TARIFF FORMAT

(N)

- A. Page Numbering-** Page numbers appear in the upper right hand corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 12 and 13 would be 12.1.
- B. Page Revision Numbers-** Revision numbers also appear in the upper right hand corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th version Page 12 cancels the 3rd version Page 12. Because of various suspension periods, deferrals, etc., the most current page number on file with the Commission is not always the tariff page in effect. Consult the Check Sheet for the page currently in effect.
- C. Paragraph Numbering Sequence-** There is eight levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a).i.
 - 2.1.1.A.1.(a).i.1.
- D. Check Sheets-** When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the pages contained in the tariff, with a cross-reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. All revision made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some pages.) The tariff user should refer to the latest Check Sheet to find out if a particular page is the most current on file with the Commission.

TARIFF FORMAT

(N)

- A. Page Numbering-** Page numbers appear in the upper right hand corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 12 and 13 would be 12.1.
- B. Page Revision Numbers-** Revision numbers also appear in the upper right hand corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th version Page 12 cancels the 3rd version Page 12. Because of various suspension periods, deferrals, etc., the most current page number on file with the Commission is not always the tariff page in effect. Consult the Check Sheet for the page currently in effect.
- C. Paragraph Numbering Sequence-** There is eight levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a).i.
 - 2.1.1.A.1.(a).i.1.
- D. Check Sheets-** When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the pages contained in the tariff, with a cross-reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. All revision made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some pages.) The tariff user should refer to the latest Check Sheet to find out if a particular page is the most current on file with the Commission.

(N)

4.1.1 General

The features in this section are made available on an individual basis or as part of multiple feature packages. All features are provided subject to availability; features may not be available with all classes of service. Transmission levels may not be sufficient in all cases. Connection charges may apply (as noted below each service.) when a customer requests connection to one or more custom calling features. Orders requested for the same customer account made at the same time for the same premises will be considered one request. These charges may not apply if the features are ordered at the same time as other work for the same customer account at the same premises. (T)

The Company may elect to offer a free or reduced rate trial of any new CLASS feature(s) to prospective customers within 90 days of the establishment of the new feature.

4.1.2 Description of Features

A. Three Way Calling/Call Hold

The Three Way Calling feature allows a customer to add a third party to an existing two-way call and form a three-way call. The call must have been originated from outside the station group and terminate to a station within the station group. The Call Hold feature allows a customer to put any in-progress call on hold by flashing the switch-hook and dialing a code. This frees the line to allow the customer to make an outgoing call to another number. Only one call per line can be on hold at a time. The third party cannot be added to the original call.

J. Auto Call Back/Auto Redial

The Auto Call Back/Auto Redial feature allows a customer to automatically redial the last number dialed by activating a code. The network periodically tests the busy/free status of the called line for up to 30 minutes until both lines are found free and then redials the call for the customer. (T)

The Automatic Redial feature also allows customers, having reached a busy number, to dial a code before hanging up. Automatic Redial feature then continues to try the busy number for up to 30 minutes until it becomes free. Once the busy line is free the call is automatically redialed and the customer is notified of the connected call via a distinctive ring.

The following types of calls cannot be Automatically Redialed:

- 1) Calls to 800 Service numbers;
- 2) Calls to 900 Service numbers;
- 3) Calls preceded by an interexchange carrier access code;

The customer selects a package of 12, 16, 20, or 23 voice lines for local exchange access. The balance of the facility's capacity is available for data applications. The rates herein are for the portion of the service dedicated to voice applications. Charges for nonregulated services and options will apply. The charges for voice lines are inclusive of appropriate End User Common Line Charges (EUCL), Touch Tone, Hunting and Relay Surcharge.

10. INTRALATA TOLL SERVICE (N)

10.1 General

Regulations of facilities based and resale intralata toll services.

10.2 Description

IntraLATA toll service is furnished for communication between telephones in different local calling areas within a particular LATA in accordance with the regulations and schedules of charges specifies in this tariff. The toll service charges specified in this Section are for all services furnished between the calling and the called telephone, except as otherwise noted in this tariff.

IntraLATA toll calling includes the following types of calls: direct dial, calling card, collect, 3rd number billed, special toll billing, person to person calling and other station to station calls.

10.2.1 Calling Plans

The Company offers Message and Flat rate calling plans. These calling plans are described in Section 5.2.1 (A) 1 and 2.

10.3 Timing of Calls

Unless otherwise indicated, all calls are timed in one-second increments. At the end of the billing period the total of all itemized calls will be rounded to the nearest cent for billing purposes.

For station-to-station calls, call timing begins when a connection is established between the calling telephone and the called telephone station.

For person-to-person calls, call timing begins when a connection is established between the calling person and the particular person, station or mobile unit specified or an agreed to alternate.

Call timing ends when the calling station "hangs up," thereby releasing the network connection. If the called station "hangs up" but the calling station does not, chargeable time ends when the network connection is released either by automatic timing equipment in the telephone network or by an operator. (N)

10. INTRALATA TOLL USAGE (cont'd) (N)

10.5 Regulations and Computation of Mileage |

Calls for which rates are mileage sensitive are rated on the airline distance between the originating rate center and the terminating rate center. |

A. Originating Rate Center |

A customer's primary local exchange number includes an NXX code that is associated with a specific rate center. The originating point of all calls charged to that Customer's account shall be the location of the Customer's rate center. |

B. Terminating Rate Center |

The terminating point for all calls shall be the location of the local rate center associated with the called number. | (N)

10. INTRALATA TOLL USAGE (cont'd) (N)

10.5 Regulations and Computation of Mileage (cont'd) |

C. Calculation of Mileage |

MILEAGE MEASUREMENT |

Determination of Mileage |

Message Toll Telephone prices are based on the airline distance between price centers. In general, each point (city, town or locality) is designated as a price center; certain small towns or localities are assigned adjacent price centers with which they are closely associated for communication purposes or by community of interest. |

For the purpose of determining airline distance between price centers, vertical and horizontal grid lines have been established across the United States. The distance between adjacent vertical grid lines and between adjacent horizontal grid lines is the square root of .1 mile. Four digit vertical (V) and four digits horizontal (H) coordinates are computed for each price center from its latitude and longitude location by use of appropriate map-projection equations. The location of a price center is identified by a pair of V-H coordinates that locate a price center within an area of 1/10 of a square mile. V&H coordinates are obtained from the Terminating Point Master (TPM). The TPM is a subsystem of the Bellcore Rating Administrative Data System (BRADS), a nationwide database maintained by Bell Communications Research, Inc. (Bellcore), Morristown, New Jersey. |

Price distance between any two-price centers is determined as follows: |

- Obtain the "V" and "H" coordinates for each price center. |
- Obtain the difference between the "V" coordinates of the two price centers. |
- Obtain the difference between the "H" coordinates. |

Note: The difference is always obtained by subtracting the smaller coordinate from the larger coordinate. |

10. INTRALATA TOLL USAGE (cont'd) (N)

10.5 Regulations and Computation of Mileage (cont'd)

C. (cont'd)

- Divide each of the differences obtained in the preceding step by three, rounding each quotient to the nearest integer.
- Square these two integers and add the two squares.

If the sum of the squares is greater than 1777, divide the integers obtained in the preceding step by three and repeat this step. Repeat this process until the sum of the squares obtained in this step is less than 1778.

- The number of successive divisions by three in the preceding two steps determines the value of "N". Multiply the final sum of the two squares obtained in the preceding step by the multiplier specified in the following table for this value of "N" preceding.

N	Multiplier	Minimum Price Mileage
1	0.9	-
2	8.1	41
3	72.9	121
4	656.1	361

- Obtain square root of product in the preceding step and, with any resulting fraction, round up to next higher integer. This is the message price mileage except that when the mileage so obtained is less than the minimum price mileage shown in the preceding step, the minimum price mileage corresponding to the "N" value is applicable.

Example:

Respective V and H Coordinates

	V	H
Indianapolis	6272	2992
Muncie	6130	2925
Difference:	142	67

Dividing each difference by 3 and rounding to nearer integer = 47 and 22

Squaring integers and adding:

$$\begin{aligned}
 47 \times 47 &= 2209 \\
 22 \times 22 &= 484 \\
 \text{Sum of squared integers} &= 2693
 \end{aligned}$$

10. INTRALATA TOLL USAGE (cont'd) (N)

10.5 Regulations and Computation of Mileage (cont'd) |

C. (cont'd) |

Sum is greater than 1,777, so divide integers in the preceding step
by three and repeat the preceding step. |

Dividing integers obtained from the preceding division by three
and rounding = 16 and 7 |

Squaring integers and adding: |

$$16 \times 16 = 256$$

$$7 \times 7 = 49$$

$$\text{Sum of squared integers} = 305$$

This sum of integers is less than 1,778 and was obtained after two
succession divisions by three; therefore, "N" = 2 |

Multiply final sum of squared integers by factor 8.1 (corresponding to
"N" = 2): |

$$305$$

$$\times 8.1$$

$$2470.5$$

Square root of 2470.5 = 49.70, which is rounded up to 50 miles.
(Fractional miles are always considered full miles.) The message
price mileage is 50 miles. (N)

11. InterLATA Toll Services (cont'd) (N)

11.3 Variations |

The service is offered in two variations depending on the method the Customer employs to gain access to the Company's network for use of the service: |

A. Presubscription - ULD is offered whereby the Customer's local telephone lines are presubscribed by the local exchange company (LEC) to the Company's ULD service, such that "1+" interLATA calls are automatically routed to the Company's network. |

B. Dedicated - ULD is offered to the extent that facilities are available in those cases where the Company and the Customer jointly arrange for the establishment of dedicated access facilities connecting the Customer's trunk-compatible PBX or other suitable equipment to the Company's POP. The Customer shall be responsible for all costs and charges associated with the dedicated access facilities. |

TELEPHONE SERVICE REQUIREMENTS FORM
Pursuant to Case Nos. 99-998-TP-COI and 99-563-TP-COI

The provider affirms that it is in compliance with Commission directives concerning the following checked items, and that this represents an up-to-date listing of applicable "generic" service requirements. The provider understands that this in no way supersedes the context of the applicable Commission orders described below. Unless otherwise specified, this language replaces the need for related language to be contained in the provider's tariff.

A. MANDATORY REQUIREMENTS FOR BASIC LOCAL EXCHANGE AND CTS PROVIDERS (unless otherwise noted):

[x] 1. SALES TAX (See also Case No. 87-1010-TP-UNC)

Certain telecommunication services, as defined in the Ohio Revised Code, are subject to state sales tax at the prevailing tax rates, if the services originate, or terminate in Ohio, or both, and are charged to a subscriber's telephone number or account in Ohio.

[x] 2. MTSS TARIFF REQUIREMENTS

[x] The provider attests that its tariffs include:

- provider-specific language addressing the deposit method (as cited in 4901:1-5-13) adopted by the company and approved by the Commission;
- Toll Caps (choose one):
 - ☐ language addressing the provider-specific parameters of toll caps approved by the Commission, OR
 - ☒ not applicable since the provider has not chosen to incorporate toll caps.
- language regarding establishment of service, including requirements to establish creditworthiness, as cited in 4901:1-5-13;
- language regarding residential service guarantors, as cited in 4901:1-5-14;
- language regarding subscriber bills, as cited in 4901:1-5-15;
- language regarding subscriber billing adjustments for local exchange service, as cited in 4901:1-5-16; and,

- o language regarding denial or disconnection of local and/or toll service, including the requirements for the reconnection of local and/or toll service, as cited in 4901:1-5-17.

Check the boxes below to attest that the provider shall adhere to the following criteria when the provider implements cancellation of service policies and/or requests an advance payment:

☒ **Cancellation of Service:**

When a customer cancels an application for service prior to the start of service or prior to any special construction, no charges will be imposed except for those specified below:

Where the company has notified a customer or prospective customer of the possibility that special expenses may be incurred in connection with provisioning the customer's service, and then the company does incur such expenses. Expenses could include special construction, or where special arrangements of facilities or equipment have begun before the company received a cancellation notice. The charge will be equal to the costs actually incurred, less net salvage;

☒ **Advance Payment:**

Advance Payment means a payment that may be required by the company as a means of being compensated for extraordinary expenses, including, but not limited to, special construction costs associated with a particular service installation.

☒ **3. SURCHARGES**

The company shall not assess separately any taxes, fees or surcharges, other than government-approved sales taxes imposed directly on the end users, without seeking Commission approval under the appropriate procedures required by the Commission. Generally, the Commission will not grant the inclusion of gross receipts tax as a separate item on the bill unless special circumstances so warrant and the Commission

specifically approves same. The company shall not place a separate line item on a customer's bill without sending notice to all customers informing them of the new line item charges in accordance with Commission-adopted notice procedures.

The customer is responsible for the payment of all state, local and E9-1-1 taxes, surcharges, utility fees, or other similar fees for which the end user is directly responsible and that may be levied by a governing body or bodies in conjunction with or as a result of a service furnished under a tariff on file with the Public Utilities Commission of Ohio. These charges may appear as separate line items on the customer's bill, as opposed to being included in the rates contained in a tariff. Any such line item charges will be reflected in the company's tariff.

☒ 4. **1+ INTRALATA PRESUBSCRIPTION - Basic Local Exchange Providers Only** (See Also Case No. 95-845-TP-COI, Guideline X.)

a. General

IntraLATA Presubscription is a procedure whereby a subscriber designates to the Telephone Company the carrier which the subscriber wishes to be the carrier of choice for intraLATA toll calls. Such calls are automatically directed to the designated carrier, without the need to use carrier access codes or additional dialing to direct the call to the designated carrier. IntraLATA presubscription does not prevent a subscriber who has presubscribed to an intraLATA toll carrier from using carrier access codes or additional dialing to direct calls to an alternative intraLATA toll carrier on a per call basis.

IntraLATA Presubscription will become effective upon the initial offering of certified local exchange service.

b. IntraLATA Presubscription Options

Option A: Subscriber may select the Telephone Company as the presubscribed carrier for intraLATA toll calls subject to presubscription.

Option B: Subscriber may select her/his interLATA toll carrier as the presubscribed carrier for intraLATA toll calls subject to presubscription.

Provider's Name: _____
Case No. ____ - ____ - TP- ____
Case No. ____ - ____ - ____ - TRF

(Date Filed)

4/7/2003

Option C: Subscriber may select a carrier other than the Telephone Company or the subscriber's interLATA toll carrier as the presubscribed carrier for intraLATA toll calls subject to presubscription.

Option D; Subscriber may select no presubscribed carrier for intraLATA toll calls subject to presubscription which will require the subscriber to dial a carrier access code to route all intraLATA toll calls to the carrier of choice for each call.

c. Rules and Regulations

Subscribers of record will retain their current dialing arrangements until they request that their dialing arrangements be changed.

Subscribers of record or new subscribers may select either Options A, B, C, or D for intraLATA Presubscription.

Subscribers may change their selected Option and/or their presubscribed intraLATA toll carrier at any time subject to charges specified in Paragraph E, below.

d. IntraLATA Presubscription Procedures

New subscribers will be asked to select an intraLATA toll carrier(s) at the time the subscriber places an order to establish local exchange service with the Telephone Company. The Telephone Company will process the subscriber's order for intraLATA service. The selected carrier(s) will confirm their respective subscribers' verbal selection by third-party verification or return written confirmation notices. All new subscribers' initial requests for intraLATA toll service presubscription shall be provided free of charge.

If a new subscriber is unable to make a selection at the time the new subscriber places an order to establish local exchange service, the Telephone Company will read a random listing of all available intraLATA carriers to aid the subscriber in selection. If selection is still not possible, the Telephone Company will inform the subscriber that he/she will be given 90 calendar days in which to inform the Telephone Company of an intraLATA toll carrier presubscription selection free of charge. Until the subscriber informs the Telephone Company of his/her choice for intraLATA toll carrier, the subscriber will not have a presubscribed intraLATA toll carrier, but rather will be

required to dial a carrier access code to route all intraLATA toll calls to the carrier(s) of choice. Subscribers who inform the Telephone Company of a choice for intraLATA toll presubscription within the 90-day period will not be assessed a service charge for the initial subscriber request.

Subscribers of record may initiate an intraLATA presubscription change at any time subject to the charges specified in e.ii. below. If a customer of record inquires of the Telephone Company of the carriers available for intraLATA toll presubscription, the Telephone Company will read a random listing of all available intraLATA carriers to aid the subscriber in selection.

e. IntraLATA Presubscription Charges

i. Application of Charges

After a subscriber's initial selection for a presubscribed intraLATA toll carrier and as detailed in Paragraph D above, for any change thereafter, an IntraLATA Presubscription Change Charge, as set forth in Paragraph E.2. will apply.

ii. Nonrecurring Charges IntraLATA Presubscription Change Charge

Per business or residence line, trunk, or port:

— Initial line, trunk, or port	\$5.00
— Additional line, trunk, or port	\$1.50

2. EMERGENCY SERVICES CALLING PLAN

Applicable to all CLECs and CTSs offering MTS (See also Case Nos. 85-1466-TP-COI and 89-54-TP-COI):

☐ 3. ALTERNATIVE OPERATOR SERVICES

The following applies to the provision of alternative operator services (AOS) including Inmate Facility Services. (See, also, Case No. 88-560-TP-COI, December 30, 1991 Supplemental Opinion and Order and February 27, 1992 Entry on Rehearing):

Preceding the maximum operator-assisted surcharges set forth in the text of the proposed tariff, as well as preceding the operator-assisted surcharges set forth in the price list attached to the proposed tariff, the service provider must insert a statement which specifies whether the rates as set forth apply to the provider's provision of traditional operator services, alternative operator services (AOS), or both.

(A) Definitions

- (1) AOS are those services provided by the provider in which the customer and the end user are totally separate entities. The provider contracts with the customer to provide the AOS; however, the provider does not directly contract with the end user to provide the services even though it is the end user who actually pays for the processing of the operator-assisted calls. These do not include coin-sent calls.
- (2) Traditional operator services are those services provided by the provider in which the end user has a customer relationship with the provider, the provider contracts with the customer/end user to provide the services, and the customer/end user pays for the actual processing of the operator-assisted calls.

(B) AOS Service Parameters

- (1) Local operator-assisted calls:
For local operator-assisted calls, both live and automated, the AOS provider shall not charge the billed party more than the ILEC's price list rates for traditional local operator-assisted calls in the same exchange. This requirement includes both the local usage rate (either flat-rate per call or a minute-of-use rate per call) and applicable operator surcharges. The minutes-of-use rate for a local call shall be no higher than the rates for MTS identified in paragraph (B)(2), below.

(2) MTS provided in conjunction with AOS:

For intraLATA and interLATA, intrastate toll service calls, each AOS provider must apply one of the following MTS price ceilings to the MTS provided in conjunction with AOS:

Mileage Band	Initial Minute	Each Additional Minute
1 - 10	.32	.16
11 - 22	.40	.22
23 - 55	.48	.28
56 - 124	.57	.37
125 - end	.58	.39

or;

\$.36 per minute of use

(3) For intraLATA and interLATA, intrastate toll service calls, each AOS provider's maximum operator-assisted rates shall be no more than:

- (a) \$1.70 for customer-dialed calling card calls;
- (b) \$2.50 for operator-handled calls; and
- (c) \$4.80 for person-to-person calls.

(4) Notice of any change in the rates stated above, whether it be upward or downward, must be maintained in the company's tariff (via its web-site or its tariff on file with the Commission), on or before the effective date.

(C) Secured Inmate Facilities:

The following provisions apply to those operator service providers (OSPs) providing service to a secured inmate facility where the originating caller does not have access to other OSPs for the call from the secured inmate facility.

(1) Local operator-assisted calls:

For local operator-assisted calls, the AOS provider serving secured inmate facilities shall not charge the billed party more

Case No. ____ - ____ - ____ - TRF

4/7/2003

than the ILEC price list rates for a local operator-assisted call in the same exchange.

- (2) IntraLATA and interLATA intrastate toll service calls:
For intraLATA and interLATA intrastate toll service calls, the AOS provider serving secured inmate facilities shall not charge the billed party more than the ILEC price list rates for an intraLATA intrastate call. This requirement includes both the rates for message toll service and operator surcharges.
- (D) The AOS providers shall not charge end users surcharges in addition to the price list rates for MTS and operator-assisted surcharges set forth in the AOS providers' tariffs. This restriction means that no surcharges, including but not limited to, bill rendering charges and any additional surcharge which a host facility may request the AOS provider to bill an end user, may be levied by the AOS provider on the end user. Any surcharges imposed by a host facility are to be billed separately by the host facility.
- (E) AOS and secured inmate facility services are not subject to either Tier 1 or Tier 2 regulatory treatment, but rather will remain subject to the provisions of these rules and the applicable provisions adopted by the Commission in Case No. 88-560-TP-COI.

☒ 4. LIMITATION OF LIABILITY

The following is applicable to all telephone companies that choose to include in their tariffs language which may limit their liability (See also Case No. 85-1406-AU-COI):

Approval of limitation of liability language by the PUCO does not constitute a determination by the Commission that the limitation of liability imposed by the company should be upheld in a court of law. Approval by the Commission merely recognizes that since it is a court's responsibility to adjudicate negligence and consequent damage claims, it is also the court's responsibility to determine the validity of the exculpatory clause.

☒ 5. TERMINATION LIABILITY

The following is applicable to all telephone companies who choose to include in their tariffs language which imposes early termination liability

Provider's Name: _____
Case No. ____ - ____ -TP- ____
Case No. ____ - ____ -TRF

on a customer for termination of service prior to the designated term of service:

Inclusion of early termination liability by the company in its tariff or a contract does not constitute a determination by the Commission that the termination liability imposed by the company is approved or sanctioned by the Commission. Customers shall be free to pursue whatever legal remedies they may have should a dispute arise.

☐ 6. **SERVICE CONNECTION ASSISTANCE (SCA)**

The following is applicable to all LECs that offer local service to residential customers:

SCA is targeted to help defray the one-time, up-front costs of connecting to the local exchange network for qualified customers. It provides a waiver of the deposit requirement, full or partial waiver of the service connection charges.

☒ 7. **LOCAL NUMBER PORTABILITY and NUMBER POOLING**

See Case No. 95-845-TP-COI Guideline XIV, FCC Dockets 95-116 and 99-200. NOTE: LNP and number pooling are required of all facilities-based LECs, regardless of size, and CMRS where currently rolled-out by the FCC or as a result of a bona fide request unless granted an extension, exemption, or waiver by the Commission or the FCC.

☒ 8. **TARIFFING AND DISCONNECTION PROCEDURES FOR SERVICE PACKAGES OR BUNDLES**

Applicable to all LECs packaging or bundling regulated local services with toll service and/or unregulated services. See Rule 4901:1-6-21(C), Ohio Administrative Code.

☒ **Option 1**

Tariffing

Under option 1, LECs that package or bundle regulated local services with toll and/or unregulated services shall tariff only the regulated components of a package or bundle of services either as a package at a separate, single rate for the regulated components or individually at individual tariffed rates. The unregulated services and any rate(s)

Case No. ____-____-____-TRF

associated with the unregulated service components of any package or bundle of services shall not be tarified.

Disconnection Procedures

Under option 1, if a customer fails to submit timely payment sufficient to cover the amount of the regulated charges, the LEC may discontinue the provision of the regulated services in compliance with Rule 4901:1-5-17, Ohio Administrative Code.

Staff Notice

Under option 1, LECs shall keep the Director of the Consumer Services Division and the Chief of Telecommunications of the Utilities Department informed and up-to-date on all current offers to consumers that bundle regulated local services with unregulated services at a single packaged rate, different from the rate shown in the tariff for the regulated components of the package. The notice to staff shall identify the regulated and unregulated services included and the packaged rate (the combined tarified and untarified rate).

☐ Option 2

Tariffing

Under option 2, LECs shall tariff the entire package or bundle of services including both regulated local services and toll and/or unregulated services for a single combined packaged rate (including any amount attributable to the unregulated components). The LEC shall clearly identify the services within the package and denote which services are unregulated.

Disconnection Procedures

Under option 2, if a customer fails to submit timely payment sufficient to cover the entire amount of the regulated and unregulated bundled packaged rate, the LEC may discontinue the provision of any regulated and unregulated services, other than basic local exchange service, if payment is sufficient to cover the rate for basic local exchange service. For purposes of this rule, the rate for basic local exchange service shall be the tarified rate for stand-alone basic local exchange service. In the event a CLEC does not offer basic local exchange service on a stand-alone basis, the CLEC shall identify an amount in the tariff for the basic local exchange service component of the package. In no event shall this amount exceed the packaged rate. Further, if the customer loses services included in the package due to non-payment or partial payment pursuant to this rule, the customer

shall be entitled to add, change, or discontinue any regulated services provided according to the LEC's normal procedures for adding, changing or discontinuing such services.

Disconnection Notice

Under option 2, the LEC shall, in its notice of disconnection for non-payment, state the total amount due to avoid discontinuance of the package, as well as the total amount due to avoid discontinuance of the basic local exchange service component of the package.

TARIFF FORMAT

- A. Page Numbering** - Page numbers appear in the upper right hand corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 12 and 13 would be 12.1.
- B. Page Revision Numbers** - Revision numbers also appear in the upper right hand corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th version Page 12 cancels the 3rd version Page 12. Because of various suspension periods, deferrals, etc., the most current page number on file with the Commission is not always the tariff page in effect. Consult the Check Sheet for the page currently in effect.
- C. Paragraph Numbering Sequence** - There is eight levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a).i.
 - 2.1.1.A.1.(a).i.1.
- D. Check Sheets** - When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the pages contained in the tariff, with a cross-reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. All revision made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some pages.) Re: Notice of Tariff Changes Ordered by the Public Utility Commission of Ohio

Dear

Beginning on February 18, 2008, the prices, service descriptions and the terms and conditions for certain telecommunication services that you are provided by Citynet Ohio, LLC ("Citynet") will no longer be on file at the Public Utilities Commission of Ohio ("PUCO"). This modification does not automatically result in a change in the prices, terms, or conditions of those services to which you currently subscribe. Citynet must still provide a customer notice at least fifteen (15) days in advance of rate increases, changes in terms and conditions and discontinuance of existing services. Services subject to an existing contract with Citynet shall continue to be governed by the terms of any such agreement.

Additionally, you will be able to view the company's future service offerings in a guidebook online at www.citynet.net/tariffs.cfm or you can request a copy of this information by contacting the company at 113 Platinum Drive, Suite B, Bridgeport, West Virginia 26330 or by calling 1-800-881-2638.

Since these services will no longer be on file with the Commission, this means that the agreement reached between the customer and the company, instead of the document on file at the PUCO, will now control new services or changes in service. This agreement, whether it is verbal or written, will still be subject to consumer protections required and enforced by the PUCO.

For any new services or changes in service, it will be important that you carefully review and confirm the price, terms and conditions. If you have any questions about this matter, please call Citynet Ohio, LLC at the toll free number 1-800-881-2638 or visit us at www.citynet.net.

Sincerely,

Citynet Ohio, LLC
