**SECTION 3 - PRODUCTS AND SERVICES (CONT'D)**

**3.13 Message Toll Service, (Cont'd.)**

**3.13.7 Method of Applying Rates**

- A.** Two point message toll telephone service rates between points are based on the rate distance between rate centers.
- B.** Message toll telephone service rates between points in Ohio are based on the airline distance between rate centers.
- C.** The rate centers and central offices for the State of Ohio are provided in industry publications. Under the list of rate centers the columns headed AV@ and AH@ contain the vertical and horizontal coordinates for each rate center.
- D.** For the purpose of determining airline mileage, vertical and horizontal grid lines have been established across the State of Ohio. The spacing between adjacent vertical grid lines and between horizontal grid lines represents a distance of one coordinate unit. This unit is the square root of 0.1, expressed in statute miles. A vertical (V) and a horizontal (H) coordinate is computed for each rate center from its latitude and longitude location by use of appropriate map-projection equations. A pair of V-H coordinates locates a rate center, for determining airline mileage, at a particular intersection of an established vertical grid line with an established horizontal grid line. The distance between any two rate centers is the airline mileage computed as explained herein.

**3.13 Message Toll Service, (Cont'd.)**

**3.13.8 Determination of Toll Rate Distances Between Points Within the State of Ohio**

To determine the rate distance between any two rate centers proceed as follows:

- Step 1:** Obtain the "V" and "H" coordinates for the serving wire center of the Customer's switch and the destination point.
- Step 2:** Obtain the difference between the "V" coordinates of each of the Rate Centers. Obtain the Difference between the "H" coordinates.
- Step 3:** Square the differences obtained in Step 2.
- Step 4:** Add the squares of the "V" difference and "H" difference obtained in Step 3.
- Step 5:** Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.
- Step 6:** Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating serving wire centers of the call.

**Formula:**

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$

When application of the discount results in a fractional charge, the amount will be rounded up to the nearest cent. Discounts do not apply to residential service. The rate discounts are as follows:

Current rate discounts can be found in Section 4 – Price List

The discounts identified as minimum are numerically higher than the discounts identified as maximum because the minimum shows the lower bound of the effective rate to the customer and the maximum shows the upper bound of the effective rate to the customer.

##### 3.14.2 Variations

The service is offered in two variations depending on the method that the Customer employs to gain access to the Company's network for use of the service:

ULD is offered in Feature Group D (FGD) exchanges whereby the Customer's local telephone lines are presubscribed by the local exchange company (LEC) to the Company's ULD service, such that "1+" interLATA calls are automatically routed to the Company's network.

##### 3.14.4 Dedicated

ULD is offered to the extent that facilities are available in those cases where the Company and the Customer jointly arrange for the establishment of dedicated access facilities connecting the Customer's trunk-compatible PBX or other suitable equipment to the Company's POP. **SECTION 3 - PRODUCTS AND SERVICES (CONT'D)**

**3.16 Public Telephone Surcharge**

In order to recover the Company's expenses to comply with the FCC's pay telephone compensation plan effective on October 7, 1997 (FCC 97-371), an undiscountable per call charge is applicable to all intrastate calls that originate from any pay telephone used to access Company provided services. This surcharge, which is in addition to standard tariff usage charges and any applicable service charges and surcharges associated with service, applies for the use of the instrument used to access Company provided service and is unrelated to the service accessed from the pay telephone.

Pay telephones include coin-operated and coinless phones owned by local telephone companies, independent companies and interexchange carriers. The Public Pay Telephone Surcharge applies to the initial completed call and any reoriginated call (e.g., using the "#" symbol). The Public Pay Telephone Surcharge does not apply to calls placed from pay telephones at which the Customer pays for service by inserting coins during the progress of the call.

Whenever possible, the Public Pay Telephone Surcharge will appear on the same invoice containing the usage charges for the surcharged call. In cases where proper pay telephone coding digits are not transmitted to the Company prior to completion of a call, the Public Pay Telephone Surcharge may be billed on a subsequent invoice after the Company has obtained information from a carrier that the originating station is an eligible pay telephone.

**3.17 Historic Invoices**

The Company will furnish, upon Customer's request, copies of invoices which were originally issued to the Customer more than thirteen months prior to the request or copies of invoices that are available on-line, but that customer does not wish to retrieve from the available on-line system. Customers can request the invoice in one of two formats: electronic copy (portable data file/.pdf) or CSV/CD of Call Detail Record. Customer will be charged based on the format requested and on a per invoice basis.

**3.18 Returned Check Charge**

Checks with insufficient funds or from non-existing accounts will be assessed a penalty as follows:

## **EXHIBIT E**

### **Customer Notification**

#### **Ohio Product Document Notice**

Beginning April 1, 2008, the prices, service descriptions, and the terms and conditions for certain telecommunication services that you are provided by XO Communications Services, Inc. will no longer be on file with the Public Utilities Commission of Ohio. These services include all long distance services, and local services that consist of more than three local access lines.

This modification does not automatically result in a change in the prices, terms, or conditions of those services to which you currently subscribe. XO must still provide a customer notice at least fifteen days in advance of rate increases, changes in terms and conditions and discontinuance of existing services. Additionally, you will be able to view the company's future service offerings in the Ohio Product Document online at [www.terms.xo.com](http://www.terms.xo.com) or you can request a copy by contacting XO at 8851 Sandy Parkway, Sandy, UT 84070 or at the toll-free number on your invoice.

Since the services will no longer be on file with the Commission, this means that the agreement reached between the customer and the company, instead of the document on file at the PUCO, will now control new services or changes in service. This agreement, whether it is verbal or written, will still be subject to consumer protections required and enforced by the PUCO.

For any new services or changes in service, it will be important that you carefully review and confirm the price, terms and conditions.

If you have any questions about this matter, please call XO Communications at the toll free number listed on your invoice or visit us online at [www.xo.com](http://www.xo.com).
