\*NOTE: During the interim period between the effective date of the rules and an Applicant's Detariffing Filing, changes to existing business Tier 2 and all toll services, including the addition of new business Tier 2 and all new toll services, will be processed as 0-day TRF filings, and briefly described in the "Other" section above.

All Section I and II applications that result in a change to one or more tariff pages require, at a minimum, the following exhibits. Other exhibits may be required under the applicable rule(s). ACN, ACO, AMT, ATC, ATR and CIO applications see the 4901:1-6-14 Filing Requirements on the Commission's Web Page for a complete list of exhibits.

Exhibit	Description:
A	The tariff pages subject to the proposed change(s) as they exist before the change(s)
B	The Tariff pages subject to the proposed change(s), reflecting the change, with the change(s) marked in the right margin.
C	A short description of the nature of the change(s), the intent of the change(s), and the customers affected.
D	A copy of the notice provided to customers, along with an affidavit that the notice was provided according to the applicable rule(s).

**Section III – Attestation**

**Registrant hereby attests to its compliance with pertinent entries and orders issued by the Commission.**

**AFFIDAVIT**

***Compliance with Commission Rules and Service Standards***

I am an officer/agent of the applicant corporation, **Candice Glover**, and am authorized to make this statement on its behalf.  
(Name)

I attest that these tariffs comply with all applicable rules, including the Minimum Telephone Service Standards (MTSS) Pursuant to Chapter 4901:1-5 OAC for the state of Ohio. I understand that tariff notification filings do not imply Commission approval and that the Commission's rules, including the Minimum Telephone Service Standards, as modified and clarified from time to time, supersede any contradictory provisions in our tariff. We will fully comply with the rules of the state of Ohio and understand that noncompliance can result in various penalties, including the suspension of our certificate to operate within the state of Ohio.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on (Date)

at (Location) **Chicago, Illinois**

\*Signature and Title

*Candice Glover* **Manager**

(Date) **3/25/08**

- This affidavit is required for every tariff-affecting filing. It may be signed by counsel or an officer of the applicant, or an authorized agent of the applicant.

**VERIFICATION**

I, **Candice Glover**

verify that I have utilized the Telecommunications Application Form for Routine Proceedings provided by the Commission and that all of the information submitted here, and all additional information submitted in connection with this case, is true and correct to the best of my knowledge.

\*(Signature and Title)

*Candice Glover* **Manager**

(Date) **3/25/08**

\*Verification is required for every filing. It may be signed by counsel or an officer of the applicant, or an authorized agent of the applicant.

***Send your completed Application Form, including all required attachments as well as the required number of copies, to:***

## 7.4 FEATURES (Cont'd)

## W. Incoming Call Redirect Option

Incoming Call Redirect (ICR) provides automated redirection of incoming calls to a predesignated back-up site during T1 or PBX failures or when all trunks are busy. This option is available with DS1-Digital Facilities, ISDN PRI and Digital Trunks service only.

ICR can redirect all or only pre-selected DID numbers, depending on the customer's application. Calls are redirected to another set of telephone numbers (Destination Numbers), and can route to the LEC trunks at the same location or distant locations. A separate route index will be set up for the redirection of selected DID numbers. Redirected calls will route to a single number at the pre-designated back-up site, and will deliver the original calling number if the back-up site is configured for PRI and Calling Party Number. It is the responsibility of the customer to obtain any necessary permission for the use of any Destination Number.

If ICR is ordered at two or more sites that provide back up to one another, the back up telephone number cannot be a number which can be redirected.

ICR is limited to a maximum of ten simultaneous redirected calls per T1, a maximum of twenty-four simultaneous calls for trunk groups of one to four T1s, and a maximum of forty-eight simultaneous calls for trunk groups of five T1s or more. A maximum of two (2) trunk groups per location can be equipped with ICR.

Customers will be responsible for all usage charges associated with redirected calls.

## X. Original Called Number (OCN)\*

(T)

This feature, which must be ordered for specific ALS ISDN PRI trunks, places the callers original dialed digits into the OCN field of the selected ISDN message for inbound calls which have been forwarded one or more times. These ISDN messages, containing OCN information, will be transmitted over the designed Data-Channels (D-Channels, primary, secondary, and back up on the ISDN trunk.

\*Effective April 15, 2007, Original Called Number (OCN) is not available to newly subscribed AT&T Business Network customers.

## P.U.C.O. NO. 8

## 7. AT&amp;T LOCAL EXCHANGE SERVICES

## 7.24 ALTERNATE ENHANCED REDIRECT SOLUTION (AERS)\*

(T)

## A. Description

Alternate Enhanced Redirect Solution will provide customers the ability to redirect incoming telephone numbers in the event their primary location is unavailable. AERS also provides the additional capability to redirect incoming traffic to a predefined redirect option within two minutes of completing the control call. Customers will be able to define and control how to route critical calls in the event of an emergency.

AERS provides the capability for the customer to predefine redirect telephone numbers for each incoming telephone number at their location. Calls can be redirected to any ten-digit North American Number Plan (NANP) telephone including toll-free numbers. The customer controls when to invoke and when to restore AERS via a telephone number or control activation number. However, the customer cannot revise the predefined redirect options without a service order.

The customer can create up to nine options including eight redirect options for each Customer Group. A Customer Group is a list of incoming telephone numbers and the customer can have up to 20 Customer Groups per customer location dependent on the total number of telephone numbers being redirected.

When a redirect option is invoked, all incoming telephone numbers within the Customer Group will be redirected to their respective numbers. Customers must use service orders to update Customer Group telephone numbers or redirect options within the Customer Group.

The location that receives the redirected calls must have sufficient lines and associated facilities to handle the estimated or actual number of calls without interfering with the exchange or toll service. In the event that there is interference with exchange or toll service, AT&T reserves the right to disconnect any redirect option immediately.

The customer controlled redirect option is available for business lines and trunks as well as incoming telephone numbers to a PBX or other CPE.

\*Effective April 15, 2007, Alternate Enhanced Redirect Solution is not available to newly subscribed AT&T Business Network customers.

# EXHIBIT C

AT&T Communications of Ohio, Inc. (AT&T) is filing this application to reinstate Original Called Number (OCN) feature and Alternate Enhanced Redirect Solution (AERS) service which were grandfathered April 15, 2007 in case 07-415-TP-ZTA. Systems difficulties occurred that have now been resolved and corrected and OCN and AERS can now be offered to Ohio customers.
