Part I – Tariffs

Please indicate the Carrier Type and the reason for submitting this form by checking the boxes below.

NOTE: All cases are ATA process cases, tariffs are effective the day they are filed, and remain in effect unless the Commission acts to suspend.

Carrier Type	<input checked="" type="checkbox"/> ILEC	<input type="checkbox"/> CLEC	<input type="checkbox"/> CTS
Business Tier 2 Services	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Residential & Business Toll Services	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Other Changes required by Rule (Describe in detail in Exhibit C)	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Part II – Exhibits

Note that the following exhibits are required for all filings using this form.

Included	Identified As:	Description of Required Exhibit:
<input checked="" type="checkbox"/>	Exhibit A	The existing affected tariff pages.
<input checked="" type="checkbox"/>	Exhibit B	The proposed revised tariff pages.
<input checked="" type="checkbox"/>	Exhibit C	Matrix or narrative summarizing all changes proposed in the application, and/or other information intended to assist Staff in the review of the Application.
<input checked="" type="checkbox"/>	Exhibit D	Explanation of how the Applicant intends to comply with Rule 4901:1-6-05(G)(3) regarding disclosure of rates, terms, and conditions for detariffed services, including: <ul style="list-style-type: none"> citation to the appropriate Web Page if any, in accordance with rule 4901:1-6-05(G)(4), and/or copy of other materials and publications to be used to comply with 4901:1-6-05(G)(3).
<input checked="" type="checkbox"/>	Exhibit E	One-time customer notice of detariffing and related changes consistent with rule 4901:1-06-16(B) , including where customers may find the information regarding such services as required by rule 4901:1-6-05(G)(3).
<input checked="" type="checkbox"/>	Exhibit F	Affidavit that the Customer Notice described in Exhibit C has been sent to Customers.

Part III. – Attestation

Registrant hereby attests to its compliance with pertinent entries and orders issued by the Commission.

AFFIDAVIT

Compliance with Commission Rules and Service Standards

I am an officer/agent of the applicant corporation, Cincinnati Bell Telephone Company LLC, and am authorized to make this statement on its behalf.
(Name)

I attest that these tariffs comply with all applicable rules, including the Minimum Telephone Service Standards (MTSS) Pursuant to Chapter 4901:1-5 OAC for the state of Ohio. I understand that tariff notification filings do not imply Commission approval and that the Commission's rules, including the Minimum Telephone Service Standards, as modified and clarified from time to time, supersede any contradictory provisions in our tariff. We will fully comply with the rules of the state of Ohio and understand that noncompliance can result in various penalties, including the suspension of our certificate to operate within the state of Ohio.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on (Date) 4/1/08 at (Location) 221 East Fourth Street, 103-1280

*(Signature and Title)  Asst
Secretary & Director Regulatory Affairs

(Date) 4/1/08

- This affidavit is required for every tariff-affecting filing. It may be signed by counsel or an officer of the applicant, or an authorized agent of the applicant.

VERIFICATION

I, D. Scott Ringo Jr.

verify that I have utilized the Telecommunications Application Form for Deteriorating and Related Actions provided by the Commission and that all of the information submitted here, and all additional information submitted in connection with this case, is true and correct to the best of my knowledge.

*(Signature and Title)  Asst Secretary & Director Regulatory Affairs

(Date) 4/1/08

*Verification is required for every filing. It may be signed by counsel or an officer of the applicant, or an authorized agent of the applicant.

- Send your completed Application Form, including all required attachments as well as the required number of copies, to:

**Public Utilities Commission of Ohio
Attention: Docketing Division
180 East Broad Street, Columbus, OH 43215-3793**

Or

Make such filing electronically as directed in Case No 06-900-AU-WVR

EXCHANGE RATE TARIFF
PUCO NO. 3

CINCINNATI BELL TELEPHONE COMPANY

Section 1
Original Page 1

GENERAL REGULATIONS

1. This tariff is subject to and governed by the present provisions of General Exchange Tariff PUCO NO. 8.

The provisions of General Exchange Tariff PUCO NO. 8 apply to this tariff except where in conflict with this tariff.

2. The schedules of basic monthly rates, charges, and nonrecurring charges applicable within the various exchange areas for the services offered therein are shown in Section 2 of this tariff. The services offered in each exchange area, the local service area for each exchange and the particular Rate Bands applicable thereto are specified in the portion of Section 3 applicable to such exchange area.

3. EXCHANGE CLASSIFICATION

For the purpose of determining exchange service monthly rates, exchanges are classified by Rate Bands.

The Local Service Area (LSA) is the geographical area within which customers may make calls without the payment of toll charges. The charges for service within the LSA may be flat rated, measured usage rated, (time of day, distance and length of call) or any tariff approved combination of rate structures. (See Note 1.)

Areas in the LSA that are classified as Community Connection Calling Areas will be charged usage rates in accordance with Section 1, Paragraph 9 of this tariff. When a customer subscribes to Measured Service as described in Section 1, paragraph 7 of this tariff, calls to Community Connection Calling Areas will be rated at the appropriate Community Connection usage rates and measured service usage rates will not apply. Flat Rate Service customers placing calls to Community Connection Calling Areas will be charged the appropriate usage rates associated with such calls in addition to their normal flat rated monthly service charges.

Note 1: Access Line Service for Customer Provided Public Telephone Service is provided on a message rated basis.

GENERAL REGULATIONS

5. Basic monthly rates and charges included in Section 2 following, apply to exchange access lines only. Exchange access lines include the serving central office line equipment (including Touch-Tone capability) and all outside plant facilities including the Telephone Company provided and maintained network interface necessary to connect the serving central office to the customer's premises.

(D)
|
(D)

6. CHARGE TO CHANGE TYPE OF SERVICE FOR RESIDENCE SERVICE CUSTOMER

The types of local exchange service are Flat Rate and Measured Service.

- a. Within 90 days of the date of initiation of service, new residential subscribers shall be allowed a one-time change of their type of local exchange service without charge. This does not preclude the Company from charging for the original service connection, monthly and usage charges for the period such service was used, or the addition or removal of any nonbasic service.
- b. Within 90 days of the date of a change in their type of service, existing residential subscribers shall be allowed to return to their prior type of local exchange service once without charge. This does not preclude the Company from charging for the previous service connection, monthly and usage charges for the period such service was used, or the addition or removal of any nonbasic service. (See Note 1.)

Note 1: The nonrecurring charge to change the type of service will only be waived once during a calendar year per subscriber.

Issued: March 24, 2003

By: Christopher S. Colwell, Vice President – Government Relations
Cincinnati, Ohio

Effective: April 23, 2003
In accordance with Case No.

GENERAL REGULATIONS

7. MEASURED SERVICE

- a. Measured Service allows subscribers to control charges for monthly telephone service by controlling usage. Besides a basic monthly charge for the access line, a subscriber is billed for usage based upon the number, distance, duration, and time-of-day of originated calls.
- b. Measured Service is furnished subject to the availability of facilities.
- c. The distance used for Measured Service billing is based on the airline mileage between rate centers serving the called and calling access line. The airline mileage is computed mathematically employing as a base a vertical (V) and a horizontal (H) coordinate for each central office, as determined from its latitude and longitude location using appropriate map projection equations.

Note 1: The Operator Completion of Local Calls charge (See Section 27 of the General Exchange Tariff) applies in addition to the usage charges when the customer requests the assistance of the Telephone Company operator to complete a local call or a call to a cellular telephone service number that is not a toll call.

Note 2: Tier 1 Noncore (BLES Alt-Reg) rates are subject to Tier 2 pricing flexibility.

Note 3: Tier 1-Noncore rates can be increased to a maximum cap of double the initial rate, other than the second local exchange access line and Call Waiting, which are limited to a ten percent increase per year until they cap at the double initial rate. This pricing flexibility is in accordance with O.A.C. 4901:1-4 and Alt Reg Case No. 04-720, effective July 1, 2004.

GENERAL REGULATIONS

7. MEASURED RATE (Continued)

- e. The monthly charges for measured service are as listed in Section 2 of this tariff. (M)
- f. The off-peak usage rates apply to that portion of the call occurring within the following periods:
 - (1) From 9:00 P.M. to but not including 8:00 A.M., on Monday through Friday.
 - (2) All day Saturday, Sunday and certain holidays. The holidays are New Year's Day (January 1), Independence Day (July 4), Christmas Day (December 25); Labor Day and Thanksgiving Day (or their resulting legal holidays). (M)
- g. Measured Service usage rates do not apply to Access Line Service for Customer Provided Public Telephone Service.
- h. A customer converting to Measured Service may change from Measured Service to any available type of access line service without having to pay the nonrecurring charge to establish such service provided the customer makes the change within 90 days from the time the customer changed to or purchased Measured Service. (See Note 1.)
- i. Chargeable time includes the initial minute plus the additional minutes or fraction thereof, if any. When a call begins in one rate period and ends in another, the rate in effect in each rate period applies to the portion of the call occurring within that rate period. In the event that a minute of use is split between two rate periods, the rate at the start of the minute applies.

Note 1: A customer may be exempted from the nonrecurring charges only once for a change to and only once for a change from Measured Service within a calendar year.

GENERAL REGULATIONS

9. COMMUNITY CONNECTION SERVICE (Continued)

- c. Community Connection Service is available with both the residence and nonresidence classes of service. (M)
- d. Chargeable time includes the initial period plus the additional period, if any. When a call begins in one rate period and ends in another, the rate in effect in each rate period applies to the portion of the call occurring within that rate period. In the event that a minute of use is split between two rate periods, the rate at the start of the minute applies.
- e. The off-peak usage rates apply to that portion of the call occurring within the following periods:
 - (1) From 9:00 P.M. to but not including 8:00 A.M., on Monday through Friday.
 - (2) All day Saturday, Sunday, and certain holidays. The holidays are New Year's Day (January 1), Independence Day (July 4), Christmas Day (December 25); Labor Day and Thanksgiving Day (or their resulting legal holidays). (M)
- f. The usage rates specified in b. preceding are in addition to the basic monthly exchange rates for local service as specified in Section 2 of this tariff.
- g. The Operator Completion of Local Calls charge (See Section 27 of the General Exchange Tariff) applies in addition to the usage charges when the customer requests the assistance of the telephone company operator to complete a local call or a call to a cellular telephone service number that is not a toll call.
- h. Community Connection Service usage rates do not apply to Access Lines for Customer Provided Public Telephone Service. For these Lines, the rate for each message is shown in Section 16 of the General Exchange Tariff PUCO NO. 8.
- i. The distance used for Community Connection Service billing is based on the airline mileage between rate centers serving the called and calling access line. The airline mileage is computed mathematically employing as a base a vertical (V) and a horizontal (H) coordinate for each central office, as determined from its latitude and longitude location using appropriate map projection equations.

GENERAL REGULATIONS

10. LOCAL USAGE DETAIL

- a. Local Usage Detail is an option for Measured Service and Community Connection Service customers who desire a printed listing of call details instead of the usual summary billing of local usage.
- b. Requests for Local Usage Detail must be received prior to the billing date on which it is to be initiated.
- c. The following recurring rates apply for Local Usage Detail:

	<u>Tier</u> <u>Classification</u> (Notes 2 & 3)	<u>Monthly Per</u> <u>Account</u>	<u>Per Listed</u> <u>Call</u>	(T)
Residence				
First Line				(C)
Cincinnati Exchange	1-Core (BLES Alt Reg)	\$ 0.25	\$0.01	
Hamilton Exchange	1-Core (BLES Alt Reg)	0.25	0.01	
All Other Exchanges	1-Core	0.25	0.01	
Second and Third Lines				
Cincinnati Exchange	1-Noncore (BLES Alt Reg)	\$ 0.25	\$0.01	
Hamilton Exchange	1-Noncore (BLES Alt Reg)	0.25	0.01	
All Other Exchanges	1-Noncore	0.25	0.01	(C)
Fourth Line and Above	2	0.25	0.01	
All other applicable residence services (Note 1)	2	0.25	0.01	

Note 1: Includes services such as Complete Connections.

Note 2: Tier 1-Noncore (BLES Alt-Reg) rates are subject to Tier 2 pricing flexibility.

Note 3: Tier 1-Noncore rates can be increased to a maximum cap of double the initial rate, other than the second local exchange access line and Call Waiting, which are limited to a ten percent increase per year until they cap at the double initial rate. This pricing flexibility is in accordance with O.A.C. 4901:1-4 and Alt Reg Case No. 04-720, effective July 1, 2004.

GENERAL REGULATIONS

11. HUNTING SERVICE

- a. Hunting Service is the process by which two or more exchange service lines of the same class, served from the same central office and furnished to the same customer, are grouped so that incoming calls overflow to the first non-busy line if the called line is busy. A busy signal or busy report is not given unless all the grouped lines are busy.
- b. Hunting service may be set up on a serial, sequential or multiline group basis.
- c. The rates for Hunting Service on individual lines are as follows:

	<u>Monthly Rate</u>	<u>Nonrecurring Charge</u>
(1) Nonresidence Service, each line	\$ 11.00	\$ 8.50
(2) Residence Service, each line	5.00	8.50

- d. Charges for Hunting Service on exchange access lines are applied as indicated herein and are in addition to the regular individual line rate. (See Note 1)

Note 1: The charge for Hunting Service was formerly contained in the monthly access line rate.

ISDN BASIC RATE INTERFACE SERVICE

A. GENERAL

1. ISDN Basic Rate Interface (BRI) Service is a digital local exchange service that provides a customer with the ability to transmit circuit switched voice, circuit switched data, and packet switched data simultaneously over a single access line. ISDN BRI Service is available from suitably equipped central offices and where suitable loop facilities exist.
2. ISDN BRI Service consists of a Basic Rate Access Line and ISDN Bearer Services. The Basic Rate Access Line and the ISDN Bearer Services are not offered separately. Up to three Bearer Services may be provisioned on each access line. In addition, optional features may be purchased as specified in B.3. following.
3. All circuit switched calls are carried on the public switched telephone network. Local circuit switched calling can be purchased as flat rate or measured rate service. All packet switched calls are carried by X.25 Packet.

B. SERVICE DESCRIPTION

1. Basic Rate Access Line
 - a. A Basic Rate Access Line is a digital line from the customer's location to the Telephone Company central office which transports one or more ISDN Bearer Services found in 2. following. A Basic Rate Access Line can carry up to two B-Channel Bearer Services and one D-Channel Bearer Service. All selected Bearer Services can operate on the Access Line simultaneously.

Issued: April 14, 1998

By: B. J. Stonebraker, Senior Vice President
Cincinnati, Ohio

Section 4
Original Page 2

ISDN BASIC RATE INTERFACE SERVICE

B. SERVICE DESCRIPTION (Continued)

1. Basic Rate Access Line (Continued)

- b. Each terminal (voice or data set) that the customer places on a Basic Rate Access Line will be assigned a directory number. The customer must notify the Telephone Company of the number of terminals that will be used on each Basic Rate Access Line. A maximum of eight (8) terminals may be connected to a Basic Rate Access Line.

2. ISDN Bearer Services

ISDN Bearer Services define the types of traffic that the Basic Rate Access Line will carry. A Basic Rate Access Line can carry up to two B-Channel Bearer Services and one D-Channel Bearer Service simultaneously.

a. Circuit Switched B-Channel (Voice or Data)

A Circuit Switched B-Channel provides a 56 kbps or 64 kbps circuit switched service which can be used for either voice or data traffic. The call type (voice or data) can be changed on a call by call basis.

- (1) When multiple circuit switched terminals are connected to a Basic Rate Access Line with two Circuit Switched B-Channels, the user can specify how the terminals contend for use of the two B-Channels. Each B-Channel can be directly assigned for use by one terminal, or it can be available for use by multiple terminals.
- (2) Circuit Switched B-Channels may be purchased with either flat rate or measured rate service. Flat rate local calling is included in the flat rate B-Channel service option. Measured rate B-Channels will be billed for local usage via the rates and regulations in Section 1, paragraph 7 ("Measured Service"), of this tariff. Mixing flat rate and measured rate service between B-Channels on a single Basic Rate Access Line is prohibited. Mixing flat rate and measured rate service between Basic Rate Access Lines is prohibited when furnished on the same continuous property, except where the services are used for separate purposes, not used to supplement each other, and used for distinctly different applications.

ISDN BASIC RATE INTERFACE SERVICE

B. SERVICE DESCRIPTION (Continued)

2. ISDN Bearer Services (Continued)

a. Circuit Switched B-Channel (Voice or Data) (Continued)

(3) Circuit Switched B-Channels are provided with the following standard features:

Call Hold - This feature allows the user to place a call on hold and retrieve it at a later time.

Display Service - This feature provides terminals which are equipped with a display screen with the time and date, and the ability to inspect the status of calls in progress.

Three Call References - Each circuit switched terminal will be offered the capacity to manage (hold, originate, terminate, or receive alerting) up to three calls at once. By placing an existing call on hold, the user can originate (or terminate) a second or third call.

Call Transfer - This feature allows the user to transfer a call to another directory number. This feature is for use with voice calls only.

Conference - This feature allows the user to add a third party to an existing conversation. This feature is for use with voice calls only.

Call Drop - This feature allows the user to disconnect the last party added to a conference call.

Calling Number Delivery - Displays the telephone number of the caller after the first ring.

2. ISDN Bearer Services (Continued)

b. Packet Switched B-Channel

B-Channel Packet Service provides a 64 kbps connection to X.25 Packet.

- (1) Each B-Channel Packet terminal will be provided up to 24 logical channels. Each logical channel can carry an independent call with throughput of up to 19.2 kbps. If more than 24 logical channels are required, additional logical channels can be provided as found in 3.b.(3) following. Each logical channel may be established as one of the following types:

Two-way Switched Virtual Circuit (default)
One-way Incoming Switched Virtual Circuit
One-way Outgoing Switched Virtual Circuit
Permanent Virtual Circuit (additional charge)

- (2) The following features are provided to B-Channel Packet subscribers.

Fast Select Initiation
Reverse Charging Initiation
Flow Control Parameter Negotiation
Throughput Class Negotiation
Recognized Private Operating Agency (RPOA) Selection

- (3) The following configuration choices are available to B-Channel Packet subscribers. Default values are used if the customer has no preference except where noted.

Recognized Private Operating Agency (RPOA) Preselection
Frame Window Size
Acknowledgement Timer
Idle Timer
Maximum Packet Size
Packet Window Size
Throughput Class Selection
Fast Select Acceptance
Reverse Charging Acceptance

ISDN BASIC RATE INTERFACE SERVICE

B. SERVICE DESCRIPTION (Continued)

3. Optional Features

The features in this section are available to ISDN BRI customers at additional cost. For Basic Rate Access Lines with multiple terminals and/or multiple directory numbers, the features must be purchased separately for each directory number on which the feature is desired. Features only function on call references assigned to the directory number subscribing to the feature.

a. Circuit Switched B-Channel Options

The following optional features are available for use on Circuit Switched B-Channels:

- (1) Hunting - This feature provides for a predefined search for an idle terminal to which a call can be completed. Terminals subscribing to hunting may not have multiple call references. Customers desiring Uniform Call Distribution (UCD) must first purchase hunting, and then purchase UCD from the General Exchange Tariff.
- (2) Additional Call References - This feature provides the customer with the ability to manage extra calls on an existing directory number. The customer may specify the number of call references desired for the directory number.
- (3) Six Party Conference Calling - This feature provides the ability to create a conference call with up to six parties. This feature is for use with voice calls only.
- (4) Call Pickup - This feature allows a user to answer any call within a customer defined call pickup group. This feature is for use with voice calls only.

ISDN BASIC RATE INTERFACE SERVICE

B. SERVICE DESCRIPTION (Continued)

3. Optional Features (Continued)

a. Circuit Switched B-Channel Options (Continued)

- (5) Electronic Key Telephone Service (EKTS) - This feature provides a group of features that increases the user's voice terminal flexibility and offers the functionality of a key system to groups of users subscribing to EKTS.

Shared Directory Numbers - This feature allows EKTS terminals to share one or more directory numbers (DNs). Originating and terminating calls on one terminal affect all terminals sharing that DN. The shared DNs can have multiple call appearances, multiple calls can exist on one DN, and more than one terminal sharing the DN can have a call active on that shared DN.

Bridging - When one EKTS user originates or receives a call on a shared directory number, bridging allows other terminals sharing that DN to bridge on to that active call.

Automatic Bridged Call Exclusion - This is a privacy feature that allows a customer to specify, on an EKTS group basis, that no other user can bridge on to calls. On a call by call basis, this feature can be disabled to allow bridging to occur.

Manual Bridged Call Exclusion - This is the opposite of Automatic Bridged Call Exclusion. On a call by call basis the user can restrict bridging.

Intercom Calling - This feature allows an EKTS user to call other terminals in the EKTS group with one or two digit dialing.

B. SERVICE DESCRIPTION (Continued)

3. Optional Features (Continued)

a. Circuit Switched B-Channel Options (Continued)

(5) Electronic Key Telephone Service (EKTS) (Continued)

Abbreviated Ringing and Delayed Ringing - Abbreviated and Delayed Ringing are related. When multiple terminals share a directory number, the customer can specify one or more of the terminals to receive Abbreviated Ringing and one or more of the terminals to receive Delayed Ringing. When a call attempts to terminate to the shared DN, the Abbreviated Ringing terminals will ring immediately. If the call remains unanswered after a pre-specified time, the Abbreviated Ringing Terminals will stop ringing and the Delayed Ringing terminals will begin ringing. The Delayed Ringing terminals will continue to ring until the call is answered or abandoned.

- (6) Additional Directory Number - This feature provides the customer with an extra call reference with a unique directory number. This feature is only available to EKTS subscribers.

b. Packet Switched Optional Features

The following features are available for use with Packet Switched B-Channel and D-Channel Bearer Services:

- (1) X.25 Hunting - This feature provides hunting between multiple directory numbers assigned to X.25 terminals.
- (2) Closed User Group (CUG) - This feature allows packet subscribers to form sub-networks within which members can communicate. The CUG is billed on a per member basis. Users can be members of more than one CUG. The CUG can be designed with the following configuration options:

Incoming calls barred within the CUG
Outgoing calls barred within the CUG
CUG with incoming access
CUG with outgoing access

3. Optional Features (Continued)

b. Packet Switched Optional Features (Continued)

- (3) Additional Logical Channels - If logical channels are required in addition to those provided as standard in 2.b.(1) and 2.c.(1) preceding, they may be purchased in blocks of seven. The maximum number of logical channels allowed on a Packet Switched B-Channel is 127. The maximum number of logical channels allowed on a D-Channel is 15.
- (4) Permanent Virtual Circuit - This feature allows a call to be established over a dedicated logical channel to a prescribed address with no need for call setup or clearing.
- (5) Additional Directory Number - This feature provides an additional telephone number for a customer's packet switched bearer service.

C. REGULATIONS

- 1. ISDN BRI Service is furnished subject to the availability of suitable facilities and is only served from specially equipped digital central offices.
- 2. Temporary suspension of service is not available with ISDN BRI Service.
- 3. The minimum service period for ISDN BRI Service is one month.

ISDN BASIC RATE INTERFACE SERVICE

C. REGULATIONS (Continued)

4. The customer must provide customer premises equipment that meets the technical requirements of the serving central office.
5. Customers must choose from a standard set of terminal button configurations when adding a terminal to a line. The charge for changing an existing terminal button configuration is listed in D.4.a. following. This charge is waived if the change is made as the result of adding a feature or service.
6. The customer is responsible for providing power to all customer premises equipment (CPE) attached to the ISDN Basic Rate Access Line.
7. The customer must notify the Telephone Company when terminals are added or removed from a Basic Rate Access Line. This is in order to maintain the proper provision of directory numbers and call control on the line.
8. An End User Common Line Charge (EUCLC) is applied to each Basic Rate Access Line.
9. One 911 charge is applied to each Circuit Switched B-Channel.
10. When a customer transfers a call, the customer is responsible for any toll charges associated with the customer originated leg(s) of the call.
11. Service from some central offices may not provide all of the features and functionality described in this tariff.

TRUNK ADVANTAGEsm

A. GENERAL

1. TRUNK Advantagesm provides exchange access service at a 1.544 Mbps (DS-1) interface.
2. TRUNK Advantagesm Service consists of a DS-1 Digital Trunk Facility and up to twenty-four (24) 64 kbps Digital Trunk Channels. Digital Trunk Facilities and Digital Trunk Channels are not offered separately.
3. Three types of Digital Trunk Channels are available. Standard channels provide the same features as analog trunk lines found in Section 2 preceding. DID channels provide direct inward dialing service as found in Section 15 of the General Exchange Tariff. Two Way DID Channels provide capability for two way standard service and direct inward dialing service.
4. Trunk channels may be purchased with flat or measured rate service. Measured rate service regulations and rates are listed in Section 1 paragraph 7 preceding.
5. All Digital Trunk Channels use MF or DTMF signalling.

B. REGULATIONS

1. DID channels do not require a DID termination as listed in the General Exchange Tariff Section 15 paragraph B.1.a.2.(d). DID trunks do require that groups of numbers be purchased from paragraph C. of this section.
2. TRUNK Advantagesm is offered under the Variable Term Payment Plan (VTPP). The VTPP rates are payable over a period selected by the customer from those available. Conditions and regulations pertaining to the VTPP are included in Section 29 of the General Exchange Tariff.
3. The minimum period of service for TRUNK Advantagesm is 12 months.
4. Termination Charges
 - a. Trunk Advantage^R is available for a minimum term of 12 months or under a term payment plan of 12, 24, 36 or 60 months. If a Customer terminates service, without cause, prior to the expiration of the minimum 12-month period or applicable term payment plan period, the Customer will pay to CBT a termination charge equal to all remaining amounts due or to become due, including but not limited to all monthly charges for which Customer would have been responsible if the Customer had not terminated prior to the end of the applicable 12, 24, 36 or 60-month period.
 - b. If Customer removes one or more facility (facilities) or channel(s) from service prior to the expiration of the term hereof, Customer will pay to CBT a termination charge equal to all monthly charges for such facility (facilities) or channel(s) for which Customer would have been responsible had Customer not removed such facility (facilities) or channel(s). B. REGULATIONS (Continued)

4. Termination Charges (Continued)

- c. If nonrecurring charges associated with the installation of a Trunk AdvantageSM Service are waived and the service is then terminated prior to completion of the 12-month minimum service period or the VTPP contract period, the customer will become liable for payment of the waived charges.
- d. Commission approval of the termination liability for Trunk AdvantageSM contracts, as described above, is not intended to indicate that the Commission has approved or sanctioned any terms or provisions contained therein. Signatories to such contracts shall be free to pursue whatever legal remedies they may have should a dispute arise.

(M)
|
(M)

5. Upgrades

Customers wishing to upgrade existing trunk service to TRUNK AdvantageSM will be charged the listed nonrecurring charges for the appropriate number of Digital Trunk Facilities and will have to convert to the DID rate structure in Paragraph C of this section. Non-recurring charges on Digital Trunk Channels are waived for the existing trunks that are moved to the TRUNK AdvantageSM. Any new channels added at the time of conversion to TRUNK AdvantageSM will receive nonrecurring charges.

TRUNK ADVANTAGESM

C. OPTIONAL FEATURES

1. Integrated Advantage Service

Integrated Advantage Service provides exchange access and special access through a 1.544 Mbps interface. Integrated Advantage is available in two versions. The first version consists of a DS1 facility and up to twenty-four 64 Kbps channels that can be used to transport local exchange service, Digital Trunk Service, Voice Grade Special Access Service, Digital Data Service and/or Frame Relay Service. As of March 17, 2006 at least 2 of the channels must be used for digital data service (this change does not apply to customers subscribing to the Service prior to this date). The remaining channels can be used in any combination.

(C)
|
(C)

The second version consists of a DS1 facility (Lite) and up to twelve channels which can be used to transport local exchange service, Digital Trunk Service, Voice Grade Special Access Service, Digital Data Service and/or Frame Relay Service. As of March 17, 2006 at least 1 of the channels must be used for digital data service (this change does not apply to customers subscribing to the Service prior to this date). The remaining channels can be used in any combination.

(C)
(C)

A special educational rate for the Lite version of the Integrated Advantage Service is available for municipal, county, and state public schools and to parochial and private schools. Qualifying institutions are referenced in Section 7, Page 2, Part C(2) of this tariff.

Flat Rated Channels and Measured Rate channels are available for Digital Trunk Channels.

Regulations for Integrated Advantage Service are the same as those described in Section B above. Rates for Integrated Advantage Service are shown in Section D.2 below.

Regulations and Rates for Digital Data Service, Voice Grade Special Access Service, and Frame Relay Service are found in Cincinnati Bell Telephone Tariff FCC No. 35 Section 7.

2. Caller ID Service

This feature allows the customer's telephone number to be passed to the called party. This feature is only available in central offices equipped with the proper equipment.

This feature works over digital channels only and is not intended for Integrated Advantage channels used to transport analog, local exchange service.

3. Channel Transfer Service

This feature allows the customer to transfer an incoming call to another line and then hang up, leaving the other two parties on a two-way call and freeing up the customer's line for another call. The customer will be responsible for toll charges associated with the transferred call.

This feature is for digital channels only and is not intended for Integrated Advantage channels used to transport analog, local exchange service.

Material formerly found on this page can be found on page 4.

PRIME ADVANTAGEsm

A. GENERAL

1. PRIME Advantagesm is an ISDN local exchange service that provides a customer with the ability to transmit and receive multiple voice and data circuit switched calls simultaneously over a single Primary Rate Facility. PRIME Advantagesm is available from suitably equipped central offices and where suitable loop facilities exist.
2. PRIME Advantagesm consists of a Primary Rate Facility and B-Channel Bearer Trunks and D-Channel Bearer Services. The Primary Rate Facility and the ISDN Bearer Trunks are not offered separately. Up to twenty-three B-Channels Bearer Trunks and one D-Channel Bearer Service may be provisioned on each access line. In addition, optional features may be purchased as specified in B.5. following.
3. Three types of B-Channel Bearer Trunk Channels are available.

Standard channels provide the same features as analog trunk lines found in Section 2 preceding.

DID channels provide direct inward dialing service as found in Section 15 of the General Exchange Tariff.

Two Way DID channels provide capability for two way standard service and direct inward dialing service.

4. Trunk channels may be purchased with either flat or measured rate service. Measured rate service regulations and rates are listed in Section 1, paragraph 7 preceding.
5. All Bearer Trunk Channels use MF or DTMF signalling.

B. SERVICE DESCRIPTION

1. Primary Rate Facility

A Primary Rate Facility is a digital pipe from the customer's location to the Telephone Company central office which transports one or more ISDN Bearer Trunks found in 2. following. A Primary Rate Facility can carry up to twenty-three 64 Kbps B-Channel Bearer Trunks and one 64 Kbps D-Channel Bearer Service. All selected Bearer Trunks and Services can operate on the Primary Rate Facility simultaneously.

PRIME ADVANTAGEsm

B. SERVICE DESCRIPTION (Continued)

2. B-Channel Bearer Trunks

B-Channel Bearer Trunks define the types of traffic that the Primary Rate Facility will carry. A B-Channel Bearer Trunk is a 64 Kbps information channel used in conjunction with circuit-switched service. These Trunks can be configured as 1-Way In, 1-Way Out, or 2-Way.

3. D-Channel Bearer Services

The D-Channel Bearer Service is a 64 Kbps signalling channel used to control associated B-Channels. One D-Channel is required for each Primary Rate Facility, and is included in the Primary Rate Facility's monthly rate.

4. PRIME Advantagesm - Standard Features

- a. PRIME Advantagesm will provide transport of customer information over the 23 available B channels in the form of circuit-switched voice or data at speeds up to 64 Kbps. The basic service will include the 1.544 Mbps switched facility and the D-Channel Bearer Service. B-Channels will be ordered in addition to the Primary Rate Facility.
- b. Dedicated B-Channel configuration - Dedicated trunk groups are the standard feature for PRIME Advantagesm. Dedicated trunk groups must be assigned to handle one specific call type (ex: DID, DOD).
- c. D-Channel configuration - Each Basic PRI service will include a dedicated D-Channel for signalling.

PRIME ADVANTAGEsm

B. SERVICE DESCRIPTION (Continued)

5. PRIME Advantagesm - Optional Features

The features in this section are available to PRIME Advantagesm customers at additional cost.

- a. Integrated PRIME Advantagesm Service - Integrated Prime Advantage Service provides exchange access and special access through a 1.544 Mbps interface. Integrated Prime Advantage consists of a DS1 facility and up to twenty-four 64 Kbps channels that can be used to transport local exchange service, Digital Trunk Service (ISDN PRI), Voice Grade Special Access Service, Digital Data Service and/or Frame Relay Service. As of March 17, 2006 at least 2 of the channels must be used for digital data service (this change does not apply to customers subscribing to the Service prior to this date). The remaining channels can be used in any combination. Flat Rated Channels and Flat Rated Channels and Measured Rate channels are available for ISDN PRI B-Channels. (C) (C)

Regulations and Rates for Digital Data Service, Voice Grade Special Access Service, and Frame Relay Service are found in Cincinnati Bell Telephone's FCC No. 35 Section 7.

- b. Call-By-Call Service Selection - This feature provides the option for B-Channels to be assigned into a flexible trunk group which can support different call types based on real-time traffic needs. Call-By-Call service selection also allows primary as well as secondary long-distance carriers to be established for the entire trunk group (e.g., Alternate Routing Arrangement).
- c. Individual Calling Line Identification (ICLID) - This feature provides customer access to the calling party's number. Feature operation is dependent on customer premise equipment and technology in use at the calling party's serving office. (Similar to the Caller ID feature available on access lines.)
- d. Direct Inward Dialing (DID) - This feature provides Direct Inward Dialing to a station. DID Termination rates will apply per B-Channels configured with this option. PRIME Advantagesm DID Number Blocks are ordered with DID Terminations on the B-Channels.
- e. Back-up D-Channel - This feature provides a minimum of three or more PRIME Advantagesm facilities terminating at the same customer premise to share one primary and one secondary (or Back-up) D-Channel. The number of PRIME Advantagesm facilities that can be shared by this feature will be based upon the availability of central office and other network facilities, and will be subject to change on a central office by central office basis.
- f. Channel Transfer Service - This feature allows the customer to transfer an incoming call to another line and then hang up, leaving the other two parties on a two-way call and freeing up the customer's line for another call. The customer will be responsible for toll charges associated with the transferred call. This feature is for digital channels only and is not intended for Integrated Prime Advantage channels used to transport analog, local exchange service.

PRIME ADVANTAGEsm

C. REGULATIONS

1. PRIME Advantagesm is furnished subject to the availability of suitable facilities and is only served from specially equipped digital central offices.
2. PRIME Advantagesm is offered under the Variable Term Payment Plan (VTPP). The VTPP rates are payable over a period selected by the customer from those available. Conditions and regulations pertaining to the VTPP are included in Section 29 of the General Exchange Tariff.
3. Temporary suspension of service is not available with PRIME Advantagesm.
4. The minimum service period for PRIME Advantagesm is twelve months.
5. The customer must provide customer premises equipment that meets the technical requirements of the serving central office.
6. The customer is responsible for providing power to all customer premises equipment (CPE) attached to the Primary Rate Facility.
7. The customer must notify the Telephone Company when call type maximums and minimums are to be changed for the call-by-call feature. This is in order to maintain the proper provision of directory numbers and call control on the line.
8. An End User Common Line Charge (EUCL) based on a maximum of 5 multi-line nonresidence subscriber EUCLs applies to each Primary Rate facility.
9. One 911 charge is applied to each outgoing and 2-way B-Channel Bearer Trunk (per channel).
10. When a customer transfers a call, the customer is responsible for any toll charges associated with the customer originated leg(s) of the call.

PRIME ADVANTAGESM

C. REGULATIONS (Continued)

11. Service from some central offices may not provide all of the features and functionality described in this tariff.

12. Termination Charges

- a. Prime Advantage^R is available for a minimum term of 12 months or under a term payment plan of 12, 24, 36 or 60 months. If a Customer terminates service, without cause, prior to the expiration of the minimum 12-month period or applicable term payment plan period, the Customer will pay to CBT a termination charge equal to all remaining amounts due or to become due, including but not limited to all monthly charges for which Customer would have been responsible if the Customer had not terminated prior to the end of the applicable 12, 24, 36 or 60-month period.
- b. If Customer removes one or more facility (facilities) or channel(s) from service prior to the expiration of the term hereof, Customer will pay to CBT a termination charge equal to all monthly charges for such facility (facilities) or channel(s) for which Customer would have been responsible had Customer not removed such facility (facilities) or channel(s). (T)
(T)
(T)
- c. If nonrecurring charges associated with the installation of a Prime AdvantageSM Service are waived and the service is then terminated prior to completion of the 12-month minimum service period or the VTPP contract period, the customer will become liable for payment of the waived charges.
- d. Commission approval of the termination liability for Prime AdvantageSM contracts, as described above, is not intended to indicate that the Commission has approved or sanctioned any terms or provisions contained therein. Signatories to such contracts shall be free to pursue whatever legal remedies they may have should a dispute arise.

13. Upgrades

Customers wishing to upgrade existing analog trunk service to PRIME AdvantageSM will be charged the listed initial charges for the appropriate number of Primary Rate Facilities and will have to convert to the DID rate structure in Paragraph D of this section. Initial charges on B-Channel Bearer Trunk Channels are waived for the existing analog trunks that are moved to the PRIME AdvantageSM. Any new channels added at the time of conversion to PRIME AdvantageSM will incur initial charges. Customers under contract for TRUNK AdvantageSM can upgrade to PRIME AdvantageSM and will not be charged any TRUNK AdvantageSM termination charges.

EXPLANATION OF TERMS

Central Office Line

A circuit used within a central office to connect to an individual line, all types of trunk lines, or semi-public service.

Channel Terminal

The portion of foreign exchange service required to terminate an inter-exchange channel.

Class of Service

Exchange service described by the use to be made of such service. The Telephone Company furnishes two classes of service, nonresidence and residence.

Coin Collecting Device

An internal mechanism of certain station sets associated with public and semi-public service to receive money deposited in payment of message charges.

Communication-Impaired Person

For purposes of this tariff, the definition of impaired refers to persons with communication impairments, including hearing impaired, deaf, deaf/blind, or speech impaired persons whose impairment prevents them from communicating over the telephone without the aid of a telecommunications device for the deaf or text telephone (TDD/TT).

CINCINNATI BELL TELEPHONE COMPANY

Section 1
Original Page 3

EXPLANATION OF TERMS

Communications Systems

Channels and other facilities which are capable of telecommunications between customer-provided terminal equipment or Telephone Company-provided terminal equipment, when not connected to exchange and long distance message telecommunications service.

Complex Service

Denotes all other wiring, equipment, and associated installation work on the customer side of the network interface or demarcation point not assigned to noncomplex service.

Connecting Arrangement

The equipment provided by the Telephone Company to accomplish the direct electrical connection of customer-provided facilities with the facilities of the Telephone Company.

Connecting Company

A corporation, association, partnership, or individual owning or operating one or more exchanges and with whom traffic is interchanged.

Construction Charge

A separate initial charge made for the construction of facilities in excess of that contemplated under the filed rates.

Continuous Property

The plot of ground, together with any buildings thereon, occupied by the customer, which is not separated by public highways or by property occupied by others. Where a customer occupies properties on both sides of a street, alley, highway, body of water, railroad right of way, etc., and the properties would otherwise be continuous, such properties are treated as continuous property provided local wire or cable facilities are used and the customer furnishes all local distribution pole line facilities or underground conduit required in connection therewith.

EXPLANATION OF TERMS

Continuous Property (Continued)

For the purpose of determining the application of charges, continuous property is additionally defined as follows when apartments, office buildings, or shopping center malls occupied by more than one customer are involved:

For residence service, the apartment occupied by the customer.

For nonresidence service, the space (single office, or two or more offices on same or different floors) occupied by the customer, whether or not separated by space occupied by others, except that when the customer vacates the space from which service is being relocated, the relocation is considered to involve non-continuous property.

Contract

The service agreement between a customer and the Telephone Company under which facilities for the use of the customer are furnished in accordance with the provisions of this tariff.

Cost

The cost of labor and material, plus an appropriate share of the Telephone Company's general operating and supervising expense.

Customer

The person, firm, or corporation responsible for the payment of charges and compliance with the rules and regulations of the Telephone Company.

Customer-Provided Terminal Equipment

Devices or apparatus and their associated wiring provided by a customer, which do not constitute a communications system and which, when connected to the communications path of the telecommunications system, are connected either electrically, acoustically, or inductively.

EXPLANATION OF TERMS

Demarcation Point (Network Interface)

The point of demarcation and/or interconnection between Telephone Company communications facilities and terminal equipment, protective apparatus or wiring at a customer's premises. Telephone Company-installed facilities at or constituting the demarcation point will consist of wire or a jack conforming to Subpart F of Part 68 of the FCC's rules. "Premises" as used in this section generally means a dwelling unit, other building or a legal unit of real property such as a lot on which a dwelling unit is located, as determined by the Telephone Company's reasonable and nondiscriminatory standard operating practices. The "minimum point of entry" as used in this section will be either (1) the closest practicable point to where the wiring crosses a property line or (2) the closest practicable point to where the wiring enters a multiunit building or buildings. The Telephone Company's reasonable and nondiscriminatory standard operating practices will determine which of (1) or (2) will apply. The Telephone Company is not precluded from establishing reasonable classifications of multiunit premises for purposes of determining which of (1) or (2) above will apply. Multiunit premises include, but are not limited to, residential, commercial, shopping center and campus situations.

- (a) Single Unit Installations: For single unit installations existing as of December 27, 1991, and installations installed after that date, the demarcation point will be a point within twelve inches of the protector or, where there is no protector, within twelve inches of where the telephone wire enters the customer's premises.

EXPLANATION OF TERMS

Demarcation Point (Network Interface) (Continued)

(b) Multiunit Installations

- (1) In multiunit premises existing as of December 27, 1991, the demarcation point will be determined in accordance with the Telephone Company's reasonable and nondiscriminatory standard operating practices; provided, however, that where there are multiple demarcation points within the multiunit premises, a demarcation point for a customer will not be further inside the customer's premises than a point twelve inches from where the wiring enters the customer's premises.
- (2) In multiunit premises in which wiring is installed after December 27, 1991, including additions, modifications and rearrangements of wiring existing prior to that date, the multiunit premises owner will determine the location of the demarcation point or points. The multiunit premises owner will determine whether there will be a single demarcation point location for all customers or separate locations for each customer; provided, however, that where there are multiple demarcation points within the multiunit premises, a demarcation point for a customer will not be further inside the customer's premises than a point twelve inches from where the wiring enters the customer's premises.

A physical connection of the electrical conductors in the communications path.

Directory Listing

The publication in the Telephone Company's alphabetical directory of information pertaining to a customer's telephone number, which allows telecommunications users to locate the desired telephone number.

Exchange

A unit established by the Telephone Company for the administration of telecommunications service in a specified area which usually embraces a city, town, or village and its environs. It consists of one or more central offices together with the associated plant used in furnishing telecommunications service within that area.

Exchange Access Line

Denotes all equipment and facilities from the central office line up to and including the Telephone Company-provided and maintained network interface or demarcation point on a customer's premises, encompassing the central office line and all lines connected to a central office line for access to an exchange.

Exchange Area

The area within which the Telephone Company furnishes telecommunications service at the exchange rates and charges applicable within that area.

EXPLANATION OF TERMS

Exchange Service

The service of furnishing facilities for telecommunications within a local service area, in accordance with regulations, rates, and charges specified in the Exchange Rate Tariff and General Exchange Tariff. The following are classified as types of exchange service:

Flat Rate Service

Customer exchange service for which a stipulated monthly rate is charged, covering all local message use within a defined area.

Message Rate Service

Customer exchange service which is local message-sensitive, where a stipulated number of local messages are furnished for a minimum rate. Local messages exceeding the monthly minimum will be charged on a per message basis.

Measured Service

Customer exchange service which is usage sensitive. In addition to a basic monthly charge for an access line, the customer is billed for usage based upon the number, distance, duration, and the time-of-day of originated calls.

Section 1
1st Revised Page 9
Cancels Original Page 9

EXPLANATION OF TERMS

Flat Rate Service

See Exchange Service

Foreign Exchange Termination

The portion of a foreign exchange service which connects a station with an interexchange or interoffice channel.

Grade of Service

Exchange service with reference to the number of parties which may share a central office line (Individual).

Individual Line

A circuit having the necessary equipment, facilities, and non-shared central office line required for interfacing with a central office.

Individual Line, Non-Hunting

See Individual Line

Individual Line, Hunting

An individual line grouped with one or more other individual lines of the same class furnished to a customer on continuous property, so that calls to the first number of the grouped lines are automatically routed to the first non-busy line of the lines so grouped, and a busy signal is not given unless all the grouped lines are tested once for busy.

Initial Charge

A nonrecurring charge associated with the installation of certain services or facilities, either in lieu of or in addition to recurring monthly charges or other service type charges.

Section 1
Original Page 10

EXPLANATION OF TERMS

Initial Service Period

The minimum length of time a customer is obligated to pay for service, facilities, or equipment whether or not retained by the customer for that minimum length of time.

Inside Wire

See Station Line

Interexchange Channel

The portion of a through channel associated with foreign exchange service which connects different exchange areas where stations or channel terminations in Telephone Company central offices are located, excluding the portions defined as "Foreign Exchange Terminal" and "Interoffice Channel".

Interoffice Channel

The portion of a channel service which connects serving central offices; or for foreign exchange service, the portion of a circuit which connects the serving central office to the rate center central office.

Key Telephone System (KTS) Service (Multi-Line Telephone System Service)

An arrangement consisting of telephone instruments with direct access to one or more individual lines, PBX station lines, Centrex system station lines, ESSX-1 station lines, WATS lines, or private lines. System also consists of the wiring facilitating that access and equipment which provides one or more service features as multi-line selection (pick-up), holding, illumination, signaling, and intercommunication.

Local Channel

The portion of a circuit which connects a station with an interoffice channel; or which connects stations served from the same central office building, when used in connection with channel services.

EXPLANATION OF TERMS

Local Service Area

A specified area where exchange service is furnished under a specific schedule of exchange rates without toll charge.

Measured Service

See Exchange Service

Message Rate Service

See Exchange Service

Miscellaneous Common Carrier

As defined in Part 21 of the Rules and Regulations of the Federal Communications Commission (FCC), a person engaged in rendering communications service for hire to the public, who is not engaged in the business of providing either a public landline message telephone service or public message telegraph service. For purposes of this and all other Telephone Company tariffs, the term "Miscellaneous Common Carrier" applies only to these carriers, as defined above, who are duly licensed by the Federal Communications Commission and have tariffs filed with the FCC and the Public Utilities Commission of Ohio.

Multiline Terminating System Area

A Multiline Terminating System Area denotes a premises or multi-premises within the same building or continuous property.

EXPLANATION OF TERMS

Network Control Signaling

The transmission of signals used in the telecommunications system which perform functions such as supervision (control, status, and charging signals), address signaling (e.g., dialing), calling and called number identification, and audible tone signals (call progress signals indicating re-order or busy conditions, alerting, coin denominations, coin collect, and coin return tones) to control the operation of switching machines in the telecommunications system.

Network Control Signaling Unit

The terminal equipment furnished, installed, and maintained for the provision of network control signaling.

Network Interface - Network Interface Device (NID)

A jack conforming to Sub-part F of Part 68 of the FCC's rules provided by the Telephone Company as part of the Local Exchange Carrier (LEC) network. It will be located on the customer premises and is considered to be the termination of the LEC network if installed by the Telephone Company. (See Demarcation Point)

Noncomplex Service

Denotes all wiring, equipment, and related installation work on the customer side of the network interface or demarcation point not associated with PBX, Key, Centrex, ESSX, Semi-Public Service, Data or any other equipment regardless of the type of exchange access line or channel service* to which the installation is connected. Noncomplex service is further defined in FCC dockets 79-105, 82-681, and 88-57.

- * The Noncomplex Service term is also applied to channel services and Foreign Exchange Service provided for in this tariff, to the extent that wiring, equipment, and associated installation work on the customer side of the network interface or demarcation point are not associated with PBX, Key, Centrex, ESSX, or Data equipment either at the originating or terminating location.

EXPLANATION OF TERMS

Premises

See Demarcation Point

Private Branch Exchange (PBX)

An arrangement of equipment consisting of switchboards, dial switching equipment, wiring, telephone station apparatus, or a combination thereof. It provides for the interconnection of service lines associated with an attendant position or switching equipment located on a premises or extended to another premises relating to the same customer. The system may also provide for centralized control of communications with a central office over trunk lines, Wide Area Telecommunications Service (WATS) lines, or with other communications systems over tie lines.

Private Branch Exchange (PBX) Service Line

The portion of equipment and facilities connecting the PBX station line(s) to the PBX switchboard or dial switching equipment.

Private Branch Exchange (PBX) Station Line

See Station Line

Rate Center Central Office

The central office of a multioffice exchange that most closely identifies with the V and H coordinates used to determine interexchange channel mileage.

EXPLANATION OF TERMS

Resale Carrier

A Resale Carrier denotes a customer who resells Telephone Company communications services to others.

Sharing Entity

A Sharing Entity denotes a customer who establishes a non-profit sharing arrangement with others for the shared use of its communication services. The customer may, but does not have to, use the communication services.

Station

The network control signaling unit and other equipment at the customer premises which enables the customer to establish the communications connection and to accomplish communications through such connections.

Station Line

Telephone Company or customer-provided wiring including connectors, blocks and jacks on a customer premises, which extends between the termination of the telecommunications network and standard jack locations or outlets on the customer's premises, to which terminal equipment can be connected for access to the telecommunications network. Station lines may also be referred to as inside wiring or premises wiring.

EXPLANATION OF TERMS

Station Line (Continued)

Exchange Station Line

Connects an exchange access line to a jack or outlet location of a station set, station, or other equipment.

PBX Station Line

Connects the PBX service line of a PBX system to the jack or outlet location of a station set, station, or other equipment exclusive of any other associated facilities.

Station Set (Telephone)

An instrument consisting of a transmitter, receiver, and associated apparatus, connected so as to permit the transmitting and receiving of telecommunications messages.

Termination Charge

A charge applied to a customer when service is terminated before the expiration of the initial service period, or a charge applied where a basic termination charge is specified.

Tie Line

A private line-type circuit connecting a PBX system, Centrex system, ESSX-1 system, Horizon* Communications System, or customer-provided equivalent system with another private branch exchange system, Centrex system, ESSX-1 system, Horizon* Communications System, or customer-provided equivalent system. It is intended primarily for intercommunication between telephones connected with such systems. Tie lines connecting systems of the same customer also may be employed for central office and toll connections to the extent that conditions permit.

EXPLANATION OF TERMS

Toll Office

A central office used primarily for completing and supervising toll calls.

Toll Restriction (Alternatively Called Toll Diverting)

An arrangement of equipment which permits station users to gain access to the local central office and to dial local service area calls but prevents completion of toll calls or calls to the toll operator. Depending upon the switching system, restricted toll calls may be routed to an attendant, to an announcement, or to a tone.

TOUCH-TONE Calling

The originating of a telephone call through the use of a bank of push-buttons usually located in or associated with a telephone, in lieu of a rotary-type dial.

Trunk Line

A circuit having the necessary equipment, facilities, and non-shared central office line required for interfacing an automatic call distributing system, PBX system or other automatic (dial) switching system with a central office.

GENERAL REGULATIONS

A. GENERAL

1. The general regulations of this tariff apply to all tariffs of this Company except where in conflict with a specific provision of another tariff.
2. Revisions to this and other Company tariffs governed by the PUCO, which affect neither the service to subscribers (customers) nor the rate, toll, classification, charge or rental to subscribers (customers) are authorized without further Order of the Commission. These revisions will be made in accordance with the Order granting such authority.

Such revisions include:

- a. Additions, deletions, corrections or rearrangements of items listed under Table of Contents, Index, Explanation of Symbols, and Explanation of Abbreviations of the Preface Section;
- b. Rearrangements or corrections in paragraph references, headings, or numerical designations;
- c. Changes to reflect revisions in names of other companies and in the names of exchanges of other companies approved by this Commission in connection with applications filed by other telephone companies; and,
- d. Changes in the "List of Rate Centers and Central Offices", Section 4 of the Message Telecommunications Service Tariff, to reflect the establishment or discontinuance of a rate center or central office as approved by the PUCO in connection with an application filed by another telephone company or in the normal course of service revisions by the Company.

Each revision will be effective on the date to be shown on the revised tariff sheets covering such changes, the effective date to be twenty days after the date of filing copies of the revised sheets with the Commission.

GENERAL REGULATIONS

A. GENERAL (Continued)

3. A move to a different continuous property is charged for as new installation of service, except lapse-in-service moves as described in Section 29 of this tariff. A new initial period applies at the new location and a termination charge applies at the old location, except as provided for elsewhere in this tariff, if the move occurs prior to the expiration of the initial service period, as specified in Section 11 of this tariff. The Telephone Company has the option of moving or replacing the equipment or a combination thereof.
4. Effective January 1, 1987, in accordance with the orders of the Federal Communications Commission (FCC) in Docket 79-105, the installation and maintenance of inside wiring will not be offered pursuant to tariff after December 31, 1986.
5. Effective July 1, 1989, all monthly charges for station lines, inside wire, that applied to inside wiring provided by the Company on a tarified basis prior to January 1, 1984, are discontinued.

B. OBLIGATION AND LIABILITY OF TELEPHONE COMPANY

1. Liability Limitations

Approval of language contained in this and other tariffs of the Company by the PUCO does not constitute a determination by the Commission that the limitation of liability imposed by the Company should be upheld in a court of law. Approval by the Commission merely recognizes that since it is a court's responsibility to adjudicate negligence and consequent damage claims, it is also the court's responsibility to determine the validity of any exculpatory clauses.

GENERAL REGULATIONS

B. OBLIGATION AND LIABILITY OF TELEPHONE COMPANY (Continued)

2. Availability of Facilities

The Telephone Company's obligation to furnish service or to continue to furnish service is dependent on its ability to obtain, retain, and maintain without unreasonable expense suitable rights and facilities, and to provide for the installation of those facilities required incident to the furnishing and maintenance of that service.

3. Service Irregularities and Interruptions

In view of the fact that the customer has exclusive control of his communications over the facilities furnished him by the Telephone Company, and of the other uses for which facilities may be furnished him by the Telephone Company, and because of unavailability of errors incident to the services and to the use of such facilities of the Telephone Company, the services and facilities furnished by the Company are subject to the terms, conditions, and limitations herein specified.

CBT incorporates, by reference, and will adhere to, the guidelines for subscriber billing adjustments for local exchange service, as found in Minimum Telephone Service Standards, Chapter 4901:1-5 O.A.C.

GENERAL REGULATIONS

B. OBLIGATION AND LIABILITY OF TELEPHONE COMPANY (Continued)

3. Service Irregularities and Interruptions (Continued)

No credit allowance will be made for interruptions due to electric power failure where, by the provisions of this tariff, the customer is responsible for providing electric power.

Credit allowance for interruptions of Message Rate or Optional Measured Service will not affect the number of local messages, message units or usage to which the customer is entitled during a given billing period.

The liability of the Telephone Company for damages arising out of mistakes, omissions, interruptions, delays or errors, or defects in transmission occurring in the course of furnishing service or facilities and not caused by the negligence of the customer, or of the Telephone Company in failing to maintain proper standards of maintenance and operation and to exercise reasonable supervision, will in no event exceed an amount equivalent to the proportionate charge to the customer for the period of service during which such mistake, omission, interruption, delay or error, or defect in transmission occurs.

GENERAL REGULATIONS

B. OBLIGATION AND LIABILITY OF TELEPHONE COMPANY (Continued)

5. Use of Connecting Company Lines

When the lines of other telephone companies are used in establishing connections to points not reached by the Telephone Company's lines, the Telephone Company is not liable for any act or omission of the other company or companies.

6. Defacement of Premises

The Telephone Company is not liable for any defacement or damage to the customer's premises resulting from the existence of the Telephone Company's equipment and associated wiring on such premises, or from the installation or removal thereof, when such defacement or damage is not the result of the negligence of the Telephone Company.

When the customer is a tenant and requests an installation that could, in the opinion of the Telephone Company, result in damage to the property of the owner, the customer must obtain, prior to installation, a written release from the owner or his authorized agent absolving the Telephone Company of liability.

7. Customer Rights and Responsibilities

Customers have certain rights and responsibilities under the Minimum Telephone Service Standards (Ohio Administrative Code 4901:1-5)(MTSS). These safeguards can be found in the Appendix to Ohio Administrative Code 4901:1-5-03, which is entitled "Telephone Customer Rights and Responsibilities". These rights and responsibilities include complaint handling, ordering or changing service, service repair, payment of bills, and disconnection and reconnection of service.

(N)
—
(N)

C. USE OF SERVICE AND FACILITIES

1. Ownership and Use of Service and Equipment

a. General

Equipment and lines furnished by the Telephone Company on the premises of a customer are the property of the Telephone Company, whose agents and employees have the right to enter the premises at any reasonable hour for the purpose of installing, inspecting, maintaining, or repairing the equipment and lines, or for the purpose of making collections from coin collecting devices, or upon termination of the service, for the purpose of removing such equipment or lines.

GENERAL REGULATIONS

C. USE OF SERVICE AND FACILITIES (Continued)

1. Ownership and Use of Service and Equipment (Continued)

a. General (Continued)

Equipment furnished by the Telephone Company must, upon termination of service for any cause whatsoever, be returned to it in good condition, except for reasonable wear and tear.

Customer-provided equipment or protective circuitry may be connected to the telecommunications network in accordance with provisions of the Federal Communications Commission's registration program, as are now in effect or may become effective.

b. Resale and Sharing of Service For Shared Tenant Services.

(1) Use of customer Local Exchange Service (excluding Foreign Exchange Service) furnished by the Telephone Company may be resold or shared subject to the following regulations.

(a) Resale and sharing of Local Exchange Service is permitted on measured rate nonresidence individual and trunk lines.

This tariff does not permit, by a certified local exchange carrier or any other entity, the purchase of local residential service for resale as business service. Nor does this tariff permit the purchase of lifeline telephone service, for resale to other than qualifying lifeline customers. Such resale is prohibited.

(b) In central offices where measured rate service is not available, message rate nonresidence individual and trunk lines may be resold or shared until measured rate service becomes available.

(c) A reseller or sharer may provide service only within a single building, or a contiguous complex of buildings under common ownership or management.

i. A contiguous complex of buildings may be intersected by public thoroughfares provided that the property segments created would be continuous in the absence of the thoroughfares.

b. Resale and Sharing of Service For Shared Tenant Services (Continued)

- (1) Use of customer Local Exchange Service (excluding Foreign Exchange Service) furnished by the Telephone Company may be resold or shared subject to the following regulations. (Continued)
 - (c) A reseller or sharer may provide service only within a single building, or a contiguous complex of buildings under common ownership or management. (Continued)
 - ii. Where separate buildings are involved, they must have a related business purpose (i.e., industrial park, shopping center, or university).
 - (d) Direct interconnection of a resale or sharing system with other PBX systems is prohibited.
 - (e) Participation in reselling or sharing systems shall be limited to occupants of a building or contiguous complex of buildings which compose a resale or sharing system.
 - (f) The Telephone Company will not be responsible for the manner in which the use of service or charges are allocated to others by a customer who resells or shares service. All applicable rates and charges for such service will be billed to the customer.
 - (g) Service orders will be accepted by the Telephone Company only from the customer; however, the Telephone Company will respond to repair and maintenance requests from others provided that the customer is responsible for any maintenance of service charges that may be billed by the Telephone Company.

(1) Use of customer Local Exchange Service (excluding Foreign Exchange Service) furnished by the Telephone Company may be resold or shared subject to the following regulations. (Continued)

- (h) Directory listings for the residential and nonresidential patrons of customers who resell or share Local Exchange Service will be provided at the rates for nonresidence additional listings as shown in Section 6 of this tariff, and will appear in the directory as their classification indicates.
- (i) Discounts, as specified in Section 7 of this tariff, do not apply for resale or sharing applications.
- (j) Rules and regulations regarding the resale and sharing of Local Exchange Service do not apply where the end users of the exchange service are considered transient in nature and the service is considered incidental to the function of the organization providing such service.
- (k) Rules and regulations regarding the resale and sharing of Local Exchange Service do not apply to hotels, hospitals and skilled nursing homes.
- (l) Sharing of Local Exchange Service is also permitted as specified in paragraph C.3 following.
- (m) A reseller or sharer of Local Exchange Service who is utilizing Customer-Provided Equipment must comply with the rules and regulations concerning interconnection as specified in paragraph C.2 following.

C. USE OF SERVICE AND FACILITIES (Continued)

1. Ownership and Use of Service and Equipment (Continued)

b. Resale and Sharing of Service For Shared Tenant Services (Continued)

(1) Use of customer Local Exchange Service (excluding Foreign Exchange Service) furnished by the Telephone Company may be resold or shared subject to the following regulations. (Continued)

(n) Rules and regulations regarding the resale of Local Exchange Service for use with Access Lines for Customer Provided Public Telephone Service are specified in Section 16 of this tariff.

2. Connections of Customer-Provided Terminal Equipment and Communications Systems

a. General Provisions

(1) General

Terminal equipment and communications systems provided by the customer may be connected at the customer's premises to telecommunications services furnished by the Telephone Company where such connections are made in accordance with the provisions of Part 68 of the Federal Communications Commission's (FCC) Rules and Regulations and any Telephone Company tariffs. Telecommunications services as used in this tariff include exchange service, Long Distance Message Telecommunications Service (LDMTS) and Wide Area Telecommunications Service (WATS).

2. Connections of Customer-Provided Terminal Equipment and Communications Systems (Continued)

a. General Provisions (Continued)

(2) Responsibility of the Customer

- (a) The customer will be responsible for the installation, operation and maintenance of any *customer-provided terminal equipment or communications system*. No combinations of customer-provided terminal equipment or communications systems shall require change in or alteration of the equipment or services of the Telephone Company, cause electrical hazards to Telephone Company personnel, damage to Telephone Company equipment, malfunction of Telephone Company billing equipment, or degradation of service to persons other than the user of the subject terminal equipment or communications system, his calling or called party. Upon notice from the Telephone Company that customer-provided terminal equipment or communications system is causing such hazard, damage, malfunction or degradation of service, the customer must make whatever changes are necessary to remove or prevent such hazard, damage, malfunction or degradation of service.
- (b) The customer will be responsible for the payment of a Maintenance of Service Charge as provided in this section for visits by a Telephone Company employee to the customer's premises when a service difficulty or trouble report results from the use of customer-provided terminal equipment or communications system.

(3) Responsibility of The Telephone Company

- (a) Telecommunications services are not represented as adapted to the use of customer-provided terminal equipment or communications systems. Where customer-provided terminal equipment or communications systems are used with telecommunications services, the responsibility of the Telephone Company shall be limited to the furnishing of service components suitable for telecommunications services and to the maintenance and operation of service components in a manner proper for such services. Subject to this responsibility the Telephone Company will not be responsible for (i) the through transmission of signals generated by the customer-provided terminal equipment or communications systems or for the quality of, or defects in such transmission, or (ii) the reception of signals by customer-provided terminal equipment or communications systems, or (iii) address signaling where such signaling is performed by customer-provided signaling equipment.
- (b) The Telephone Company will, at the customer's request, provide information concerning interface parameters needed to permit customer-provided terminal equipment to operate in a manner compatible with telecommunications services.

C. USE OF SERVICE AND FACILITIES (Continued)

2. Connections of Customer-Provided Terminal Equipment and Communications Systems (Continued)

a. General Provisions (Continued)

(3) Responsibility of The Telephone Company (Continued)

- (c) The Telephone Company may make changes in its telecommunications services, equipment, operations or procedures, where such action is not inconsistent with Part 68 of the Federal Communications Commission's Rules and Regulations. If such changes can be reasonably expected to render any customer's terminal equipment or communications system incompatible with telecommunications services, or require modification or alteration of such customer-provided terminal equipment or communications systems, or otherwise materially affect its use or performance, the customer will be given adequate notice, in writing, to allow the customer an opportunity to maintain uninterrupted service.

(4) Recording of Two-Way Telephone Conversations

The recording of two-way telephone conversations is governed by state and federal laws and regulations.

(5) Violation of Regulations

When any customer-provided terminal equipment or communications system is used with telecommunications services in violation of any of the provisions in this paragraph C.2., the Telephone Company will take whatever immediate action is necessary for the protection of the telecommunications network and Telephone Company employees, and will promptly notify the customer of the violation.

(5) Violation of Regulations (Continued)

The customer must discontinue use of the terminal equipment or communications system or correct the violation and must confirm in writing to the Company within 10 days, following the receipt of written notice from the Company, that such use has ceased or that the violation has been corrected.

Failure of the customer to discontinue such use or to correct the violation and to give the required written confirmation to the Telephone Company within the time stated above will result in suspension of the customer's service until the customer complies with the provisions of this tariff.

(6) Connection of Grandfathered Communications Systems and Terminal Equipment

Grandfathered Communications Systems

The term "Grandfathered Communications Systems" denotes customer-provided communications systems (including their equipment, premises wiring and protective circuitry if any) connected at the customer's premises, in accordance with any Telephone Company tariffs, that are considered to be grandfathered under Part 68 of the Federal Communications Commission's (FCC) Rules and Regulations. These systems may remain connected for the life of the equipment without registration. Additions and modifications may be made only in accordance with FCC Part 68.

(6) Connection of Grandfathered Communications Systems and Terminal Equipment (Continued)

Grandfathered Terminal Equipment

The term "Grandfathered Terminal Equipment" denotes customer-provided terminal equipment (including protective circuitry if any) connected at the customer premises, in accordance with any Telephone Company tariffs, that is considered to be grandfathered under FCC Part 68.

Grandfathered terminal equipment may remain directly connected and be moved and reconnected to the telecommunications network for the life of the equipment without registration and may be modified only in accordance with FCC Part 68.

b. Connections of Registered Equipment

Registered Equipment

The term "Registered Equipment" denotes equipment which complies with and has been approved within the registration provisions of FCC Part 68.

Customer-provided registered terminal equipment, registered protective circuitry, and registered communications systems may be directly connected at the customer premises to the telecommunications network, subject to FCC Part 68.

c. Premises Wiring Associated With Registered Communications Systems

Premises wiring is wiring which connects separately-housed equipment entities or system components to one another, or wiring which connects an equipment entity or system component with the telephone network interface or demarcation point not within an equipment housing. All premises wiring, whether fully protected or unprotected, must be installed in compliance with FCC Part 68.

Customers who intend to connect premises wiring other than fully protected to the telephone network must give advance notice to the Telephone Company in accordance with the procedures specified in FCC Part 68 or as otherwise authorized by the Federal Communications Commission.

3. Use of Customer Local Exchange Service

- a. Customer Local Exchange service, as distinguished from public and semi-public service, is furnished only for use by the customer, the customer's family, employees or representatives, persons residing in the customer's household, or guests of the customer, except as the use of the service may be extended to:

(1) Joint users

- (2) Patrons, as opposed to tenants, of the customer where the use of the service by the patron is incidental to his patronage of the customer, provided no charge except reimbursement for toll charges is made by the customer for such use.

 - (3) Patrons of the customer, and to the public in general, in connection with Automatic Dialing Telephone Units arranged for the origination of calls only to preselected telephone numbers.
 - (4) Medical doctor employees of the customer (hospital) for the conduct of their private practice on the premises of the customer (hospital).
 - (5) Another party on a different premises, to provide for the answering of calls during the customer's absence. Such a termination is furnished only with the understanding that outward calls are not to be placed from it, and on the condition that use of separate exchange service is available to the other party on the same premises.
 - (6) A communications common carrier in the provision of overseas data message service.
 - (7) Students, faculty members or employees who reside in dormitories or other residential quarters owned, leased, or under control of a college or university.
 - (8) Patrons of customers who resell or share their service.

GENERAL REGULATIONS

C. USE OF SERVICE AND FACILITIES (Continued)

5. Local Message

A local message is a communication between an exchange access line and any other exchange access line within the local service area of the originating exchange access line.

Charges for local messages originating at locations other than mobile stations and directed to a miscellaneous common carrier (MCC) are the same as for those local messages terminating at stations or station sets (wire) in the exchange area in which the point of connection of the system of the MCC with the system of the Telephone Company is located.

D. ESTABLISHMENT AND FURNISHING OF SERVICE

1. Application for Service

The Telephone Company may refuse an application for service if objection is made by or on behalf of any governmental authority to the furnishing of service.

An application for service becomes a contract upon the establishment of service. Neither the contract nor any rights acquired under it may be assigned or transferred in any manner except as specifically provided for in this tariff. Requests for additional service, when established, become a part of the original contract, except that each item of additional service is furnished subject to payment of charges for the period specified in Section 11, Initial Service Periods and Termination of Service. Any change in rates or regulations authorized by legally constituted authorities acts as a modification of all contracts to that extent, without further notice.

GENERAL REGULATIONS

D. ESTABLISHMENT AND FURNISHING OF SERVICE (Continued)

1. Application for Service (Continued)

When an application for service is cancelled by the applicant or a customer before service is established, the applicant or customer may be required to reimburse the Telephone Company for all expenses, including engineering and construction costs, incurred by the Telephone Company as a result of the application before it received notice of cancellation. The amount of reimbursement, however, will not exceed the service, construction, installation, and termination charges that would have been applicable if the service had been established.

When a request for additions, rearrangement, relocation, or modification of service or equipment is cancelled by a customer before the work involved has been completed, the customer may be required to reimburse the Telephone Company for all expenses, including engineering and construction costs, incurred by the Telephone Company as a result of the request before it received notice of cancellation. The amount of reimbursement, however, shall not exceed the service, construction, installation, and termination charges that would have been applicable if the work involved in complying with the request had been completed.

If an applicant has an outstanding account with the Telephone Company, the Telephone Company reserves the right to reject application for service until the amount due has been paid in full.

A contract for service may be transferred to another member of the family in the case of residence service and to another individual, partnership, association, or corporation in the case of nonresidence service. No billing adjustment for local exchange or toll service previously furnished is made and the new customer must assume all outstanding indebtedness of the original customer. No charge applies to service transferred in accordance with these provisions.

GENERAL REGULATIONS

D. ESTABLISHMENT AND FURNISHING OF SERVICE (Continued)

2. Application of Nonresidence and Residence Rates

Although the location of a customer's telephone service or the type of directory listing desired may in most cases serve as a satisfactory basis for determining whether nonresidence or residence rates apply, final determination will be based on the criteria below.

a. Nonresidence Rates

Telephone service is classified and charged for as nonresidence when a nonresidence listing is furnished. Telephone service is also classified and charged for as nonresidence when:

(1) the service

- (a) is used regularly in the pursuit of monetary gain from an occupation, commercial activity, or industrial effort; or
- (b) is used primarily in conjunction with a nonprofit activity of a service, organizational, professional, institutional, or charitable nature; or
- (c) is advertised regularly for the purpose of soliciting calls to the customer's telephone number; and

Telephone service is classified and charged for as nonresidence when a nonresidence listing is furnished. Telephone service is also classified and charged for as nonresidence when: (Continued)

(2) the customer is not

- (a) a customer or joint user of other nonresidence telephone service used in the principal conduct of the activity in which the customer is engaged; or
- (b) an employee or a representative of a customer to other nonresidence telephone service used in the principal conduct of the activity in which the customer is engaged.

Section 2
1st Revised Page 24
Cancels Original Page 24

GENERAL REGULATIONS

D. ESTABLISHMENT AND FURNISHING OF SERVICE (Continued)

2. Application of Nonresidence and Residence Rates (Continued)

b. Residence Rates

Telephone service is classified and charged for as residence at all residences when the conditions requiring a nonresidence classification as set forth in paragraph D.2.a. preceding are not present.

Telephone service is also classified and charged for as residence when furnished at any location as an access to a repeater control and/or autopatch facility of a bona fide amateur radio operator, organization or society duly licensed as a primary station by the Federal Communications Commission as an amateur radio station pursuant to FCC Part 97. The Telephone Company may request a copy of the amateur radio station license prior to the installation of service.

When it is determined that a residence service customer is using the service in such a manner that it should be classified and charged for as nonresidence service under the above provisions, the Telephone Company will reclassify the service of the customer to nonresidence and bill the customer the appropriate nonresidence rates. In the event the customer refuses to pay the applicable nonresidence rates, the Telephone Company may temporarily deny or discontinue the service under the provisions of this tariff applicable to payment for service.

3. Advance Payments

Advance payment may be required for extraordinary expenses, including, but not limited to, special construction costs associated with a particular service installation.

4. Deposits

The Company will comply with the Minimum Telephone Service Standards (MTSS) Chapter 4901:1-5 O.A.C, with respect to the establishment of service and the requirements to establish creditworthiness.

(T)

(D)

(D)

The Telephone Company may, in order to safeguard its interests and in accordance with the MTSS, Chapter 4901:1-5, require an applicant or a customer to make a suitable deposit to be held by the Telephone Company as a guarantee of the payment of charges. Such deposit will be in accordance with the individual service history method as described in the MTSS. The fact that a deposit has been made in no way relieves the applicant or customer from complying with the Telephone Company's regulations concerning advance payments and the prompt payment of bills on presentation. Simple interest at the rate of 3% per annum is paid for the period during which a cash deposit is held by the Telephone Company. When the contract is terminated, the amount of the deposit and any accrued interest is credited to the customer's account and any credit balance which may remain is refunded. The Telephone Company will review annually each active account for which a deposit is being held and will refund the deposit plus accrued interest for qualified customers in the form of a check or credit.

(T)

5. Computation of Local Message and Usage Charges

Unless otherwise requested by the customer, where two or more individual line message rate or optional measured services of the same class are furnished to a customer from the same central office unit at a given continuous property, the usage allowance for the lines involved is combined and the total usage of all lines applied against this combined allowance.

6. Flat Rate and Message Rate or Optional Measured Services

In exchanges in which both Flat Rate and Message Rate or Optional Measured Services are offered, combinations of Flat Rate and Message Rate or Optional Measured Services are not furnished on the same continuous property, except where the two services are used for separate purposes and are not used to supplement each other.

7. Telephone Numbers

The customer has no property right in the telephone number which is assigned by the Telephone Company, or any right to continuance of service through any particular central office, and the Telephone Company reserves the right to change the telephone number or the central office designation, or both, of a customer whenever it deems it necessary to do so in the conduct of its business.

8. Payment for Service

CBT incorporates, by reference, and will adhere to, the guidelines for subscriber bills, as found in Minimum Telephone Service Standards, Chapter 4901:1-5 O.A.C. (T)

- a. The customer is responsible for payment monthly or on demand, of all charges for facilities and services furnished the customer, including charges for services originated or charges accepted at such facilities. Charges are payable at the Telephone Company's Business offices or at any agency authorized to receive such payments.
- b. Bills are rendered monthly and include charges for local service for the current service month and charges for local messages or usage charges and toll messages
- c. A subscriber's bill will not be due earlier than 21 days from the bill date printed on the bill. If the bill is not paid by the due date, it then becomes past due.

8. Payment for Service (Continued)

- e. All service, except Residence Service, provided to the same customer, regardless of the tariff under which the service is provided, is considered one service for payment purposes. (Continued)
 - (4) Where the inquiry service is provided by an IXC or its designated agent, it will be responsible for promptly responding to the customer. In addition, it will be responsible for notifying the Telephone Company immediately regarding any bona fide dispute over outstanding toll charges, so that service will not be terminated during the investigation of the dispute. Upon completion of the investigation, it will be responsible for notifying the Telephone Company should the non-payment treatments set forth in paragraphs D.8.d. and e. above be appropriate.
- f. A subscriber who orders service or equipment installations, moves, or changes prior to the date of the Commission's Order authorizing any increase in the one time charge applicable to such work will be subject to the one time charge in effect at the time the subscriber's order was received by the Telephone Company, provided the work is completed within the Telephone Company's normal installation interval in effect at the time the order was placed. However, if subsequent to the effective date of the increase in the one time charge, the completion of such work is delayed beyond the Telephone Company's normal installation interval and the delay is not caused by the Telephone Company, the subscriber will then be subject to the one time charge in effect at the time the work is completed by the Telephone Company.
- g. Returned Check Charge

A \$25.00 administrative charge (USOC REK) will apply on each occasion a check, draft or electronic funds transfer item is presented for payment for service by a subscriber and is not accepted by the institution upon which it is drawn.

D. ESTABLISHMENT AND FURNISHING OF SERVICE (Continued)

9. Denial or Disconnection and Restoral of Service

CBT incorporates by reference, and will adhere to, the Minimum Telephone Service Standards, Chapter 4901:1-5 O.A.C. regarding the denial and/or disconnection of service.

- a. Telephone service may be disconnected for subscriber nonpayment of charges not in bona fide dispute for the following:

- (1) Local services for which the associated charges are directly regulated by the PUCO; (See Note 1)
or
- (2) Interexchange carrier services for which the Telephone Company does the principal billing.
However, local service may not be disconnected for subscriber nonpayment of toll service.

- b. Service may be disconnected or refused when any of the following conditions exist, provided the Company attempts to notify the customer in accordance with the Minimum Telephone Service Standards, Chapter 4901:1-5 O.A.C:

(T)

- (1) Violation of or noncompliance with the PUCO's regulations governing service supplied by the Telephone Company;
- (2) Failure to comply with municipal ordinances or other laws pertaining to telecommunications services;
- (3) Refusal by the subscriber to permit the Telephone Company necessary access to its facilities or equipment;
- (4) Failure to establish credit or make a deposit, when requested, for initial, current, or additional service;
- (5) When an emergency may threaten the health or safety of a person, a surrounding area, or the Telephone Company's distribution system;
- (6) In the event of a subscriber's use of telecommunications equipment in such a manner as to adversely affect the Company's equipment, its service to others, or the safety of the Company's employees or subscribers;

Note 1: The PUCO established in Case No. 95-790-TP-COI as amended by Entry on Rehearing, December 12, 1996, that all regulated telephone services provided by a local service provider, except toll service, shall be defined as local service.

GENERAL REGULATIONS

D. ESTABLISHMENT AND FURNISHING OF SERVICE (Continued)

9. Denials or Disconnection and Restoral of Service (Continued)

- (7) In the event of tampering with any facilities or equipment furnished and owned by the Telephone Company;

(D)

(D)

The Telephone Company, under the provisions in paragraphs D.9.a. and b. above, may either temporarily deny service or terminate the contract without incurring any liability. For additional liability information see paragraph B.1. this section.

- c. If a subscriber or a member of the subscriber's household demonstrates that disconnection of service would be especially dangerous to his or her health, the Telephone Company will consider this circumstance when offering extended payment arrangements to avoid disconnection. Payment arrangements will be offered regardless of the credit class of the subscriber.

GENERAL REGULATIONS

D. ESTABLISHMENT AND FURNISHING OF SERVICE (Continued)

9. Denial or Disconnection and Restoral of Service (Continued)

- d. When service of a customer has been temporarily denied in accordance with paragraphs D.9.a. or b. above, but the contract has not been terminated, or the order to remove the service has not been issued and completed; service will be restored following adjustment of the circumstances that caused the temporary denial, upon the payment of a restoration charge per exchange access line for residence or nonresidence service. If service has been denied for non-payment of charges due, the customer must pay all charges due. Temporary denial status will be maintained for a minimum period of five days, after which the service will be discontinued. Subsequent to the completion of a discontinuance order, service will be reestablished only upon the basis of a new service application.

Restoration Charge

	Tier Classification (Notes 1 & 2)	Charge	(T)
Residence and Non-Residence			
First Line			(C)
Cincinnati Exchange	1-Core (BLES Alt Reg)	\$ 18.30	
Hamilton Exchange	1-Core (BLES Alt Reg)	18.30	
All Other Exchanges and Lifeline subscribers	1-Core	18.30	
Second and Third Lines, PBX			
Trunks (Analog), and Centrex Lines			
Cincinnati Exchange	1-Noncore (BLES Alt Reg)	18.30	
Hamilton Exchange	1-Noncore (BLES Alt Reg)	18.30	
All Other Exchanges	1-Noncore	18.30	(C)
Fourth Lines and Above	2	18.30	
Complete Connections	2	18.30	(T)
All Other Applicable Services	2	18.30	(T)

Note 1: Tier 1-Noncore (BLES Alt-Reg) rates are subject to Tier 2 pricing flexibility.

Note 2: Tier 1-Noncore rates can be increased to a maximum cap of double the initial rate, other than the second local exchange access line and Call Waiting, which are limited to a ten percent increase per year until they cap at the double initial rate. This pricing flexibility is in accordance with O.A.C. 4901:1-4 and Alt Reg Case No. 04-720, effective July 1, 2004.
