TARIFF FORMAT

- A. Page Numbering** - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially, However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Page Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the PUCO. For example, the 4th Revised Page 14 cancels the 3rd Revised Page 14.
- C. Paragraph Numbering Sequence** - There are seven levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1
 - 2.1.1(A)
 - 2.1.1(A)(1)
 - 2.1.1(A)(1)(a)
 - 2.1.1(A)(1)(a)(1)
- D. Check Sheets** - When a tariff filing is made with the PUCO, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new sheets are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some sheets.)

| 11:00 PM TO 7:59 AM | NIGHT/WEEKEND RATE PERIOD OR OFF PEAK RATE PERIOD | | | | | | |

- 3.3.1** Day, Evening, and Night/Weekend times are determined by the local time of the location of the calling service point. Chargeable time for a rate period (e.g. 8AM-5PM) begins with the first stated hour (8AM) and continues to, but does not include, the second stated hour (5PM). The rate applicable at the start of chargeable time at the calling station applies to the call during the duration of the call that is applicable to that time period. The charge for each additional minute of usage is the additional minute billing rate of the rate period in which the beginning of each minute occurs.

SECTION 3 - DESCRIPTION OF SERVICE AND RATES, (CONT'D.)**3.4 Calculation of Distance**

For services that are distance sensitive, usage charges are based on the airline distance between the serving wire center locations associated with the originating and terminating points of the call.

The distance between the originating and terminating points is calculated by using the "V" and "H" coordinates of the serving wire centers as defined by Telcordia, in the following manner:

Step 1: Obtain the "V" and "H" coordinates for the serving wire center of the Customer's switch and the destination point.

Step 2: Obtain the difference between the "V" coordinates of each of the Rate Centers. Obtain the Difference between the "H" coordinates.

Step 3: Square the differences obtained in Step 2.

Step 4: Add the squares of the "V" difference and "H" difference obtained in Step 3.

Step 5: Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.

Step 6: Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating serving wire centers of the call.

Formula:

$$\sqrt{\frac{(V1 - V2)^2 + (H1 - H2)^2}{10}}$$

(N)

CenturyTel Enterprise Solutions is a flat rate product for direct dial switched service. Calls are billed in six (6) second increments with an initial period, for billing purposes, of thirty (30) seconds.

Customers must agree to a Minimum Monthly Commitment Level ("MMCL"). All per-minute rates will be based upon the Customers' MMCL as defined below. Customers will be charged the MMCL when usage for the billing period is below the base level. Usage over the MMCL will be billed at the corresponding per-minute rate that corresponds with the MMCL. Usage over the MMCL may not be carried over to future months to satisfy the commitment level.

Intrastate and interstate usage contribute to the MMCL. Surcharges, taxes and other similar fees shall not be included in the calculation for the determination of whether the minimum monthly commitment level has been met.

This service is only offered in conjunction with the corresponding interstate CenturyTel Enterprise Solutions plan. This service is not offered on an intrastate only basis.

| | MON | TUES | WED | THUR | FRI | SAT | SUN |
|------------------------|--|------|-----|------|-----|-----|-----|
| 8:00 AM TO 4:59 PM | DAYTIME RATE PERIOD OR PEAK RATE PERIOD | | | | | EVE | |

| 11:00 PM TO 7:59 AM | NIGHT/WEEKEND RATE PERIOD OR OFF PEAK RATE PERIOD | | | | | | |

The charge for each additional minute of usage is the additional minute billing rate of the rate period in which the beginning of each minute occurs.

SECTION 3 - DESCRIPTION OF SERVICE AND RATES, (CONT'D.)**3.4 Calculation of Distance**

For services that are distance sensitive, usage charges are based on the airline distance between the serving wire center locations associated with the originating and terminating points of the call.

The distance between the originating and terminating points is calculated by using the "V" and "H" coordinates of the serving wire centers as defined by Telcordia, in the following manner:

- Step 1:** Obtain the "V" and "H" coordinates for the serving wire center of the Customer's switch and the destination point.
- Step 2:** Obtain the difference between the "V" coordinates of each of the Rate Centers. Obtain the Difference between the "H" coordinates.
- Step 3:** Square the differences obtained in Step 2.
- Step 4:** Add the squares of the "V" difference and "H" difference obtained in Step 3.
- Step 5:** Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.
- Step 6:** Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating serving wire centers of the call.

Formula:

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$

Beginning April 2, 2008, the prices, service descriptions, and the terms and conditions for certain telecommunication services that you are provided by CenturyTel of Ohio, Inc., will no longer be on file at the Public Utilities Commission of Ohio (PUCO). Services affected by this change include, but are not limited to, intrastate long distance services, Centrex services, PBX trunks, advanced digital services, PRI, certain optional service features, such as Caller ID Name and Number, Call Forwarding and Call Return, packages and bundles of services containing business optional services, and other optional business services. This modification does not automatically result in a change in the prices, terms, or conditions of those services to which you currently subscribe. CenturyTel must still provide a customer notice at least fifteen days in advance of rate increases, changes in terms and conditions and discontinuance of existing services. Additionally, you will be able to view the company's future service offerings in an online price list at centurytel.com or you can request a copy of this information by contacting us at 1-800-201-4102 or by mail at P.O. Box 4065, Monroe, LA 71211-4065. Since these services will no longer be on file with the Commission, this means that the agreement reached between the customer and the company, instead of the document on file at the PUCO, will now control new services or changes in service. This agreement, whether it is verbal or written, will still be subject to consumer protections required and enforced by the PUCO. For any new services or changes in service, it will be important that you carefully review and confirm the price, terms and conditions. If you have any questions about this matter, please call CenturyTel at 1-800-201-4102 or visit us at centurytel.com.
