Number of Pages : 200

Description of Document : New Case

SECTION 8.A PRIVATE LINE TELEPHONE SERVICE (VERIZON) (Cont.)

8.A.8 TERM VOLUME PLAN (TVP) (cont.)

(N)

M. Upgrade to Higher Speed Service (cont.)

- The customer must notify the Telephone Company in writing, in addition to the order.
- The higher speed service period must be equal to or longer in length than the time remaining under the TVP.
- The upgraded service remains connected at the same point(s) of termination.

When TVP DS1 SALs are upgraded to an Optical Networking arrangement, the number of DS1 SALs upgraded will remain in the quantity count for the purpose of determining the applicable threshold level rate.

N. Termination Liability

When a TVP arrangement is discontinued prior to the end of the commitment period, termination liability charges, as set forth below, will apply based on the remainder of the TVP period in effect at the time of disconnect.

One Year TVP – 50% of any remaining portion of the first year's recurring charges.

Two Year TVP – 50% of any remaining portion of the first year's recurring charges. In addition, for any remaining portion of the second year, the customer will be liable for 5% of the total monthly recurring charges in that period.

Three Year TVP – 50% of any remaining portion of the first year's recurring charges. In addition, for any remaining portion of the second and third years, the customer will be liable for 10% of the total monthly recurring charges in that time period.

Five Year TVP – 50% of any remaining portion of the first year's recurring charges. In addition, for any remaining portion of the second through fifth years, the customer will be liable for 15% of the total monthly recurring charges in that time period.

O. Termination Without Liability

During a TVP period, should the currently effective rate for a customer's service increase, the customer may, at his/her option, terminate the TVP arrangement without penalty or liability, unless the increase is a result of FCC action.

(N)

SECTION 8.A PRIVATE LINE TELEPHONE SERVICE (VERIZON) (Cont.)

8.A.9 SERVICE COMPONENTS

(N)

A. Local Channel Termination

1. A Local Channel Termination is furnished between a customer's designated premises and the Serving Wire Center or between a customer's designated premises and the Company hub.
2. The First Nonrecurring Charge for a Local Channel Termination is applicable for the first Local Channel Termination to a customer's designated premises only. For each additional Local Channel Termination to the same premises ordered at the same time, the Additional Nonrecurring Charge applies.

B. Interoffice Channel, Fixed

The interoffice Channel, Fixed is a fixed monthly charge applicable for each circuit provisioned through two Serving Wire Centers or Central Offices.

C. Interoffice Channel, Per Mile

The Interoffice Channel is furnished on a circuit that requires interoffice mileage. Rates are based on airline distance between two (2) Service Wire Centers.

D. Fractional DS1 Channels

Fractional DS1 Channels provide simultaneous, two-way transmission at contiguous bit rates of 112, 128, 224, 256, 336 and 384 Kbps. Fractional DS1 Channels operate over the combined bandwidth of adjacent channels to create a contiguous bit rate.

(N)

SECTION 8.A PRIVATE LINE TELEPHONE SERVICE (VERIZON) (Cont.)

8.A.9 SERVICE COMPONENTS (cont.)

(N)

E. Description of Multiplexing Arrangements

Multiplexing Arrangements provide the function to convert a single higher capacity or bandwidth circuit for bulk transport to several lower capacity or bandwidth circuits. Cascading multiplexing occurs when a high capacity analog or digital channel is de-multiplexed to provide channels with a lesser capacity and one of the lesser capacity channels is further de-multiplexed. For example, a DS1C may be de-multiplexed to two DS1 facilities and then the DS1 facilities may be further de-multiplexed to 24 Voiceband channels.

When cascading multiplexing is performed in the same or different Hub Wire Center, a charge for the additional multiplexing unit will also apply. When cascading multiplexing is performed at a different Hub Wire center, Special Transport will also apply between the involved Hub Wire Centers.

Listed below are the multiplexing arrangements offered under this tariff.

1. Group to Voice

An arrangement that multiplexes twelve voice grade circuits to a single wideband analog group band circuit, or multiplexes a single wideband analog group band circuit to twelve voice grade circuits.

2. Supergroup to Group

An arrangement that multiplexes five wideband analog group band circuits to a single wideband analog supergroup band circuit, or multiplexes a single wideband analog supergroup band circuit to five wideband analog group band circuits.

3. Mastergroup to Supergroup

An arrangement that multiplexes ten wideband analog supergroup band circuits to a single wideband analog mastergroup band circuit, or multiplexes a single wideband analog mastergroup band circuit to ten wideband analog supergroup band circuits.

(N)

SECTION 8.A PRIVATE LINE TELEPHONE SERVICE (VERIZON) (Cont.)

8.A.9 SERVICE COMPONENTS (cont.)

(N)

E. Description of Multiplexing Arrangements (cont.)

4. DS1 to Voice

An arrangement that multiplexes twenty-four voice grade circuits to a single DS1 digital circuit at a rate of 1.544 Mbps, or multiplexes a single DS1 digital circuit at a rate of 1.544 Mbps to twenty-four voice grade circuits. If this DS1 terminates in a DDS hub, a channel(s) of the DS1 can be used to provide DDS; however, DDS service stops at the DS1 interface. Multiple channels may be required to provide individual Program Audio Channels.

Up to 16 channels of this DS1 can be used for Direct Digital Service (DDS-like service) with the assurance that circuit performance parameters will be met. If more than 16 channels are used for DDS-like service, the performance parameters for the DS1 and all circuits riding the DS1 will not be guaranteed.

FT1 can be used in conjunction with DS1 to Voice Multiplexing in groupings of $N \times 56$ Kbps or $N \times 64$ Kbps where $N = 2, 4$ or 6 , to a single DS1 digital circuit at a rate of 1.544 Mbps.

5. DS1C to Voice

An arrangement that multiplexes forty-eight voice grade circuits to a single DS1C digital circuit at a rate of 3.152 Mbps, or multiplexes a single DS1C digital circuit at a rate of 3.152 Mbps to forty-eight voice grade circuits.

6. DS1C to DS1

An arrangement that multiplexes two DS1 digital circuits to a single DS1C digital circuit at a rate of 3.152 Mbps, or multiplexes a single DS1C digital circuit at a rate of 3.152 Mbps to two DS1 digital circuits.

(N)

SECTION 8.A PRIVATE LINE TELEPHONE SERVICE (VERIZON) (Cont.)

8.A.9 SERVICE COMPONENTS (cont.)

(N)

E. Description of Multiplexing Arrangements (cont.)

7. DS3 to DS1 and/or E1

An arrangement that multiplexes twenty-eight DS1 digital circuits to a single DS3 digital circuit at a rate of 44.736 Mbps, or multiplexes a single DS3 digital circuit at a rate of 44.736 Mbps to twenty-eight DS1 digital circuits.

In addition, where E1 service is available, this arrangement is capable of multiplexing:

- a) twenty-one E1 digital circuits
- b) four DS1 and eighteen E1 digital circuits
- c) eight DS1 and fifteen E1 digital circuits
- d) twelve DS1 and twelve E1 digital circuits
- e) sixteen DS1 and nine E1 digital circuits
- f) twenty DS1 and six E1 digital circuits
- g) twenty-four DS1 and three E1 digital circuits

to a single DS3 digital circuit at a rate of 44.736 Mbps, or a single DS3 digital circuit at a rate of 44.736 Mbps to one of the combinations set forth in (a) through (g) above.

8. DS3C to DS1

An arrangement that multiplexes fifty-six DS1 digital circuits to a single DS3C digital circuit at a rate of 89.472 Mbps, or multiplexes a single DS3C digital circuit at a rate of 89.472 Mbps to fifty-six DS1 digital circuits.

9. Group to DS1

An arrangement that multiplexes two wideband analog groupband circuits to a single DS1 digital circuit at a rate of 1.544 Mbps, or multiplexes a single DS1 digital circuit at a rate of 1.514 Mbps to two wideband analog groupband circuits.

(N)

SECTION 8.A PRIVATE LINE TELEPHONE SERVICE (VERIZON) (Cont.)

8.A.9 SERVICE COMPONENTS (cont.)

(N)

E. Description of Multiplexing Arrangements (cont.)

10. Digital Data Carrier Multiplexer

An arrangement that multiplexes a single DS1 1.544 Mbps digital circuit to twenty-three DSO digital ports for connection to either a subrate data multiplexer as described below or 56 Kbps digital circuits.

11. Digital Data Subrate Multiplexer

Used with cascading multiplexing, the Digital Data Subrate Multiplexer is an arrangement that multiplexes the following quantities of subrate digital data circuits into a single DSO digital port: 1) twenty 2.4 Kbps, 2) ten 4.8 Kbps or 3) five 9.6 Kbps. In turn, the DSO digital port is then multiplexed to a single DS1 digital circuit using the Digital Data Carrier Multiplexer described below.

F. Clear Channel Capability

An arrangement that allows the customer to transport 1.536 Mbps of information through a DS1 with no constraint on the quantity or sequence of one (mark) and zero (space) bits utilizing the Bipolar with Eight Zero Substitution (B8ZS) method of providing bit sequence independence. This arrangement is capable of transporting DS1 signals which utilize Superframe or Extended Superframe format (ESF) as defined by the American National Standards Institute (ANSI) T1.107-1988 standard. This arrangement requires the customer signal at the channel interface to conform to the B8ZS method of providing bit sequence independence.

(N)

SECTION 8.A PRIVATE LINE TELEPHONE SERVICE (VERIZON) (Cont.)

8.A.10 CHANNELIZED DS-1

(N)

A. Basic Description

Channelized DS-1 provides channelization capability for the customer at the company's central office. Channelized DS-1 is provided in packets based upon multiple voice grade channel equivalents (DS0) where 24 voice grade channels are equal to a DS-1. The service provides local channels or interoffice channels for network access, Centrex station lines, off-premise extensions and digital data lines.

Channelization is provided by D type channel banks. The customer may channelize all or part of a DS-1 to activate voice and data facilities. Individual channels may be connected with service offerings in other parts of this tariff as appropriate.

The Customer must provide the Network Channel Terminating Equipment associated with the high capacity channel at the Customer's premise. Customer equipment must be compatible with the Company provided channelization at the central office. The customer must be prepared to activate his portion of joint service in a timely manner on the negotiated due date.

A channel with the technical specifications of HC1 will be capable of an error free performance of 98.75% over a continuous twenty-four (24) hour period as measured at the rate of 1.544 Mbps rate through a CSU equivalent which is designed, manufactured and maintained to conform with the specifications in Technical Reference PUB 62411.

(N)

SECTION 8.A PRIVATE LINE TELEPHONE SERVICE (VERIZON) (Cont.)

8.A.11 NETWORK ACCESS SERVICE

(N)

A. Basic Description

Network Access Service is applicable when local trunks of any nature are provisioned over Channelized DS-1 or ISDN PRI. These charges are for supplying the trunks in a digital channelized fashion rather than purchasing individual trunks delivered on an analog basis. There are no measured usage charges with network access service and all rates are a flat amount per month per trunk.

(N)

SECTION 8.A PRIVATE LINE TELEPHONE SERVICE (VERIZON) (Cont.)

(D)

RESERVED FOR FUTURE USE

(D)

SECTION 8.A PRIVATE LINE TELEPHONE SERVICE (VERIZON) (Cont.)

8.A.12 INTEGRATED SERVICES DIGITAL NETWORK (ISDN) (cont.)

8.A.12.3 Regulations

(N)

- A. The rates specified for ISDN Service contemplate the availability of existing compatible facilities from the normal serving wire center which must be a digital ISDN equipped central office entity. If such facilities are required to provide ISDN Service, a charge based on the cost incurred may apply in addition to the rates for this service. These charges may be in the form of a nonrecurring and/or monthly charge.
- B. ISDN Service must include a digital service line and at least one (1) basic service capability.
- C. The minimum service period for ISDN Service is 12 months.
- D. An individual directory number will be assigned for each digital service line.
- E. The customer must provide Customer Premises Equipment (CPE) that complies with the ISDN requirements of the Company.

8.A.12.4 Termination Charges

- A. All termination charges will be based on the term prices in effect at the time of termination.

8.A.12.5 ISDN PRI

- A. ISDN PRI provides a method for high speed end-to-end DS1 capacity that provides the Customer access to switched services in the Company's Central Office. The service can carry voice, data and video simultaneously. Traffic can be inward or outward or a combination of both. This is controlled by the Customer's premise equipment.
- B. The minimum service period for ISDN PRI is six months.
- C. ISDN PRI is a service for the transmission of digital signals only
- D. The minimum service period of ISDN PRI is one month.
- E. A standard service consists of up to twenty-three "B" channels and one "D" channel at a total speed of 1.544 Mbps. The D channel is used for signaling. B channels are used for voice, data and/or video delivery.

(N)

SECTION 8.A PRIVATE LINE TELEPHONE SERVICE (VERIZON) (CONT.)

8.A.12 INTEGRATED SERVICES DIGITAL NETWORK (ISDN) (Cont.)

8.A.12.5 ISDN PRI (Cont.)

(N)

- F. ISDN PRI service between a serving wire center and a customer location will be charged at a rate per Basic PRI. Interoffice Channels between central offices will be charged based upon airline distance between offices.

The customer may choose any number of channels up to 23 B channels. There is a charge per PRI channel in use.

There is a Service Establishment Charge applicable to each ISDN PRI in addition to any installation nonrecurring charge. This fee is for the ordering, recording, provisioning and engineering required with a customer's request for ISDN PRI. Additionally, there is a Service Change Charge applicable to move or transfer an ISDN PRI service line.

8.A.12.6 ISDN PRI Plus

- A. ISDN PRI Plus provides an ISDN based T-1 access to the network and includes the flexibility of multiple voice and/or data transmission channels on the same line. The basic channel structure for ISDN PRI is twenty-three 64 Kbps B channels and one 64 Kbps D channel. The customer has the option to activate up to 23 B Channels on the First ISDN PRI Plus service arrangement and up to 24 B Channels on subsequent arrangements. One primary Directory listing will be furnished at no charge for each ISDN PRI Plus service B Channel.
- B. ISDN PRI Plus is a service for the transmission of digital signals only.
- C. The minimum service period for ISDN PRI Plus is one month.
- D. ISDN PRI Plus service between a serving wire center and a customer location will be charged at a rate per Basic PRI. Interoffice Channels between central offices will be charged based upon airline distance between offices. There is a charge per PRI channel in use. Separate charges apply for Digital Data Channels or Inward Dial Channels.

There is a Service Establishment Charge applicable to each ISDN PRI in addition to any installation nonrecurring charge. This fee is for the ordering, recording, provisioning and engineering required with a customer's request for ISDN PRI. Additionally, there is a Service Change Charge applicable to move or transfer an ISDN PRI service line.

(N)

SECTION 8.A PRIVATE LINE TELEPHONE SERVICE (VERIZON) (CONT.)

8.A.13 DS3 HIGH CAPACITY SERVICE*

A. DS3 Rate Structure

(N)

Option 1: (System DS3s) SALs are provided as one of two system offerings: 3 System and Unlimited System. SAL rates for System DS3s vary dependent on whether the interface provided is electrical or optical. Additional SALs may only be added with the same interface with Telephone Company electronics or without Telephone Company electronics (electrical or optical) as the First System. All DS3 SALs are non-distance sensitive.

Under a 3 System DS3, additional DS3 SALs, up to a maximum of two, may be ordered by the same customer, between the same CDL and serving wire center.

Under an Unlimited System DS3, additional SALs, with no maximum, may be ordered by the same customer, between the same CDL and serving wire center.

Group System DS3s are limited to those services so equipped and in service as of March 4, 1999. Group System DS3s provide a total capacity of 12 (DS3 x 12) or 24 (DS3 x 24) DS3 SALs. All DS3s in a Group System must be between the same CDL and serving wire center.

Option 2: (Individual DS3) This option provides individual DS3 service. Before confirming the order for this option, the Telephone Company will verify the availability of a DS3 interface at the CDL. If a DS3 interface can be made available with no physical change to the existing configuration at the CDL, the order will be confirmed and processed. If this condition is not met, the customer will be advised and no charge will be assessed for the unprocessed order. The customer may then cancel the order or submit a new order for one of the services available under Option 1.

SAL rates for individual DS3s vary dependent on whether the interface provided is electrical or optical.

(N)

* High Capacity DS1 and DS3 services may be provided between service areas where facilities and conditions permit.

SECTION 8.A PRIVATE LINE TELEPHONE SERVICE (VERIZON) (CONT.)

8.A.13 DS3 HIGH CAPACITY SERVICE (Cont.)

A. DS3 Rate Structure (Cont.)

(N)

A DS3 SAL provides a spare transmission path (transmit and receive) connected to an automatic protection switch. In the event of failure in the primary service, traffic will be automatically transferred to the spare transmission facilities. The spare transmission path will normally be provided on the same route as the primary path. When a customer orders a DS3 SAL, the customer may request that the spare transmission path be provided via an alternate route provisioned as the Telephone Company may elect. If common points for the primary and alternate route become necessary, these points will be identified by the Telephone Company and provided to the ordering customer. Should the routing arrangement require special routing requirements specified by the customer, other rates and regulations as set forth in Section 10 or Section 11 may be applicable.

A customer may order the same or different type of DS3 SALs for each CDL(s) at which DS3 service is terminated.

When a customer requests the disconnect of a DS3 service in the 3 System DS3 or Unlimited System DS3, an Additional System DS3 SAL must be disconnected first. When only the First DS3 service exists, that service will be disconnected.

Costs associated with Special Construction may apply.

DS3 Special Transport contains two rate elements, Special Transport Termination and Special Transport Facility. Special Transport Termination rates apply for the termination of each end of the interoffice facility. Special Transport Facility rates apply for each airline mile of the interoffice facility. Group System DS3* Transport Terminations (DS3 x 12 and DS3 x 24) and Group System DS3* Transport Facilities are only available when connected to at least one DS3 Group System* SAL or the same level (12 or 24). In addition, the Special Transport Facility and Special Transport Termination rates apply per DS3 Group of 12 or 24.*

(N)

* Limited to those services so equipped and in service as of March 4, 1999.

SECTION 8.A PRIVATE LINE TELEPHONE SERVICE (VERIZON) (CONT.)

8.A.13 DS3 HIGH CAPACITY SERVICE (Cont.)

B. Minimum Service Periods

(N)

Individual DS3s and System DS3s are offered under four minimum service periods, each with different rate levels. The minimum service periods are 1, 3, 5 and 7 years. The customer must specify the minimum service period at the time the service is ordered. First and Additional DS3 SALs (3 System DS3s and Unlimited System DS3s) can have a different minimum service period. However, each DS3 SAL of a two-point DS3 service must have the same minimum service period.

The customer may select a longer minimum service period at any time, without penalty or application of nonrecurring charges, to obtain the lower monthly recurring rates associated with a longer minimum service period. When the customer selects this option, no credit toward the new service period will be given for the amount of time they were under the shorter minimum service period. The new recurring charges will apply subsequent to the effective date of the new minimum service period.

C. Expiration of Service Period

At the expiration of a service commitment period, the customer may select a new DS3 commitment period. If the customer does not select a new minimum service period within 60 days from the expiration date, billing will remain at the current service period and a new DS3 minimum service period will begin based on the previously effective service period. All terms and conditions, including Subsequent Termination Liabilities, will apply to the new DS3 period.

Customers with expired service periods for the Individual System, Three System and Unlimited System DS3s, prior to the effective date of this tariff offering will have up to 180 days to select a new commitment service period. If the customer does not select a new service period within 180 days of the effective date of this tariff, billing will remain at the current service period and a new DS3 minimum service period will begin based on the last service period. The beginning date of the new service period will be the date immediately following the expiration date of the expired service period. This does not apply to the grandfathered DS3 Group System service offerings.

D. Discontinuance Without Liability – DS3 Minimum Service Period

Should the recurring charges for a customer's DS3 service increase, in aggregate, by more than 10% from the original recurring charges during the minimum service period, the customer may, at his/her option, terminate the DS3 service without penalty or liability.

(N)

SECTION 8.A PRIVATE LINE TELEPHONE SERVICE (VERIZON) (CONT.)

8.A.13 DS3 HIGH CAPACITY SERVICE (Cont.)

E. Discontinuance With Liability – DS3 Minimum Service Period

(N)

When a DS3 service is discontinued prior to the end of the minimum service period, the customer will be liable for a percentage of the total monthly charges for the remaining portion of the applicable minimum service period. This charge will be based on the rates in effect at the time of disconnect. There are two liability periods for DS3 service, "first liability period" and "subsequent liability period." The "first liability period" is the period beginning from the establishment of the DS3 and is based on the customer's initial commitment term for the DS3. The "subsequent liability period" is the period after the customer's initial commitment term has expired and the customer wants to renew the DS3 service with the existing term period or select a new DS3 term period. The customer's total liability for the "first liability period" or "subsequent liability period" is dependent upon the number of months remaining within the year that the service is discontinued times the liability rate for that year plus the total monthly charges for each annual period remaining in the "first liability period" or "subsequent liability period" times the applicable liability rate. The liability rates for each year of the minimum service period are as follows:

<u>Year in Which Service is Discontinued</u>	<u>1st Liability Period Rate</u>	<u>Subsequent Liability Period Rate</u>
1	45%	20%
2	30%	20%
3	25%	20%
4	20%	20%
5	20%	20%
6	20%	20%
7	20%	20%

For example, if a customer with a first liability period of seven years discontinues the DS3 service after six months within the 4th year, the customer will be liable for 20% of the total monthly charges for six months, 20% of the total monthly charges for the 5th year, 20% of the total monthly charges for the 6th year and 20% of the total monthly charges for the 7th year.

For example, if DS3 service is disconnected during the subsequent seven year liability period, the customer will be liable for 20% of the total monthly charges for the remaining months for each annual period remaining in the seven year minimum service period.

(N)

SECTION 8.A PRIVATE LINE TELEPHONE SERVICE (VERIZON) (CONT.)

8.A.13 DS3 HIGH CAPACITY SERVICE (Cont.)

E. Discontinuance With Liability – DS3 Minimum Service Period (Cont.)

(N)

Customers with a minimum service period arrangement of three years or greater established on or prior to September 17, 1992, who discontinue service are eligible for limitation of the termination liability as set forth below.

Customer liability will be calculated as previously stated but will be limited to:

The dollar difference between 1) the amount the customer has already paid and, 2) any additional charges that the customer would have paid for service if the customer had taken a shorter term offering corresponding to the term actually used.

For example, if a customer with a seven year minimum service period discontinues service six months after the end of the third year, the customer liability will not exceed:

(Three year monthly rate – Seven year monthly rate) x 42 months

F. Notification of Discontinuance

Notice of discontinuance must be given by the customer at least thirty days prior to actual discontinuance. Monthly charges will apply for a period of thirty days from the date the Company receives discontinuance notification or until the requested discontinuance date, whichever period is longer.

G. Upgrade to Higher Speed Service

Customers may elect to upgrade DS3 service(s) to a higher speed during a first liability period or subsequent liability period. The upgraded service will be subject to all appropriate NRCs.

If the following conditions exist, no termination liabilities will be applied:

- Both the existing and the new services are provided solely by the Company.
- The order to discontinue a service at an existing speed or capacity and the order for the upgraded service are received by the Company at the same time.
- The new service will be provided at the same customer location(s) as the discontinued service.
- The fixed-period plan for the upgraded service(s) meets or exceeds the remaining length of the existing fixed-period plan.

(N)

SECTION 8.A PRIVATE LINE TELEPHONE SERVICE (VERIZON) (CONT.)

8.A.13 DS3 HIGH CAPACITY SERVICE (Cont.)

G. Upgrade to Higher Speed Service (Cont.)

- The total monthly rate of the new agreement is equal to or greater than the total monthly rate of the existing agreement period.
- The monthly rates for the upgraded services and/or service elements will be those in effect at the time of the service upgrade. The upgraded service will be subject to all appropriate nonrecurring charges.
- Termination liability charges will not apply as long as the upgraded service remains connected at the same points of terminations.

H. DS3 Multiplexer Cross Connect Arrangement

(D) For DS3 multiplexed services, the DS3 Multiplexer Cross Connect arrangement allows a customer to cross connect digital DS1 channels from one multiplexer to another multiplexer. The rates as specified in Section 10 of this Tariff will apply per cross connect arrangement. If the DS3 multiplexed services are located in different hub wire centers, DS1 special transport will apply in addition to the DS3 cross connect charge. The customer must provide the channel assignments (CFA and SCFA) for both multiplexed services on the order.

SECTION 8.A PRIVATE LINE TELEPHONE SERVICE (VERIZON) (CONT.)

8.A.14 HIGH VOLTAGE PROTECTION

A. Description

(N)

High Voltage Protection Service is used at customer locations that may require special equipment to isolate or neutralize Ground Potential Rise (GPR) and/or induced voltage caused by faults in the electric power system. GPR is a voltage difference between two or more ground electrodes caused by earth return currents. GPR on cable facilities can occur, for example, when current from lightning surges flow to ground, but GPR often is associated with voltage generated as the power system fault currents flow to ground. Maximum GPR is developed by the percentage of line-to-ground fault current entering earth through electrode impedance.

This feature will provide high voltage isolation for Special Access telecommunications, while enabling the normal transmission between the Telephone Company wire center and the equipment at the customer's location during GPR environment due to electrical power faults.

(N)

SECTION 9. PRICE LIST

This Price List is Expressly Written for Customers within the Service Territory of United Telephone Company of Ohio, d/b/a Sprint

9.1 SERVICE CHARGES

	<u>Business</u>	<u>Residence</u>	
A. Service Ordering Charges			
Initial Order	\$ 12.25	\$ 11.00	
Conversion Order	\$ 12.25	\$ 11.00	
Subsequent Orders	\$ 9.25	\$ 7.25	
Central Office Charge	\$ 6.75	\$ 6.75

C. Extended Local Calling Service

General

1. Extended Local Calling Service is a measured rate service provided between specific intrastate exchanges.
2. Extended Local Calling Service will be provided to exchanges meeting the criteria for extended area service as outlined in Rule 4901:1-7 of the Ohio Administrative Code.
3. Extended Local Calling Service will be provided in lieu of one-way or two-way extended area service when ordered by the Public Utilities Commission of Ohio. All existing extended area service will continue in its present form unless discontinued by order of the Public Utilities Commission of Ohio.
4. Extended Local Calling Service is available with all classes of service.
5. The rates as specified below apply only to customer-dialed, one way sent paid calls to the extended exchange(s).

F. Alarm Service

Facilities between two points within one Telephone Company exchange area (containing one central office) will incur the following rates and charges for each channel.*

	<u>Monthly Rate</u>
1) First mile or fraction thereof	\$7.60
2) Each additional 1/4 mile or fraction thereof	1.90

Facilities between two points within one Telephone Company exchange area (containing two or more central offices) will incur the following rates and charges for each channel.**

	<u>Monthly Rate</u>
1) Between contiguous central offices in the same exchange area	\$24.70
2) Between noncontiguous central offices in the same exchange area	39.90

Note: Service Grandfathered for customers using two-wire analog for analog or data services.

* Local channel mileage is based upon airline mileage measurement between the location of channel terminals within the serving central office area.

SECTION 9. PRICE LIST (cont'd.)

9.14 PRIVATE LINE RATES AND CHARGES (cont'd.)

F. Alarm Service (cont'd.)

** Local channel mileage beyond the central office is based on airline mileage distance from the central office to the location of channel termination at rates indicated above. Local channel facilities provided beyond both central offices will be based on the sum of local channel mileage at rates indicated above.

Service among three or more points within one Telephone Company exchange is rated on a per location basis. A charge applies from the central office to each individual location. Each location is rated according to the applicable guidelines above.

9.16.2 ISDN PRI

A. General

1. Unless specified, the regulations for ISDN-PRI service apply in addition to the General Regulations set forth in this tariff.
2. ISDN-PRI service is provided from central offices where appropriate ISDN facilities are available as determined by the Telephone Company. Service inquiries will be necessary to determine availability.

B. Regulations

1. Customer Premises Equipment (CPE) that is compatible with ISDN-PRI Service is the customer's responsibility to provision.
2. The Telephone Company shall not be responsible if changes in any of the equipment, operations or procedures of the Telephone Company utilized in the provisioning of ISDN-PRI Service render any facilities provided by the customer obsolete or require modification or alteration of such equipment or system or otherwise affect its use or performance.
3. The minimum service period ofr ISDN-PRI Service is six months.
4. Telephone numbers transmitted via the Optional or Standard Incoming Call Identification feature are intended solely for the use of the ISDN-PRI Service subscriber. Resale of this call identification information is prohibited by this tariff.
5. This Telephone Company shall not be liable for any loss or damages arising from the emergency calls placed from ISDN-PRI Primary Rate Access Lines provisioned via an alternative serving central office.
6. Rotary hunt functionality, at no additional charge, is available with ISDN-PRI Service with possible restriction.
7. ISDN-PRI Service is not offered in conjunction with Local Measured Service.

SECTION 9. PRICE LIST (cont'd.)

9.16 ISDN, (CONT'D.)

9.16.2 ISDN PRI (cont'd.)

C. Features

Basic Features

- Dynamic Allocation of Bandwidth
- Incoming Call Identification (Caller ID)
- Clear Channel Capability
- Digital Voice Transmission
- Direct Inward Dialing (DID) Signaling
- PBX Station ID Capability

Optional Features

- D-Channel Backup
- Network Ring Again
- Call-by-Call/Integrated Service Access Feature Capability
- Incoming Call Identification (Caller ID Name and Number)

Service Components

The components for ISDN-PRI Service will be as follows:

- Primary Rate Access Line
- Primary Rate Interface
- Primary Rate Channels

D. Application of Rates

1. ISDN-PRI Primary Rate Access Line rates, including interoffice channels if applicable, apply in addition to Primary Rate Interface and Primary Rate Channel charges.
2. If the customer chooses to purchase additional channels after purchasing the original 23B + D configuration, the customer must purchase another Primary Rate Access Line and another Primary Rate Interface as well as the additional channels. Additional channels can be purchased in increments of 12.
3. The Telephone Company may offer ISDN-PRI Service to individual customers for terms and for rates and charges that differ from those stated in this section of the Price List. Individual contracts will specify these terms, length of service, conditions and rate levels applicable to those specific customers.

SECTION 9. PRICE LIST (cont'd.)

(N)

9.16 ISDN, (CONT'D.)

9.16.2 ISDN PRI (cont'd.)

E. Termination Liability Charges

1. If a customer chooses to disconnect all or a portion of the Term Discount Plan (TDP) period, Termination Liability Charges will apply to those circuits that are disconnected. If a customer disconnects any portion of the TDP service prior to the end of month six, the customer will be liable for 100% of the payments remaining for the first six months and 50% of the payments remaining for the rest of the Plan. If a customer disconnects any portion of the TDP Service after the end of the sixth months, the customer will be liable for 50% of the payments remaining for the rest of the plan.
2. Rate increases or decreases will automatically be applied to the monthly term plan rates for the remaining term of the TDP. If a Company initiated rate increase causes a customer's rates to exceed the original rates in effect at the beginning of the TDP, the customer may cancel the TDP without incurring termination liability charges.
3. The customer can extend TDP commitment periods at any time during the term of the plan, up to a maximum of 84 months. The number of months accrued in the current plan will apply toward the new plan selected.
4. At the end of the TDP service commitment period, the customer may subscribe to a new TDP at the prevailing rates. If the customer does not select a new TDP, the rates will convert to the prevailing month-to-month rates.

9.16.3 TSC LINK SERVICE

A. General Regulations

1. TSC Link is furnished for the two-way transmission of digital signals at 1.544 Mbps between the serving wire center and the customer's premises located with the same exchange. TSC Link may not be terminated to a serving wire center for the purposes of switched connection to the local exchange and/or long distance (local toll) network.
2. The TSC Line Primary Facility is the first facility for a given customer and route. Each TSC Link Primary Facility is comprised of one pilot telephone number, one central office termination and one 24 channel DS1 facility.
3. The TSC Link Secondary Facility is any subsequent facility for a given customer and route. Each TSC Link Secondary Facility is comprised of one central office termination, one 24 channel DS1 facility and rotary hunting with the primary facility and/or all other secondary facilities.
4. TSC Link is furnished for a minimum service period of six (6) months on a 24-hour per day, seven day per week basis.
5. Five multi-line Subscriber Line Charges (SLCs), as described in the Telephone Company Access Tariffs, will apply per TSC Line Primary facility, per TSC Link Secondary Facility or per TSC FX Link Facility.
6. The Term Discount Plan (TDP) provides for rates to be discounted based on the length of the service commitment period selected by the customer. If the customer chooses to disconnect all or a portion of the TDP service prior to the expiration to the TDP period, a termination liability will apply to the facilities disconnected.
7. TSC Link is only provided in exchanges where ISDN PRI is not available.
8. TSC FX Link provides TSC Link functionality in a format to be carried over interexchange facilities. Interoffice facility charges will apply in addition to the rates and charges applicable to TSC FX Link. The local calling area will coincide with that of the central office from which TSC FX Link is provided.

SECTION 9. PRICE LIST (cont'd.)

(N)

9.16 ISDN, (CONT'D.)

9.16.3 TSC LINK SERVICE, (cont'd.)

A. Responsibility of the Customer

1. A CSU or appropriate digital terminating equipment must be provided by the customer to connect a TSC Link digital facility to customer-provided terminal equipment. The CSU or digital terminating equipment must comply with the technical requirements outlined in Parts 15 and 68 of the FCC Rules and Regulations.
2. For maintenance purposes, the customer will be responsible for notifying the Telephone Company of the type of CSU or digital terminating equipment used upon request.
3. The customer will be responsible for payment of a Maintenance of Service Charge, as defined in this Price List for visits by the Telephone Company to the customer's premises when the service difficulty or trouble report results from the use of equipment or facilities provided or owned by the customer.
4. The customer may not rearrange, disconnect, remove or attempt to repair any equipment installed by the Telephone Company without the prior written consent of the Telephone Company.
5. A termination charge applies when the subscriber terminates a service prior to the expiration of the service contract period. The charge is determined by multiplying the monthly rate by the unexpired portion of the service contract.

B. Responsibility of the Telephone Company

1. The responsibility of the Telephone Company shall be limited to the furnishing and maintenance of TSC Link to that point on the customer's premises where provision is made for the connection of appropriate customer-provided CSU or digital terminating equipment.
2. The Telephone Company will not be responsible for installation or maintenance of any customer-owned terminal equipment. The telephone company will also not be responsible for the following:
 - a.) The through transmission of signals generated by such equipment for the quality of or defects in such transmission.
 - b.) The reception of signals by such equipment.

(N)

SECTION 9. PRICE LIST (cont'd.)

(N)

9.16 ISDN, (CONT'D.)

SECTION 9. PRICE LIST (CONT'D.)

9.19 ROTARY LINE SERVICE

A. General

Rotary line service is an arrangement whereby two or more individual lines or exchange trunk lines furnished to a customer at a given location are grouped so that calls to the first number of the grouped lines are automatically routed to the first non-busy line of the lines so grouped and a busy signal or busy report is not given unless all the grouped lines are busy.

B. Regulations

1. Rotary lines are individual lines or exchange trunk lines of the same class and type.
2. Only the call number of the first individual or exchange trunk line of a rotary group is listed in the directory.
3. All subsequent rotary lines are terminated with the associated listed number line on the same or continuous premises of the same customer.

C. Rates and Charges

	Monthly Rate	Min/Max.
Each individual or exchange trunk line arranged for rotary line service, in addition to the charges for the app (N) ass and grade of service as specified in the exchange tariff	\$1.62	\$.50 - \$7.00

SECTION 9. PRICE LIST (CONT'D.)

9.20 DIGITAL CAPABLE LOOP SERVICE

A. Description

1. Digital Capable Loop Service is an intraexchange non-switched private line facility that consists of two loops that connect within the same Serving Central Office (SCO). For example, one loop is provisioned from an Internet Service Provider (ISP) to a SCO and a second loop is provisioned from the same SCO to an end-user customer. The two loops are connected by the Telephone Company at the SCO to provide a complete transmission path.
2. These loops are furnished on a two-wire or four-wire basis over non-loaded metallic cable facilities and are provided for the transmission of digital signals. In the case whereby the ISP is co-located within a given SCO, Digital Capable Loop Service consists of only one loop.
3. Digital Capable Loop Service requires the use of customer premises equipment that must be purchased separately from Digital Capable Loop Service and must conform to national industry standards and Part 68 of the FCC Rules and Regulations, as referenced in Section E following.

B. Definitions

1. Four-Wire Facility – A transmission circuit composed of four wires which function together to provide a single, simultaneous, two-way communication path.
2. Guarded System – A loop transmission system with which Digital Subscriber Line (DSL) systems and other new loop transmission systems are required to demonstrate spectral compatibility. These systems include, but are not limited to, Voice Grade Services, Digital Data Services (DDS), and Repeated T1 Service. (D)
3. Internet Service Provider (ISP) – An entity that typically provides a connection for end-users to the Internet.
4. Non-Loaded Metallic Facility – Cable pairs with no added inductive loading coils, that is, a non-loaded copper cable pair.

SECTION 9. PRICE LIST (CONT'D.)

9.20

DIGITAL CAPABLE LOOP SERVICE (cont'd)

(N)

B. Definitions (cont'd)

5. Nonrecurring Charge (NRC) – A one-time charge for initial installation and service arrangements.
6. Serving Central Office (SCO) – The central office from which the customer normally receives dial tone.
7. Spectral Compatibility – The capability of two different loop transmission system technologies to coexist in the same cable and operate satisfactorily in the presence of crosstalk noise from each other.
8. Spectrum Management – The administration of the loop plant in a way that provides spectral compatibility for services and technologies that use pairs in the same cable.
9. Two-Wire Facility – A transmission circuit composed of two wires used to provide a single, simultaneous, two-way communication path.

C. Terms and Conditions

1. Digital Capable Loop Service is offered for the connection of two customer locations within a single Serving Central Office distribution area. Provision of these pairs are dependent on the availability of appropriate facilities and does not contemplate construction of such facilities expressly for this service over any route other than that which the Telephone Company would normally provide this service.
2. The Telephone Company has no obligation to continue to provide this service if suitable facilities are no longer available. Non-availability of suitable facilities may be caused by the continuing need to add new central offices, the transfer of service areas between Serving Central Offices, and the increasing use of digital loop carrier technology on lines between the Serving Central Office and customers' locations.

(N)

SECTION 9. PRICE LIST (CONT'D.)

9.20 DIGITAL CAPABLE LOOP SERVICE (cont'd)

(N)

C. Terms and Conditions (cont'd)

3. The Telephone Company, at its sole discretion, will qualify the Digital Capable Loop to determine the availability and suitability of existing Telephone Company facilities to support the technology, and to determine if loop conditioning is required to sustain the service. The Telephone Company will not provision Digital Capable Loop Service on facilities that are not suitable for the service.
4. Digital Capable Loop Service is available only where the customer's service location is within the provisioning limitations as determined prior to installation of the service.
5. Loop length is determined by the actual physical length of the facilities used. Physical proximity between the customer locations to be connected is not an indication of loop length or even that the loop can be provided at all. If the locations are served by different Serving Central Offices or the overall length of the facilities exceeds technical limitations, then a loop cannot be provided under this service offering. In general, the sum of the individual loop lengths cannot exceed a maximum cable plant distance of approximately 18,000 feet. The actual distance is dependent on decibel (dBm) loss, and not just physical loop length.
6. The Telephone Company will not provision Digital Capable Loop Service if it has reasonably determined that it is not technically feasible, or there is not sufficient capacity over existing facilities or planned capacity, or it will cause interference problems within the existing Telephone Company's network, guarded systems, or other services.
7. Digital Capable Loop Service will accommodate only symmetrical transmissions in which the send and receive directions of transmission have the same data signaling rate.
8. Digital Capable Loop Service may be requested in either one of two configurations: two-wire or four-wire. The two-wire service is implemented with two-wire cable facilities and presents a two-wire interface to the customer premises equipment. The four-wire service is implemented with four-wire cable facilities and presents a four-wire interface. Both configurations allow simultaneous transmission in two directions.

(N)

SECTION 9. PRICE LIST (CONT'D.)

9.20 DIGITAL CAPABLE LOOP SERVICE (cont'd)

(N)

C. Terms and Conditions (cont'd)

9. Interconnection of more than two points (i.e., multi-point circuits) will not be provided.
10. Loop conditioning is available, at no additional charge, and may be required if the facility will not initially accommodate Digital Capable Loop Service. This may include, but is not limited to, the removal of load coils, bridge taps and/or repeaters. The Telephone Company does not warrant that loop conditioning will permit the provision of Digital Capable Loop Service.
11. The minimum service period for Digital Capable Loop Service is three months.
12. Unless specifically exempted, the terms and conditions for Digital Capable Loop Service apply in addition to the General Regulations set forth in Section 2 herein.
13. Temporary Suspension of Service (Vacation Service) at the customer's request is not allowed for Digital Capable Loop Service.
14. The customer is responsible for payment of a Customer Premise Visit Charge, as defined in Section 3 herein, for visits by the Telephone Company to the customer's premises when a service difficulty resulting in a trouble report is caused by the use of equipment or facilities provided by the customer.
15. Service Connections, Changes and Moves specified in Section 3 herein also apply as appropriate.

D. Obligations of the Telephone Company

1. The responsibility of the Telephone Company is limited to furnishing network facilities suitable for Digital Capable Loop Service and to the maintenance and operation of such facilities in a manner proper for such service to maintain spectral compatibility using spectrum management techniques. The Telephone Company is not responsible for the through transmission of signals generated by the CPE or attached systems, or for the quality of, or defects in, such transmission or the reception of signals by such equipment or systems.

(N)

SECTION 9. PRICE LIST (CONT'D.)

9.20 DIGITAL CAPABLE LOOP SERVICE (cont'd)

(N)

D. Obligation of the Telephone Company (cont'd)

2. The Telephone Company is not responsible for installation, operation or maintenance of any terminal equipment, data unit or communications system provided by a customer or user unless provided for under separate contract. The Telephone Company is not responsible for adapting Digital Capable Loop Service to the technical requirements of any specific customer equipment.
3. The Telephone Company will perform acceptance testing with the customer at the time of installation of Digital Capable Loop Service.
4. The Telephone Company is not responsible to the customer or user if changes in any of the equipment, operations or procedures of the Telephone Company used in the provision of Digital Capable Loop Service render any facilities or equipment provided by the customer or user obsolete or require modification or alteration of such equipment or system or otherwise affects its use or performance, provided the Telephone Company has met any applicable information disclosure requirements otherwise required by law.
5. In order to maintain the quality of Digital Capable Loop Service, the Telephone Company reserves the right to perform preventative maintenance to the network. The Telephone Company has classified this maintenance as indicated below:

Scheduled Maintenance

Scheduled Maintenance is used to perform such functions as hardware and software upgrades and network optimization. The Telephone Company will perform these tasks in a maintenance window that is defined as occurring between midnight and 6 a.m., local time, seven days per week. The Telephone Company will provide advance notice of all scheduled maintenance.

Demand Maintenance

Demand maintenance may occur as a result of unexpected events and is performed when Digital Capable Loop Service network elements are in jeopardy. The Telephone Company will perform this type of maintenance at its discretion. Due to the nature of demand maintenance, prior notification may not be possible; however, the customer will be informed when the maintenance has been completed.

(N)

SECTION 9. PRICE LIST (CONT'D.)

9.20 DIGITAL CAPABLE LOOP SERVICE (cont'd)

(N)

E. Obligations of the Customer

1. The customer is responsible to ensure all terminal equipment complies with the current standards specified in American National Standards Institute (ANSI) Letter Ballot 785 or the final Technical Publication on Spectrum Management for Loop Transmission Systems when completed, as found at internet site: <http://www.t1.org>. Proposed standards include the following types of industry requirements and recommendations for certain defined digital subscriber line spectrum management classes: power spectral density, total average power, transverse balance deployment restrictions and loop assignment guidelines. The customer should recognize and understand that the conditions of the ANSI standard continue to evolve. The customer will not operate the DSL terminal equipment in Asymmetrical Digital Subscriber Line (ADSL) mode in violation of the spectrum management standard.
2. The purpose of this standard is to minimize the potential for crosstalk interference in twisted pair subscriber loop cables that are shared by multiple users. When a single carrier deploys technologies in loop plant, it alone has the responsibility for spectral compatibility and may select any combination of compatible loop technologies. In an unbundled loop environment however, multiple carriers utilize pairs in the same loop cables. In such instances, if services and technologies are deployed in an uncoordinated manner, they may interfere with each other. The proposed standard is intended to be used by carriers to manage the loop plant to achieve spectral compatibility.
3. In some instances a particular installation using a particular DSL spectrum management class may need to reduce its expected performance level (i.e., data rate, bit error rate, etc.) in order to achieve and maintain spectral compatibility with one or more of the guarded systems. If this standard permits such a reduction for a particular DSL spectrum management class, it shall be explicitly stated for that class. This standard does not, and shall not, permit a reduction in the performance of a guarded system.
4. The proposed ANSI standard defines signal power limits for several DSL spectrum management classes. The requirements apply to signals transmitted by DSL transceivers units whether located in a Central Office or a remote terminal location. The remote terminal location is usually on or near the customer's premises. This tariff offering is limited to spectrum management classes 1, 2, 3 and 4 only, as defined in the proposed spectrum management standard.

(N)

SECTION 9. PRICE LIST (CONT'D.)

9.20

DIGITAL CAPABLE LOOP SERVICE (cont'd)

(N)

E. Obligations of the Customer (cont'd)

5. The characterization of a transmitted signal by power level and frequency content is called the power spectral density (PSD) of the signal. The primary signal power requirements in this standard are specified through the use of PSD masks and templates. The PSD mask shows the maximum power boundary or limit, in dBm per Hz, for the transmitted signal. The use of the PSD masks and templates is described more fully in the ANSI proposed standard with which this tariff offering contemplates the customer will comply.
6. Part 68 of the FCC Rules and Regulations contain mandatory signal power limits for several types of CPE including voice, voice band data, DDS subrates, public switched digital services, ISDN, local area data channel and T1. The proposed spectrum management standard defines signal power limits for several DSL spectrum management classes that are not currently covered by Part 68. This offering contemplates any equipment connected to the network will meet existing Part 68 rules with the exceptions noted above or when Part 68 is amended in the future, the equipment will comply with the new rules.
7. The customer is responsible for any necessary customer provided equipment adjustments or modifications, up to and including replacement due to technological changes or rearrangements in the network.
8. The customer is responsible for testing, sectionalization and clearance of trouble conditions or service difficulties on any terminal equipment or communications systems connected to Digital Capable Loop Service unless such services are contracted for separately or are covered under other tariffed services.
9. The operating characteristics of CPE or systems shall be such as not to interfere with any services offered by the Telephone Company. Such use is subject to the further provisions that the equipment provided by the customer or user does not endanger the safety of Telephone Company employees or the public; does not damage, harm, require change in or alteration of the equipment or other service of the Telephone Company; does not interfere with the proper operation of the Telephone Company's equipment; or does not otherwise injure the public in its use of Telephone Services. Upon notice from the Telephone Company that the equipment provided by the customer or user is causing, or is likely to cause, such hazard or interference, the customer shall take the necessary steps to remove or prevent such hazard or interference.

(N)

SECTION 9. PRICE LIST (CONT'D.)

9.20 DIGITAL CAPABLE LOOP SERVICE (cont'd)

(N)

E. Obligations of the Customer (cont'd)

10. Upon request, the customer is responsible for providing the Telephone Company with the necessary information to provision Digital Capable Loop Service. This information includes, but is not limited to, technical specifications associated with the CPE (e.g., the certification by a testing lab of such equipment used in combination with Digital Capable Loop Service).
11. The customer ordering Digital Capable Loop Service on behalf of its subscriber(s) must obtain written authorization in the form of a letter of agency.

F. Application of Rates

1. Digital Capable Loop Service will be charged at monthly recurring rates determined by service configuration (i.e., two-wire or four-wire), the number of loops (i.e., one loop or two loops) required to provision the service, and band classification (i.e., band 1, band 2, band 3, band 4 or band 5) as determined by cost characteristics of the exchange.
2. A Nonrecurring Charge will apply for each loop of the Digital Capable Loop Service for which the customer subscribes.

SECTION 10. PRICE LIST, (cont'd.)

10.4 LOCAL EXCHANGE BASE RATES, (cont'd.)

B. Extended Local Calling Plan

General

1. Extended Local Calling Plan is a usage sensitive rate service provided between specific intrastate exchanges.
2. This service is restricted to customer dialed station-to-station calls charged to the calling station and does not apply to operator assisted calls.
3. Customers in exchanges where Extended Local Calling Plan is offered will continue to be charged from the same basic exchange service rate schedule from which they were charged prior to the establishment of Extended Local Calling Plan.
4. The "Saturday and Sunday Only" usage rates apply on Christmas Day (December 25), New Year's Day (January 1), Independence Day (July 4), Labor Day and Thanksgiving Day or resulting legal Holidays when Christmas, New Year's or Independence Day legal holidays fall on dates other than December 25, January 1 and July 4th respectively.
5. Time of each call begins when the called party answers or when the caller is connected to automatic answering recording equipment. In cases where a call begins in one rate period and ends in another, the rate in effect at the time the connection is established applies.

SECTION 10. PRICE LIST, (cont'd.)

10.4 LOCAL EXCHANGE BASE RATES, (cont'd.)

(N)

C. Usage Sensitive Service Monthly Rates*

General

1. Each call to a telephone number within the customer's exchange area is charged on a usage basis. Extended area usage rates apply to calls made to certain exchanges outside the customer's exchange area. Usage charges apply on customer-dialed station-to-station calls charged to the calling party. Where operator assistance is utilized, the usage charges apply in addition to the charge for operator assistance would apply if the calling party wants the call billed to another local telephone number.

Extended area designations are determined as follows:

Where the Airline Distance Between the Customer's Serving Center Office or Exchange and the Called Central Office or Exchange is: *	Extended Area Designation
1 - 10 miles	1
11 - 22 miles	2
Over 22 miles	3

2. Service charges in Section 10.1 of this Price List apply for installing, moving, and change Usage Sensitive Service. However, the servicing charges do not apply to customers changing this service from flat rate to Usage Sensitive Service, or vice versa, during the six month period immediately following:
 - a.) the institution of Usage Sensitive Service in an exchange, or
 - b.) the customer's establishment of flat rate service in an exchange where Usage Sensitive Service is offered.
 - i **This waivering of the service charges is limited to one occurrence per customer.**

SECTION 10. PRICE LIST, (cont'd.)

10.4 LOCAL EXCHANGE BASE RATES, (cont'd.)

(N)

C. Usage Sensitive Service Monthly Rates, (cont'd.)

General, (cont'd.)

3. Timing of each call begins when the called party answers or when the caller is connected to automatic answering or recording equipment. In cases where a call begins in one rate period and ends in another, the rate in effect at the time the connection is established applies.
4. The "Saturday and Sunday Only" call connection and minute of use rates apply on Christmas Day (December 25), New Year's Day (January 1), Independence Day (July 4), Labor Day and Thanksgiving Day or resulting legal Holidays when Christmas, New Year's or Independence Day legal holidays fall on dates on than December 25, January 1 and July 4th respectively.
5. Itemized billing of local call details for Usage Sensitive Service can be provided to customers upon request where such details are available and facilities permit and must be requested at least 30 days prior to the month in which the customer wants the local call details.

	<u>Monthly Rates</u>	<u>Servicing Charges</u>
a.) Monthly Itemized Billing, per account telephone number	\$ 1.50	*
b.) Each Page Printed	--	\$ 0.10

The Company will provide, without charge, a future one month detailed billing of usage where a bonafide dispute arises between a subscriber and the company that cannot be resolved. Otherwise, the Company will charge the rates listed above plus the Subsequent Service Order charge.

6. Usage Sensitive Service is optional to all customers in the exchanges listed below.
 7. All exchange service access lines on a premises must be either Usage Sensitive Service lines or Flat Rate service lines. No mixing of flat rate and USS is permitted on the same premises.
- * The Subsequent Service Ordering Charge in Section 10.1 of this Price List applies when initiating a customer request for itemized billing detail.

R. CyberDS1 Service

Rate Regulations

1. CyberDS1 Service provides network dial tone service between a customer's premises and the local serving office on a channelized basis (DS0) over a single high-capacity (DS1) digital facility that terminates on the trunk side of the switch in the local service office. Cyber DS1 is available for data dialed access use.
2. CyberDS1 does not provide the function of analog to digital (or vice versa) conversions and no service types can be specified on the DS1.
3. Customers will be offered CyberDS1 on a month-to-month basis only.
4. These services will be available from the Company on a ling (partial channel) basis rather than as an end-to-end service. This architecture is intended to promote more efficient connectivity of analog and digital networks.
5. The service date interval for CyberDS1 and related network services connected to CyberDS1 will differ from the normal guidelines applicable to end-to-end services.
6. CyberDS1 is available within an exchange where appropriate digital facilities are available as determined by the Company. Service inquiries will be necessary to determine availability. Special Construction Charges as specified herein may be applicable.
7. CyberDS1 cannot be split between premises, or multiple locations within a premise.

SECTION 10. PRICE LIST, (cont'd.)

(N)

10.13 DIGITAL CHANNEL SERVICE II

A. General

Digital Channel Service is comprised of the following components:

- Digital Channel Capacity
- Customer Premises Channelization
- Digital Channel Activation
- Service Activation

Service is available within an exchange where appropriate digital facilities are available as determined by the Company. Service inquiries will be necessary to determine availability. Special Construction Charges as specified elsewhere in this Price List may be applicable.

B. Digital Architecture

Digital Channel Service II differs in provisioning method and numbering format from end-to-end services. These services will be available from the Company on a link (partial channel) basis rather than as an end-to-end service.

The time required to provision service is known as the service date interval. The service date interval for Digital Channel Service II and related network services connected to Digital Channel Service II will differ from the normal guidelines applicable to end-to-end services.

C. Regulations

1. This service is available within an exchange where appropriate digital facilities are available as determined by the Company. Service inquiries will be necessary to determine availability. Special Construction Charges will apply.
2. Interoffice transport mileage will apply when a customer requested Digital Channel Service II must be provisioned in a central office other than the customer's local serving office.
3. The total number of digital channels activated by the customer may not at any time exceed the total Digital Channel Capacity. Additionally, there are some necessary restrictions in total system capacities where certain types of services are channelized, ie., some channelizing equipment may require two DS0 channels per channel provided by the Company thereby reducing the basic system stated capacity substantially. The Company will notify the customer when the Digital Channel Capacity is affected.

(N)

SECTION 10. PRICE LIST, (cont'd.)

(N)

10.13 DIGITAL CHANNEL SERVICE II, (cont'd.)

C. Regulations, (cont'd.)

4. Responsibilities of the Company

- a. The Company will endeavor to activate its portion of joint service in a timely manner on the negotiated date to support installation requirements.
- b. The Company will provide the customer with information regarding the type and the manufacturer of central office channelization equipment to be used in each application.
- c. The Company will attempt to limit its selection of central office equipment to avoid operational and administrative difficulties associated with a multi-vendor central office environment.
- d. The Company reserves the right to change its equipment vendors should equipment availability, price or technological advantages make such a change attractive or necessary.

5. Responsibilities of the Customer

- a. The customer must be prepared to activate his portion of joint service in a timely manner on the negotiated date, providing testing equipment and personnel to support installation requirements, as may be necessary.
- b. The customer will be responsible for selecting his own equipment. Customer equipment must be compatible with the Company provided channelization at the central office.

6. Trouble Resolutions

The company will assist the customer in resolving any installation or day-to-day channel service problems. However, the Company does not assume responsibility for the compatibility or suitability of the customer's equipment. Dispatches to customer premises caused by customer equipment troubles will result in a Premises Visit Charge as set forth in this Price List.

(N)

SECTION 10. PRICE LIST, (cont'd.)

(N)

10.13 DIGITAL CHANNEL SERVICE II, (cont'd.)

C. Regulations, (cont'd.)

7. When a customer's Digital Channel Service II is interrupted due to any cause other than the negligence or willful act of the subscriber or the failure of the facilities provided by the subscriber, a pro rata adjustment of the monthly charges involved will be allowed automatically for the service and facilities rendered useless and inoperative by reason of the interruption during the time said interruption continues in excess of 24 hours from the time it is reported to or detected by the Company except as otherwise specified in this tariff. The adjustment shall not be applicable for the time that the Company stands ready to repair the service and the subscriber does not provide access to the Company for such restoration work.

D. Application of Rates

1. Digital Channel Activation is a recurring charge for each digital channel (DS0) activated within the Digital Channel Capacity. The Digital Channel Activation is offered on a month-to-month basis. When Digital Channel Service II facilities are used to transport DS1 Service, the DS1 Service Activation charge is applied in lieu of the Digital Channel Activation charge.
2. Service Activation charges are recurring charges and are applicable for each network service (switched or dedicated) required by the customer. Service Activation is offered on a month-to-month basis. For DS1 Services, a DS1 Service Activation charge is applicable. In addition, a network access charge may apply.
3. Customer Premises Channelization Capacity is an optional component. Channelization at the customer premises is available as a Company functionality at the rates described herein. In addition to this charge, a Customer Premises Service activation charge will apply for each network service with Company provided channelization. Otherwise, the customer has the option to support premises channelization with CPE devices.

SECTION 10. PRICE LIST, (cont'd.)

(N)

10.13 DIGITAL CHANNEL SERVICE II, (cont'd.)

D. Application of Rates, (cont'd.)

4. The Termination Liability Charge will be applicable should the customer discontinue service prior to the end of the Term Payment Plan. This is subject to the following exemptions:
 - a. No Termination Liability Charge will be applicable for the Digital Channel Service II Capacity when the customer negotiates a new Term Payment Plan for the same equipment or larger system at the same location for a period of the time greater than the time remaining on the existing Term Payment Plan subject to payment periods of 36 months, 60 months, or 84 months.
 - b. All Digital Channel Service II components are conterminous with the Digital Channel Capacity with which they are associated. Any activations subscribed to on a month-to-month basis have a minimum service period of one month and no associated Termination Liability Charge.
5. A Termination Liability Charge will be calculated based on the sum of the monthly payments remaining under the customer's Term Payment Plan, adjusted to the present value at the date of termination, based upon a 12% APR discount. The Termination Liability Charge is due in full at the date of termination.

*Attendant features require the use of a Centrex System Interface.

(T)

C. Regulations

1. In the event of termination of Centrex Service during the contract period, the customer will remain liable for the balance of contract period rates adjusted to their then present worth equivalent, based upon a 12% discount rate, which shall upon any such termination immediately become due and payable in their entirety.
2. In the event the customer reduces the number of Centrex lines initially contracted, by 20% or more, the termination liability as specified in Section 10.16.C.1 above, is applicable and will be based upon the initial number of lines under contract, as set forth in Section 10.16.A (4) below.
3. This Tariff contemplates the use of central office equipment selected by the Company. When special central office equipment or features are provided at the request of the customer, special assembly rates and charges may be applied in addition to those shown herein.

(T)

(T)

Issued Date: October 24, 2001

Effective Date: November 26, 2001

In Accordance with Case No. 01-2737-TP-ATA
Issued by the Public Utilities Commission of Ohio
Clinton Conover, Vice-President, TSC Communications, Inc.
2 Willipie Street, Wapakoneta, Ohio 45895

SECTION 10. PRICE LIST, (cont'd.)

10.16 CENTREX SERVICE, (cont'd.)

C. Regulations, (cont'd.)

- 4 Centrex Service for customers who require a system in excess of 500 access lines will be provided on an individual case contract basis.

Centrex Service, which has unique costs to the Company not contemplated in the general Centrex Service offering described elsewhere in this section, will be provided on an individual case contract basis. These contracts may be subject to the approval of The Public Utilities Commission of Ohio.

5. Centrex Service lines may not be terminated on a PBX or equivalent type system.
6. This Tariff (including the rates and charges shown herein) for Centrex Service is subject to such changes or modifications as The Public Utility Commission of Ohio may from time to time direct or allow in the exercise of its jurisdiction.
7. All customer lines in Calling Number ID serving areas will automatically be provisioned with Cancel Calling Number Delivery Per Call service unless the customer orders Cancel Call Number Delivery Per Line service.
8. Centrex Service Customer Moves and Changes provide customers with the ability to prepare, schedule, and implement feature changes and configurations from a computer terminal located on the customer's premises.

(T)

Product Functions – The customer controls the following functions:

(1) Service Option Information Changes

- Line Restriction Status
- Facility Restriction Level Assignment
- Call Pick-Up Group
- Call Forwarding Number
- Authorization Code Assignment
- Button Features

(2) Activation/Deactivation of Features

(3) Telephone Number Swaps

(4) Reports (Queries and Tallies)

SECTION 10. PRICE LIST, (cont'd.)

10.16 CENTREX SERVICE, (cont'd.)

C. Regulations, (cont'd.)

9. Subsequent line additions/deletions

(a) Subsequent line additions will be rated under a new contract or an addendum to an existing contract based upon the remaining period of the initial contract. Existing contract period rates, for lines previously contracted, remain unchanged. If the line addition results in the customer's total Centrex line count exceeding the threshold of the line group previously contracted, only the quantity of additional lines will be billed at the rate for the larger group.

(b) Subsequent line deletions resulting in reductions equal to or exceeding 20% of the initial lines under contract will be treated as set forth in Section 10.16.A (4) above. If the reduction causes the total number of lines to fall within a different line group, all remaining lines will be billed at rates according to the associated line group as set forth below.

(T)

(T)

10. If a customer request an upgrade of an existing Feature Series (e.g., from Series 1000 to 2000 or from Series 2000 to 3000), his existing per line contract rate will be changed to reflect the appropriate rate applicable to the new Feature Series, as set forth in Section 10.16.A (4) below. The new contract rate will apply for the duration of the existing contract period. Charges as set forth in Section 10.16.A (6)(a) will apply.

(T)
(T)
(T)

A. The following rates and charges apply to Centrex Service.

- (1) The Service is offered via the following contract options: month to month, 12 months, 36 months, 60 months and 84 months.
- (2) The rates and charges shown herein apply in addition to all other applicable rates and charges shown elsewhere in the Company's tariff.

10.16 CENTREX SERVICE, (cont'd.)

A. (cont'd.)

(3) The following rates apply during the initial contract period and until the service is discontinued:*

	<u>Month to Month</u>	<u>Monthly Rate</u>
3 - 25 Lines, per line		\$ 28.50
26 - 50 Lines, per line		\$ 26.60

	<u>12 Month Contract</u>

10.18 ROTARY LINE SERVICE

A. General

Rotary line service is an arrangement whereby two or more individual lines or exchange trunk lines furnished to a customer at a given location are grouped so that calls to the first number of the grouped lines are automatically routed to the first non-busy line of the lines so grouped and a busy signal or busy report is not given unless all the grouped lines are busy.

B. Regulations

1. Rotary lines are individual lines or exchange trunk lines of the same class and type.
2. Only the call number of the first individual or exchange trunk line of a rotary group is listed in the directory.
3. All subsequent rotary lines are terminated with the associated listed number line on the same or continuous premises of the same customer.

C. Rates and Charges

	Monthly Rate	Min/Max.
Each individual or exchange trunk line arranged for rotary line service, in addition to the charges for the app (N) ass and grade of service as specified in the exchange tariff	\$2.28	\$.50 - \$7.00
