Description of Document: Transcript w/Exhibits
 Volume V

1 A. That's correct.

2 Q. Do you know what the tax rate paid by
3 CEI, Toledo Edison, or Ohio Edison is, the tax rate
4 that they actually pay to the federal government?

5 A. 35 percent.

6 Q. Is that the actual taxes paid?

7 A. The 35 percent is a statutory tax rate
8 that utilities pay to the federal government.

9 Q. But the federal government also grants
10 various deductions, credits, and other types of
11 adjustments that can change that tax rate of
12 35 percent to some other percentage, correct?

13 A. There is some deductions from taxable
14 income before we apply the 35 percent tax rate, there
15 is a different tax rate for different level of
16 income, but for large companies you're ending up
17 paying the 35 percent.

18 MR. RINEBOLT: No more questions, your
19 Honor.

20 EXAMINER PRICE: Thank you.

21 OCC?

22 MR. SMALL: Thank you, your Honor.

1 CROSS-EXAMINATION

2 By Mr. Small:

3 Q. Mr. Soliman, my name is Jeff Small, and I
4 represent the office of the Ohio Consumers' Counsel.

5 You have the Staff Report with you on the stand?

6 A. Yes.

7 Q. We'll be using it in just a second.

8 Would you please turn to page 5 and 6 of your
9 testimony?

10 A. I have that.

11 Q. The portion of your testimony starting on
12 page 5 and continuing on to page 6 discusses SFAS 109
13 and income tax liability, correct?

14 A. Yes.

15 Q. Could you please turn to the CEI Staff
16 Report initially at page 147. Page 147 should be
17 labeled Schedule C-3.5, page 1 of 1.

18 A. Schedule C-3.5.

19 Q. Yes, page 1 of 1. Do you have that?

20 A. Yes.

21 Q. On page 147 at the bottom of the page the
22 last entry before the total line has included
23 something that's entitled FAS 109 amortization. Do
24 you see that?

1 A. Yes.

2 Q. You have an entry there of negative
3 \$2,444,039, correct?

4 A. That's correct.

5 Q. And if you could keep your finger on that
6 page and turn to another portion of the Staff Report
7 on CEI, page 165, you should have Schedule C-3.13,
8 page 1.

9 A. Schedule C-3.13.

10 Q. I'm sorry, page 147 -- I'm sorry, page
11 165, Schedule C-3.13, yes. Do you have that?

12 A. Yes.

13 Q. Good. And there's a figure for an FAS
14 109 account of \$2,811,059. Do you see that?

15 A. Yes.

16 Q. Now, those two figures, the first one on
17 page 147 and the second one on page 165, represent
18 staff's replacement of a tax study amount for the
19 actual test year amortization; is that correct?

20 A. No, that's not correct.

21 Q. Would you please explain those -- the
22 relationship between those two entries?

23 A. What was in Schedule C-3.13 was an
24 estimated amount of the incremental FASB 109 that the

1 company needed to record and amortize in their books.
2 And what's in Schedule C-3.5 was what was current
3 test year amortization. However, Schedule C-3.5 was
4 adjusted to reflect the staff positions and I think
5 that's an attachment to Mr. Tufts' testimony, and I
6 don't have copy of it here.

7 MR. McNAMEE: I do. Do you need a copy
8 of --

9 THE WITNESS: Yes.

10 MR. SMALL: There's no pending question
11 on this.

12 Q. Is the effect of your testimony on pages
13 5 and 6 to reverse the amount shown on -- oh, let me
14 go back for a second. The amount shown on 147 and
15 165, I've pointed those out with regard to CEI. Are
16 there corresponding entries for the other two
17 companies just to be complete here?

18 A. Yes.

19 Q. Now, is the effect of your testimony on
20 pages 5 and 6 a change in the entry listed on page
21 147, that is the negative figure of a little over
22 \$2 million? Is the effect of your testimony on pages
23 5 and 6 to reverse that and to add that back in?

24 A. I need a copy of the revised schedules.

1 The amount that is showing on the Staff Report was
2 not the amount that the staff recommended but that
3 was in the test year, and when we revised the
4 schedules, we have our own numbers and I wish to have
5 copy of the schedules.

6 MR. McNAMEE: Your Honor, I have a copy
7 of Mr. Tufts' testimony here. If I might give that
8 to the witness, we can perhaps advance the ball here.

9 EXAMINER PRICE: You may approach.

10 Q. I realize that you want to look at
11 additional tables but really before we get into exact
12 dollar amounts I'd like to get to the concept. Is
13 the concept -- regardless of the exact dollar figure,
14 is the concept of your testimony on pages 5 and 6 to
15 reverse a negative entry and replace it with a --
16 reverse a negative entry?

17 A. Yes, the purpose is to give the company
18 the amortization of the current test year FASB 109
19 plus incremental amount resulting from the new study.

20 Q. What did the staff do -- what did you do
21 to verify the results of the study were incremental
22 to the actual test year amortization?

23 A. I reviewed workpapers that was prepared
24 by the consultant that was hired by the company. I

1 reviewed preliminary numbers and during the Staff
2 Report the final number was not ready yet so I asked
3 the company to make that final numbers available as
4 long as it was a workpaper to support the final
5 numbers, and also I asked the company to give me copy
6 of the journal entry that they made in their books to
7 record the final numbers.

8 Q. I want to make clear about what your
9 response is. The question was what did you do to
10 verify that the results of the study were incremental
11 to the actual test year amortization, and what I'm
12 trying to figure out is from your response were you
13 responding to what did the staff do to verify the
14 study results or were you responding to what were
15 incremental to the actual test year amortization, I
16 emphasize the word "incremental"?

17 A. Well, my response is I verified the total
18 deferred liability that the company needs and then
19 the difference between -- which was a result of the
20 study, and compared that number to what the company
21 has in their books and then the difference would be
22 the incremental amount that the company needs to
23 record and amortize over the remaining life of the
24 net plant.

1 Q. What is that incremental amount? I think
2 now we're going to refer to the tables.

3 A. I believe this number was provided in
4 company's witness Mr. Young.

5 Q. I'm a little bit confused. I thought you
6 were going to refer to Mr. Tufts' testimony for this
7 number. Is it not in Mr. Tufts' testimony?

8 A. Mr. Tufts' testimony was a revision to
9 the Staff Schedule C-3.5 and Schedule C-3.13 where
10 it's showing the final numbers. But Mr. Young
11 provided copies of the workpaper to support the
12 numbers that coming out from the study.

13 Q. And there's no specific line item for
14 Mr. Young's value in the new tables shown in
15 Mr. Tufts' testimony, or his new tables? Is it not
16 shown on Mr. Tufts' tables?

17 A. Yeah, the number that Mr. Young shown in
18 his second supplemental testimony is the same number
19 that are shown now on the Staff Schedule C-3.5.

20 Q. And could you -- all right. What is that
21 value?

22 A. For which company?

23 Q. Let's go through all three of the
24 companies one at a time. Just to be clear about

1 this, are these the incremental amounts?

2 A. Yes. For CEI the final jurisdiction
3 incremental amount is \$746,630. Ohio Edison the
4 final jurisdiction amount is \$1,296,503. Toledo
5 Edison the final jurisdiction amount is \$31,038. And
6 these are the same numbers that I have in my prefilled
7 testimony that I'm recommending to be used.

8 EXAMINER BOJKO: I'm sorry, I didn't hear
9 you. These are the numbers you have in your prefilled
10 testimony?

11 THE WITNESS: Yes.

12 EXAMINER BOJKO: I thought these were the
13 revised numbers in Mr. Tufts' testimony.

14 THE WITNESS: Well, it's the same. My
15 testimony supports the numbers. Mr. Tufts just
16 revised the schedules.

17 EXAMINER BOJKO: Okay.

18 MR. SMALL: I have no further questions,
19 your Honor.

20 EXAMINER PRICE: Thank you. Company?

21 MR. FELD: The company has no cross.

22 EXAMINER PRICE: Mr. McNamee, redirect?

23 MR. McNAMEE: No thank you.

24 EXAMINER PRICE: Mr. Soliman, you're

1 excused.

2 THE WITNESS: Thank you.

3 EXAMINER PRICE: Mr. McNamee.

4 MR. MCNAMEE: At this time I would move
5 the admission of Staff Exhibit 8.

6 EXAMINER PRICE: Any objections?

7 Hearing none Staff Exhibit 8 will be
8 admitted.

9 (EXHIBIT ADMITTED INTO EVIDENCE.)

10 EXAMINER PRICE: Let's go off the record.

11 (Off the record.)

12 EXAMINER PRICE: Let's go on the record.
13 With that, that will be our last witness today. We
14 will adjourn until tomorrow at 10 a.m. Thank you
15 all. Off the record.

16 (The hearing was adjourned at 4:53 p.m.)

PUBLIC NOTICE

NOTICE OF APPLICATION TO THE PUBLIC UTILITIES COMMISSION OF OHIO FOR AN INCREASE IN ELECTRIC DISTRIBUTION RATES TO ALL JURISDICTIONAL CUSTOMERS OF THE CLEVELAND ELECTRIC ILLUMINATING COMPANY

TO WHOM IT MAY CONCERN:

Pursuant to the requirements of Ohio Revised Code Section 4909.19, The Cleveland Electric Illuminating Company ("Company") gives notice that on June 7, 2007, it filed with The Public Utilities Commission of Ohio ("Commission") an Application for authority to change its electric rates and charges in incorporated communities and the unincorporated territory within its service area, which includes all or part of Ashtabula, Cuyahoga, Geauga, Lake, Lorain, Medina, Portage, Summit, and Trumbull Counties in Ohio. Such Application has been assigned Case Nos. 07-551-EL-AIR, 07-552-EL-ATA, 07-553-EL-AAM and 07-554-EL-UNC by the Commission. The substance of the Application follows.

In this Application the Company proposes to make changes and increases in electric distribution rates applicable to customers within the Company's service territory effective May 2009. Since the Company's last request for an increase in distribution rates in 1996, the Company's operating costs to provide electric service to customers have increased significantly. Moreover, pursuant to prior Commission Orders, the Company has been deferring recovery of certain costs. As a result, this filing includes expenses related to distribution operations, recovery of investments in distribution infrastructure and fuel charges that were deferred under prior rate orders.

The average increase in total rate that each rate schedule would bear over the present rates if the proposed increase is granted in full would be:***

Residential	3.9%
Commercial	8.4%
Industrial	5.9%
Total Company	6.0%

*** This increase would be offset by a reduction in charges related to electric restructuring in Ohio.

This Application is being filed so as to generate sufficient revenues for the Company to pay distribution-related operating expenses, service outstanding debt balances, and earn an adequate return on property used in providing electric distribution service to customers. However, when combined with other previously approved changes in regulatory charges, the rates requested in this Application would result in an overall reduction in the regulated portion of customer bills.

The Company proposes to change its current rate schedules to those shown below and among other things, eliminate customer class specific rate schedules and replace them with voltage based schedules. The proposed schedules better match how the distribution system is designed, built and operated and reflects how customers are physically connected to and take service from our system. Accordingly, many of the current rate schedules are being eliminated, with customers currently taking service under these schedules being transferred to one of the new proposed schedules.

The new rate classifications proposed in the Application are as follows:

Residential schedule (RS)

General Service schedules:

- General Service Secondary (GS)
- General Service Primary (GP)
- General Service Sub-transmission (GSU)
- General Service Transmission (GT)

Lighting schedules:

- Street Lighting (STL)
- Traffic Lighting (TRF)
- Private Outdoor Lighting (POL)

In addition to these changes, the Company is proposing the following new electric service riders:

- Residential Distribution Credit Rider, which provides a reduction to distribution charges for certain electric loads so as to mitigate the effects of changes in rate design.
- Business Distribution Credit Rider, which provides a reduction to distribution charges for certain electric loads so as to mitigate the effects of changes in rate design.
- Demand Side Management ("DSM") Rider, which creates a mechanism through which certain approved DSM costs are to be recovered and reconciled semi-annually.

The Company is also proposing certain modifications to the following rider currently in effect:

- State kWh Tax Rider, which modifies and renames the Company's current State and Local Tax Rider and eliminates charges for local taxes that are currently included in base rates.

In addition to the rate relief described above, the Company also asks the Commission to authorize the following accounting treatment:

- Depreciation: The Company has determined that certain modifications to depreciation rates are warranted and requests that depreciation rates proposed in this proceeding be approved by the Commission.
- Deferral of Storm Related Costs: The Company requests permission to defer storm restoration and repair costs in excess of those included in base rates.

Changes In Rate Design

The Company's basic rate design has been in place since its last base rate case in 1996. Accordingly, the Company is proposing to update the existing rate design with the goal of:

- Simplifying distribution rate designs of the FirstEnergy Ohio utility companies from three different tariffs to one uniform set of schedules
- Implementing rate designs that focus on distribution service and discontinue concepts inherent in the legacy bundled rate design
- Implementing distribution rates that recover fixed costs associated with the infrastructure needed to deliver electricity to customers
- Incorporating gradusmism in managing customer impacts while simplifying and consolidating tariff design

Residential Rates

The following is a list of key changes proposed for Residential rates:

- Creation of a single distribution rate schedule for all residential customers
- Creation of a Residential Distribution Credit Rider (mentioned above)
- Conversion from existing multiple block and declining block designs to a simple two block structure that is consistent across all companies
- Elimination of the Percentage of Income Payment Plan ("PIPP")

Note - customers participating in the PIPP program will continue to have their PIPP payment calculated based on income

General Service Rates

The following is a list of key changes proposed for General Service rates:

- Simplification of distribution rates to one uniform tariff design for the FirstEnergy Ohio utility companies
- Reduction in the number of rate blocks
- Conversion from a declining block structure to a flat structure
- Creation of a Business Distribution Credit Rider (mentioned above)
- Standardization of Service Charges and power factor

- Changes across the FirstEnergy Ohio utility companies
- Standardization on demand-only distribution pricing
- Changes in rate applicability based on service voltage rather than usage

Changes in Electric Services Regulations
(Formerly Standard Rules and Regulations)

There are three categories of changes made to the Electric Service Regulations ("Regulations"). The first category is changes made in order to make the Regulations uniform across the three FirstEnergy Ohio utility companies. The second category consists of changes made to clarify language and thereby aid customer understanding of the Regulations. The third category relates to changes that better align charges with actual costs. This last category includes an increase in the reconnection charge, the returned payment charge and the meter test charge. In addition, a provision for an annual automatic increase to certain charges based on the Consumer Price Index (CPI) has been added.

The above proposed provisions, rates, and charges are subject to change, including changes as to amount and form, by the Commission following a public hearing on the filed Application. Recommendations which differ from the filed Application may be made by the Staff of the Commission or by intervening parties and may be adopted by the Commission.

Any person, firm, corporation or association may file, pursuant to Section 4909.19 of the Revised Code, an objection to such proposed increased rates by alleging that such proposals are unjust and discriminatory or unreasonable.

Any interested party seeking detailed information with respect to all affected rates, charges, regulations, and practices may inspect a copy of the application (including supporting schedules and present and proposed rate sheets) at the offices of the Commission at 180 East Broad Street, 13th floor, Columbus, Ohio, 43215-2793; visit the Commission's web site at <http://www.pucrc.ohio.gov>, select DIS, input 07-0551 in the case lookup box, and select the date the application was filed; or call the Commission at 1-800-886-7828. Additionally, a copy of the application and supporting documents may be viewed at the business office of the Company: The Cleveland Electric Illuminating Company, 8896 Miller Road, Brecksville, Ohio 44141.

Since the rates, prices, charges and other provisions in the Company's current electric rate schedules do not yield just and reasonable compensation to the Company for supplying electric distribution service and do not yield a just and reasonable return to the Company on the value of the property used in furnishing such electric distribution service, the Company requests the Commission:

- (a) Accept this Application and Exhibits for filing;
- (b) Find that this Application and the attached Schedules filed herewith and incorporated herein, are in accordance with Sections 4909.18, Ohio Revised Code, and Section 4901-7-01 of the Commission's Rules and Regulations;
- (c) Find that the current rates, prices and charges for electric service are unjust, unreasonable and insufficient to yield reasonable compensation to the Company for the electric distribution service rendered;
- (d) Find that the proposed rates, prices and charges are just and reasonable based upon the test period for the twelve months ending February 29, 2008, and approve such schedules in the form tendered herewith;
- (e) Approve the Company's requested accounting treatment;
- (f) Fix the date on which applicable services provided to customers are subject to the proposed rates at May 2009.

NOTICE OF APPLICATION TO THE PUBLIC UTILITIES COMMISSION OF OHIO FOR AN INCREASE IN ELECTRIC DISTRIBUTION RATES TO ALL JURISDICTIONAL CUSTOMERS OF THE CLEVELAND ELECTRIC ILLUMINATING COMPANY

TO WHOM IT MAY CONCERN:

Pursuant to the requirements of Ohio Revised Code Section 4909.19, The Cleveland Electric Illuminating Company ("Company") gives notice that on June 7, 2007, it filed with The Public Utilities Commission of Ohio ("Commission") an Application for authority to change its electric rates and charges in incorporated communities and the unincorporated territory within its service area, which includes all or part of Ashtabula, Cuyahoga, Geauga, Lake, Lorain, Medina, Portage, Summit, and Trumbull Counties in Ohio. Such Application has been assigned Case Nos. 07-551-EL-AIR, 07-552-EL-ATA, 07-553-EL-AAM and 07-554-EL-UNC by the Commission. The substance of the Application follows.

In this Application the Company proposes to make changes and increases in electric distribution rates applicable to customers within the Company's service territory effective May 2008. Since the Company's last request for an increase in distribution rates in 1996, the Company's operating costs to provide electric service to customers have increased significantly. Moreover, pursuant to prior Commission Orders, the Company has been deferring recovery of certain costs. As a result, this filing includes expenses related to distribution operations, recovery of investments in distribution infrastructure and fuel charges that were deferred under prior rate orders.

The average increase in total rate that each rate schedule would bear over the present rates if the proposed increase is granted in full would be:***

Residential	3.9%
Commercial	8.4%
Industrial	5.9%
Total Company	6.0%

*** This increase would be offset by a reduction in charges related to electric restructuring in Ohio.

This Application is being filed so as to generate sufficient revenues for the Company to pay distribution-related operating expenses, service outstanding debt balances, and earn an adequate return on property used in providing electric distribution service to customers. However, when combined with other previously approved changes in regulatory charges, the rates requested in this Application would result in an overall reduction in the regulated portion of customer bills.

The Company proposes to change its current rate schedules to those shown below and among other things, eliminate customer class specific rate schedules and replace them with voltage based schedules. The proposed schedules better match how the distribution system is designed, built and operated and reflects how customers are physically connected to and take service from our system. Accordingly, many of the current rate schedules are being eliminated, with customers currently taking service under these schedules being transferred to one of the new, proposed schedules.

The new rate classifications proposed in the Application are as follows:

Residential service (RS)

General Service schedules:

- General Service Secondary (GS)
- General Service Primary (GP)
- General Service Sub-transmission (GSU)
- General Service Transmission (GT)

Lighting schedules:

- Street Lighting (STL)
- Traffic Lighting (TRF)
- Private Outdoor Lighting (POL)

In addition to these changes, the Company is proposing the following new electric service riders:

- Residential Distribution Credit Rider, which provides a reduction in distribution charges for certain electric loads so as to mitigate the effects of changes in rate design.
- Business Distribution Credit Rider, which provides a reduction in distribution charges for certain electric loads so as to mitigate the effects of changes in rate design.
- Demand Side Management ("DSM") Rider, which creates a mechanism through which certain approved DSM costs are to be recovered and reconciled semi-annually.

The Company is also proposing certain modifications to the following rider currently in effect:

- State kWh Tax Rider, which modifies and renames the Company's current State and Local Tax Rider and eliminates charges for local taxes that are currently included in base rates.

In addition to the relief described above, the Company also asks the Commission to authorize the following accounting treatment:

- Depreciation: The Company has determined that certain modifications to depreciation rates are warranted and requests that depreciation rates proposed in this proceeding be approved by the Commission.
- Deferral of Storm Related Costs: The Company requests permission to defer storm restoration and repair costs in excess of those included in base rates.

Changes In Rate Design

The Company's basic rate design has been in place since its last base rate case in 1996. Accordingly, the Company is proposing to update the existing rate design with the goal of:

- Simplifying distribution rate designs of the FirstEnergy Ohio utility companies from three different tariffs to one uniform set of schedules
- Implementing rate designs that focus on distribution service and discontinue concepts inherent in the legacy bundled rate design
- Implementing distribution rates that recover fixed costs associated with the infrastructure needed to deliver electricity to customers
- Incorporating gradualism in managing customer impacts while simplifying and consolidating tariff design

Residential Rates

The following is a list of key changes proposed for Residential rates:

- Creation of a single distribution rate schedule for all residential customers
- Creation of a Residential Distribution Credit Rider (mentioned above)
- Conversion from existing multiple block and declining block designs to a simple two block structure that is consistent across all companies
- Elimination of the Percentage of Income Payment Plan ("PIPP")

Note: Customers participating in the PIPP program will continue to have their PIPP payment calculated based on income.

General Service Rates

The following is a list of key changes proposed for General Service rates:

- Simplification of distribution rates to one uniform tariff design for the FirstEnergy Ohio utility companies
- Reduction in the number of rate blocks
- Conversion from a declining block structure to a flat structure
- Creation of a Business Distribution Credit Rider (mentioned above)
- Standardization of Service Charges and power factor

- charges across the FirstEnergy Ohio utility companies
- Standardization on demand-only distribution pricing
- Changes in rate applicability based on service voltage rather than usage

**Changes In Electric Service Regulations
(Formerly Standard Rules and Regulations)**

There are three categories of changes made to the Electric Service Regulations ("Regulations"). The first category is changes made in order to make the Regulations uniform across the three FirstEnergy Ohio utility companies. The second category consists of changes made to clarify language and thereby aid customer understanding of the Regulations. The third category relates to changes that better align charges with actual costs. This last category includes an increase to the reconnection charge, the return payment charge and the meter test charge. In addition, a provision for an annual automatic increase to certain charges based on the Consumer Price Index (CPI) has been added.

The above proposed provisions, rates, and charges are subject to changes, including changes as to amount and form, by the Commission following a public hearing on the filed Application. Recommendations which differ from the filed Application may be made by the Staff of the Commission or by intervening parties and may be adopted by the Commission.

Any person, firm, corporation or association may file, pursuant to Section 4909.19 of the Revised Code, an objection to such proposed increased rates by alleging that such proposals are unjust and discriminatory or unreasonable. Any interested party seeking detailed information with respect to all affected rates, charges, regulations, and practices may inspect a copy of the application (including supporting schedules and present and proposed rate sheets) at the offices of the Commission at 160 East Broad Street, 13th floor, Columbus, Ohio, 43215-3763; visit the Commission's web site at <http://www.pucio.ohio.gov>; select DIS, input 07-0551 in the case lookup box, and select the date the application was filed; or call the Commission at 1-800-666-7826. Additionally, a copy of the application and supporting documents may be viewed at the business office of the Company: The Cleveland Electric Illuminating Company, 5896 Miller Road, Brecksville, Ohio 44141.

Since the rates, prices, charges and other provisions in the Company's current electric rate schedules do not yield just and reasonable compensation to the Company for supplying electric distribution service and do not yield a just and reasonable return to the Company on the value of the property used in furnishing such electric distribution service, the Company requests the Commission:

- (a) Accept this Application and Exhibits for filing;
- (b) Find that this Application and the attached Schedules filed herewith and incorporated herein, are in accordance with Sections 4909.18, Ohio Revised Code, and Section 4901.7-01 of the Commission's Rules and Regulations;
- (c) Find that the current rates, prices and charges for electric service are unjust, unreasonable and insufficient to yield reasonable compensation to the Company for the electric distribution service rendered;
- (d) Find that the proposed rates, prices and charges are just and reasonable based upon the test period for the twelve months ending February 29, 2008, and approve such schedules in the form tendered herewith;
- (e) Approve the Company's requested accounting treatment;
- (f) Fix the date on which applicable services provided to customers are subject to the proposed rates at May 2009.

NOTICE OF APPLICATION TO THE PUBLIC UTILITIES COMMISSION OF OHIO FOR AN INCREASE IN ELECTRIC DISTRIBUTION RATES TO ALL JURISDICTIONAL CUSTOMERS OF THE CLEVELAND ELECTRIC ILLUMINATING COMPANY

TO WHOM IT MAY CONCERN:

Pursuant to the requirements of Ohio Revised Code Section 4909.19, The Cleveland Electric Illuminating Company ("Company") gives notice that on June 7, 2007, it filed with The Public Utilities Commission of Ohio ("Commission") an Application for authority to change its electric rates and charges in incorporated communities and the unincorporated territory within its service area, which includes all or part of Ashtabula, Cuyahoga, Geauga, Lake, Lorain, Medina, Portage, Summit, and Trumbull Counties in Ohio. Such Application has been assigned Case Nos. 07-551-EL-AIR, 07-552-EL-ATA, 07-553-EL-AAM and 07-554-EL-UNC by the Commission. The substance of the Application follows.

In this Application the Company proposes to make changes and increases in electric distribution rates applicable to customers within the Company's service territory effective May 2009. Since the Company's last request for an increase in distribution rates in 1996, the Company's operating costs to provide electric service to customers have increased significantly. Moreover, pursuant to prior Commission Orders, the Company has been deferring recovery of certain costs. As a result, this filing includes expenses related to distribution operations, recovery of investments in distribution infrastructure and fuel charges that were deferred under prior rate orders.

The average increase in total rate that each rate schedule would bear over the present rates if the proposed increase is granted in full would be:***

Residential	3.9%
Commercial	8.4%
Industrial	5.9%

Total Company 6.0%

*** This increase would be offset by a reduction in charges related to electric restructuring in Ohio.

This Application is being filed so as to generate sufficient revenues for the Company to pay distribution-related operating expenses, service outstanding debt balances, and earn an adequate return on property used in providing electric distribution service to customers. However, when combined with other previously approved changes in regulatory charges, the rates requested in this Application would result in an overall reduction in the regulated portion of customer bills.

The Company proposes to change its current rate schedules to those shown below and among other things, eliminate customer class specific rate schedules and replace them with usage based schedules. The proposed schedules better match how the distribution system is designed, built and operated and reflect how customers are physically connected to and take service from our system. Accordingly, many of the current rate schedules are being eliminated, with customers currently taking service under these schedules being transferred to one of the new proposed schedules.

The new rate classifications proposed in the Application are as follows:

Residential schedule (RS)

General Service schedules:

- General Service Secondary (GS)
- General Service Primary (GP)
- General Service Sub-transmission (GSU)
- General Service Transmission (GT)

Lighting schedules:

- Street Lighting (STL)
- Traffic Lighting (TRF)
- Private Outdoor Lighting (POL)

In addition to these changes, the Company is proposing the following new electric service riders:

• Residential Distribution Credit Rider, which provides a reduction to distribution charges for certain electric loads so as to mitigate the effects of changes in rate design.

• Business Distribution Credit Rider, which provides a reduction to distribution charges for certain electric loads so as to mitigate the effects of changes in rate design.

• Demand Side Management ("DSM") Rider, which creates a mechanism through which certain approved DSM costs are to be recovered and reconciled semi-annually.

The Company is also proposing certain modifications to the following rider currently in effect:

• State kWh Tax Rider, which modifies and renames the Company's current State and Local Tax Rider and eliminates charges for local taxes that are currently included in base rates.

In addition to the rate relief described above, the Company also asks the Commission to authorize the following accounting treatment:

• Depreciation: The Company has determined that certain modifications to depreciation rates are warranted and requests that depreciation rates proposed in this proceeding be approved by the Commission.

• Deferral of Storm Related Costs: The Company requests permission to defer storm restoration and repair costs in excess of those included in base rates.

Changes in Rate Design

The Company's basic rate design has been in place since its last base rate case in 1996. Accordingly, the Company is proposing to update the existing rate design with the goal of:

• Simplifying distribution rate designs of the FirstEnergy Ohio utility companies from three different tariffs to one uniform set of schedules

• Implementing rate designs that focus on distribution service and discontinue concepts inherent in the legacy bundled rate design

• Implementing distribution rates that recover fixed costs associated with the infrastructure needed to deliver electricity to customers

• Incorporating gradualism in managing customer impacts while simplifying and consolidating tariff design

Residential Rates

The following is a list of key changes proposed for Residential rates:

• Creation of a single distribution rate schedule for all residential customers

• Creation of a Residential Distribution Credit Rider (mentioned above)

• Conversion from existing multiple block and declining block designs to a simple two block structure that is consistent across all companies

• Elimination of the Percentage of Income Payment Plan ("PIPP")

Note - Customers participating in the PIPP program will continue to have their PIPP payment calculated based on historic

General Service Rates

The following is a list of key changes proposed for General Service rates:

• Simplification of distribution rates to one uniform tariff design for the FirstEnergy Ohio utility companies

• Reduction in the number of rate blocks

• Conversion from a declining block structure to a flat structure

• Creation of a Business Distribution Credit Rider (mentioned above)

• Standardization of Service Charges and power factor

charges across the FirstEnergy Ohio utility companies

• Standardization on demand-only distribution pricing

• Changes in rate applicability based on service voltage rather than usage

Changes in Electric Service Regulations (formerly Standard Rules and Regulations)

There are three categories of changes made to the Electric Service Regulations ("Regulations"). The first category is changes made in order to make the Regulations uniform across the three FirstEnergy Ohio utility companies. The second category consists of changes made to clarify language and thereby aid customer understanding of the Regulations. The third category relates to changes that better align charges with actual costs. This last category includes an increase to the reconnection charge, the returned payment charge and the meter test charge, in addition, a provision for an annual automatic increase to certain charges based on the Consumer Price Index (CPI) has been added.

The above proposed provisions, rates, and charges are subject to changes, including changes as to amount and form, by the Commission following a public hearing on the filed Application. Recommendations which differ from the filed Application may be made by the Staff of the Commission or by intervening parties and may be adopted by the Commission.

Any person, firm, corporation or association may file, pursuant to Section 4909.19 of the Revised Code, an objection to such proposed increased rates by alleging that such proposals are unjust and discriminatory or unreasonable.

Any interested party seeking detailed information with respect to all affected rates, charges, regulations, and practices may inspect a copy of the application (including supporting schedules and present and proposed rate sheets) at the offices of the Commission at 180 East Broad Street, 13th floor, Columbus, Ohio, 43215-3793; visit the Commission's web site at <http://www.puciohio.gov>; select DIS, input 07-0451 in the case lookup box, and select the date the application was filed; or call the Commission at 1-800-586-7828. Additionally, a copy of the application and supporting documents may be viewed at the business office of the Company: The Cleveland Electric Illuminating Company, 6898 Miller Road, Brecksville, Ohio 44141.

Since the rates, prices, charges and other provisions in the Company's current electric rate schedules do not yield just and reasonable compensation to the Company for supplying electric distribution service and do not yield a just and reasonable return to the Company on the value of the property used in furnishing such electric distribution service, the Company requests the Commission:

(a) Accept this Application and Exhibits for filing;

(b) Find that this Application and the attached Schedules filed herewith and incorporated herein, are in accordance with Sections 4909.18, Ohio Revised Code, and Section 4901-7-01 of the Commission's Rules and Regulations;

(c) Find that the current rates, prices and charges for electric service are unjust, unreasonable and insufficient to yield reasonable compensation to the Company for the electric distribution service rendered;

(d) Find that the proposed rates, prices and charges are just and reasonable based upon the test period for the twelve months ending February 29, 2008, and approve such schedules in the form tendered herewith;

(e) Approve the Company's requested accounting treatment;

(f) Fix the date on which applicable services provided to customers are subject to the proposed rates at May 2009.

Form L1

NOTICE OF APPLICATION TO THE PUBLIC UTILITIES COMMISSION OF OHIO FOR AN
INCREASE IN ELECTRIC DISTRIBUTION RATES TO ALL JURISDICTIONAL CUSTOMERS
OF THE CLEVELAND ELECTRIC ILLUMINATING COMPANY

TO WHOM IT MAY CONCERN:

Pursuant to the requirements of Ohio Revised Code Section 4909.19, The Cleveland Electric Illuminating Company ("Company") gives notice that on June 7, 2007, it filed with The Public Utilities Commission of Ohio ("Commission") an Application for authority to change its electric rates and charges in incorporated communities and the unincorporated territory within its service area, which includes all or part of Ashtabula, Cuyahoga, Geauga, Lake, Lorain, Medina, Portage, Summit, and Trumbull Counties in Ohio. Such Application has been assigned Case Nos. 07-051-EL-AIR, 07-532-EL-ATA, 07-533-EL-AAM and 07-554-EL-UNC by the Commission. The substance of the Application follows.

In this Application the Company proposes to make changes and increases in electric distribution rates applicable to customers within the Company's service territory effective May 2009. Since the Company's last request for an increase in distribution rates in 1998, the Company's operating costs to provide electric service to customers have increased significantly. Moreover, pursuant to prior Commission Orders, the Company has been deferring recovery of certain costs. As a result, this filing includes expenses related to distribution operations, recovery of investments in distribution infrastructure and fuel charges that were deferred under prior rate orders.

The average increase in total rate that each rate schedule would bear over the present rates if the proposed increase is granted in full would be:***

Residential	3.9%
Commercial	8.4%
Industrial	5.9%
Total Company	6.0%

*** This increase would be offset by a reduction in charges related to electric restructuring in Ohio.

This Application is being filed so as to generate sufficient revenues for the Company to pay distribution-related operating expenses, service outstanding debt balances, and earn an adequate return on property used in providing electric distribution service to customers. However, when combined with other previously approved changes in regulatory charges, the rates requested in this Application would result in an overall reduction in the regulated portion of customer bills.

The Company proposes to change its current rate schedules to those shown below and among other things, eliminate customer class specific rate schedules and replace them with voltage based schedules. The proposed schedules better match how the distribution system is designed, built and operated and reflects how customers are physically connected to and take service from our system. Accordingly, many of the current rate schedules are being eliminated, with customers currently taking service under these schedules being transferred to one of the new proposed schedules.

The new rate classifications proposed in the Application are as follows:

Residential schedule (RS)

General Service schedules:

- General Service Secondary (GS)
- General Service Primary (GP)
- General Service Sub-transmission (GSU)
- General Service Transmission (GT)

Lighting schedules:

- Street Lighting (STL)
- Traffic Lighting (TRF)
- Private Outdoor Lighting (POL)

In addition to these changes, the Company is proposing the following new electric service riders:

- Residential Distribution Credit Rider, which provides a reduction to distribution charges for certain electric loads so as to mitigate the effects of changes in rate design.
- Business Distribution Credit Rider, which provides a reduction to distribution charges for certain electric loads so as to mitigate the effects of changes in rate design.
- Demand Side Management ("DSM") Rider, which creates a mechanism through which certain approved DSM costs are to be recovered and reconciled semi-annually.

The Company is also proposing certain modifications to the following rider currently in effect:

- State RWH Tax Rider, which modifies and renames the Company's current State and Local Tax Rider and eliminates charges for local taxes that are currently included in base rates.

In addition to the rate relief described above, the Company also asks the Commission to authorize the following accounting treatment:

- Depreciation: The Company has determined that certain modifications to depreciation rates are warranted and requests that depreciation rates proposed in this application be approved by the Commission.
- Deferral of Storm Related Costs: The Company requests permission to defer storm restoration and repair costs in excess of those included in base rates.

Changes in Rate Design

The Company's basic rate design has been in place since its last base rate case in 1996. Accordingly, the Company is proposing to update the existing rate design with the goal of:

- Simplifying distribution rate designs of the FirstEnergy Ohio utility companies from three different tariffs to one uniform set of schedules
- Implementing rate designs that focus on distribution service and discontinue concept inherent in the legacy bundled rate design
- Implementing distribution rates that recover fixed costs associated with the infrastructure needed to deliver electricity to customers
- Incorporating gradualism in managing customer impacts while simplifying and consolidating tariff design

Residential Rates

The following is a list of key changes proposed for Residential rates:

- Creation of a single distribution rate schedule for all residential customers
- Creation of a Residential Distribution Credit Rider (mentioned above)
- Conversion from existing multiple block and declining block designs to a simple two block structure that is consistent across all companies
- Elimination of the Percentage of Income Payment Plan ("PIPP")

Note - Customers participating in the PIPP program will continue to have their PIPP payment calculated based on income

General Service Rates

The following is a list of key changes proposed for General Service rates:

- Simplification of distribution rates to one uniform tariff design for the FirstEnergy Ohio utility companies
- Reduction in the number of rate blocks
- Conversion from a declining block structure to a flat structure
- Creation of a Business Distribution Credit Rider (mentioned above)
- Standardization of Service Charges and power factor

- charges across the FirstEnergy Ohio utility companies
- Standardization on demand-only distribution pricing
- Changes in rate applicability based on service voltage rather than usage

Changes in Electric Service Regulations
(formerly Standard Rules and Regulations)

There are three categories of changes made to the Electric Service Regulations ("Regulations"). The first category is changes made in order to make the Regulations uniform across the three First Energy Ohio utility companies. The second category consists of changes made to clarify language and thereby aid customer understanding of the Regulations. The third category relates to changes that better align charges with actual costs. This last category includes an increase to the reconnection charge, the returned payment charge and the meter test charge. In addition, a provision for an annual automatic increase to certain charges based on the Consumer Price Index (CPI) has been added.

The above proposed provisions, rates, and charges are subject to changes, including changes as to amount and form, by the Commission following a public hearing on the filed Application. Recommendations which differ from the filed Application may be made by the Staff of the Commission or by intervening parties and may be adopted by the Commission.

Any person, firm, corporation or association may file, pursuant to Section 4909.19 of the Revised Code, an objection to such proposed increased rates by alleging that such proposals are unjust and discriminatory or unreasonable.

Any interested party seeking detailed information with respect to all affected rates, charges, regulations, and practices may inspect a copy of the application (including supporting schedules and present and proposed rate sheets) at the offices of the Commission at 180 East Broad Street, 13th floor, Columbus, Ohio, 43215-3793; visit the Commission's web site at <http://www.pucio.ohio.gov>; select the DIS, input 07-051 in the case lookup box, and select the date the application was filed; or call the Commission at 1-800-686-7826. Additionally, a copy of the application and supporting documents may be viewed at the business office of the Company: The Cleveland Electric Illuminating Company, 6899 Miller Road, Brecksville, Ohio 44141.

Since the rates, prices, charges and other provisions in the Company's current electric rate schedules do not yield just and reasonable compensation to the Company for supplying electric distribution service and do not yield a just and reasonable return to the Company on the value of the property used in furnishing such electric distribution service, the Company requests the Commission:

- (a) Accept this Application and Exhibits for filing;
- (b) Find that this Application and the attached Schedules filed herewith and incorporated herein, are in accordance with Sections 4909.18, Ohio Revised Code, and Section 4901.7-01 of the Commission's Rules and Regulations;
- (c) Find that the current rates, prices and charges for electric service are unjust, unreasonable and insufficient to yield reasonable compensation to the Company for the electric distribution service rendered;
- (d) Find that the proposed rates, prices and charges are just and reasonable based upon the test period for the twelve months ending February 29, 2008, and approve such schedules in the form tendered herewith;
- (e) Approve the Company's requested accounting treatment;
- (f) Fix the date on which applicable services provided to customers are subject to the proposed rates at May 2009.

**NOTICE OF APPLICATION TO THE PUBLIC UTILITIES COMMISSION OF OHIO FOR AN
INCREASE IN ELECTRIC DISTRIBUTION RATES TO ALL JURISDICTIONAL CUSTOMERS
OF THE CLEVELAND ELECTRIC ILLUMINATING COMPANY**

TO WHOM IT MAY CONCERN:

Pursuant to the requirements of Ohio Revised Code Section 4909.19, The Cleveland Electric Illuminating Company ("Company") gives notice that on June 7, 2007, it filed with The Public Utilities Commission of Ohio ("Commission") an Application for authority to change its electric rates and charges in incorporated communities and the unincorporated territory within its service area, which includes all or part of Ashtabula, Cuyahoga, Geauga, Lake, Lorain, Medina, Portage, Summit, and Trumbull Counties in Ohio. Such Application has been assigned Case Nos. 07-551-EL-AIR, 07-552-EL-ATA, 07-553-EL-AAM and 07-554-EL-UNC by the Commission. The substance of the Application follows.

In this Application the Company proposes to make changes and increases in electric distribution rates applicable to customers within the Company's service territory effective May 2009. Since the Company's last request for an increase in distribution rates in 1995, the Company's operating costs to provide electric service to customers have increased significantly. Moreover, pursuant to prior Commission Orders, the Company has been deferring recovery of certain costs. As a result, this filing includes expenses related to distribution operations, recovery of investments in distribution infrastructure and fuel charges that were deferred under prior rate orders.

The average increase in total rate that each rate schedule would bear over the present rates if the proposed increase is granted in full would be: **

Residential	3.9%
Commercial	8.4%
Industrial	5.9%

Total Company 6.0%

** This increase would be offset by a reduction in charges related to electric restructuring in Ohio.

This Application is being filed so as to generate sufficient revenues for the Company to pay distribution-related operating expenses, service outstanding debt balances, and earn an adequate return on property used in providing electric distribution service to customers. However, when combined with other previously approved changes in regulatory charges, the rates requested in this Application will result in an overall reduction in the regulated portion of customer bills.

The Company proposes to change its current rate schedules to those shown below and among other things, eliminate customer class specific rate schedules and replace them with voltage based schedules. The proposed schedules better match how the distribution system is designed, built and operated and reflects how customers are physically connected to and take service from our system. Accordingly, many of the current rate schedules are being eliminated, with customers currently taking service under these schedules being transferred to one of the new proposed schedules.

The new rate classifications proposed in the Application are as follows:

Residential schedule (RS)

General Service schedules:

- General Service Secondary (GS)
- General Service Primary (GP)
- General Service Sub-transmission (GSU)
- General Service Transmission (GT)

Lighting schedules:

- Street Lighting (STL)
- Traffic Lighting (TRF)
- Private Outdoor Lighting (POL)

In addition to these changes, the Company is proposing the following new electric service riders:

- Residential Distribution Credit Rider, which provides a reduction to distribution charges for certain electric loads so as to mitigate the effects of changes in rate design.

- Business Distribution Credit Rider, which provides a reduction to distribution charges for certain electric loads so as to mitigate the effects of changes in rate design.

- Demand Side Management ("DSM") Rider, which creates a mechanism through which certain approved DSM costs are to be recovered and reconciled semi-annually.

The Company is also proposing certain modifications to the following rider currently in effect:

- State kWh Tax Rider, which modifies and renames the Company's current State and Local Tax Rider and eliminates charges for local taxes that are currently included in base rates.

In addition to the rate relief described above, the Company also asks the Commission to authorize the following accounting treatment:

- Depreciation: The Company has determined that certain modifications to depreciation rates are warranted and requests that depreciation rates proposed in this proceeding be approved by the Commission.

- Deferral of Storm Related Costs: The Company requests permission to defer storm restoration and repair costs in excess of those included in base rates.

Changes in Rate Design

The Company's basic rate design has been in place since its last base rate case in 1995. Accordingly, the Company is proposing to update the existing rate design with the goal of:

- Simplifying distribution rate designs of the FirstEnergy Ohio utility companies from three different tariffs to one uniform set of schedules
- Implementing rate designs that focus on distribution service and discontinue concepts inherent in the legacy bundled rate design
- Implementing distribution rates that recover fixed costs associated with the infrastructure needed to deliver electricity to customers
- Incorporating gradualism in managing customer impacts while simplifying and consolidating tariff design

Residential Rates

The following is a list of key changes proposed for Residential rates:

- Creation of a single distribution rate schedule for all residential customers
- Creation of a Residential Distribution Credit Rider (mentioned above)
- Conversion from existing multiple block and declining block designs to a simple two block structure that is consistent across all companies
- Elimination of the Percentage of Income Payment Plan ("PIPP")

Note - Customers participating in the PIPP program will continue to have their PIPP payment calculated based on income.

General Service Rates

The following is a list of key changes proposed for General Service rates:

- Simplification of distribution rates to one uniform tariff design for the FirstEnergy Ohio utility companies
- Reduction in the number of rate blocks
- Conversion from a declining block structure to a flat structure
- Creation of a Business Distribution Credit Rider (mentioned above)
- Standardization of Service Charges and power factor

- charges across the FirstEnergy Ohio utility companies
- Standardization on demand-only distribution pricing
- Changes in rate applicability based on service volt rather than usage

**Changes in Electric Service Regulations
(formerly Standard Rules and Regulations)**

There are three categories of changes made to the Service Regulations ("Regulations"). The first category consists of changes made in order to make the Regulations uniform across the three FirstEnergy Ohio utility companies. The second category consists of changes made to clarify language and thereby aid customer understanding of Regulations. The third category relates to changes to better align charges with actual costs. This last category includes an increase to the reconnection charge, the returned payment charge and the meter test charge, addition, a provision for an annual automatic increase in certain charges based on the Consumer Price Index has been added.

The above proposed provisions, rates, and charges are subject to changes, including changes as to amount and form, by the Commission following a public hearing on the filed Application. Recommendations which differ from the filed Application may be made by the Staff of the Commission or by intervening parties and may be adopted by the Commission.

Any person, firm, corporation or association may file, pursuant to Section 4909.19 of the Revised Code, an objection to such proposed increased rates by alleging that such proposals are unjust and discriminatory or unreasonable. Any interested party seeking detailed information with respect to all affected rates, charges, regulations, and practices may inspect a copy of the application (including supporting schedules and present and proposed rate sheets) at the offices of the Commission at 180 East Street, 13th floor, Columbus, Ohio, 43215-3743, visit the Commission's web site at <http://www.pucrc.ohio.gov>, select DSI, input 07-0551 in the case lookup box, and select date the application was filed; or call the Commission at 1-800-686-7826. Additionally, a copy of the applicant supporting documents may be viewed at the business office of the Company: The Cleveland Electric Illuminating Company, 6898 Miller Road, Bracksville, Ohio 44141.

Since the rates, prices, charges and other provisions in Company's current electric rate schedules do not yield a reasonable compensation to the Company for supplying electric distribution service and do not yield a just and reasonable return to the Company on the value of the property used in furnishing such electric distribution service, the Company requests the Commission:

- (a) Accept this Application and Exhibits for filing;
- (b) Find that this Application and the attached Schedule filed herewith and incorporated herein, are in accordance with Sections 4909.18, Ohio Revised Code, and Section 4901-7-01 of the Commission's Rules and Regulations;
- (c) Find that the current rates, prices and charges for electric service are unjust, unreasonable and insufficient to yield reasonable compensation to the Company for the electric distribution service rendered;
- (d) Find that the proposed rates, prices and charges are just and reasonable based upon the test period for the twelve months ending February 28, 2008, and approve such schedules in the form tendered herewith;
- (e) Approve the Company's requested accounting treatment;
- (f) Fix the date on which applicable services provided to customers are subject to the proposed rates at May 2009.

NOTICE OF APPLICATION TO THE PUBLIC UTILITIES COMMISSION OF OHIO FOR AN INCREASE IN ELECTRIC DISTRIBUTION RATES TO ALL JURISDICTIONAL CUSTOMERS OF THE CLEVELAND ELECTRIC ILLUMINATING COMPANY

TO WHOM IT MAY CONCERN:

Pursuant to the requirements of Ohio Revised Code Section 4909.19, The Cleveland Electric Illuminating Company ("Company") gives notice that on June 7, 2007, it filed with The Public Utilities Commission of Ohio ("Commission") an Application for authority to change its electric rates and charges in incorporated communities and the unincorporated territory within its service area, which includes all or part of Ashtabula, Cuyahoga, Geauga, Lake, Lorain, Medina, Portage, Summit, and Trumbull Counties in Ohio. Such Application has been assigned Case Nos. 07-551-EL-AIR, 07-552-EL-ATA, 07-553-EL-AAM and 07-554-EL-UNC by the Commission. The substance of the Application follows.

In this Application the Company proposes to make changes and increases in electric distribution rates applicable to customers within the Company's service territory effective May 2009. Since the Company's last request for an increase in distribution rates in 1998, the Company's operating costs to provide electric service to customers have increased significantly. Moreover, pursuant to prior Commission Orders, the Company has been deferring recovery of certain costs. As a result, this filing includes expenses related to distribution operations, recovery of investments in distribution infrastructure and fuel charges that were deferred under prior rate orders.

The average increase in total rate that each rate schedule would bear over the present rates if the proposed increase is granted in full would be:***

Residential	3.9%
Commercial	8.4%
Industrial	5.9%
Total Company	6.0%

*** This increase would be offset by a reduction in charges related to electric restructuring in Ohio.

This Application is being filed so as to generate sufficient revenues for the Company to pay distribution-related operating expenses, service outstanding debt balances, and earn an adequate return on property used in providing electric distribution service to customers. However, when combined with other previously approved changes in regulatory charges, the rates requested in this Application would result in an overall reduction in the regulated portion of customer bills.

The Company proposes to change its current rate schedules to those shown below and among other things, eliminate customer class specific rate schedules and replace them with voltage based schedules. The proposed schedules better match how the distribution system is designed, built and operated and reflects how customers are physically connected to and take service from our system. Accordingly, many of the current rate schedules are being eliminated, with customers currently taking service under these schedules being transferred to one of the new proposed schedules.

The new rate classifications proposed in the Application are as follows:

Residential schedule (RS)
General Service schedules:
General Service Secondary (GS)
General Service Primary (GP)
General Service Sub-transmission (GSU)
General Service Transmission (GT)

Lighting schedules:
Street Lighting (STL)
Traffic Lighting (TRF)
Private Outdoor Lighting (POL)

In addition to these changes, the Company is proposing the following new electric service riders:

- Residential Distribution Credit Rider, which provides a reduction to distribution charges for certain electric loads so as to mitigate the effects of changes in rate design.
- Business Distribution Credit Rider, which provides a reduction to distribution charges for certain electric loads so as to mitigate the effects of changes in rate design.
- Demand Side Management ("DSM") Rider, which creates a mechanism through which certain approved DSM costs are to be recovered and reconciled semi-annually.

The Company is also proposing certain modifications to the following rider currently in effect:

- State kWh Tax Rider, which modifies and renames the Company's current State and Local Tax Rider and eliminates charges for local taxes that are currently included in base rates.

In addition to the rate relief described above, the Company also asks the Commission to authorize the following accounting treatment:

- Depreciation: The Company has determined that certain modifications to depreciation rates are warranted and requests that depreciation rates proposed in this proceeding be approved by the Commission.
- Deferral of Storm Related Costs: The Company requests permission to defer storm restoration and repair costs in excess of those included in base rates.

Changes In Rate Design

The Company's basic rate design has been in place since its last base rate case in 1998. Accordingly, the Company is proposing to update the existing rate design with the goal of:

- simplifying distribution rate designs of the FirstEnergy Ohio utility companies from three different tariffs to one uniform set of schedules
- implementing rate designs that focus on distribution service and discontinue concepts inherent in the legacy bundled rate design
- Implementing distribution rates that recover fixed costs associated with the infrastructure needed to deliver electricity to customers
- incorporating gradualism in managing customer impacts while simplifying and consolidating tariff design

Residential Rates

The following is a list of key changes proposed for Residential rates:

- Creation of a single distribution rate schedule for all residential customers
- Creation of a Residential Distribution Credit Rider (mentioned above)
- Conversion from existing multiple block and declining block designs to a simple two block structure that is consistent across all companies
- Elimination of the Percentage of Income Payment Plan ("PIPP")

Note: Customers participating in the PIPP program will continue to have their PIPP payment circled based on income

General Service Rates

The following is a list of key changes proposed for General Service rates:

- Simplification of distribution rates to one uniform tariff design for the FirstEnergy Ohio utility companies
- Reduction in the number of rate blocks
- Conversion from a declining block structure to a flat structure
- Creation of a Business Distribution Credit Rider (mentioned above)
- Standardization of Service Charges and power factor

- charges across the FirstEnergy Ohio utility companies
- Standardization on demand-only distribution pricing
- Changes in rate applicability based on service volt rather than usage

Changes In Electric Service Regulations (formerly Standard Rules and Regulations)

There are three categories of changes made to the Service Regulations ("Regulations"). The first category consists of changes made to clarify language and thereby aid customer understanding of Regulations. The second category relates to changes that better align charges with actual costs. This last category includes an increase to the reconnection charge, the returned payment charge and the meter test charge, addition, a provision for an annual automatic increase in certain charges based on the Consumer Price Index has been added.

The above proposed provisions, rates, and charges are subject to changes, including changes as to amount or form, by the Commission following a public hearing on the filed Application. Recommendations which differ from the filed Application may be made by the Staff of the Commission or by intervening parties and may be adopted by the Commission.

Any person, firm, corporation or association may file, pursuant to Section 4909.19 of the Revised Code, an objection to such proposed increased rates by alleging that such proposals are unjust and discriminatory or unreasonable. Any interested party seeking detailed information with respect to all affected rates, charges, regulations, and practices may inspect a copy of the application (including supporting schedules and present and proposed rate sheets) at the offices of the Commission at 180 East Street, 13th floor, Columbus, Ohio, 43215-3793; visit the Commission's web site at <http://www.pucrc.ohio.gov>; se DIS, input 07-0551 in the case lookup box, and select date the application was filed; or call the Commission at 1-800-666-7826. Additionally, a copy of the application supporting documents may be viewed at the business office of the Company: The Cleveland Electric Illuminating Company, 6890 Miller Road, Brecksville, Ohio 44141.

Since the rates, prices, charges and other provisions in Company's current electric rate schedules do not yield a reasonable compensation to the Company for supplying electric distribution service and do not yield a just and reasonable return to the Company on the value of the property used in furnishing such electric distribution service, the Company requests the Commission:

- (a) Accept this Application and Exhibits for filing;
- (b) Find that this Application and the attached Schedule filed herewith and incorporated herein, are in accordance with Sections 4909.10, Ohio Revised Code, and Sect. 4901-7-01 of the Commission's Rules and Regulations;
- (c) Find that the current rates, prices and charges for electric services are unjust, unreasonable and insufficient to yield reasonable compensation to the Company for the electric distribution service rendered;
- (d) Find that the proposed rates, prices and charges are just and reasonable based upon the test period for the twelve months ending February 29, 2008, and approve such schedules in the form tendered herewith;
- (e) Approve the Company's requested accounting treatment;
- (f) Fix the date on which applicable services provided to customers are subject to the proposed rates at May 2009.

**NOTICE OF APPLICATION TO THE PUBLIC UTILITIES COMMISSION OF OHIO FOR AN
INCREASE IN ELECTRIC DISTRIBUTION RATES TO ALL JURISDICTIONAL CUSTOMERS
OF THE CLEVELAND ELECTRIC ILLUMINATING COMPANY**

TO WHOM IT MAY CONCERN:

Pursuant to the requirements of Ohio Revised Code Section 4909.19, The Cleveland Electric Illuminating Company ("Company") gives notice that on June 7, 2007, it filed with The Public Utilities Commission of Ohio ("Commission") an Application for authority to change its electric rates and charges in incorporated communities and the unincorporated territory within its service area, which includes all or part of Ashtabula, Cuyahoga, Geauga, Lake, Lorain, Medina, Portage, Summit, and Trumbull Counties in Ohio. Such Application has been assigned Case Nos. 07-551-EL-AIR, 07-552-EL-ATA, 07-553-EL-AAM and 07-554-EL-UNC by the Commission. The substance of the Application follows.

In this Application the Company proposes to make changes and increases in electric distribution rates applicable to customers within the Company's service territory effective May 2008. Since the Company's last request for an increase in distribution rates in 1996, the Company's operating costs to provide electric service to customers have increased significantly. Moreover, pursuant to prior Commission Orders, the Company has been deferring recovery of certain costs. As a result, this filing includes expenses related to distribution operations, recovery of investments in distribution infrastructure and fuel charges that were deferred under prior rate orders.

The average increase in total rate that each rate schedule would bear over the present rates if the proposed increase is granted in full would be:***

Residential	3.9%
Commercial	8.4%
Industrial	5.9%

Total Company 6.0%

*** This increase would be set by a reduction in charges related to electric restructuring in Ohio.

This Application is being filed so as to generate sufficient revenues for the Company to pay distribution-related operating expenses, service outstanding debt balances, and earn an adequate return on property used in providing electric distribution service to customers. However, when combined with other previously approved changes in regulatory charges, the rates requested in this Application would result in an overall reduction in the regulated portion of customer bills.

The Company proposes to change its current rate schedules to those shown below and among other things, eliminate customer class specific rate schedules and replace them with voltage based schedules. The proposed schedules better match how the distribution system is designed, built and operated and reflect how customers are physically connected to and take service from our system. Accordingly, many of the current rate schedules are being eliminated, with customers currently taking service under these schedules being transferred to one of the new proposed schedules.

The new rate classifications proposed in the Application are as follows:

Residential schedule (RS)

General Service schedules:

- General Service Secondary (GS)
- General Service Primary (GP)
- General Service Sub-transmission (GSU)
- General Service Transmission (GT)

Lighting schedules:

- Street Lighting (STL)
- Traffic Lighting (TRF)
- Private Outdoor Lighting (POL)

In addition to these changes, the Company is proposing the following new electric service riders:

- Residential Distribution Credit Rider, which provides a reduction to distribution charges for certain electric loads so as to mitigate the effects of changes in rate design.
- Business Distribution Credit Rider, which provides a reduction to distribution charges for certain electric loads so as to mitigate the effects of changes in rate design.
- Demand Side Management ("DSM") Rider, which creates a mechanism through which certain approved DSM costs are to be recovered and reconciled semi-annually.

The Company is also proposing certain modifications to the following rider currently in effect:

- State kWh Tax Rider, which modifies and renames the Company's current State and Local Tax Rider and eliminates charges for local taxes that are currently included in base rates.

In addition to the rate relief described above, the Company also asks the Commission to authorize the following accounting treatment:

- Depreciation: *The Company has determined that certain modifications to depreciation rates are warranted and requests that depreciation rates proposed in this proceeding be approved by the Commission.*

- Deferral of Storm Related Costs: The Company requests permission to defer storm restoration and repair costs in excess of those included in base rates.

Changes In Rate Design

The Company's basic rate design has been in place since its last base rate case in 1995. Accordingly, the Company is proposing to update the existing rate design with the goal of:

- Simplifying distribution rate designs of the FirstEnergy Ohio utility companies from three different tariffs to one uniform set of schedules
- Implementing rate designs that focus on distribution service and discontinuing concepts inherent in the legacy bundled rate design
- Implementing distribution rates that recover fixed costs associated with the infrastructure needed to deliver electricity to customers
- Incorporating gradualism in managing customer impacts while simplifying and consolidating tariff design

Residential Rates

The following is a list of key changes proposed for Residential rates:

- Creation of a single distribution rate schedule for all residential customers
- Creation of a Residential Distribution Credit Rider (mentioned above)
- Conversion from existing multiple block and declining block designs to a simple two block structure that is consistent across all companies
- Elimination of the Percentage of Income Payment Plan ("PIPP")

Note - Customers participating in the PIPP program will continue to have their PIPP payment calculated based on income

General Service Rates

The following is a list of key changes proposed for General Service rates:

- Simplification of distribution rates to one uniform tariff design for the FirstEnergy Ohio utility companies
- Reduction in the number of rate blocks
- Conversion from a declining block structure to a flat structure
- Creation of a Business Distribution Credit Rider (mentioned above)
- Standardization of Service Charges and power factor

- charges across the FirstEnergy Ohio utility companies
- Standardization on demand-only distribution pricing
- Changes in rate applicability based on service volt rather than usage

Changes in Electric Service Regulations

(formerly Standard Rules and Regulations)

There are three categories of changes made to the Service Regulations ("Regulations"). The first category changes made in order to make the Regulations uniform across the three FirstEnergy Ohio utility companies. The second category consists of changes made to clarify language and thereby aid customer understanding of Regulations. The third category relates to changes to better align charges with actual costs. This last category includes an increase to the reconnection charge, the returned payment charge and the meter test charge. In addition, a provision for an annual automatic increase in certain charges based on the Consumer Price Index has been added.

The above proposed provisions, rates, and charges are subject to changes, including changes as to amount and form, by the Commission following a public hearing on the filed Application. Recommendations which differ from the filed Application may be made by the Staff of the Commission or by intervening parties and may be adopted by the Commission.

Any person, firm, corporation or association may file, pursuant to Section 4909.19 of the Revised Code, an objection such proposed increased rates by alleging that such proposals are unjust and discriminatory or unreasonable. Any interested party seeking detailed information with respect to all affected rates, charges, regulations, and practices may inspect a copy of the application (including supporting schedules and present and proposed rate sheets) at the offices of the Commission at 180 East 9th Street, 13th floor, Columbus, Ohio, 43215-3703; visit the Commission's web site at <http://www.puc.ohio.gov>; select DIS, input 07-0551 in the case lookup box, and select date the application was filed; or call the Commission at 1-800-585-7828. Additionally, a copy of the application supporting documents may be viewed at the business office of the Company: The Cleveland Electric Illuminating Company, 6956 Miller Road, Brecksville, Ohio 44141.

Since the rates, prices, charges and other provisions in Company's current electric rate schedules do not yield a reasonable compensation to the Company for supplying electric distribution service and do not yield a just and reasonable return to the Company on the value of the property used in furnishing such electric distribution service, the Company requests the Commission:

- (a) Accept this Application and Exhibits for filing;
- (b) Find that this Application and the attached Schedule filed herewith and incorporated herein, are in accordance with Sections 4909.18, Ohio Revised Code, and Sec. 4901-7-01 of the Commission's Rules and Regulations;
- (c) Find that the current rates, prices and charges for electric service are unjust, unreasonable and insufficient to yield reasonable compensation to the Company for the electric distribution service rendered;
- (d) Find that the proposed rates, prices and charges are just and reasonable based upon the test period for twelve months ending February 29, 2008, and approve such schedules in the form tendered herewith;
- (e) Approve the Company's requested accounting treatment;
- (f) Find that the date on which applicable services provided to customers are subject to the proposed rates at May 2008.

**NOTICE OF APPLICATION TO THE PUBLIC UTILITIES COMMISSION OF OHIO FOR AN
INCREASE IN ELECTRIC DISTRIBUTION RATES TO ALL JURISDICTIONAL CUSTOMERS
OF THE CLEVELAND ELECTRIC ILLUMINATING COMPANY**

TO WHOM IT MAY CONCERN:

Pursuant to the requirements of Ohio Revised Code Section 4909.19, The Cleveland Electric Illuminating Company ("Company") gives notice that on June 7, 2007, it filed with The Public Utilities Commission of Ohio ("Commission") an Application for authority to change its electric rates and charges in incorporated communities and the unincorporated territory within its service area, which includes all or part of Ashtabula, Cuyahoga, Geauga, Lake, Lorain, Medina, Portage, Summit, and Trumbull Countys in Ohio. Such Application has been assigned Case Nos. 07-551-EL-AIR, 07-552-EL-ATA, 07-553-EL-AAM and 07-554-EL-UNC by the Commission. The substance of the Application follows.

In this Application the Company proposes to make changes and increases in electric distribution rates applicable to customers within the Company's service territory effective May 2009. Since the Company's last request for an increase in distribution rates in 1995, the Company's operating costs to provide electric service to customers have increased significantly. Moreover, pursuant to prior Commission Orders, the Company has been deferring recovery of certain costs. As a result, this filing includes expenses related to distribution operations, recovery of investments in distribution infrastructure and fuel charges that were deferred under prior rate orders.

The average increase in total rate that each rate schedule would bear over the present rates if the proposed increase is granted in full would be:***

Residential	3.9%
Commercial	8.4%
Industrial	5.9%

Total Company 6.0%

*** This increase would be offset by a reduction in charges related to electric restructuring in Ohio.

This Application is being filed so as to generate sufficient revenues for the Company to pay distribution-related operating expenses, service outstanding debt balances, and earn an adequate return on property used in providing electric distribution service to customers. However, when combined with other previously approved changes in regulatory charges, the rates requested in this Application would result in an overall reduction in the regulated portion of customer bills.

The Company proposes to change its current rate schedules to those shown below and among other things, eliminate customer class specific rate schedules and replace them with voltage based schedules. The proposed schedules better match how the distribution system is designed, built and operated and reflects how customers are physically connected to and take service from our system. Accordingly, many of the current rate schedules are being eliminated, with customers currently taking service under these schedules being transferred to one of the new proposed schedules.

The new rate classifications proposed in the Application are as follows:

Residential schedule (RS)
General Service schedules:
General Service Secondary (GS)
General Service Primary (GP)
General Service Sub-transmission (GSU)
General Service Transmission (GT)

Lighting schedules:
Street Lighting (STL)
Traffic Lighting (TRF)
Private Outdoor Lighting (POL)

In addition to these changes, the Company is proposing the following new electric service riders:

- Residential Distribution Credit Rider, which provides a reduction to distribution charges for certain electric loads so as to mitigate the effects of changes in rate design.
- Business Distribution Credit Rider, which provides a reduction to distribution charges for certain electric loads so as to mitigate the effects of changes in rate design.
- Demand Side Management ("DSM") Rider, which creates a mechanism through which certain approved DSM costs are to be recovered and reconciled semi-annually.

The Company is also proposing certain modifications to the following rider currently in effect:

- State kWh Tax Rider, which modifies and renames the Company's current State and Local Tax Rider and eliminates charges for local taxes that are currently included in base rates.

In addition to the rate rider described above, the Company also asks the Commission to authorize the following accounting treatment:

- Depreciation: The Company has determined that certain modifications to depreciation rates are warranted and requests that depreciation rates proposed in this proceeding be approved by the Commission.
- Deferral of Storm Related Costs: The Company requests permission to defer storm restoration and repair costs in excess of those included in base rates.

Changes In Rate Design

The Company's basic rate design has been in place since its last base rate case in 1995. Accordingly, the Company is proposing to update the existing rate design with the goal of:

- Simplifying distribution rate designs of the FirstEnergy Ohio utility companies from three different tariffs to one uniform set of schedules
- Implementing rate designs that focus on distribution service and discontinue concepts inherent in the legacy bundled rate design
- Implementing distribution rates that recover fixed costs associated with the infrastructure needed to deliver electricity to customers
- Incorporating gradualism in managing customer impacts while simplifying and consolidating tariff design

Residential Rates

The following is a list of key changes proposed for Residential rates:

- Creation of a single distribution rate schedule for all residential customers
- Creation of a Residential Distribution Credit Rider (mentioned above)
- Conversion from existing multiple block and declining block designs to a simple two block structure that is consistent across all companies
- Elimination of the Percentage of Income Payment Plan ("PIPP")

Note - Customers participating in the PIPP program will continue to have their PIPP payment calculated based on income.

General Service Rates

The following is a list of key changes proposed for General Service rates:

- Simplification of distribution rates to one uniform tariff design for the FirstEnergy Ohio utility companies
- Reduction in the number of rate blocks
- Conversion from a declining block structure to a flat structure
- Creation of a Business Distribution Credit Rider (mentioned above)
- Standardization of Service Charges and power factor

- charges across the FirstEnergy Ohio utility companies
- Standardization on demand-only distribution pricing
- Changes in rate applicability based on service volt rather than usage

Changes In Electric Service Regulations (Formerly Standard Rules and Regulations)

There are three categories of changes made to the Service Regulations ("Regulations"). The first category consists of changes made in order to make the Regulations uniform across the three FirstEnergy Ohio utility companies, second category consists of changes made to clarify language and thereby aid customer understanding of the Regulations. The third category relates to changes to better align charges with actual costs. This last category includes an increase to the reconnection charge, the returned payment charge and the meter test charge. In addition, a provision for an annual automatic increase certain charges based on the Consumer Price Index has been added.

The above proposed provisions, rates, and charges are subject to changes, including changes as to amount and form, by the Commission following a public hearing on the filed Application. Recommendations which differ from the filed Application may be made by the Staff of the Commission or by intervening parties and may be adopted by the Commission.

Any person, firm, corporation or association may file, pursuant to Section 4909.19 of the Revised Code, an objection to such proposed increased rates by alleging that such proposals are unjust and discriminatory or unreasonable. Any interested party seeking detailed information with respect to all affected rates, charges, regulations, and practices may inspect a copy of the application (including supporting schedules and present and proposed rate sheets) at the offices of the Commission at 1180 East Street, 13th floor, Columbus, Ohio, 43215-3793; visit the Commission's web site at <http://www.pucco.ohio.gov>; se DIS, input 07-0551 in the case lookup box, and select date the application was filed; or call the Commission at 1-800-686-7826. Additionally, a copy of the application and supporting documents may be viewed at the business office of the Company: The Cleveland Electric Illuminating Company, 6890 Miller Road, Brecksville, Ohio 44141.

Since the rates, prices, charges and other provisions in the Company's current electric rate schedules do not yield a reasonable compensation to the Company for supplying electric distribution service and do not yield a just and reasonable return to the Company on the value of the property used in furnishing such electric distribution service, the Company requests the Commission:

- Accept the Application and Exhibit for filing;
- Find that this Application and the attached Schedule filed herewith and Incorporated herein, are in accordance with Sections 4909.18, Ohio Revised Code, and Section 4901-7-01 of the Commission's Rules and Regulations;
- Find that the current rates, prices and charges for electric service are unjust, unreasonable and insufficient to yield reasonable compensation to the Company for the electric distribution service rendered;
- Find that the proposed rates, prices and charges are just and reasonable based upon the test period for the twelve months ending February 29, 2008, and approve such schedules in the form tendered herewith;
- Approve the Company's requested accounting treatment;
- Fix the date on which applicable services provided to customers are subject to the proposed rates at May 2009.

NOTICE OF APPLICATION TO THE PUBLIC UTILITIES COMMISSION OF OHIO FOR AN INCREASE IN ELECTRIC DISTRIBUTION RATES TO ALL JURISDICTIONAL CUSTOMERS OF THE CLEVELAND ELECTRIC ILLUMINATING COMPANY

TO WHOM IT MAY CONCERN:

Pursuant to the requirements of Ohio Revised Code Section 4909.19, The Cleveland Electric Illuminating Company ("Company") gives notice that on June 7, 2007, it filed with The Public Utilities Commission of Ohio ("Commission") an Application for authority to change its electric rates and charges in incorporated communities and the unincorporated territory within its service area, which includes all or part of Ashtabula, Cuyahoga, Geauga, Lake, Lorain, Medina, Portage, Summit, and Trumbull Counties in Ohio. Such Application has been assigned Case Nos. 07-551-EL-AIR, 07-552-EL-ATA, 07-553-EL-AAM and 07-554-EL-UNC by the Commission. The substance of the Application follows.

In this Application the Company proposes to make changes and increases in electric distribution rates applicable to customers within the Company's service territory effective May 2009. Since the Company's last request for an increase in distribution rates in 1996, the Company's operating costs to provide electric service to customers have increased significantly. Moreover, pursuant to prior Commission Orders, the Company has been deferring recovery of certain costs. As a result, this filing includes expenses related to distribution operations, recovery of investments in distribution infrastructure and fuel charges that were deferred under prior rate orders.

The average increase in total rate that each rate schedule would bear over the present rates if the proposed increase is granted in full would be***

Residential	3.9%
Commercial	8.4%
Industrial	5.9%
Total Company	6.0%

*** This increase would be offset by a reduction in charges related to electric restructuring in Ohio.

This Application is being filed so as to generate sufficient revenues for the Company to pay distribution-related operating expenses, service outstanding debt balances, and earn an adequate return on property used in providing electric distribution service to customers. However, when combined with other previously approved changes in regulatory charges, the rates requested in this Application would result in an overall reduction in the regulated portion of customer bills.

The Company proposes to change its current rate schedules as those shown below and among other things, eliminate customer class specific rate schedules and replace them with voltage based schedules. The proposed schedules better match how the distribution system is designed, built and operated and reflects how customers are physically connected to and take service from our system. Accordingly, many of the current rate schedules are being eliminated, with customers currently taking service under these schedules being transferred to one of the new proposed schedules.

The new rate classifications proposed in the Application are as follows:

Residential schedule (RS)

General Service schedules:

- General Service Secondary (GS)
- General Service Primary (GP)
- General Service Sub-transmission (GSU)
- General Service Transmission (GT)

Lighting schedules:

- Street Lighting (STL)
- Traffic Lighting (TRF)
- Private Outdoor Lighting (POL)

In addition to these changes, the Company is proposing the following new electric service riders:

- Residential Distribution Credit Rider, which provides a reduction to distribution charges for certain electric loads so as to mitigate the effects of changes in rate design;
- Business Distribution Credit Rider, which provides a reduction to distribution charges for certain electric loads so as to mitigate the effects of changes in rate design;
- Demand Side Management ("DSM") Rider, which creates a mechanism through which certain approved DSM costs are to be recovered and reconciled semi-annually.

The Company is also proposing certain modifications to the following rider currently in effect:

- State kWh Tax Rider, which modifies and renames the Company's current State and Local Tax Rider and eliminates charges for local taxes that are currently included in base rates.

In addition to the rate relief described above, the Company also asks the Commission to authorize the following accounting treatment:

- Depreciation: The Company has determined that certain modifications to depreciation rates are warranted and requests that depreciation rates proposed in this proceeding be approved by the Commission.
- Deferral of Storm Related Costs: The Company requests permission to defer storm restoration and repair costs in excess of those included in base rates.

- charges across the FirstEnergy Ohio utility compa
- Standardization on demand-only distribution pricin
- Changes in rate applicability based on service volv

Changes in Electric Service Regulations (formerly Standard Rules and Regulations)

There are three categories of changes made to the Service Regulations ("Regulations"). The first category consists of changes made in order to make the Regulations uniform across the three FirstEnergy Ohio utility companies. The second category consists of changes made to clarify language and thereby aid customer understanding of the Regulations. The third category relates to changes that better align charges with actual costs. This last category includes an increase to the reconnection charge, the returned payment charge and the meter test charge. In addition, a provision for an annual automatic increase in certain charges based on the Consumer Price Index has been added.

The above proposed provisions, rates, and charges are subject to changes, including changes as to amount and form, by the Commission following a public hearing on the filed Application. Recommendations which differ from the filed Application may be made by the Staff of the Commission or by intervening parties and may be adopted by the Commission.

Any person, firm, corporation or association may file, pursuant to Section 4909.19 of the Revised Code, an objection to such proposed increased rates by alleging that such proposals are unjust and discriminatory or unreasonable. Any interested party seeking detailed information with respect to all affected rates, charges, regulations, and practices may inspect a copy of the application (including supporting schedules and present and proposed rate sheets) at the offices of the Commission at 180 East 9th Street, 13th floor, Columbus, Ohio 43215-3793; visit the Commission's web site at <http://www.pucrc.ohio.gov>; at DLS, input 07-0551 in the case lookup box, and select date the application was filed; or call the Commission 1-800-666-7826. Additionally, a copy of the application supporting documents may be viewed at the business office of the Company, The Cleveland Electric Illuminating Company, 6896 Miller Road, Brecksville, Ohio 44141.

Since the rates, prices, charges and other provisions in the Company's current electric rate schedules do not yield a reasonable compensation to the Company for supplying electric distribution service and do not yield a just and reasonable return to the Company on the value of the property used in furnishing such electric distribution service, the Company requests the Commission:

- (a) Accept this Application and Exhibits for filing;
- (b) Find that this Application and the attached Schedule filed herewith and incorporated herein, are in accordance with Sections 4909.18, Ohio Revised Code, and Sect. 4901-7-01 of the Commission's Rules and Regulation;
- (c) Find that the current rates, prices and charges for electric service are unjust, unreasonable and insufficient to yield reasonable compensation to the Company for the electric distribution service rendered;
- (d) Find that the proposed rates, prices and charges are just and reasonable based upon the test period for twelve months ending February 29, 2008, and approve such schedules in the form tendered herewith;
- (e) Approve the Company's requested accounting treatment;
- (f) Fix the date on which applicable services provided to customers are subject to the proposed rates at May 2009.

**NOTICE OF APPLICATION TO THE PUBLIC UTILITIES COMMISSION OF OHIO FOR AN
INCREASE IN ELECTRIC DISTRIBUTION RATES TO ALL JURISDICTIONAL CUSTOMERS
OF THE CLEVELAND ELECTRIC ILLUMINATING COMPANY**

TO WHOM IT MAY CONCERN:

Pursuant to the requirements of Ohio Revised Code Section 4909.19, The Cleveland Electric Illuminating Company ("Company") gives notice that on June 7, 2007, it filed with The Public Utilities Commission of Ohio ("Commission") an application for authority to change its electric rates and charges in incorporated communities and the unincorporated territory within its service area which includes all or part of Ashtabula, Cuyahoga, Geauga, Lake, Lorain, Medina, Portage, Summit, and Trumbull Counties in Ohio. Such application has been assigned Case Nos. 07-581-EL-AIR, 07-582-EL-ATA, 07-583-EL-AAM and 07-584-EL-UNC by the Commission. The substance of the application follows.

In the application the Company proposes to make changes and increases in electric distribution rates applicable to customers within the Company's service territory effective May 2009. Since the Company's last request for an increase in distribution rates in 1996, the Company's operating costs to provide electric service to customers have increased significantly. Moreover, pursuant to prior Commission Orders, the Company has been deferring recovery of certain costs. As a result, this filing includes expenses related to distribution operations, recovery of investments in distribution infrastructure and fuel charges that were deferred under prior rate orders.

The average increase in total rate that each rate schedule would bear over the present rates if the proposed increase is granted in full would be:***

Residential	3.9%
Commercial	8.4%
Industrial	5.9%
Total Company	6.0%

*** This increase would be offset by a reduction in charges related to electric restructuring in Ohio.

This application is being filed so as to generate sufficient revenues for the Company to pay distribution-related operating expenses, service outstanding debt balances, and earn an adequate return on property used in providing electric distribution service to customers. However, when combined with other previously approved changes in regulatory charges, the rates requested in this application would result in an overall reduction in the regulated portion of customer bills.

The Company proposes to change its current rate schedules to those shown below and among other things, eliminate customer class specific rate schedules and replace them with voltage based schedules. The proposed schedules better match how the distribution system is designed, built and operated and reflects how customers are physically connected to and take service from our system. Accordingly, many of the current rate schedules are being eliminated, with customers currently taking service under these schedules being transferred to one of the new proposed schedules.

The new rate classifications proposed in the application are as follows:

Residential schedule (RS)

General Service schedules:

- General Service Secondary (GS)
- General Service Primary (GP)
- General Service Sub-transmission (GSU)
- General Service Transmission (GT)

Lighting schedules:

- Street Lighting (SIL)
- Traffic Lighting (TRF)
- Private Outdoor Lighting (POL)

In addition to these changes, the Company is proposing the following new electric service riders:

- Residential Distribution Credit Rider, which provides a reduction to distribution charges for certain electric loads so as to mitigate the effects of changes in rate design.
- Business Distribution Credit Rider, which provides a reduction to distribution charges for certain electric loads so as to mitigate the effects of changes in rate design.
- Demand Side Management ("DSM") Rider, which creates a mechanism through which certain approved DSM costs are to be recovered and reconciled semi-annually.

The Company is also proposing certain modifications to the following rider currently in effect:

- State KWh Tax Rider, which modifies and renames the Company's current State and Local Tax Rider and eliminates charges for local taxes that are currently included in base rates.

In addition to the rate relief described above, the Company also asks the Commission to authorize the following accounting treatment:

- Depreciation: The Company has determined that certain modifications to depreciation rates are warranted and requests that depreciation rates proposed in this proceeding be approved by the Commission.
- Deferral of Storm Related Costs: The Company requests permission to defer storm restoration and repair costs in excess of those included in base rates.

Changes in Rate Design

The Company's basic rate design has been in place since its last base rate case in 1998. Accordingly, the Company is proposing to update the existing rate design with the goal of:

- Simplifying distribution rate designs of the FirstEnergy Ohio utility companies from three different tariffs to one uniform set of schedules
- Implementing rate designs that focus on distribution service and discontinuing concepts inherent in the legacy bundled rate design
- Implementing distribution rates that recover fixed costs associated with the infrastructure needed to deliver electricity to customers
- Incorporating gradualism in managing customer impacts while simplifying and consolidating tariff design

Residential Rates

The following is a list of key changes proposed for residential rates:

- Creation of a single distribution rate schedule for all residential customers
- Creation of a Residential Distribution Credit Rider (mentioned above)
- Conversion from existing multiple block and declining block designs to a simple two block structure that is consistent across all companies
- Elimination of the Percentage of Income Payment Plan ("PIPP")

Note - Customers participating in the PIPP program will continue to have their PIPP payment calculated based on income.

General Service Rates

The following is a list of key changes proposed for general service rates:

- Simplification of distribution rates to one uniform tariff design for the FirstEnergy Ohio utility companies
- Reduction in the number of rate blocks
- Conversion from a declining block structure to a flat structure
- Creation of a Business Distribution Credit Rider (mentioned above)
- Standardization of Service Charges and power factor

- charges across the FirstEnergy Ohio utility companies
- Standardization on demand-only distribution pricing
- Changes in rate applicability based on service volt rather than usage

**Changes in Electric Service Regulations
(Former Standard Rules and Regulations)**

There are three categories of changes made to the Service Regulations ("Regulations"). The first category consists of changes made in order to make the Regulations uniform across the three FirstEnergy Ohio utility companies. The second category consists of changes made to clarify language and thereby aid customer understanding of Regulations. The third category relates to changes that better align charges with actual costs. This last category includes an increase to the reconnection charge, the returned payment charge and the meter test charge, addition, a provision for an annual automatic increase in certain charges based on the Consumer Price Index has been added.

The above proposed provisions, rates, and charges are subject to changes, including changes as to amount and form, by the Commission following a public hearing of the application. Recommendations which differ from the application may be made by the Staff of the Commission or by intervening parties and may be adopted by the Commission.

Any person, firm, corporation or association may file, pursuant to Section 4909.19 of the Revised Code, an objection to such proposed increased rates by alleging that such proposals are unjust and discriminatory or unreasonable.

Any interested party seeking detailed information with respect to all affected rates, charges, regulations, and practices may inspect a copy of the application (including supporting schedules and present and proposed rate sheets) at the offices of the Commission at 180 East Street, 13th floor, Columbus, Ohio, 43215-3753; visit the Commission's web site at <http://www.pucrc.ohio.gov>, select DLS, input 07-0551 in the case lookup box, and select date the application was filed; or call the Commission at 1-800-686-7825. Additionally, a copy of the application supporting documents may be viewed at the business office of the Company: The Cleveland Electric Illuminating Company, 6896 Miller Road, Brecksville, Ohio 44141. Since the rates, prices, charges and other provisions in the Company's current electric rate schedules do not yield reasonable compensation to the Company for supplying electric distribution service and do not yield a just and reasonable return to the Company on the value of the property used in furnishing such electric distribution service, the Company requests the Commission:

- (a) Accept this Application and Exhibits for filing;
- (b) Find that this Application and the attached Schedule filed herewith and incorporated herein, are in accordance with Sections 4909.18, Ohio Revised Code, and Section 4901-7-01 of the Commission's Rules and Regulations;
- (c) Find that the current rates, prices and charges for electric service are unjust, unreasonable and insufficient to yield reasonable compensation to the Company for the electric distribution service rendered;
- (d) Find that the proposed rates, prices and charges are just and reasonable based upon the test period for the twelve months ending February 29, 2008, and approve such schedules in the form tendered herewith;
- (e) Approve the Company's requested accounting treatment;
- (f) Fix the date on which applicable services provided to customers are subject to the proposed rates at May 2009.

PUBLIC NOTICE

PUBLIC NOTICE

PUBLIC NOTICE

**NOTICE OF APPLICATION TO THE PUBLIC UTILITIES COMMISSION OF OHIO FOR AN
INCREASE IN ELECTRIC DISTRIBUTION RATES TO ALL JURISDICTIONAL CUSTOMERS
OF THE CLEVELAND ELECTRIC ILLUMINATING COMPANY**

TO WHOM IT MAY CONCERN:

Pursuant to the requirements of Ohio Revised Code Section 4909.19, The Cleveland Electric Illuminating Company ("Company") gives notice that on June 7, 2007, it filed with The Public Utilities Commission of Ohio ("Commission") an Application for authority to change its electric rates and charges in incorporated communities and the unincorporated territory within its service area, which includes all or part of Ashlawn, Cuyahoga, Geauga, Lake, Lorain, Medina, Portage, Summit, and Trumbull Counties in Ohio. Such Application has been assigned Case Nos. 07-551-EL-AIR, 07-552-EL-ATA, 07-553-EL-AAM and 07-554-EL-UNC by the Commission. The substance of the Application follows.

In this Application the Company proposes to make changes and increases in electric distribution rates applicable to customers within the Company's service territory effective May 2008. Since the Company's last request for an increase in distribution rates in 1996, the Company's operating costs to provide electric service to customers have increased significantly. Moreover, pursuant to prior Commission Orders, the Company has been deferring recovery of certain costs. As a result, this filing includes expenses related to distribution operations, recovery of investments in distribution infrastructure and fuel charges that were deferred under prior rate orders.

The average increase in total rate that each rate schedule would bear over the present rates if the proposed increase is granted in full would be:***

Residential	3.9%
Commercial	8.4%
Industrial	5.8%
Total Company	6.0%

*** This increase would be offset by a reduction in charges related to electric restructuring in Ohio.

This Application is being filed so as to generate sufficient revenues for the Company to pay distribution-related operating expenses, service outstanding debt balances, and earn an adequate return on property used in providing electric distribution service to customers. However, when combined with other previously approved changes in regulatory charges, the rates requested in this Application would result in an overall reduction in the regulated portion of customer bills.

The Company proposes to change its current rate schedules to those shown below and among other things, eliminate customer class specific rate schedules and replace them with voltage based schedules. The proposed schedules better match how the distribution system is designed, built and operated and reflects how customers are physically connected to and take service from our system. Accordingly, many of the current rate schedules are being eliminated, with customers currently taking service under those schedules being transferred to one of the new proposed schedules.

The new rate classifications proposed in the Application are as follows:

Residential schedule (RS)**General Service schedules:**

- General Service Secondary (GS)
- General Service Primary (GP)
- General Service Sub-transmission (GSU)
- General Service Transmission (GT)

Lighting schedules:

- Street Lighting (STL)
- Traffic Lighting (TRF)
- Private Outdoor Lighting (POL)

In addition to these changes, the Company is proposing the following new electric service riders:

- Residential Distribution Credit Rider, which provides a reduction to distribution charges for certain electric loads so as to mitigate the affects of changes in rate design.
- Business Distribution Credit Rider, which provides a reduction to distribution charges for certain electric loads so as to mitigate the affects of changes in rate design.
- Demand Side Management ("DSM") Rider, which creates a mechanism through which certain approved DSM costs are to be recovered and reconciled semi-annually.

The Company is also proposing certain modifications to the following rider currently in effect:

- State kWh Tax Rider, which modifies and replaces the Company's current State and Local Tax Rider and eliminates charges for local taxes that are currently included in base rates.

In addition to the rate relief described above, the Company also asks the Commission to authorize the following accounting treatment:

- Depreciation: The Company has determined that certain modifications to depreciation rates are warranted and requests that depreciation rates proposed in this proceeding be approved by the Commission.

- Deferral of Storm Related Costs: The Company requests permission to defer storm restoration and repair costs in excess of those included in base rates.

Changes in Rate Design

The Company's basic rate design has been in place since its last base rate case in 1998. Accordingly, the Company is proposing to update the existing rate design with the goal of:

- simplifying distribution rate designs of the FirstEnergy Ohio utility companies from three different tariffs to one uniform set of schedules
- implementing rate designs that focus on distribution service and discontinue concepts inherent in the legacy bundled rate design
- implementing distribution rates that recover fixed costs associated with the infrastructure needed to deliver electricity to customers
- incorporating gradualism in managing customer impacts while simplifying and consolidating tariff design

Residential Rates

The following is a list of key changes proposed for Residential rates:

- Creation of a single distribution rate schedule for all residential customers
- Creation of a Residential Distribution Credit Rider (mentioned above)
- Conversion from existing multiple block and declining block designs to a simple two block structure that is consistent across all companies
- Elimination of the Percentage of Income Payment Plan ("PIPP")

Note - Customers participating in the PIPP program will continue to have their PIPP payment calculated based on income.

General Service Rates

The following is a list of key changes proposed for General Service rates:

- Simplification of distribution rates to one uniform tariff design for the FirstEnergy Ohio utility companies
- Reduction in the number of rate blocks
- Conversion from a declining block structure to a flat structure
- Creation of a Business Distribution Credit Rider (mentioned above)
- Standardization of Service Charges and power factor

- charges across the FirstEnergy Ohio utility companies
- Standardization on demand-only distribution pricing
- Changes in rate applicability based on service volt rather than usage

Changes in Electric Service Regulations (formerly Standard Rules and Regulations)

There are three categories of changes made to the Service Regulations ("Regulations"). The first category consists of changes made in order to make the Regulations uniform across the three FirstEnergy Ohio utility companies. Second category consists of changes made to clarify language and thereby aid customer understanding of Regulations. The third category relates to changes that better align charges with actual costs. This last category includes an increase to the reconnection charge, the returned payment charge and the meter test charge, addition, a provision for an annual automatic increase, certain charges based on the Consumer Price Index has been added.

The above proposed provisions, rates, and charges are subject to changes, including changes as to amount and form, by the Commission following a public hearing on this filed Application. Recommendations which differ from filed Application may be made by the Staff of the Commission or by intervening parties and may be adopted by the Commission.

Any person, firm, corporation or association may file, pursuant to Section 4909.19 of the Revised Code, an objection to such proposed increased rates by alleging that such proposals are unjust and discriminatory or unreasonable. Any interested party seeking detailed information with respect to all affected rates, charges, regulations, and practices may inspect a copy of the application (including supporting schedules and present and proposed rate sheets) at the offices of the Commission at 180 East 9th Street, 13th floor, Columbus, Ohio, 43215-3793, visit the Commission's web site at <http://www.pucb.ohio.gov>, select D-15, Input 07-0551 in the case lockup box, and select date the application was filed; or call the Commission at 1-800-686-7826. Additionally, a copy of the application and supporting documents may be viewed at the business office of the Company: The Cleveland Electric Illuminating Company, 6895 Miller Road, Brecksville, Ohio 44141.

Since the rates, prices, charges and other provisions in Company's current electric rate schedules do not yield a reasonable compensation to the Company for supplying electric distribution service and do not yield a just and reasonable return to the Company on the value of the property used in furnishing such electric distribution service, the Company requests the Commission:

- (a) Accept this Application and Exhibits for filing;
- (b) Find that this Application and the attached Schedule A herewith and incorporated herein, are in accordance with Sections 4909.18, Ohio Revised Code, and Sect. 4901-7-01 of the Commission's Rules and Regulations;
- (c) Find that the current rates, prices and charges for electric service are unjust, unreasonable and insufficient to yield reasonable compensation to the Company for the electric distribution service rendered;
- (d) Find that the proposed rates, prices and charges are just and reasonable based upon the test period for the twelve months ending February 29, 2008, and approve such schedules in the form tendered herewith;
- (e) Approve the Company's requested accounting treatment;
- (f) Fix the date on which applicable services provided to customers are subject to the proposed rates at May 2008.

RESPONSES TO REQUEST

PUCO DR #87 As a result of discrepancies with respect to General Office transportation equipment recorded for CEI, OE, and TE, please provide documentation to assure Staff of the proper classification of all General Office assets and allocation factor utilized.

Response: Based on certain activities within the Company we believe the remaining general plant equipment - office furniture, computer equipment, tools, lab equipment & communication equipment is properly assigned to the correct Companies. The tools & lab equipment, which are being used at the Generation Plants, are properly assigned to a production account; e.g. 31600 Misc Plant Steam Production and would not have been included in the 39400 & 39500 accounts at the Operating Companies. For the remaining accounts, 39110, 39120 & 397 - Office Furniture, Computer Equipment and Communication Equipment, an allocation was done in December 2000 to support Value Based Management (VBM). An analysis was completed which identified the asset location of the equipment and assigned the equipment to the Company which owned the asset location (i.e. Generation Asset Locations - Plants, Energy Delivery - Service Centers). If the asset location was "Unspecified" this equipment was allocated based on the number of workstations per Department. A worksheet received from the IT department identified a listing of workstations per Department. This was used to allocate office furniture & PC's. Communication Equipment was assigned 100% to FE Service Company since it was determined to be owned by Admin Services and they were a department under FE Service Company.

As an example of this assignment, the Office Furniture allocation resulted in \$3M being assigned to Generation, \$2.9M to FE Solutions, \$9.7M to FE Service Company, \$500K to ATSI and \$6M remaining at the Operating Companies out of the \$22.1M total Office Furniture.

Additionally, while developing the response to this data request, we became aware that the general and intangible plant items residing at the Service Company were inadvertently omitted from rate base. These plant items include the investments made for items such as office furniture and equipment, communications hardware, records storage equipment, and software systems used by Service Company employees to provide support to each operating subsidiary of FirstEnergy Corp. As with all expenses incurred by the Service Company, depreciation expense associated with this general and intangible plant is allocated to FirstEnergy's operating subsidiaries, a portion of which is included as operating expense in this case. As such, the carrying costs for holding these items should also be directed

to the operating subsidiaries. Doing so adds \$3.82 million, \$1.67 million and \$3.08 million to the revenue requirements of OE, TE and CEI, respectively. Beginning with the October 2007 accounting close, carrying costs associated with this general and intangible plant will be charged to the operating subsidiaries and beginning January 2008, we will begin transferring these plant items off the Service Company books and onto the appropriate operating subsidiaries' books.

As of the date certain, May 31, 2007, the entire balance on the Service Company's books was \$178,712,092. After applying the appropriate SEC approved Service Company Allocators to this balance, the amount of net plant used to support OE, TE and CEI operations was \$31,086,472, \$13,683,792 and \$26,653,582, respectively. Please see *PUCO DR-87 Attachment 1.xls* supporting the plant totals and calculation of the additional revenue requirements. Also, note that an inter-company loan, with interest payable to FE Corp, exists for approximately \$42 million of the Service Company's general plant. The interest expense incurred by Service Company on this loan is already charged back to the operating subsidiaries and is removed from the calculation of the revenue requirement such that that portion of the carrying cost is not recovered twice.

Additional Request #1 Provide 923 account detail for each operating company and specifically identify the expenses charged from the Service Company in relation to General Plant Assets. Also provide details of accts 390, 391 and 394 as discussed at our November 7 meeting, for each operating company.

Response: Attached is one month of O&M billings (May 2007) from the Service Company (SC00) to the operating companies where it ultimately resides in either account 923 or a capital account on the operating companies. The attached file, "PUCO DR-87 Additional # 1 SCOO Assessed Costs May 2007.xls" contains 4 worksheets associated with the General Plant on SC00 for the month of May 2007. The first worksheet identifies the interest (debt) expenses, cost center 502633. The second worksheet contains the depreciation expense cost centers 502637, 502638, 502639, 502640, 502641 and 502643. The next two worksheets identify the total billing from SC00 for May 2007 by cost center with a description of the function (worksheet #3) and the last worksheet is a summary of worksheet #3 by company billed. The cost flows of depreciation and interest can be traced to the schedule that depicts the total May 2007 billing. All services are provided at cost and fairly allocated in accordance with paragraph 367.25 of FERC Uniform Systems of Accounts as indicated in the attached file "PUCO DR-87 Additional # 1 FERC Uniform System of Accounts.doc".

There was no requirement in 2000 when the asset transfer was made between the operating companies and FE Corp to obtain regulatory approval to transfer the assets and therefore no documents exist related to the transfer other than property records. The transfer was done at net book value and any transfer back to the operating companies will be done at net book value in accordance with paragraph 367.53 of the FERC Uniform System of Accounts as indicated in the attachment

For details to Accounts 390, 391 and 394 see the following attached files:

PUCO DR-87 Additional # 1 CEI Attachment 2.xls

PUCO DR-87 Additional # 1 TE Attachment 2.xls

PUCO DR-87 Additional # 1 OE Attachment 2.xls

Also attached is PUCO DR-87 Additional #1 - Activity Codes.xls which provides a legend to activity codes in the attachments.

Revised Original Response: The date certain balance of Service Company general plant assets indicated in the initial response includes an entry that was ultimately reversed in June of 2007. The balance reflective of the actual assets as of date certain is \$172,551,247. Please see PUCO DR-87 REVISED Attachment 1.xls for a revised estimation of the additional revenue requirement impact associated with the Service Company general plant.

§ 367.25 Determination of service cost.

A service must be deemed at cost and fair allocation of costs requires an accurate accounting for the elements that makes up the aggregate expense of conducting the business of the service company. In the accounts prescribed in this part, the total amounts included in the expense accounts during any period plus the amount that appropriately may be added as compensation for the use of capital constitute cost during that period.

§ 367.4570 Account 457, Services rendered to associate companies.

This account must include amounts billed to associate companies for services rendered at cost (See accounts 457.1 through 457.3 in §§ 367.4571 through 367.4573). Overbillings or underbillings arising from adjustments of estimated costs to actual costs must be cleared through this account and concurrent adjustments made to other accounts involved.

§ 367.53 Service company property purchased or sold.

(a) When service company property is acquired by purchase, merger, consolidation, liquidation, or otherwise, after the effective date of this system of accounts, the costs of acquisition, including related incidental expenses, must be charged to the appropriate service company property accounts and account 107, Construction work in progress (§ 367.1070), as appropriate.

(b) If property acquired is in a physical condition so that it is necessary to rehabilitate it substantially in order to bring the property up to the standards of the service company, the cost of the work, except replacements, must be accounted for as a part of the purchase price of the property.

(c) Unless otherwise authorized by the Commission, all service company property acquired from an affiliate company must be recorded at its book value. Additionally, if property is acquired that is in excess of \$10 million and has been previously devoted to public service at a price above

book value, the service company must file with the Commission the proposed journal entries associated with the acquisition within six months from the date of acquisition of the property.

(d) When service company property is sold, conveyed, or transferred to another by sale, merger, consolidation, or otherwise, the book cost of the property sold or transferred to another must be credited to the appropriate service company property accounts. The amounts (estimated, if not known) carried with respect the accounts for accumulated provision for depreciation and amortization must be charged to those accounts. The difference, if any, between the net amount of debits and credits and the consideration received for the property (less commissions and other expenses of making the sale) must be included in account 421.1, Gain on disposition of property (§ 367.4211), or account 421.2, Loss on disposition of property (§ 367.4212).

(e) In connection with the acquisition of service company property previously devoted to service company operations or acquired from an associate company, the service company must procure, if possible, all existing records relating to the property acquired or related certified copies, and must preserve the records in conformity with regulations or practices governing the preservation of records of its own construction.

Case No. 07-554-EL-UNC

Ohio Edison Company, The Cleveland Electric Illuminating Company and The Toledo
Edison Company for Authority to Increase Rates for Distribution Service, Modify Certain
Accounting Practices and for Tariff Approvals.

RESPONSES TO REQUEST

PUCO IDR #89 Please provide detail of activity through date certain for information systems assets transferred to the Service Company in December 2000. Also include activity for those respective accounts as they have been added since the December 2000 transfer. Finally, provide the FERC language governing the transfer of assets between Service Companies and Operating subsidiaries and the agreements, if any, which were executed at the time of transferring assets to the Service Company.

Response: The attached file "PUCO IDR 89 Information Systems Assets under SC00 R2 Attachment 1.xls" contains the information associated with the Information Systems assets at SC00 for detailed assets. The first tab, "Original transfer Assets" contains the assets originally transferred to SC00 in Dec 2000 & Jan 2001. The tab also contains all asset activity associated with these original assets (transfers/retirements). The 2nd tab, "Information Systems Assets" contains the remaining assets.

Also attached are three "Net Plant" reports from PowerPlant:

"SC00 IT Original Assets Net Book Jan 2000.pdf"
"SC00 IT Original Assets Net Book May 2007.pdf"
"SC00 IT Assets Net Book May 2007.pdf"

These reports identify:

1. The original assets transferred and their associated net plant as of Jan 2001.
2. The original assets transferred and their associated net plant as of May 2007.
3. The total assets currently assigned to the Information Systems group and their net plant as of May 2007.

Also, see attached "PUCO IDR-89 FERC Uniform System of Accounts.doc" for language governing the transfer of assets between Service Companies and Operating subsidiaries.

Finally, there was no requirement in 2000 when the asset transfer was made between the operating companies and FE Corp to obtain regulatory approval to transfer the assets and therefore no documents exist related to the transfer other than property records. The transfer was done at net book value and any transfer back to the operating companies will be done at net book value in accordance with paragraph 367.53 of the FERC Uniform System of Accounts as indicated in the above attachment.

**Additional
Request #1**

Could you please provide additional data on the assets included in the 1957 total? It appears they are not depreciating on the same rate.

There are two assets which make up the detail for the 1957 vintage. One of these assets is land which does not depreciate. The other asset is office equipment which does depreciate. The original value of the office equipment asset was \$3167.47. There has been \$1363.27 retired on this asset since 2001. The land value is \$38,832.64. The only piece depreciating is the \$1804.20 which is the remaining office equipment piece. Please see also "PUCO IDR 89 Additional Request #1 Attachment 1".

§ 367.25 Determination of service cost.

A service must be deemed at cost and fair allocation of costs requires an accurate accounting for the elements that makes up the aggregate expense of conducting the business of the service company. In the accounts prescribed in this part, the total amounts included in the expense accounts during any period plus the amount that appropriately may be added as compensation for the use of capital constitute cost during that period.

§ 367.4570 Account 457, Services rendered to associate companies.

This account must include amounts billed to associate companies for services rendered at cost (See accounts 457.1 through 457.3 in §§ 367.4571 through 367.4573). Overbillings or underbillings arising from adjustments of estimated costs to actual costs must be cleared through this account and concurrent adjustments made to other accounts involved.

§ 367.53 Service company property purchased or sold.

(a) When service company property is acquired by purchase, merger, consolidation, liquidation, or otherwise, after the effective date of this system of accounts, the costs of acquisition, including related incidental expenses, must be charged to the appropriate service company property accounts and account 107, Construction work in progress (§ 367.1070), as appropriate.

(b) If property acquired is in a physical condition so that it is necessary to rehabilitate it substantially in order to bring the property up to the standards of the service company, the cost of the work, except replacements, must be accounted for as a part of the purchase price of the property.

(c) Unless otherwise authorized by the Commission, all service company property acquired from an affiliate company must be recorded at its book value. Additionally, if property is acquired that is in excess of \$10 million and has been previously devoted to public service at a price above

book value, the service company must file with the Commission the proposed journal entries associated with the acquisition within six months from the date of acquisition of the property.

(d) When service company property is sold, conveyed, or transferred to another by sale, merger, consolidation, or otherwise, the book cost of the property sold or transferred to another must be credited to the appropriate service company property accounts. The amounts (estimated, if not known) carried with respect the accounts for accumulated provision for depreciation and amortization must be charged to those accounts. The difference, if any, between the net amount of debits and credits and the consideration received for the property (less commissions and other expenses of making the sale) must be included in account 421.1, Gain on disposition of property (§ 367.4211), or account 421.2, Loss on disposition of property (§ 367.4212).

(e) In connection with the acquisition of service company property previously devoted to service company operations or acquired from an associate company, the service company must procure, if possible, all existing records relating to the property acquired or related certified copies, and must preserve the records in conformity with regulations or practices governing the preservation of records of its own construction.

RESPONSES TO REQUEST

PUCO IDR #92 Please provide detail in regards to the Company's Objection No. 2 and Paulette Chatman's Supplemental Testimony. Specifically, describe the reason certain general plant assets were originally transferred from the Operating Companies to the Service Company, what the outcome of this initiative was, and why the Service Company is now transferring the general plant assets back to the Operating Companies. Please provide the amounts that will be allocated from the Service Company to the Operating Companies after the December 2007 and January 2008 transfers. Also, please provide the detail of what resides in the miscellaneous communications equipment account that was transferred in December 2007.

Response: In December 2000 general plant assets were transferred from the Operating Companies to the Service Company to better align costs with the "Value Center" which owned the asset. Value Centers were "department cost centers" within the Value Based Management (VBM) System. VBM was a management tool for billing O&M charges used by the Service Company in conjunction with Oracle. This system was designed to accumulate costs associated with services provided by the Service Company and then billed to the associate company that benefited from the service provided. The VBM system, which interfaced with the Oracle accounting system, generated monthly reports that were used by the Service Company and utility company employees. The Value Centers were required to have "complete costs" associated with the services that were provided by the Value Center. This would include depreciation expense associated with the assets they had responsibility for. This is the reason the general plant assets were transferred to these Value Centers which resided in the Service Company.

Through May 31, 2003, costs of the Service Company were allocated by the Oracle/Value Based Management System, the accounting software system formerly used by the Company, based upon the allocation method identified for the function by the function. The Service Company adopted SAP in June 2003 and the VBM and Oracle systems are no longer in use. The VBM and Oracle systems only applied to the Ohio Operating Companies (including the Penn Power subsidiary), whereas the new SAP system is used by all seven FirstEnergy utility subsidiaries.

The reason these general plant assets are now being transferred from the Service Company back to the Operating Companies is that the VBM System is no longer in use and the assets are appropriate to include in the assets of the Operating Companies. These general plant assets are serving the distribution function and properly reside on the books of the companies utilizing the assets.

Please see PUCO IDR-92 Attachment 1 for the amounts that will be allocated from the Service Company to the Operating Companies after the December 2007 transfer. The amounts that will be allocated from the Service Company to the Operating Companies after the January 2008 transfer will be provided at a later date when finalized. Also, please see PUCO IDR-92 Attachment 2 for the detail of what resides in the miscellaneous communications equipment account that was transferred in December 2007.
