SECTION 2 - REGULATIONS

2.1 Undertaking of the Company

2.1.1 Scope

The Company undertakes to furnish intrastate telecommunications services within the State of Ohio under the terms of this Tariff. Service is available 24 hours a day, seven days a week.

The Company is responsible under this Tariff only for the services provided herein. Should Customers use such services to obtain access to services offered by other providers, the Company assumes no responsibility for such other service.

2.1.2 Terms and Conditions

- A. Except as otherwise provided herein, service is provided on the basis of a minimum period of at least one month and shall continue to be provided until service is cancelled or terminated by either party.
- B. Unless otherwise specified herein, for the purpose of computing charges in this Tariff, a month is considered to have thirty (30) days. All calculations of dates set forth in this Tariff shall be based on calendar days. Should the applicable date fall on a Sunday or Federal holiday, the Customer will be permitted to make payment on the next regular business day.
- C. This Tariff shall be interpreted and governed by the laws of the State of Ohio.
- D. Another telephone company must not interfere with the right of any person or entity to obtain service directly from the Company.
- E. The Customer has no property right to the telephone number or any other call number designation associated with services furnished by the Company. The Company reserves the right to change such numbers, or the central office designation associated with such numbers, or both, assigned to the Customer, whenever the Company deems it necessary to do so in the conduct of its business.
- F. Customers may be required to enter into written Service Orders which shall contain or reference the name of the Customer, a specific description of the service ordered, the rate to be charged, the duration of the services, and the terms and conditions in this tariff.

3.2 Usage Based Charges

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

- 3.2.1 Calls are measured in durational increments identified for each service. All calls which are fractions of a measurement increment are rounded-up to the next whole unit.
- 3.2.2 Timing on completed calls begins when the call is answered by the called party. Answering is determined by hardware answer supervision in all cases where this signaling is provided by the terminating local carrier and any intermediate carrier(s). Timing for operator service person-to-person calls start with completion of the connection to the person called or an acceptable substitute, or to the PBX station called.
- 3.2.3 Timing terminates on all calls when the calling party hangs up or the Company's network receives an off-hook signal from the terminating carrier.
- 3.2.4 Calls originating in one time period and terminating in another will be billed in proportion to the rates in effect during different segments of the call.
- 3.2.5 All times refer to local time.

3.3 Rates Based Upon Distance

Where charges for a service are specified based upon distance, the following rules apply:

- 3.3.1 Distance between two points is measured as airline distance between the rate centers of the originating and terminating telephone lines. The rate center is a set of geographic coordinates, as referenced in Local Exchange Routing Guide issued by Bellcore, associated with each NPA-NXX combination (where NPA is the area code and NXX is the first three digits of a seven-digit telephone number). Where there is no telephone number associated with an access line on the Company's network (such as a dedicated 800 or WATS access line), the Company will apply the rate center of the Customer's main billing telephone number.

SECTION 3 – APPLICATION OF RATES (cont'd)

3.3 Rates Based Upon Distance (cont'd)

3.3.2 The airline distance between any two rate centers is determined as follows:

- A. Obtain the "V" (vertical) and "H" (horizontal) coordinates for each Rate Center from the above-referenced Bellcore document.
- B. Compute the difference between the "V" coordinates of the two rate centers; and the difference between the two "H" coordinates.
- C. Square each difference obtained in step (b) above.
- D. Add the square of the "V" difference and the square of the "H" difference obtained in step (C) above.
- E. Divide the sum of the squares by 10. Round to the next higher whole number if any fraction is obtained.
- F. Obtain the square root of the whole number result obtained above. Round to the next higher whole number if any fraction is obtained. This is the airline mileage.
- G. FORMULA =

$$\sqrt{\frac{(V1 - V2)^2 + (H1 - H2)^2}{10}}$$

SECTION 5 - SERVICES AND RATES (cont'd)

5.6 PBX Trunk Service - Digital/DS1

PBX Trunk Service - Digital/DS1 provides business Customers with PBX or PBX-like equipment or other telephonic equipment with access to switch port. Customers can purchase this capability for both primary service (listed directory number) and diversity purposes. Customers must have the ability to terminate DS1 signal. The signal is delivered as a digital signal at the DS1 level.

The connection to the Customer's equipment is accomplished using a DS1 for digital connectivity.

Customers can subscribe to PBX Trunk Service - Digital/DS1 for local telecommunications services. Customers can also use this service for intraLATA and interLATA toll calling capability and for access to long distance carriers.

DID trunk signaling enables a PBX to switch an incoming call directly to the intended extension number without the need for an attendant. PBX Trunk Service - Digital/DS1 includes access to 911 service.

PBX Trunk Service - Digital/DS1 provides line connections from an end user's Private Branch Exchange ("PBX"), Key System, or other telephonic device to the Switch Port. PBX Trunk Service - Digital/DS1 is available as a DS1 (1.544 Mbps). Service on a Digital Trunk is available on a measured rate basis for business customers only. A minimum order of 18 voice grade connections (active DSO trunks) is required. Charges for Local Calling Service and Message Telecommunications Service are assessed on a measured rate basis and are additional to charges for PBX Trunk Service - Digital/DS1.

The Customer may opt to utilize PBX Trunk Service - Digital/DS1 for outgoing calls only, or for outgoing and incoming calls. In the latter case, direct inward dial ("DID") numbers must be purchased from the Company.

An Internet Service Provider ("ISP") may opt to utilize PBX Trunk Service-Digital/DS1 ISP Service (DID only) for incoming calls to its facility. DID numbers must be purchased from the Company.

7.1.2 Basis for Cost Computation

- E. license preparation, processing and related fees;
- F. tariff preparation, processing and related fees;
- G. any other identifiable costs related to the facilities provided; or

- A. The termination liability period is the estimated service life of the facilities provided.
- B. The amount of the maximum termination liability is equal to the estimated amounts for:
 - 1. Cost installed of the facilities provided including estimated costs for rearrangements of existing facilities and/or construction of new facilities as appropriate, less net salvage. Cost installed includes the cost of:

EXHIBIT C

**Narrative Summarizing All Changes Proposed by
A.R.C. Networks, Inc. d/b/a InfoHighway
In Compliance with PUCO Opinion and Order
in Case No. 06-1345-TP-ORD**

PUCO Opinion and Order in Case No. 06-1345-TP-ORD provides that even within the P.U.C.O.'s mandatory detariffing environment, carriers must retain tariffs for the following Tier 1 services:

"local dial tone service; touch tone dialing service; access to and usage of 9-1-1 services; access to operator services and directory assistance; provision of a telephone directory and listing; per call, caller identification blocking services, access to telecommunications relay service, access to toll presubscription, interexchange or toll providers and networks of other companies (i.e., Basic Local Exchange Services).

Additionally, a tariff must continue to be maintained

"for purposes of complying with Commission and/or Federal Communications (FCC) directives including, but not limited to: primary interexchange carrier (PIC) change charges, Alternative Operator and Inmate Operator Services (AOS/IOS); late payment and bad check charges, per call and per line blocking; intrastate special and switched access services provided to carriers; N-1-1 service; pole attachments and conduit occupancy; pay telephone service; and telecommunications relay service."

To comply with this directive, A.R.C. Networks, Inc. d/b/a InfoHighway ("InfoHighway") has analyzed the provisions embodied in the Company's P.U.C.O. Tariff No. 1. Set forth at Exhibit A hereto is the text which InfoHighway is removing from P.U.C.O. Tariff No. 1 in order to comply with the dictates of the PUCO's Opinion and Order. Set forth at Exhibit B hereto is the text of P.U.C.O. Tariff No. 1 which will remain on file with the PUCO following the effectiveness of InfoHighway's mandatory detariffing filing.

To the extent the provisions previously set forth in P.U.C.O. Tariff No 1 have not been superceded by PUCO rules, these rates, terms and conditions of service will continue to apply to InfoHighway's Ohio telecommunications service offerings.
