5.4 Direct Inward Dialing (DID) and Direct Inward / Outward Dialing (DIOD) Service

DID Service enables incoming calls to equipped trunk lines to terminate directly on dialed stations behind an appropriately equipped Private Branch Exchange (PBX).

Direct Inward/Outward Dialing (DIOD) is a central office based service that permits incoming calls to reach customer provided equipment, without the assistance of an attendant, and allows the trunk to be used to place outgoing calls. Rotary hunt does not apply.

1. DID and DID/DIOD services are provided subject to the availability of central office facilities and telephone numbers in the customer's serving central office.
2. This service must be provided on all lines in a central office group that are arranged for inward service.
3. This service includes the central office switching equipment necessary for inward-dialing from the exchange and toll network.
4. DID Service is furnished upon the condition that the customer must subscribe to a quantity of trunk lines adequate in the judgment of the Telephone Company to permit the use of DID Service without injurious effects upon general telephone service.
5. Customer-Provided Switching Systems must handle calls to assigned numbers, including those that are not currently used with specific stations. Calls to numbers not currently used with specific stations must be routed by the customer to a recorded announcement referring the caller to another number.
6. The rates for DID service are in addition to the charges for the associated PBX Trunk Lines.

5.4 Direct Inward Dialing (DID) and Direct Inward / Outward Dialing (DIOD) Service (cont'd)

7. The assignment of telephone numbers and the sequence of numbers to a customer are made at the discretion of the Company. All terms and conditions pertaining to DID service are applicable to DIOD service.
8. Trunks arranged for DIOD service may not be combined with trunk groups arranged to provide DID service. Overflow of calls between the two arrangements is not permitted.
9. Customers are required to subscribe/use current trunks as the basic access piece of DIOD trunks using the existing tariff rate. The DIOD Functionality Rate Element is an adder to the existing trunk rate(s).

5.10 Special Packages

5.10.1 Pot of Gold Feature Package

The Pot of Gold Feature Package allows a subscriber to choose any number of the Company’s custom calling features described in Section 5.7 for a singled bundled rate when the sum of the individual rates would exceed the Pot of Gold Feature Package rate. Pot of Gold Feature Package rate applies per line or trunk and cannot be combined across multiple facilities or customer accounts. Terms of service and operation restrictions including potential conflicts between services as described in this tariff for the individual features apply. Not all services will work when combined on a single line. This rate applies in addition to line and trunk charges described elsewhere in this tariff.

Subscribers to the Pot of Gold Feature Package will pay a single service order fee for all features ordered at the same time. Service order fees in this tariff apply to changes additions or termination of features purchased under a feature package.

## SECTION 6 – TOLL SERVICES

### 6.1 General

Rates and timing of calls may vary by product type, access method, or call duration. Calls are billed individually and on a monthly basis. Usage is billed in arrears.

Intrastate services are offered in conjunction with interstate services.

### 6.2 Timing of Calls

Billing for calls placed over the network is based in part on the duration of the call as follows, unless otherwise specified in this tariff:

- A. Call timing begins when the called party answers the call (i.e., when two-way communications are established).
- B. Chargeable time for calls ends when one of the parties disconnects from the call.
- C. Minimum call duration periods for billing purposes may vary by service option.
- D. For billing purposes, usage after the initial period varies by service and is specified by service in this tariff.

**SECTION 6 – TOLL SERVICES**

6.3 Promotional Offerings

The Carrier may from time to time engage in promotional trial service offerings of limited duration designed to attract new subscribers or to increase subscriber awareness of a particular service offering. Such promotional offerings will be limited to specific dates, times, and locations. Except for the rates charged under such promotions, all other terms and conditions of service contained in this tariff will apply to the Carrier's promotional service offerings.

**SECTION 7 – MISCELLANEOUS AND ANCILLARY SERVICES**

7.1 Toll Blocking

Pursuant to PUCO Rules and Regulations Toll blocking is a central office service arrangement whereby calls dialed over an individual residence exchange service or non-residence exchange service or a PBX trunk, to other than the local service area, are either automatically routed to the customer's attendant position or the calling person receives an announcement. Toll blocking will be provided where facilities permit.

7.2 Message Telecommunications Service

Message Telecommunications Service (MTS) is a communications service that is available for use by customers 24-hours a day. MTS enables a user of an exchange access line to place toll calls to any station on the public switched telecommunications network bearing an NPA-NXX designation associated with points outside the customer's local calling area. Customers must arrange for intraLATA and interLATA MTS service from the customer's carrier of choice.

**SECTION 8 – INTEGRATED SERVICES DIGITAL NETWORK (ISDN)**

8.1 Primary Rate Interface (PRI)

A. General

1. Primary Rate Interface is a central office based service arrangement that is an alternative for individual access services, such as Direct Inward Dialing (DID), Direct Outward Dialing (DOD), 800/877/888 Services, Wide Area Telecommunications Services, and local business trunks.
2. ISDN-PRI is provisioned on a clear channel 1.544 megabit per second (Mbps) facility and uses the ISDN architecture of 23 “B” channels and one “D” channel or 24 “B” channels to provide the customer with the capabilities of simultaneous access, transmission and switching of voice, data and imaging services via channelized transport.
3. ISDN-PRI provides the capability to transport customer information in the form of circuit-switched voice or data up to 64 Kbps over any “B” channel. One “D” channel can control up to 20 PRI trunks. In these cases, a single “D” channel in one ISDN-PRI trunk handles all signaling and control functions of the other trunks in the arrangement, which allows supplemental trunks to consist of 24 “B” channels.
4. Customer Provided Equipment (CPE) must be NI-2 compliant. Any CPE that requires custom switch features not supported in the NI-2 specification may be supported as an exception and priced on an individual case basis. Custom ISDN features based in specific switch types may be provided on individual case basis.

**SECTION 8 – INTEGRATED SERVICES DIGITAL NETWORK (ISDN)**

8.2 Primary Rate Interface (PRI) (cont'd)

B. PRI Features

The following B-channel features are offered to the customer, at no additional charge.

1. Calling Number Identification is a standard feature within a system between an ISDN-PRI Service and a Centrex System or between two or more ISDN-PRI Services belonging to the same customer.
2. “D” Channel Back-Up automatically takes over for a failed “D” channel in case of trouble. This may be subscribed to as part of a 23B+D Channel Back-Up arrangement.
3. Call-by-Call Service Selection provides an option to the dedicated channel configuration by allowing channels to be configured to access multiple services on a per call basis. With this feature, separate facilities are not required for individual services, such as DID, DOD, WATS, 800/877/888 services, and local switched access lines.
4. Clear Channel Capability allows the customer to transport 64 Kbps over the PRI channels with no constraint on the quantity or sequence of bits using the “Bipolar with Eight Zero Substitution” method of providing bit sequence independence.
5. Fractional DS1 ISDN-Originating allows the customer to set up N x 64 Kbps calls from an ISDN-PRI in real-time and in the same manner as any circuit switched ISDN call.
6. Fractional DS1 ISDN-Terminating allows the customer to receive N x 64 Kbps calls from an ISDN-PRI in real-time and in the same manner as any circuit switched ISDN call.
7. Non-Facility Associated Signaling (NFAS) allows the D-channel signaling entity to assign calls to channels on more than one interface (including the one containing the D-channel). The collection of these B-channels and the controlling D-channel is called a PRI group. Up to 20 DS1 Facilities can be assigned to a PRI group.

**SECTION 8 – INTEGRATED SERVICES DIGITAL NETWORK (ISDN)**

8.3 Primary Rate Interface (PRI) (cont'd)

C. Rate Structure

1. ISDN-PRI Facility

The customer has a choice of call connection arrangements, i.e., central office to end-user premises, central office to central office, or ISDN-PRI access to IC services. The rates and charges for the ISDNPRI Facility will be based on the selected arrangement either flat rate or mileage sensitive option. The month-to-month charges consist of the 1.544 access line and special transport specified herein. The ISDN-PRI Facility charge for a contract term customer is a flat rate based on the length of the contract selected.

2. ISDN-PRI Central Office Termination

The ISDN-PRI Access provides the switch termination for the ISDN-PRI Facility. A PRI Access is required to terminate to an ISDN-PRI serving central office. ISDN-PRI Access typically provides twenty-three (23) individual “B” channels and one (1) “D” channel.

3. Channel Activations

Channel activation charges will apply to provide voice or circuit switched data capability for up to 24 “B” channel. Channel activations are monthly recurring charges applied on a per channel basis.

4. Subsequent Activity Charge (SAC)

The Subsequent Activity Charge is applicable for any changes to the customers' configurations after the initial installation. The SAC is applicable per occurrence and not based on the number of trunks. This charge is applicable for all customers.

811 SERVICE FOR "ONE CALL" NOTIFICATION SYSTEMS

A. GENERAL

1. The Federal Communications Commission (FCC) assigned the 811 dialing code for nationwide access to One Call Notification Systems. The 811 dialing code ("811 Service") is a nationwide toll-free number to be used by state "One Call" notification systems for providing advanced notice of excavation activities to underground facility operators. Pursuant to PUCO Case No. 05-1306-TP-COI, 811 Service shall be made available within Ohio by May 25, 2007.
  2. The three digit 811 abbreviated dialing One Call Notification code is assigned to the approved "811 Provider" for use in providing One Call notification services to the public by way of voice grade facilities.
  3. 811 Service is available from the Company within its services area only. To provide access to 811 to end users in another company's service area or to Competitive Local Exchange Carrier (CLEC) end users within the local calling area, the 811 Provider must make appropriate arrangements with the other company or CLEC serving that territory. The 811 Provider should work separately with competing local providers to ascertain that its end user customers will be able to reach one-call services provided by dialing 811.
  4. All 811 abbreviated dialing code calls must be local in nature and will not result in any expanded local calling area (ELCA), intraLATA toll, interLATA long distance, or pay-per-call charges to Company subscribers. However, 811 Service calls may result in local measured service charges where Company subscribers' service plans include such charges.
  5. The 811 Service is not available for the following classes of service: inmate service, 1+ and 0+ calling, 0- operator assisted calling and 101XXXX calling. 811 Service is otherwise available wherever local service is accessible.

**APPLICATION OF TARIFF**

This tariff sets forth the service offerings, rates, terms and conditions applicable to the furnishing of intrastate end-user communications services by Gold Radio Group, hereinafter referred to as the Company, to customers within the State of Ohio.

Customers have certain rights and responsibilities under the Minimum Telephone Standards (Ohio Adm. Code 4901:1-5) (the "MTSS"). These safeguards can be found in the Appendix to Ohio Adm. Code 4901:1 5-03, which is entitled "Telephone Customer Rights and Responsibilities." These rights and responsibilities include complaint handling, ordering or changing service, service repair, payment of bills and disconnection and reconnection of service. (N)

As of the Effective Date below, the rates, service descriptions, and the terms and conditions for all residential and business long distance services, as well as certain business telecommunications services will no longer be included in this tariff, which is on file with the Public Utilities Commission of Ohio. You may view or receive a paper copy of such information for those services by visiting our office at 301 West South Street, New Knoxville, Ohio 45871 or by calling toll free 866-Try-Gold. (N)

**SECTION 3 – SERVICE CHARGES**

3.6 Late Payment Charge

The Company will render monthly subscriber bills for local charges that will include the date of the bill, the beginning and ending dates and the due date of the bill. Further, the bill will include the current month's charges, and, all credits applied to the account during the current billing period. The Company will also include information regarding all unpaid charges from previous bills, and all applicable late payment charges.

If any portion of the payment is received by the Company nineteen days after the postmark on the bill or (T) later, or if any portion of the payment is received by the Company in funds that are not immediately available upon presentation, then a late payment charge of 1.5% per month with a minimum of \$.50 per month shall be due the Company. The Late Payment Charge is not applicable to any portion of the bill that is in bona fide dispute, any previous late payment fees included in the amount due, or to service establishment charges for lifeline services. Late payment charges are to be applied without discrimination.

The customer should notify the Company of any disputed items on an invoice. If the customer and the Company are unable to resolve the dispute to their mutual satisfaction, the customer may file a complaint with the Public Utilities Commission of Ohio in accordance with the Commission's rules and procedures. The address of the Public Utilities Commission is as follows:

Public Utilities Commission of Ohio  
180 East Broad Street  
Columbus, OH 43215-3793

(T)

If service is disconnected by the Company and later re-installed, re-installation of service will be subject to all applicable installation charges. If service is suspended by the Company and later restored, restoration of service will be subject to deposits as described within this tariff.

Section 11

8-1-1- Offering

(T)

811 SERVICE FOR “ONE CALL” NOTIFICATION SYSTEMS

A. GENERAL

1. The Federal Communications Commission (FCC) assigned the 811 dialing code for nationwide access to One Call Notification Systems. The 811 dialing code (“811 Service”) is a nationwide toll-free number to be used by state “One Call” notification systems for providing advanced notice of excavation activities to underground facility operators. Pursuant to PUCO Case No. 05-1306-TP-COI, 811 Service shall be made available within Ohio by May 25, 2007.
2. The three digit 811 abbreviated dialing One Call Notification code is assigned to the approved “811 Provider” for use in providing One Call notification services to the public by way of voice grade facilities.
3. 811 Service is available from the Company within its services area only. To provide access to 811 to end users in another company’s service area or to Competitive Local Exchange Carrier (CLEC) end users within the local calling area, the 811 Provider must make appropriate arrangements with the other company or CLEC serving that territory. The 811 Provider should work separately with competing local providers to ascertain that its end user customers will be able to reach one-call services provided by dialing 811.
4. All 811 abbreviated dialing code calls must be local in nature and will not result in any expanded local calling area (ELCA), intraLATA toll, interLATA long distance, or pay-per-call charges to Company subscribers. However, 811 Service calls may result in local measured service charges where Company subscribers’ service plans include such charges.
5. The 811 Service is not available for the following classes of service: inmate service, 1+ and 0+ calling, 0- operator assisted calling and 101XXXX calling. 811 Service is otherwise available wherever local service is accessible.

**(Summary of Tariff Revisions)**

## EXHIBIT C

The Applicant, Gold Radio Group, LLC (“Gold Radio”), has deleted all business tier 2 services from its Competitive Local Communications Services Tariff (the “Local Tariff”) and residential and business toll services.

Specifically, Gold Radio has deleted from its Local Tariff the following services:

- Local Business Measured Service and related Printed Detail/Itemized Billing (service is not available; no customers currently subscribe to this service, therefore deletion does not require customer notice)
- Key Systems
- Direct Inward Dialing (DID) and Direct Inward/Outward Dialing (DIOD) Service
- PBX Trunks
- Centrex
- Standard Local Private Line
- Business rates for CLASS features other than Calling Number Delivery (Caller ID) and Call Trace
- Toll Blocking
- Message Telecommunications Service
- Network Connectivity Charges for multi-line businesses
- Rates for Business Class/Flat Rate Service-multiple lines
- Pot of Gold Feature Package – Business
- Toll Plans
- ISDN
- PRI

Gold Radio also added to its Local Tariff a) the general MTSS reference pursuant to the September 26, 2007 Entry in Case No. 05-1102-TP-ORD and b) an explanation that all residential and business long distance services, as well as certain business telecommunications services, have been detariffed, with direction to contact the Applicant if the customer wishes to view or receive a paper copy of such information. Further, Gold Radio has made various revisions consistent with the new MTSS adopted in Case No. 05-1102-TP-ORD.

## **EXHIBIT D**

The Applicant intends to comply with Ohio Adm. Code 4901:1-6-05(G)(3) by providing its customers with a paper copy of the rates, service descriptions, and terms and conditions of the detariffed services upon request.

## **EXHIBIT E**

The following notice was mailed to residential customers as a bill insert on March 13, 2008.

Although Business Tier 2 services were deleted from the local tariff, customer notice was not required because, at this time, the Company has no business customers.

In addition, on March 3, 2008 Gold Radio forwarded the customer notices to the following Commission-provided electronic mailbox: [Telecomm-Rule16@puc.state.oh.us](mailto:Telecomm-Rule16@puc.state.oh.us) in accordance with the Entry issued September 19, 2007 in Case No. 06-1345-TP-ORD.

To All Gold Radio Long Distance customers:

Beginning on March 28, 2008, the prices, service descriptions, and the terms and conditions for long distance services that you are provided by Gold Radio Group, LLC ("Gold Radio") will no longer be on file at the Public Utilities Commission of Ohio (PUCO).

This modification does not automatically result in a change in the prices, terms, or conditions of those services to which you currently subscribe. Gold Radio must still provide a customer notice at least fifteen days in advance of rate increases, changes in terms and conditions and discontinuance of existing services. Additionally, you can request a copy of this information by contacting Gold Radio at 301 W. South Street, P.O. Box 1, New Knoxville, Ohio 45871 or toll free at 866-TRY-GOLD.

Since long distance services will no longer be on file with the Commission, this means that the agreement reached between the customer and the company, instead of the document on file at the PUCO, will now control new services or changes in service. This agreement, whether it is verbal or written, will still be subject to consumer protections required and enforced by the PUCO.

For any new services or changes in service, it will be important that you carefully review and confirm the price, terms and conditions.

If you have any questions about this matter, please call Gold Radio at the toll free number 866-TRY-GOLD or visit us at [www.nktelco.net](http://www.nktelco.net). You may also visit the consumer information page on the PUCO's website at [puco.ohio.gov](http://puco.ohio.gov) for further information.

Sincerely,  
Gold Radio Group, LLC
