**LOCAL EXCHANGE SERVICES**

---

**7. PROMOTIONAL OFFERINGS (Cont'd)****Longevity Promotion IIII**

Beginning September 1, 2006, business customers may be eligible to have charges waived for certain local exchange services for one, two, or three months when they subscribe to any Sprint Integrated Local Service. To be eligible, customers who are contacted by the Company or who contact the Company and request this promotion must subscribe to a Sprint Integrated Local Service under a one-year, two-year or three-year term agreement. The Company will waive the monthly charges for those Sprint Integrated Local Services ordered under this promotion in the 12<sup>th</sup>, 24<sup>th</sup> and 36<sup>th</sup> months when customers subscribe to a one, two or three-year term agreement, respectively. Services and features for which charges will be waived include all local exchange services and features contained in the Sprint Integrated Local Service as specified in this Tariff and all monthly charges for optional services and features ordered from other sections of this Tariff in conjunction with Integrated Local Services. Charges for long distance services subscribed to in conjunction with the Sprint Integrated Local Service are not waived under this promotion. The waiver also does not include CPE, maintenance, nonrecurring and service connection charges, or usage charges of any kind (i.e. long distance usage charges, operator services, directory assistance, etc.). Customer will be responsible for all applicable taxes, surcharges and fees calculated based on the value of the MRC before the waiver is applied. Customers who discontinue the services subscribed to under this promotion prior to the end of their term agreement will be assessed all charges waived under this promotion. Subscription to this promotion is available through June 30, 2007, unless it is sooner changed or canceled by the Company. This promotion is not available in conjunction with the Installation Waiver Promotion III offered under this tariff.

## LOCAL EXCHANGE SERVICES

---

### 8. BUSINESS PRODUCT DESCRIPTIONS

#### 1. Local Exchange Service

Local Exchange Service consists of services furnishing switched communication in connection with one-way and/or two-way information transmission points within a Local Calling Area offered pursuant to this tariff. Local Exchange Services provide a Customer with a connection to the public switched network which enables the Customer to:

1. receive calls from other stations on the public switched telephone network; access the Company's Local and IntraLATA Calling Services as set forth in this tariff;
2. access intraLATA, interLATA, intrastate, interstate and international calling services provided by other certified common carriers;
3. access the Company's operator and customer service center for service related assistance; access toll-free telecommunications services such as 800, 888, 877 NPA; and access 9-1-1 service for emergency calling.

Local Exchange Service provides an individual access line for the transmission of two way switched voice or data communication within a local calling area. The individual access line is the connecting facility between a Customer's premise and a serving central office that provides Customer access to the switched network for placing and receiving calls. The individual access line also enables the Customer to access the service of long distance carriers.

**8. BUSINESS PRODUCT DESCRIPTIONS (Continued)****3. Service Connection Charges (SCC)**

Service connection charges are nonrecurring charges that apply for the connection, reconnection, move or change of local telephone service. One or more SCC may apply to each Customer order depending upon the work functions performed. The charges specified herein do not contemplate work being performed at a time when overtime wages apply due to the request of the customer.

All changes in the location of a customer's service from one premise to another will be treated as a new installation. SCCs do not apply when service is disconnected.

Service Connection Charges are associated with, but not necessarily limited to service establishment, and Telephone number changes.

**1. Description**

**Primary Service Connection Charge** - Applies for the establishment of service, per location, per occasion. The charge is for receiving, recording and processing information necessary to execute a customer's request for service and initial connection or establishment of service. (T)

**Secondary Service Connection Charge** - Applies to the second or additional line of a new access line installation and connection. This charge applies only when the second or additional line is ordered simultaneously with the initial connection for service. (N)

**Transfer of Service Charge, Primary Line** - Applies to the first line of a Transfer of Service (TOS) Order, when a customer requests a move or change in physical location. This charge applies whether a customer changes telephone number or not. If, in addition, the Customer requests the telephone number be changed, a separate charge may apply.

**Transfer of Service Charge, Secondary Line** - Applies to the second, or third, etc., line of a Transfer of Service (TOS) Order, when a customer requests a move or change in physical location. This charge applies whether a customer changes telephone number or not. If, in addition, the Customer requests the telephone number be changed, a separate charge may apply. (N)

**Change Order - Subsequent Charge** - Applies for changes in existing service such as changing a local access line or trunk from hunting to non-hunting or to resequence hunting numbers. Also applies for charges or additions to features after initial establishment of service. Applies to other customer-requested changes in service that are not specifically covered in other nonrecurring service connection charges. (Z) (T) (Z) (T)

#### 3. Service Connection Charges (SCC) (Continued)

##### 1. Description (Continued)

Record Charge – Applies for a customer requested change to business office, directory or billing records when no premises work, access line work or central office work is required.

Technician Dispatch Charge – Applies when travel to a subscriber's premises is required. Only one Technician Dispatch Charge applies per subscriber request at the same premises.

Telephone Number Change Order Charge - Applies to each telephone number change request/order associated with local access lines/trunk service or Remote Call Forwarding.

Listing Change Charge - Applies when a Customer requests/orders a change to add or delete a white pages listing or requests a change to add/delete listings. This charge also applies to a request for Non-Published or Non-Listed numbers.

(D)

(D)

Restoration of Service Charge - Applies to the restoration of temporarily suspended service and facilities because of nonpayment of bills and is payable at the time that the restoration of the temporarily suspended service and facilities are arranged. In the event that service is permanently disconnected for nonpayment of bills, Service Connection Charge(s) applicable for service installation will apply at the time that service is subsequently reestablished.

**LOCAL EXCHANGE SERVICES****8. BUSINESS PRODUCT DESCRIPTIONS (Continued)****3. Service Connection Charges (SCC) (Continued)****2. Presubscribed Interexchange Carrier (PIC) Change Charge**

This refers to an arrangement whereby a customer may select and designate an Interexchange Carrier to access, without an access code, for interLATA and intraLATA intrastate calls. Charges apply per line or trunk, per carrier changed.

Single line customers requesting a PIC to only one line or trunk will incur the per line charge. Multiline customers requesting a PIC to more than one line or trunk in a single request will incur the per line charge for the first line and the additional line charge for each additional line or trunk.

**3. Miscellaneous Charges**

Duplicate Invoice - applies each time a Customer requests an additional copy of a current bill or invoice.

**LOCAL EXCHANGE SERVICES****8. BUSINESS PRODUCT DESCRIPTIONS (Continued)****4. Custom Calling Services**

Custom Calling Services are optional service arrangements of central office features furnished to individual line customers. The following custom calling features are available within the exchange area of all exchanges served by a central office where facilities and operating conditions permit. Customers may subscribe to one or more of the following features.

A Feature Installation Change Charge applies in lieu of all other Service Connection Charges to establish or change one or more Custom Calling Features.

**1. Features and Functions**

1. **Anonymous Call Rejection** – Allows customers to reject calls from calling parties that have blocked the delivery of their number and/or name. Calls are routed to an announcement. Anonymous Call Rejection is provided at no additional charge to Caller ID – *Number Only* and *Caller ID with Name and Number* Customers, subject to the availability of facilities. The feature is available to non-Caller ID subscribers for a flat monthly rate. (T)

2. **Call Forwarding**- *Provides an arrangement for transferring incoming calls to another telephone number one call at a given time unless the Customer also subscribes to Simultaneous Call Forwarding. Calls may be transferred to any telephone number.* (T)(N)  
(N)

The Call Forwarding customer is responsible for payment of toll, *local usage sensitive* or other charges associated with each call between the called number and the forwarded number. *Call Forwarding shall not be used to extend calls on a planned and continuous basis to intentionally avoid the payment, in whole or in part, of local usage sensitive or message toll charges that would regularly be applicable between the station originating the call and the station to which the call is transferred. The Company will not provide identification of the originating telephone number to the call forwarding number.* (T)  
(N)  
(N)

1. **Call Forwarding - Variable** - Permits the Customer to automatically forward all incoming calls to another telephone number, *until the customer deactivates the feature*, and to restore it to normal operations at the Customer's discretion. *If forwarded to a long distance number, the Customer will incur long distance charges. This feature is available to Business Customers only.* (T)  
(T)
2. **Call Forwarding - Busy** - Permits the Customer to have all incoming calls automatically forwarded to a predetermined telephone number when the Customer's line is busy.
3. **Call Forwarding - Busy/No Answer** - Permits the forwarding of incoming calls when the Customer's line is busy or remains unanswered after a designated number of rings.

April 2, 2004

Filed under authority of Order of the Public Utilities Commission of Ohio in Case No. 04-465-TP-ZTA

**LOCAL EXCHANGE SERVICES**

---

**8. BUSINESS PRODUCT DESCRIPTIONS (Continued)****4. Custom Calling Services (Continued)****1. Features and Functions (Continued)****2. Call Forwarding (Continued)**

(T)

4. Call Forwarding - No Answer - Permits the forwarding of incoming calls when the Customer's line remains unanswered after a designated number of rings. The number of rings and the forwarded number are predetermined by the customer order.
5. Remote Call Forwarding - Permits the Customer's calls to be automatically forwarded by the central office equipment to a predetermined number over local or long distance facilities. The terminating locations must have the capacity to accept incoming calls.

Remote Call Forwarding is offered where economically and technologically feasible. This feature will not be offered to locations which terminate the calls in a coin telephone instrument. Caller ID is not available to Remote Call Forwarding subscribers. Transmission quality may vary depending upon the distance and routing necessary to complete the forwarded call, therefore, may not be suitable for data transmissions.

A Change Order - Subsequent Charge applies for each change of a telephone number associated with Remote Call Forwarding.

6. Remote Access to Call Forwarding - *This feature allows the Customer to activate and deactivate their Call Forwarding feature and to change their forwarded to number from a location other than where their service is located.*
7. Simultaneous Call Forwarding - *Provides the Customer that also subscribes to an appropriate call forwarding service the ability to forward multiple incoming calls simultaneously to another telephone number designated by the Customer. The Simultaneous Call Forwarding Customer must subscribe to sufficient facilities to adequately handle calls. The Simultaneous Call Forwarding Customer is responsible for the payment of charges (e.g., toll charges) for each call between the Simultaneous Call Forwarding equipped telephone line and the line to which the call is being forwarded.*

**LOCAL EXCHANGE SERVICES****8. BUSINESS PRODUCT DESCRIPTIONS (Continued)****4. Custom Calling Services (Continued)****1. Features and Functions (Continued)**

3. Call Waiting - Call Waiting *provides a tone signal to indicate to the Customer who is* (M1)  
already engaged in a telephone call that a second caller is attempting to dial in. *Where* (M1)(N)  
*facilities permit, Call Waiting Customers who are subscribed to Caller ID may also*  
view on a Customer-provided display device the calling party's name and/or telephone (M2)  
number associated with an incoming Call Waiting call, unless the name and telephone (M2)  
number of the calling party is suppressed, *either via Per Call or Per Line Blocking. In*  
*areas where Caller ID with Name and Number is not available, Caller ID-Number*  
*Only, which displays only the caller's telephone number, will be displayed. Call*  
*Waiting permits the Customer to place the first call on hold and answer a waiting*  
*call. The Customer may alternate between the two calls by depressing the switchhook*  
*or "flash" feature. Where facilities permit, options for call handling during an active*  
*call include answering the call, sending a "please hold" message, conferencing the*  
*caller with the current call, or forwarding the caller to a voice mail system.*

The Customer *may disable* Call Waiting for the duration of an outgoing call by dialing  
an activation code immediately prior to placing the call. Call Waiting is automatically  
reactivated when the Customer disconnects from the call.

4. Caller ID - Allows a Customer to view, on a customer provided display unit, the Calling  
Party Number (CPN) or the Calling Party Directory Name (CPDN) on incoming  
telephone calls. Where facilities are available, Anonymous Call Rejection is provided  
with this feature at no additional charge.
1. Caller ID (Number Only) - Allows a Customer to view the Calling Party Number  
(CPN) on a customer-provided display unit
2. Caller ID with Name and Number - Allows a Customer to view, on a customer  
provided display unit, the Calling Party Number (CPN) and the Calling Party  
Directory Name (CPPN) on incoming calls, (limited to areas where the underlying  
local exchange carrier accesses calling number databases). Where facilities are  
available, Anonymous Call Rejection is provided with this feature at no additional  
charge.

---

**8. BUSINESS PRODUCT DESCRIPTIONS (Continued)****4. Custom Calling Services (Continued)****1. Features and Functions (Continued)****4. Caller ID – (Continued)**

Any Customer subscribing to Caller ID will be responsible for the provision a display device that will be located on the Customer's premises. The installation, repair, and technical capability of that equipment to function in conjunction with the feature specified herein will be the responsibility of the Customer. Sprint assumes no liability and will be held harmless for any incompatibility of this equipment to perform satisfactorily with the network features described herein.

(M)

Telephone CPN information transmitted via Caller ID is intended solely for the use of the Caller ID subscriber. Resale of this information is prohibited by this tariff. CPN will not be displayed if the called party is off-hook or if the called party answers during the first ring interval. CPN will be displayed for calls made from another central office only if it is linked by appropriate facilities. Caller ID is not available on operator handled calls.

7. Call Return- Allows the customer to automatically redial the last incoming call whether answered or not. If the line is busy, Call Return rings back the customer when the line is no longer busy, for up to thirty (30) minutes. Call Return is available on either a flat monthly rate or on a usage sensitive basis, where facilities are available.

8. Repeat Dialing - Allows the customer to dial a code initiating the switch to automatically place a call to the last outgoing number stored. Each time a customer dials, the most recent number is stored. When the called number is busy, the number will be automatically redialed for thirty (30) minutes and will be signaled by a distinctive ringing pattern. Repeat Dialing is available on either a flat monthly rate or on a usage sensitive basis, where facilities are available.

(D)

10. Signal Ring - Provides the Customer with one or two additional telephone numbers on the primary line, each with its own distinctive ringing pattern. The designated primary number will receive a normal ringing pattern.

Directory listings are provided for each telephone number associated with Signal Ring. Charges for additional listings or other directory services will apply to all associated Signal Ring numbers.

Service Connection charges may apply to any changes in the listings for telephone numbers associated with Signal Ring.

The distinctive ringing patterns associated with this service may not be recognized by some Customer provided terminal equipment.

Signal Ring is only available on single line or non-hunting multi-line service.

11. Speed Dial 8 - Permits the Customer to place calls to other telephone numbers by dialing a code rather than the complete telephone number. This feature is available in an eight (8) number capacity.
12. Three-Way Calling - Permits the Customer to add a third party to an established connection on both outgoing and incoming calls without operator intervention. Three-Way Calling is available on either a flat monthly rate basis or on a usage sensitive basis, where facilities are available.

#### 5. Operator Services

##### 1. Operator Assistance

When customers request that a call be handled in such a manner that operator assistance in completion of the call is necessary, such as alternate billing, person-to-person services, operator dialed or requests other special handling of the call, Operator Assistance surcharges apply as set forth within.

Busy Line Interrupt: Upon request of a calling party the operator will interrupt the call on the called line only if the calling party indicates an emergency.

Busy Line Verify: Upon request of a calling party the Operator will verify a busy condition on a called line. The operator will determine if the line is clear or in use and report to the calling party.

Operator Dialed: The end user places the call without dialing the designated number, although the capability to do it himself exists. The end user will dial "0" for local calls and long distance calls and then requests the operator to dial the called station.

Person-to-Person: Calls completed with the assistance of a Company operator to a particular person, station, department, or PBX extension specified by the calling party. Charges may be billed to the calling station, called station (collect), or a third number.

Station-to-Station: Refers to calls other than person-to-person calls billed collect or to a calling card or third number. Calls may be completed with or without the assistance of a Company operator.

**LOCAL EXCHANGE SERVICES**

---

8. **BUSINESS PRODUCT DESCRIPTIONS** (Continued)

(T)

5. **Operator Services** (Continued)2. **Directory Assistance**

Customers may obtain directory assistance in determining telephone numbers by calling the Directory Assistance (DA) operator. A maximum of two requested telephone numbers will be provided for each Directory Assistance call. A Directory Assistance Charge applies when customers request assistance in determining telephone numbers in the local calling area in which the customer receives local exchange services (local directory assistance), telephone numbers located outside the local calling area but within the customer's Home Numbering Plan Area (long distance directory assistance), or telephone numbers that are located outside the customer's Home Numbering Plan Area (national directory assistance).

When a customer requests operator assistance to place a call to Directory Assistance, the Operator Services Operator Dialed Call Placement Charge applies in addition to the Directory Assistance Charge. Directory Assistance calls that are alternately billed (collect, calling card or third number) will be assessed the applicable Operator Services Call Placement Charge.

Calls to Directory Assistance from lines of customers who have been certified by a registered physician or recognized agency as unable to use a directory because of a physical handicap are not subject to charge.

The Directory Assistance Charge applies per call even if the customer requests telephone numbers that are Non-Published or otherwise not found by the automated directory assistance system.

**8. BUSINESS PRODUCT DESCRIPTIONS (Continued)****(T)****6. Directory Listings**

For each Customer of Company-provided Exchange Service(s), one listing (Initial Listing) will be offered without charge for each Local Exchange Service access line and will be published by the dominant Local Exchange Carrier at no charge.

**1. Description****1. Listings - Additional**

Additional listings are any listings of a name or information in connection with a customer's access line number beyond that to which the customer is entitled in connection with the customer's regular service, including listings of the customer's main telephone number in a directory other than the directory which contains the primary listing. Additional listings include Alternate listings, Cross Reference listings, Foreign listings and Secretarial listings.

Where a customer is served by two or more lines in a regular hunt group, an additional listings may be provided for any of the lines in the group.

**2. Listing - Non-Listed****(T)**

A Non Listed listing applies to primary numbers that will not appear in the phone directory. The primary number will be listed in the directory assistance records and will be furnished upon request of the calling party.

##### 10. Extra Listing

Where available, a list in a telephone directory which is not in the Customer's immediate calling area.

##### 11. Extra Line Listing

An extra line listing may be provided in the directory if it facilitates the use of telephone service. An extra line consists of five words or any fraction thereof. Ordinarily, an extra line will be provided only when a Customer has more than one listed telephone. When a Customer needs more than five words to properly direct calls, he may arrange for two or more extra lines.

(T)

10. **Miscellaneous Services** (Continued)2. **Blocking of Calling Party Number (CPN)**1. **Description**

When Caller ID is activated on a customer's line, the CPN of incoming calls is displayed at the called Customer Premise Equipment (CPE) during the first, long silent interval of the ringing cycle.

Per line blocking of CPN is available upon request, at no charge, to the following entities for lines over which the official business of the agency is conducted, including those at the residences of employees/volunteers, where an executive officer of the agency registers a need for blocking and provides the required certification to Sprint: a) private, nonprofit, tax exempt, domestic violence intervention agencies and b) federal, state, and local law enforcement agencies. The CPN will not be transmitted from a line equipped with this capability. Per line blocking is operational on a continuous basis but can be deactivated by the customer by dialing an access code immediately prior to placing a call. Line blocking customers can unblock their CPN information on a per call basis, at no charge, by dialing an access code (\*82 on their touch tone pad or 1182 from a rotary phone) immediately prior to placing a call.

A customer may prevent the delivery of their calling name and/or number to the called party by dialing an access code (\*67 on their touch tone pad or 1167 from a rotary phone) immediately prior to placing a call. The access code will activate per call blocking, which is available at no charge. If the calling party activates blocking, the CPN will not be transmitted across the line to the called party. Instead, customers will receive an anonymous indicator notifying the Caller ID customer that the calling party has elected to block the delivery of their name and telephone number. The blocking of CPN will not be provided on calls originating from Customer Owned Pay Telephones. If the Caller ID customer also subscribes to Selective Call Rejection, the calling party will be routed to a telephone company recording advising the caller that the called party will not accept calls whose CPN has been blocked.

---

**8. BUSINESS PRODUCT DESCRIPTIONS (Continued)****10. Miscellaneous Services (Continued)****4. Selective Call Screening****1. Description**

Selective Call Screening is designed to restrict certain types of billing from a line that originates a call. The screening is designed to inform the operator services provider about special characteristics with the line. Under this arrangement, the operator services provider processes the operator-assisted, and/or operator-handled, and/or automated operator-assisted originating call so that the call will conform to one of the allowable types of billing, which could be those which conform only to billing as collect, billed to a third number, or billed to a calling card.

**2. Regulations**

1. The Company assumes no liability for calls completed by any other entity or carrier or operator services provider as long as the screening code accompanies the call forwarded to the other entity. The Company is responsible for properly handling calls, which are selectively screened and are not carried over any other entity's network or facilities.
2. Customers subscribing to Selective Call Screening Service are responsible for all toll ***and local usage-sensitive*** charges billed to their lines for calls that are not carried

**LOCAL EXCHANGE SERVICES****8. BUSINESS PRODUCT DESCRIPTIONS (Continued)****10. Miscellaneous Services (Continued)****5. Call Trace****1. Description**

Call Trace enables a customer to initiate a trace of the origin of the last incoming call by dialing an activation code. If a trace is successful, the Company's equipment will record the incoming call detail (date, time, telephone number). The results of the trace will be disclosed to a law enforcement agency. Call Trace is available where facilities permit.

**2. Rate**

	<u>Max</u>
Charge Per Successful Trace	\$30.00

**6. Line Hunting**

The following Line Hunting arrangements are available to Customers and allow the customer to specify a hunting sequence or hunting arrangement for call distribution of incoming calls. There is no additional charge for Line Hunting.

(D)  
(D)

**1. Descriptions****1. Line Hunting Regular**

The hunt for an idle line starts with the called line in a prearranged group and ends with the last line in the group, completing the call to the first idle line encountered. Unless the first line is called, only a portion of the group is hunted.

**2. Line Hunting Circular**

Permits a complete hunt sequence over all the lines in a prearranged group. If no idle line is encountered, the hunt will continue until it reaches the line that was originally called.

**LOCAL EXCHANGE SERVICES****8. BUSINESS PRODUCT DESCRIPTIONS (Continued)****(T)****10. Miscellaneous Services (Continued)****10. Telecommunications Service Priority (TSP) System****1. Description**

The TSP System is a service that provides for the priority provisioning and/or restoration of National Security Emergency Preparedness (NSEP) telecommunications services. The TSP system applies only to NSEP services, which includes Switched Access facilities and local exchange and intrastate services and provides the Company with a guide to the sequence in which services are to be provisioned and/or restored.

All facilities that can be identified by a unique circuit identifier can be provisioned for TSP service by the Company.

The Executive Office of the President is empowered with the authority to receive, evaluate and process requests for NSEP TSP Services. The Executive Office of the President, through the TSP Program office as its administrative branch, makes the priority level assignments and issues the TSP authorization code reflecting the priority assignments associated with the Customer's request. The Customer initiates the request for TSP service from the TSP Program office through an agency of the federal government. The Customer then provides the TSP authorization code, in addition to all other details necessary to complete the order, and submits it to the Company for appropriate action.

**8. BUSINESS PRODUCT DESCRIPTIONS (Continued)****10. Miscellaneous Services (Continued)****14. Blocking Services****A. Description**

Blocking service is a feature that permits Customers to restrict access from their telephone line to various discretionary services. The following blocking options are available to Customers where facilities and services permit. This service is only available to Sprint Integrated Local Services Customers.

The minimum service period is one month. Service is furnished subject to the technical capability.

The Customer indemnifies and saves harmless the Company from any and all claims, losses and damages caused by this blocking of the Customer's calling.

1. 101XXXX Blocking - Allows the subscriber to block outgoing calls to 101XXXX1+ and 101XXXX011+ numbers.
2. International Blocking - Allows the subscriber to block outgoing calls to 011+ and 101XXXX011+ numbers.

**LOCAL EXCHANGE SERVICES****8. BUSINESS PRODUCT DESCRIPTIONS (Continued)****11. Bundled Services (Continued)****3. Sprint Integrated Local Services**

Sprint Integrated Local Services includes usage-sensitive business Local Exchange Service, Touch Tone Calling Service, and certain features.

If available in the territory of the underlying incumbent local exchange carrier, Local Exchange Services may be used to originate calls to other telephone companies' caller-paid information services (e.g. 900, 976, etc.). Calls to those numbers and other numbers used for caller-paid information services will be blocked by the Company at the Customer's request. Customers who request other call blocking or screening services will be charged as specified elsewhere in this Tariff.

Unless otherwise specified in this Tariff, *Sprint Integrated Local Services* are available for one-year, two-year and three-year commitment periods. Customers must subscribe for a minimum one-year period. If the Customer terminates all or any portion of the services before the end of the term commitment, the Company may assess a termination liability equal to 100% of the monthly recurring charge multiplied by the number of months left in the first contract year, plus 50% of the monthly charge for each month remaining in subsequent contract years. The Company will not charge early termination liabilities if, upon giving notice of termination, the Customer orders another Sprint service with a monthly charge and term commitment equal to or greater than those services being terminated. (T)

Commitment periods can be extended by the Customer at any time during the term of the plan. The number of months accrued in the current plan will apply toward the new plan selected. If the Customer does not specify renewal terms prior to the expiration of the service period, the existing rates in effect at the time of expiration will automatically continue. The Customer can terminate *Sprint Integrated Local Services* at the end of the service period with no penalty or obligation to continue the service. (D)

Customers who subscribe to *Sprint Integrated Local Services* must subscribe to one of the Block of Time Minutes specified in Section 9.13.3 for their usage-sensitive local exchange service. All Block of Time Minutes are provided on a per Customer location basis. All Integrated Local Services provided at a single Customer location must share the Block of Time Minutes option selected by the Customer. These minutes do not apply to long distance.

When a customer orders multiple high capacity (1.544 Mbps) facilities in conjunction with an Integrated Local Service, the sum of the channels, trunks or lines ordered for all such facilities at a single location under a single account must be equal to or greater than the required minimum quantity. When a maximum number of channels, trunks or lines are stated for a service, the maximum applies per facility rather than per location. (N)

ISSUED:  
March 1, 2005

Director - Tariffs

Overland Park, KS 66251

EFFECTIVE:  
March 1, 2005

**LOCAL EXCHANGE SERVICES**

---

**8. BUSINESS PRODUCT DESCRIPTIONS (Continued)****11. Bundled Services (Continued)****3. Sprint Integrated Local Services****A. Term Discount Plan (TDP)**

The Term Discount Plan (TDP) provides customers with discounted rates for Sprint Integrated Local Services.

The discount applies to the monthly recurring charge for Sprint Integrated Local Services and all optional services and features ordered from this Tariff.

At the end of the TDP service commitment period, the customer may subscribe to a new TDP at the prevailing rates. If the customer does not select a new TDP, the prevailing rates applicable for the expired TDP will continue in effect for as long as the customer chooses to continue subscribing to the services installed under the expired TDP.

Rate increases or decreases will automatically be applied to the monthly term plan rates for the remaining term of the TDP.

The customer can extend TDP commitment periods at any time during the term of the plan, up to a maximum of three years. The number of remaining months in the original term plan will apply toward the new term plan selected.

If customers under a TDP disconnect any portion of their Sprint Integrated Local Services TDP service prior to the expiration of the TDP, then a Termination Liability Charge will apply to those services that are disconnected. The Termination Liability Charge will be equal to 100% of the monthly recurring charge for each month remaining in the first contract year, plus 50% of the monthly recurring charge for each month remaining in subsequent years. The Company will not charge early termination liabilities, if, upon giving notice of termination, the customer orders another Sprint Integrated Local Services with a monthly charge and term commitment period equal to or greater than those services being terminated.

<u>Commitment Period</u>	<u>Discount</u>
One Year	5%
Two Year	10%
Three Year	15%

### 8. BUSINESS PRODUCT DESCRIPTIONS (Continued)

#### 11. Bundled Services (Continued)

#### 3. Sprint Integrated Local Services (Cont'd)

#### 3. Integrated T1 Service

Integrated T1 Service includes the following:

1. Customer channelized high capacity (1.544 Mbps) facility between a Customer premises and its serving office for connection to services provided by Sprint. Integrated T1 Service allows a Customer to integrate voice and data on a single high capacity facility. The Customer selects a package of a minimum of 6 voice channels (up to a maximum of 20 total voice channels) for local exchange access for usage-sensitive local calling, and a minimum of 4 Dedicated IP channels for Internet Access (up to a maximum of 18 total Dedicated IP channels). The balance of the facility's capacity is available for data. The rates herein are for the portion of the service dedicated to voice applications;
2. Feature: Caller ID-Number Only;
3. Dedicated IP for Internet Access\*;
4. Subscription to a Block of Time Minutes as specified preceding in this Section is required.

Voice channels will be provisioned with Line Hunting upon Customer request, at the rates specified in Section 9.13.3.3.

---

\* Dedicated IP is not regulated by the Commission. Nonregulated charges for this service apply in addition to the regulated charges specified in this Tariff.

**8. BUSINESS PRODUCT DESCRIPTIONS (Continued)****11. Bundled Services (Continued)****3. Sprint Integrated Local Services (Cont'd)****4. Digital Integrated T1 Service**

Digital Integrated T1 Service includes the following:

1. Customer channelized high capacity (1.544 Mbps) facility between a Customer premises and its serving office for connection to services provided by Sprint. Digital Integrated T1 Service allows a Customer to integrate voice and data on a single high capacity facility. The Customer selects a package of a minimum of 6 voice channels (up to a maximum of 20 total voice channels) for local exchange access usage-sensitive local calling, and a minimum of 4 Dedicated IP channels for Internet Access (up to a maximum of 18 total Dedicated IP channels). The balance of the facility's capacity is available for data. The rates herein are for the portion of the service dedicated to voice applications;
2. Feature: Line Hunting;
3. Dedicated IP for Internet Access\*;
4. Subscription to a Block of Time Minutes as specified preceding in this Section is required.

The Customer will be responsible for the connection from the Integrated Access Device to their equipment (no connection block will be provided with this service). Customers must digitally accept all of their channels. No more than two trunk groups will be provisioned for any given circuit.

- \* Dedicated IP is not regulated by the Commission. Nonregulated charges for this service apply in addition to the regulated charges specified in this Tariff.

## LOCAL EXCHANGE SERVICES

---

### 8. BUSINESS PRODUCT DESCRIPTIONS (Continued)

#### 11. Bundled Services (Continued)

##### 3. Sprint Integrated Local Services (Cont'd)

##### 5. Sprint Digital PBX Trunk Service

Sprint Digital PBX Trunk Service includes the following:

1. Digital access from the Customer's premises to the central office via a DS1 (1.544 Mbps) connection. This connection provides a facility with the equivalent of 24 access lines between a Customer's premises and a central office that can be used as Wide Area Telecommunications Service (WATS), or as PBX trunks for local exchange access for usage-sensitive local calling, which may or may not include Direct Inward Dial (DID). Sprint Digital PBX Trunk Service is provided in a base capacity of 24 channels.

The PBX Digital Trunk Service provides 1.544 Mbps digital trunking and the local distribution channel between the serving central office and 24 channels, and provides for the communications path between the Customer's designated premises and the serving wire center of that premises;

2. Features: Line Hunting and Block of 10 DID Numbers;
3. Subscription to a Block of Time Minutes as specified preceding in this Section is required.

**LOCAL EXCHANGE SERVICES**

---

**8. BUSINESS PRODUCT DESCRIPTIONS (Continued)****11. Bundled Services (Continued)****3. Sprint Integrated Local Services (Cont'd)****6. Sprint ISDN-PRI for Business****A. Description**

Sprint ISDN-PRI for Business includes the following:

1. A high speed end-to-end digital switched service that provides PBX and host computers access to switched services via an ISDN central office. The service can carry voice, data and video simultaneously. Traffic can be inward, outward or a combination of both. This is controlled by the Customer's CPE. Local exchange access includes usage-sensitive local calling.

A facility consists of up to twenty-three "B" (Bearer) channels and one "D" (Delta) channel at a total speed of 1.544 Mbps. The D channel is used for signaling and can usually handle an additional 19 ISDN facilities containing 24 B channels. The local channel may be a DS1 with clear channel capability.

2. Features: Caller ID-Number Only, Block of 10 DID Numbers and Line Hunting;
3. Subscription to a Block of Time Minutes as specified preceding in this Section is required.

One directory listing will be provided per D-Channel. Additional directory listings are available as specified in Section 8.6 of this Tariff.

**B. Optional Service Component**

The following Service Component is also available with the Sprint ISDN-PRI for Business:

**PRI D Channel** - A D channel may be designated as a Backup D channel for another D channel that provides signaling and control for one or more ISDN PRI connections. This enables the Customer to complete calls to a busy station without continually redialing. Certain equipment restrictions may apply.
