AFFIDAVIT

Compliance with Commission Rules and Service Standards

I am an officer/agent of the applicant corporation, **Raven Robinson**, and am authorized to make this statement on its behalf.
(Name)

I attest that these tariffs comply with all applicable rules, including the Minimum Telephone Service Standards (MTSS) Pursuant to Chapter 4901:1-5 OAC for the state of Ohio. I understand that tariff notification filings do not imply Commission approval and that the Commission's rules, including the Minimum Telephone Service Standards, as modified and clarified from time to time, supersede any contradictory provisions in our tariff. We will fully comply with the rules of the state of Ohio and understand that noncompliance can result in various penalties, including the suspension of our certificate to operate within the state of Ohio.

I declare under penalty of perjury that the foregoing is true and correct.

5. PRIVACY ID

5.1 Privacy ID Service

- A. Caller ID service is required in order to subscribe to Privacy ID. Tier 2 residential and business services.
- B. Privacy ID provides Caller ID subscribers with the ability to identify unavailable, unknown, blocked and private numbers. Privacy ID intercepts all unidentified calls before the subscriber's telephone rings than asks the caller to state their name or company. Once the calling party has responded, the service rings to the subscriber and announces the calling party's information. The subscriber has the option to accept the call, reject the call, play an announcement to the calling party or forward the call to voicemail.
- C. The Privacy ID subscriber may provide calling parties with a Personal Identification Number (PIN). Use of the PIN allows the calling party to bypass Privacy ID.
- D. Privacy ID is not offered in concurrence with Basic Rate Interface (BRI), Primary Rate Interface (PRI), Centrex, Payphone Line and PBX Trunks.
- E. When the Call Trace and Return Call features are activated on calls intercepted by Privacy ID, the telephone number captured is that of the Service Node, which performs Privacy ID, not the telephone number of the calling party.
- F. The following rates and charges apply to Privacy ID only in Sprint area.

8.3 Toll Restriction

8.3.1 General

Toll Restriction is a service arrangement whereby calls dialed over residence and business line or trunks to other than the local toll free service area, receive a recorded restriction announcement or are automatically routed to the PBX subscriber's attendant position. This is applicable for Sprint, SBC, and Verizon areas.

- A. **Toll Restriction is only available for individual residence and business services.**
- B. **Toll Restriction will not allow 1+, 0+, 0-, 101XXXX, 500 service code, 900 service code, 700 code toll calls, 1 + 411 Local Information or 555 Toll Information calls and any 1+ Local Calling Plan Calls.**
- C. **Toll Restriction does not relieve subscribers of responsibility for calls charged to their telephone number.**
- D. **Toll Restriction does not provide restriction of non-chargeable calls to numbers such as repair service, 911 or 1+800.**
- E. **Toll Restriction will not be provided payphone line service.**
- F. **The Company will not be liable to the subscriber in connection with the inability to access the operator, Directory Assistance, or any non toll free number and any 1+ Local Calling Plan Numbers for any purpose.**

8.4 Toll and Casual Dialing Restriction

8.4.1 General

- A. Toll and Casual Dialing Restriction prevents the completion of certain types of calls. Toll and Casual Dialing Restriction can be provided to individual residence and business line subscribers.
- B. Toll and Casual Dialing Restriction Options 1 and 2 restrict access to 1+, 0+, 0-, and 00-, and restrict access to 01/011+ numbers outside of the North American Numbering Plan. Access to 900, 976, 500 and 700 numbers is also restricted in addition to Directory Assistance and the casual dialing of toll calls (by preceding the telephone number with 101XXXX+). Option 1 additionally restricts access to Toll Free Code numbers. Option 3 only restricts access to 01/011+ numbers outside of the North American Numbering Plan.
- C. Restriction of access to operator services prevents the subscriber from dialing an operator for all purposes, including emergencies, assistance and the placing of toll calls. Operator Services will not be accessible from a line with Toll and Casual Dialing Restriction with Option 1 or 2.
- D. Directory Assistance (411, 1411, 555-1212, 1-555-1212, or 1-NPA-555-1212) will not be accessible from a line with Toll and Casual Dialing Restriction with Option 1 or 2.
- E. All local calls and non-chargeable calls to Company numbers (such as repair service) will be permitted.

14. BUSINESS NETWORK SERVICES (cont'd)

14.2 Integrated Services Digital Network (ISDN)

14.2.1 Basic Rate Interface II (BRI II)

A. General

1. **Integrated Services Digital Network – Basic Rate Interface II (ISDN-BRI II) is a local exchange telecommunications service that provides integrated voice and data communications capability. ISDN-BRI II service supports the simultaneous transmission of circuit switched voice and circuit switched data over a single exchange access line.**

ISDN-BRI II provides a customer two B-channels with transmission speeds up to 64 Kbps each and one 16 Kbps D-channel. The service provides switched communication paths providing end user access to a variety of circuit-switched services and features including data, voice and video.

2. Service Capabilities

- A. **ISDN-BRI II consists of three distinct channels delivered to the customer's premises: two B (bearer) channels and one D (delta) channel. This is also known as 2B+D. ISDN-BRI II is not available in other channel configurations of 1B+D or 0B+D.**
- B. **The B-channel carries circuit-switched voice and/or circuit-switched data communications at speeds up to 64 Kbps, from the customer's premises, over the loop facility, to the central office. Packet data services are not available over the B-channel.**
- C. **The D-channel carries administrative signaling at 16 Kbps for call-control for either a voice or data B-channel call on the ISDN-BRI II line. The D-channel does not have voice capability. Packet data services are not available on the D-channel.**

14. BUSINESS NETWORK SERVICES (cont'd)
- 14.2 Integrated Services Digital Network (ISDN) (cont'd)
- 14.2.1 Basic Rate Interface II (BRI II) (cont'd)

A. General (cont'd)

2. Service Capabilities (cont'd)

- D. Customers subscribing to ISDN-BRI II must comply with ISDN Basic Rate Network Interface specifications as specified by the Company. The ISDN Basic Rate Interface II is comprised of a limited set of standard user-network interfaces. The BRI II customer premises equipment (CPE) located at the customer premises must be compatible with the network interface. This interface is defined as follows:

A two-wire interface is the physical interface between a central office switch equipped with ISDN and the customer premises equipment which is necessary for terminating a telephone circuit or facility at the customer premises.

3. Service Capability Packages

- A. Customers can subscribe to one of the following Service Capability Packages specifying the assignment of each B-channel. Through the North American ISDN Users' Forum, a set of ISDN Service Capability Packages have been defined and given a letter designation. Each of the Service Capability Packages describes a specific interface configuration as well as the features and capabilities of that interface. Detailed technical specifications are defined for each of the Service Capability Packages. These packages have been established to help simplify the ordering, provisioning, and installation of ISDN.

1. Standard ISDN-BRI II (equivalent to package S without features)

1-B Alternate circuit-switched voice/circuit-switched data.

B. **Key Telephone Systems**

ISDN may be purchased for a Key System in place of a Rotary Access Service (for ISDN-capable Key Systems). If terminating an ISDN-BRI II line into a Key System, the customer can order one of the following Service Capability Packages:

1. **Package H:**
1-B Voice Only
1-B Circuit-switched data only
(Includes Additional Call Offering)
2. **Package L:**
1-B Circuit-switched data only
1-B Alternate voice/circuit switched data
(Includes Additional Call Offering)

4. **Optional Services and Features**

The ISDN-BRI II offering provides the customer with the following features, where available.

1. **Call Pickup – Originating and Terminating –** This feature allows a station user to answer any call within an associated pre-designated pickup group. If more than one line within the pickup group has an unanswered incoming call, the call to be answered is selected by the central office switching system.

B. Regulations

1. This service is offered only where facilities and appropriate technology exist.
2. Local circuit-switched voice and data calls will be billed on a flat-rate, reference to Section 15.1 Basic Local Exchange Rates of this tariff.
3. The Company shall terminate ISDN-BRI II Services at the Company Network Interface Device (NID) located at the customer's premises.
4. Two Primary Directory Numbers will be included with an ISDN-BRI II Service, one for each B-Channel.
5. ISDN-compatible customer premises terminal equipment is required for proper operation. It is the customer's responsibility to provide necessary power and obtain such equipment.
6. The provisions for temporary suspension of service, as defined in Section 19.2.1 of this tariff, do not apply to ISDN-BRI II Service.

14. BUSINESS NETWORK SERVICES (cont'd)

14.2 Integrated Services Digital Network (ISDN) (cont'd)

14.2.1 Basic Rate Interface II (BRI II) (cont'd)

B. Regulations (cont'd)

7. This service is available only from central offices, which have the necessary facilities to provide ISDN-BRI II on the standard network platform.
8. One directory listing will be provided with ISDN-BRI II.
9. ISDN-BRI II does not provide for the transmission of packet data on either the D-channel or one of the B-channels.
10. ISDN-compatible terminal equipment is a requirement for operation and is the customer's responsibility. ISDN customer-premise equipment is dependent upon commercial power and not power from the Company central office. For their safety and well being, all ISDN customers are encouraged to maintain a non-ISDN access line on the premises for emergency calls in the event of a loss of commercial electrical power. In the event a subscriber elects to disconnect or not maintain a non-ISDN access line, the customer assumes full responsibility for telephone service in the event of an emergency.
11. ISDN-BRI II Service may be terminated in Key Telephone Systems in lieu of Rotary Access Service; however, the Key Telephone System must be ISDN compatible.
12. ISDN BRI II Service for customers subscribing to Rotary Access Service will be provisioned outside the existing hunt group.
13. Verification and Emergency Interrupt service is not available for ISDN-BRI II service.

5. PRIVACY ID

5.1 Privacy ID Service

- A. Caller ID service is required in order to subscribe to Privacy ID. Tier 2 residential and business services.
- B. Privacy ID provides Caller ID subscribers with the ability to identify unavailable, unknown, blocked and private numbers. Privacy ID intercepts all unidentified calls before the subscriber's telephone rings than asks the caller to state their name or company. Once the calling party has responded, the service rings to the subscriber and announces the calling party's information. The subscriber has the option to accept the call, reject the call, play an announcement to the calling party or forward the call to voicemail.
- C. The Privacy ID subscriber may provide calling parties with a Personal Identification Number (PIN). Use of the PIN allows the calling party to bypass Privacy ID.
- D. Privacy ID is not offered in concurrence with Basic Rate Interface (BRI), Primary Rate Interface (PRI), Centrex, Payphone Line and PBX Trunks.
- E. When the Call Trace and Return Call features are activated on calls intercepted by Privacy ID, the telephone number captured is that of the Service Node, which performs Privacy ID, not the telephone number of the calling party.
- F. The following rates and charges apply to Privacy ID only in Sprint area.

Dear Valued Customers:

Beginning on April 1, 2008 the prices, service descriptions, and the terms and conditions for certain telecommunication services that you are provided by ValTech Communications will no longer be on file with the Public Utilities Commission of Ohio.

Services that will be affected are; Business features rates, Business packages and rates, Toll Restriction, Toll & Casual Dialing Restriction, Business Directory Listing rates, and Business Network Services such as Direct Inward Dialing (DID), Integrated Services Digital Network (ISDN), Primary Rate Interface (PRI/T1), and Centrex Services.

You will be able to find these services at our website www.vatlech.info or you can request a copy of this information by contacting the Customer Service Department at P.O. Box 831 Reynoldsburg, OH 43068 or by calling 800-800-7444.

This change does not affect the prices, terms or conditions of those services to which you currently subscribe. These services continue to be regulated by the Public Utilities Commission of Ohio.

If you have any questions about this matter, please call ValTech Communications at 1-800-800-7444 or visit us at www.valtech.info.

Sincerely,
ValTech Communications
