informed and up-to-date on all current offers to consumers that bundle regulated local services with unregulated services at a single packaged rate, different from the rate shown in the tariff for the regulated components of the package. The notice to staff shall identify the regulated and unregulated services included and the packaged rate (the combined tariffed and untariffed rate).

☐ **Option 2****Tariffing**

Under option 2, LECs shall tariff the entire package or bundle of services including both regulated local services and toll and/or unregulated services for a single combined packaged rate (including any amount attributable to the unregulated components). The LEC shall clearly identify the services within the package and denote which services are unregulated.

Disconnection Procedures

Under option 2, if a customer fails to submit timely payment sufficient to cover the entire amount of the regulated and unregulated bundled packaged rate, the LEC may discontinue the provision of any regulated and unregulated services, other than basic local exchange service, if payment is sufficient to cover the rate for basic local exchange service. For purposes of this rule, the rate for basic local exchange service shall be the tariffed rate for stand-alone basic local exchange service. In the event a CLEC does not offer basic local exchange service on a stand-alone basis, the CLEC shall identify an amount in the tariff for the basic local exchange service component of the package. In no event shall this amount exceed the packaged rate. Further, if the customer loses services included in the package due to non-payment or partial payment pursuant to this rule, the customer shall be entitled to add, change, or discontinue any regulated services provided according to the LEC's normal procedures for adding, changing or discontinuing such services.

Disconnection Notice

Under option 2, the LEC shall, in its notice of disconnection for non-payment, state the total amount due to avoid discontinuance of the package, as well as the total amount due to avoid discontinuance of the basic local exchange service component of the package.

TARIFF FORMAT

Sheet Numbering. Sheet numbers appear in the upper right hand corner of the sheets. Sheets are numbered sequentially. From time to time new sheets may be added to the tariff. When a new sheet is added between existing sheets, a decimal is added to the preceding sheet number. For example, a new sheet added between sheets 5 and 6 would be numbered 5.1.

Sheet Revision Numbers. Revision numbers also appear in the upper right corner of sheets. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th Revised Sheet No. 24 cancels the 3rd Revised Sheet No. 24.

Paragraph Numbering Sequence. There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level, as shown by the following example:

2
2.1
2.1.1
2.1.1.A
2.1.1.A.1
2.1.1.A.1.(a)
2.1.1.A.1.(a).I
2.1.1.A.1.(a).I.(i)
2.1.1.A.1.(a).I.(i).(1)

Check Sheets. When a tariff filing is made with the Commission, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross-reference to the current revision number. When new sheets are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current one on file with the Commission.

All promotions will be offered on a nondiscriminatory basis to eligible Customers.

3.13 Individual Case Basis (ICB) and Term and Volume Discounts

3.0 Description of Services Offered (cont'd)

3.15 Private Switch Automatic Location Identification (PS/ALI)

This service is offered subject to the availability of appropriate facilities. It enables the customer to interface with the E911 database to provide address and location information for the stations that operate behind their switch. This information includes the PBX customers' names, addresses, and other location information which are associated with specific PBX station telephone numbers. The PS/ALI customer may be a municipality or other state or local governmental unit, or an authorized agent of one or more municipalities or other state or local governmental units to whom authority has been lawfully delegated, or a PBX owner/operator who has been required or who desires to provide PBX station specific location information to the E911 system. The PS/ALI customer must be authorized by the 911 jurisdiction to subscribe to PS/ALI service, and obtaining such authorization is the responsibility of the customer.

This service is offered as either Standard or Advanced. For Standard PS/ ALI, information is loaded and managed via Clear Rate's existing interface to the database provider. For Advanced PS/ALI, the customer manages 911 information via a direct PC interface to the database provider.

3.16 Group Billing

This service is a unique invoice option for business customers with multiple locations. Group Billing allows customers to establish a tier system in which a main or "parent" account can have multiple sub or "child" accounts and pay the "child" invoices for all locations, some locations or no locations. Summary information is available to the "parent" for all "child" accounts and "child" accounts can receive individual invoice detail regardless of who is remitting payment. Group Billing can be used in partnership with Clear Rate's Toll Free application.

At service set-up, customer must determine the locations responsible for payment remittance. Although "child" accounts may be responsible for payment, "parent" accounts are ultimately responsible for past due balances on "child" accounts. If a "child" account disconnects service, any past due balance will be transferred to the "parent" account. Payment disputes between "parent" and "child" accounts are not the responsibility of Clear Rate.

Re: Clear Rate Communications, Inc.

Dear Sir/Madam:

Please be advised that the above referenced corporation intends to provide telecommunications service in the State of Ohio upon receiving approval of its application filed with the Public Utilities Commission of Ohio.

Sincerely,

Thane Namy
CEO/President, Clear Rate Communications, Inc.

Brief description of service(s) proposed

The nature of service to be provided is Local calling service, Local Toll Calling, Long Distance, Calling Card, prepaid local service, Dedicated Long Distance, Toll Free, and such further services that may become available upon proper notice and approval by the Commission.

Exhibit D

Explanation of whether applicant intends to provide resold services, facilities-based services, or both resold and facilities-based services

The Applicant does not currently utilize its own equipment or facilities, but intends on deploying such facilities after the Applicant establishes a market presence and an established end user customer base. The Applicant intends to initially resell local exchange and interexchange services of Verizon and AT&T Ohio, and to provide local exchange services by purchasing unbundled network elements (UNEs) obtained from and utilizing facilities provided by facilities-based carriers.

To the extent Applicant utilizes facilities, the equipment used would be a Nortel DMS 100/200 or other comparable switching equipment, collocated with a fiber based CLEC partner. Slicks would be collocated within each serving central office and routed to the nearest partnered fiber based CLEC's Point of Presence (POP). Calls would then be backhauled via the CLEC's SONET ring to the Applicant's switch and handed off to the appropriate IXC or LEC. As the Applicant's customer base grows the Applicant would collocate switching equipment within each CO that warranted such investment.

Exhibit E

Explanation as to whether CLEC currently offers CTS services under separate CTS authority, and whether it will be including those services within its CLEC filing, or maintaining such CTS services under a separate affiliate

Applicant obtained a CTS (IXC) license from the Public Utilities Commission of Ohio in Case No. 02-2034-CT-ACE. Applicant does not have a separate affiliate and is complying with the Commission's detariffing requirements.

Exhibit F

Explanation of how the proposed services in the proposed market area are in the public interest

Granting this Application will promote the public interest by increasing competition in the provision of telecommunications services in Ohio. Applicant will provide high quality, cost effective local exchange and long distance telecommunications service, with reliable customer service. Increased competition will provide more choices to the consumer, lower prices and will promote the development of new services.

Description of the proposed market area

The Applicant proposes to provide interexchange service statewide and local service in all areas in the State of Ohio serviced by AT&T Ohio and Verizon.

Exhibit H

Description of the class of customers (e.g., residence, business)_that the applicant intends to serve

Applicant intends to serve business and residential customers.

Exhibit I

Applicant's technical staff is highly qualified and will ensure that Applicant's operations will meet the most demanding standards for service, quality and reliability. Additionally, as stated above, Applicant currently provides services in Illinois and Michigan.

Applicant intends to provide all forms of facilities based and resold local exchange services to business and residential customers in Ohio. These services include two way local lines, CENTREX, ISDN and switched access services. Applicant also proposes to provide associated local calling (usage) for these access lines, including message rate service for business customers and the required calling options for residential customers, and free 900 prefix call blocking. It will offer, on resold basis, residential services, operator assistance service, lifeline, hearing impaired service, directory assistance and directories.
