D. LINK UP ASSISTANCE

2. Regulations (Continued)

- c. A customer eligible for Link Up may choose one or both of the Link Up benefits identified in paragraph D.1., above. (T)
- d. The Telephone Company's Link Up Assistance program shall allow a qualifying low-income consumer to receive the benefits of the Link Up program for a second or subsequent time only for a principal place of residence with an address different from the address at which the Link Up Assistance was provided previously. (T)
- e. The Telephone Company shall require, as proof of eligibility for Link Up Assistance, a document signed by the customer, certifying under penalty of perjury that the customer is receiving benefits from one of the programs identified in paragraph 2.a., above; identifying the specific program or programs from which the customer receives benefits. Additionally, any customer certifying income eligibility under part D.2.b of this section must provide documentation of eligibility within 15 business days of the customer's service establishment date to receive the Link Up benefits. Examples of acceptable income documentation include the most current: (D) (N)
 - 1. Year's state or federal income tax return;
 - 2. Income statement from an employer or W-2;
 - 3. Three consecutive months worth of pay stubs;
 - 4. Social Security statement of benefits;
 - 5. Veteran's Administration statement of benefits;
 - 6. Retirement/pension statement of benefits;
 - 7. Unemployment/Workmen's Compensation statement of benefits; or
 - 8. Other legal document showing current income, e.g. divorce decree or child support document. (N)
- f. If a customer is simultaneously applying for both Link Up Assistance and any other Basic Telephone Assistance described in this section of the tariff, such customer may utilize the same document to verify eligibility for both programs. (T)
(T)
- g. Link Up Assistance customers are not restricted on the optional services to which they subscribe. (T)
- h. This tariff does not permit, by a certified local exchange carrier or any other entity, the purchase of local residential service for resale as business service. Nor does this tariff permit the purchase of lifeline telephone service, for resale to other than qualifying lifeline customers. Such resale is prohibited. (T)

E. CBT LIFELINE RESIDENTIAL RATE PROGRAM

1. General

- a. The CBT Lifeline Residential Rate Program is a State of Ohio program that provides eligible residential customers with the maximum contribution of federally available Lifeline assistance. The specific benefits are:

A monthly discount of \$7.00 on Flat Rate Residence Service as shown in CBT's Exchange Rate Tariff, PUCO No. 3, Section 2. This discount consists of a CBT provided discount of \$3.50, a federal Lifeline discount of \$1.75, and a federal matching contribution of \$1.75.

An additional CBT-provided discount will be offered when appropriate to ensure that the net price does not increase above the Lifeline rates in effect on November 28, 2006. See Page 19 of this section for the monthly Lifeline rates.

(C)
(C)

A waiver of the monthly federal subscriber line charge.

A waiver of the nonrecurring charge to establish an exchange access line as shown in CBT's Exchange Rate Tariff, PUCO No. 3, Section 2

Free toll limitation services (e.g. toll and/or 900 blocking) upon customer request.

A waiver of the Telephone Company's local exchange service deposit requirement.

- b. This plan is provided pursuant to the rules for an elective alternative regulation plan for ILECs established in Case No. 00-1532-TP-COI.

E. CBT LIFELINE RESIDENTIAL RATE PROGRAM (Continued)

2. Regulations

- a. The CBT Lifeline Residential Rate Program is available to residential customers who are currently participating in one of the following assistance programs:
 1. Medical Assistance (Medicaid), including any state program that might supplement Medicaid;
 2. Food Stamps;
 3. Supplemental Security Income - blind and disabled (SSDI) or aged (SSI);
 4. Federal Public Housing Assistance/Section 8;
 5. Home Energy Assistance Program (HEAP);
 6. General Assistance, including disability assistance (DA);
 7. Ohio Works First (formerly AFDC) or Temporary Assistance to Needy Families (TANF);
 8. National School Lunch Program (NSL) - free lunch program.
- b. The CBT Lifeline Residential Rate Program is also available to customers who do not receive benefits from the programs shown in E.2.a above, but who have household income at or below 150% of the poverty level. (Non-categorical).
- c. Customers on the CBT Lifeline Residential Rate Program have the option to purchase Call Waiting. Additionally, customers have the option to purchase other features for medical and/or safety reasons. Requests to purchase vertical features for medical and/or safety reasons must be signed by the customer self-certifying that the feature is necessary for medical and/or safety reasons. No other optional/vertical features will be provided with the CBT Lifeline Residential Rate Program.
- d. Reductions to customer accounts through this program shall not produce a monthly rate that is below zero.
- e. The CBT Lifeline Residential Rate Program discount will apply to only one access line per household.

E. CBT LIFELINE RESIDENTIAL RATE PROGRAM (Continued)

2. Regulations (Continued)

- (D)
|
(D)
f. The Telephone Company shall require, as proof of eligibility for the CBT Lifeline Residential Rate Program, a document signed by the customer, certifying under penalty of perjury that the customer is receiving benefits from one or more of the qualifying programs listed in paragraph 2.a. above or that they meet the non-categorical qualification stated in paragraph 2.b. above; identifying the specific program or programs from which the customer receives benefits, and agreeing to notify the Telephone Company if the customer ceases to participate in such program or programs and/or no longer meets the non-categorical qualification. If a customer is applying for Lifeline based on income under part E.2.b of this section, the customer must provide documentation of eligibility. (See part E.3.b of this section for additional information regarding the enrollment process for non-categorical customers and for examples of acceptable income documentation.) (T)
(N)
|
(N)
g. The Telephone Company is permitted to perform a verification audit of a customer already on the CBT Lifeline Residential Rate Program. (T)
h. CBT Lifeline Residential Rate Program customers with past due bills for regulated local service charges will be offered special payment arrangements for these past due balances. These arrangements will consist of an initial payment not to exceed \$25.00, before service is installed, with the balance for the regulated local charges to be paid over six equal monthly installments. Lifeline customers with past due bills for toll service will be required to have toll restricted service until such past due toll charges have been paid in full or until the customer establishes service with a subsequent toll provider. (T)
i. This tariff does not permit, by a certified local exchange carrier or any other entity, the purchase of local residential service for resale as business service. Nor does this tariff permit the purchase of lifeline telephone service, for resale to other than qualifying lifeline customers. Such resale is prohibited. (T)

E. CBT LIFELINE RESIDENTIAL RATE PROGRAM (Continued)

3. Enrollment Process

a. Program Qualified Customers

The enrollment process and rules in this part E.3.a apply only to customers who qualify for the CBT Lifeline Residential Rate Program through one of the programs listed in part E.2.a of this section.

Current customers who convert to Lifeline will receive Lifeline benefits beginning on the day that the customer requests conversion to Lifeline.

New customers will begin receiving Lifeline benefits on the service establishment date.

The customer must submit a completed Lifeline application certifying eligibility to receive Lifeline benefits within 15 business days of the request to establish Lifeline service. Customers who do not submit the appropriate certification within 15 business days are subject to termination of Lifeline benefits in accordance with the "Notice of Non-qualification" described in part E.3.c of this section.

b. Income Qualified (Non-categorical) Customers

The enrollment process and rules in this part E.3.b apply only to customers who qualify for the CBT Lifeline Residential Rate Program through the income qualifier in part E.2.b of this section.

Customers enrolling in Lifeline through income eligibility must submit appropriate documentation of eligibility prior to receiving Lifeline benefits. Examples of acceptable income documentation include the most current:

1. Year's state or federal income tax return;
2. Income statement from an employer or W-2;
3. Three consecutive months worth of pay stubs;
4. Social Security statement of benefits;
5. Veteran's Administration statement of benefits;
6. Retirement/pension statement of benefits;
7. Unemployment/Workmen's Compensation statement of benefits; or
8. Other legal document showing current income, e.g. divorce decree or child support document.

BASIC TELEPHONE ASSISTANCE

E. CBT LIFELINE RESIDENTIAL RATE PROGRAM (Continued)

3. Enrollment Process

b. Income Qualified (Non-categorical) Customers (Continued)

The customer must submit a completed Lifeline application certifying eligibility to receive Lifeline benefits and the supporting documentation verifying income eligibility within 15 business days of the request to establish Lifeline service. Customers who return the appropriate documentation within 15 business days will receive Lifeline benefits retro-active to the date the customer requested Lifeline service or to the date that service was established for customers who established new service.

Customers who do not submit documentation within 15 business days will not receive retro-active Lifeline credits. Rather, Lifeline benefits will begin on the date the application and supporting documentation is received by CBT.

Customers who submit insufficient documentation will receive notice in accordance with E.3.c of this section. Customers who subsequently submit sufficient documentation will receive Lifeline benefits retro-active to the date the customer requested Lifeline service or to the date that service was established for customers who established new service.

The Company will review all submitted documentation within 60 days.

E. CBT LIFELINE RESIDENTIAL RATE PROGRAM (Continued)

3. Enrollment Process

c. Notice of Non-qualification

The Telephone Company shall provide written notification to customers that do not qualify for Lifeline Assistance or that fail to submit acceptable documentation. The notice shall give customers an additional 30-day opportunity to prove eligibility or dispute the company's determination.

The written notification will include:

1. The earliest date termination of Lifeline benefits will occur if the customer has been receiving the benefits or the last date the customer has to provide documentation to prove eligibility to receive the benefits;
2. The reason(s) for termination of Lifeline benefits and any actions which the customer must take to demonstrate continued eligibility;
3. Contact information for the Company; and
4. A statement consistent with the disconnect notice set forth in Minimum Telephone Service Standards, Chapter 4901:1-5, O.A.C., explaining who customers may contact in the event of a dispute. (T)
(T)

If a customer disagrees with the Company's findings regarding eligibility for Lifeline Assistance, the customer may file an informal/formal complaint with the Public Utilities Commission of Ohio.

Issued: January 9, 2008

Section 17
Original Page 18

BASIC TELEPHONE ASSISTANCE

E. CBT LIFELINE RESIDENTIAL RATE PROGRAM (Continued)

4. Verification for Continued Eligibility

The Company must notify customers at least 60 days prior to the company's pending termination of the customer's Lifeline Assistance if the customer fails to submit acceptable documentation for continued eligibility for benefits. Such notice will be separate from the bill and will include:

- a. The earliest date termination of Lifeline benefits would occur;
- b. The reason(s) for termination of Lifeline benefits and any actions which the customer must take to demonstrate continued eligibility;
- c. Contact information for the telephone company; and
- d. A statement consistent with the disconnect notice requirements outlined in the MTSS Chapter 4901:1-5, O.A.C., explaining who the customer should contact in the event of a dispute.

Should a customer fail to submit proper documentation within the 60-day period, the Company will terminate the customer's Lifeline benefits. Documentation received after the 60-day period will be treated as a new application for Lifeline benefits, and Lifeline benefits will resume on the date the documentation is received.

If a customer disagrees with the Company's findings regarding eligibility for Lifeline Assistance, the customer may file an informal/formal complaint with the Public Utilities Commission of Ohio.

SPECIAL REVERSED CHARGE TOLL SERVICE

A. GENERAL

1. Special Reversed Charge Toll Service allows a customer in one exchange to arrange for patrons in one or more other exchanges to be able to call him without paying a toll charge and without requesting reversal of the charge.
2. This service is available only to customers to PBX service, or individual line service except semi-public service.
3. The Telephone Company assigns a special call number designation for the use of patrons in each exchange in which the transfer service is to be furnished.
4. Calls for the special number designation are accepted only when originated at station sets located in the exchange to which the special number had been assigned and only calls placed by calling the special number are considered as coming within the scope of the service.
5. Customers contracting for Special Reversed Charge Toll Service assume all charges for completed calls to their special numbers.

B. RATES AND CHARGES

1. Each completed call made in connection with Special Reversed Charge Toll Service is charged for at the established rate for a completed sent paid station-to-station operator-handled toll call.

	Initial Charge	Monthly Rate	<u>USOC</u>
2. Special Reversed Charge Toll Service, including one directory listing, if desired, per each exchange for which the service is furnished	\$ 11.35	\$11.85	ENT

3. Additional directory listings may be provided at charges shown in Section 6 of this tariff.

SUSPENSION OF SERVICE

A. GENERAL

1. Upon request of a customer, residence service may be suspended for periods of one or more months at a given location. Service must be restored for at least one month between periods of suspension.
2. No outward or inward service is furnished during the period of suspension.
3. Unless otherwise arranged for by the customer, parties calling the telephone number of the suspended service will be advised that the service has been temporarily suspended.
4. Nonresidence service may not be suspended.
5. Rates and regulations applicable to suspension of service for Centrex residence service are shown in Section 21 of this tariff.

B. RATES

1. The rate for service during the period of suspension is 50 percent of the regular rate for the service. Bills are rendered at the reduced rate during the period of suspension.
2. A nonrecurring charge of \$18.30 applies, which provides for the suspension and restoral of the residence service. No premises charges apply for this service.

TELECOMMUNICATIONS SERVICE PRIORITY (TSP) SYSTEM

A. GENERAL

1. The TSP System is a service developed to meet the requirements of the Federal Government, which provides the regulatory, administrative and operational framework for the priority installation and/or restoration of National Security Emergency Preparedness (NSEP) telecommunications services. Priority installation and/or restoration of NSEP telecommunications services will be provided in accordance with Part 64.401, Appendix A, of the Federal Communications Commission's (FCC's) Rules and Regulations.

Regulations, rates and charges are as specified in FCC No. 35, Access Service Tariff, Section 10.

CELLULAR INTERCONNECTION CHARGES

A. GENERAL

1. Landline direct-dialed intraLATA calls made by Telephone Company customers to certain cellular telephone numbers will be charged the cellular interconnection charge subject to the conditions described in this section.

B. DEFINITIONS

1. Landline Subscriber - A customer of the Telephone Company originating a direct dialed call that will terminate at a cellular telephone number.
2. Cellular Interconnection Charge - A charge to the landline subscriber for the use of the Cellular Radio Common Carrier's facilities. Also referred to as Calling Party Pays.

C. REGULATIONS

1. Billing of the cellular interconnection charge is subject to the Public Utilities Commission of Ohio approval of:

The Southern Ohio Telephone Company, Wholesale Cellular Telecommunications Service Tariff
PUCO NO. 1, or

The Cincinnati SMSA Limited Partnership, Wholesale Cellular Radio Telecommunications Service
Ohio Tariff PUCO NO. 8.

2. Calls involving a cellular interconnection charge will require the use of a 1+NXX-XXXX dialing pattern.
3. A specific contract between the Cellular Radio Common Carrier and the Telephone Company which includes the details for settlement of the Cellular Interconnection Charge will be required.

CELLULAR INTERCONNECTION CHARGES

C. REGULATIONS (Continued)

4. Only direct-dialed intraLATA Telephone Company subscriber calls to cellular telephone numbers associated with Calling Party Pays will be charged the cellular interconnection charge. Cellular interconnection charges will not be billed to the landline subscriber on calls originating from:

- Coin sent paid calls
- WATS calls
- Operator handled calls
- Calling card calls
- Interexchange Carriers
- International Telephone Companies
- Other Telephone Companies

5. Each cellular interconnection charge call will be itemized on the landline subscriber's billing statement.
6. Cellular interconnection charges are not included in local exchange flat rate access line charges. When cellular interconnection charge calls are placed from measured or message rate exchange lines, the usual measured or message rate usage charges are not applicable, nor are such calls chargeable against any measured or message rate usage allowance.
7. Cellular Interconnection Charges will be determined by rounding the message time to the next whole minute.
8. Cellular Interconnection Charges to the landline calling party for cellular usage are specified in the following tariffs:

The Southern Ohio Telephone Company Wholesale Cellular Communications Service Wholesale Price List PUCO NO. 1.

The Cincinnati SMSA Limited Partnership, Wholesale Cellular Radio Telecommunications Service Wholesale Price List PUCO NO. 8.

PAGING INTERCONNECTION CHARGES

A. GENERAL

1. Landline direct-dialed intraLATA calls made by Telephone Company customers to certain paging telephone numbers will be charged the paging interconnection charge subject to the conditions described in this section.

B. DEFINITIONS

1. Landline Subscriber - A customer of the Telephone Company originating a direct dialed call that will terminate at a paging telephone number.
2. Paging Interconnection Charge - A charge to the landline subscriber for the use of the Paging Common Carrier's facilities. Also referred to as Paging Party Pays.

C. REGULATIONS

1. Billing of the paging interconnection charge is subject to the Public Utilities Commission of Ohio approval.
2. Calls involving a paging interconnection charge will require the use of a 1+NPA-NXX-XXXXX dialing pattern.
3. A specific contract between the Paging Radio Common Carrier and the Telephone Company which includes the details for settlement of the Paging Interconnection Charge will be required and shall be filed with the Commission.

CUSTOM CALLING SERVICE

A. GENERAL

1. Custom Calling Service features are offered only from selected offices where the Telephone Company has arranged the facilities for this service, and are furnished subject to the availability of facilities.
2. Custom Calling Service includes one or more of the following service features

a. Call Forwarding Variable Feature

Call Forwarding Variable permits the customer to activate and deactivate a transfer of his or her incoming calls to another telephone line. Because of transmission limitations, it is recommended that the calls be transferred within the customer's local service area.

The Call Forwarding Variable customer is responsible for any applicable customer-dialed station-to-station toll charge.

b. Three-Way Calling Feature

Three-Way Calling permits the customer to add a third party to an existing connection, thus establishing a three-way conference call. Because of transmission limitations, it is recommended that not more than one of the parties included in a three-way conference call be outside the local service area of the customer establishing the call.

Customers may utilize Three-Way Calling on a subscription basis or on a pay-per-use basis. Customers obtaining the service on a subscription basis order the service in advance and the feature is always activated for their use. These customers incur a monthly charge and receive unlimited use of the Three-Way Calling feature. Customers who obtain the service on a pay-per-use basis order Three-Way Calling in advance and then activate the Three-Way Calling feature by dialing an activation code each time they want to utilize Three-Way Calling. These customers incur a specific charge for each activation (usage) of the Three-Way Calling feature but no monthly charge. The pay-per-use option is only available where facilities permit and at the option of the Telephone Company.

c. Speed Calling Feature

Speed Calling permits the customer to place local and message toll calls to a pre-selected group of telephone numbers by dialing abbreviated codes. Speed Calling is provided in capacities of eight or thirty telephone numbers.

CUSTOM CALLING SERVICE

A. GENERAL (Continued)

2. Custom Calling Service includes one or more of the following service features (Continued)

d. Call Waiting Feature (including Cancel Call Waiting Feature)

- (1) Call Waiting permits the customer, upon receiving a tone signal indicating that a call is waiting, to place an existing call on hold by depressing the switchhook, and answer the second waiting call.
- (2) Cancel Call Waiting permits the customer to deactivate the Call Waiting feature on an individual call by dialing a code before making an outgoing call.
- (3) Long Distance Alert (LD Alert) is a feature on the Call Waiting Service which indicates to Call Waiting subscribers - while on a call in progress through a special signal - that an incoming call is long distance. This feature overrides the Multiple Directory Number (Distinctive Ring) feature for long distance calls.

e. Call Forwarding Busy Line Feature

Call Forwarding Busy Line allows for forwarding of an incoming call when the activated line is busy. The Call Forwarding Busy Line customer is responsible for any applicable customer-dialed station-to-station toll charge.

f. Call Forwarding Don't Answer Feature

Call Forwarding Don't Answer allows for forwarding an incoming call when the call remains unanswered after a pre-determined number of rings (approximate number 1 to 7, selected by the customer). The call forwarding don't answer customer is responsible for any applicable customer-dialed station-to-station toll charge.

CUSTOM CALLING SERVICE

A. GENERAL (Continued)

2. Custom Calling Service includes one or more of the following service features (Continued)

g. Multiple Directory Numbers Per Line With Distinctive Ringing Feature

- (1) The Multiple Directory Numbers Per Line with Distinctive Ringing feature (MDNL) will provide customers the benefit of up to three Directory Numbers (DNs) on a single access line, each with a unique distinctive ringing pattern, without an additional line termination, and without additional station equipment. The access line will be designated as the "Master" DN and will receive a standard ring. Any additional DNs associated with the same access line number will be called a "Dependent" DN and will receive distinctive ringing. Each Dependent DN will have a non-standard distinctive ringing pattern.
- (2) If a customer subscribes to Call Waiting, distinctive call waiting tones that correspond in cadence to the distinctive ringing patterns will also be provided for each of the additional DNs.
- (3) Customers with MDNL who subscribe to Call Forwarding must designate whether calls to only the "master" DN or to all DNs are to be call-forwarded.
- (4) Customers subscribing to the MDNL feature can subscribe to all other Custom Calling Service features available to them. However, regardless of the number of DNs an access line has, it can only have one set of custom calling features chargeable per access line, and the features are available to all the DNs.
- (5) A call directed to an off-hook MDNL line will receive busy treatment, regardless of which DN (master or any of the related dependents) was dialed.

Section 25
Original Page 4

CUSTOM CALLING SERVICE

A. GENERAL (Continued)

2. Custom Calling Service includes one or more of the following service features (Continued)

g. Multiple Directory Numbers Per Line With Distinctive Ringing Feature (Continued)

- (6) Residence rates for MDNL service will be charged to customers qualifying for residence rates as defined in Section 2 of this tariff. Nonresidence rates for MDNL service will be charged to customers qualifying for nonresidence rates as defined in Section 2 of this tariff. A change in "class of service" (residence to nonresidence) will be required in connection with a residence customer's requesting and receiving nonresidence MDNL service.
- (7) Directory listings provided in connection with MDNL service will be governed by rules, regulations, and rates specified in Section 6 of this tariff.
- (8) Customer Premises Equipment (CPE) which produces personalized ringing should not be used with the MDNL service. Personalized ringing (ringing provided, based on call destination that indicates the intended recipient of the call) and MDNL's distinctive ringing can be coded within the same ringing pattern. As a result, customers may have trouble discerning what the ringing implies. Similarly, other types of CPE such as cordless phones and phones with electronic ringers may not be able to reproduce the distinctive ringing patterns that are sent out from the central office. For that reason, these types of CPE are not recommended for use with the MDNL service.

CUSTOM CALLING SERVICE

A. GENERAL (Continued)

2. Custom Calling Service includes one or more of the following service features (Continued)

h. Call Waiting Deluxe

Call Waiting Deluxe is a feature that allows a customer to control the treatment applied to incoming calls while the customer is off-hook on an existing call. While on an existing call, Call Waiting Deluxe notifies the customer of an incoming call with the call waiting tone. Call Waiting Deluxe is comprised of the functionality of the Call Waiting feature including Long Distance Alert and provides several additional call disposition options.

A user's perception of Call Waiting Deluxe will be affected by 1) whether they receive Calling Identity Delivery (CID) data for a waited party (Caller ID type services), and 2) the type of Customer Premises Equipment (CPE) used. The application of CID while a call is waited, allows the Call Waiting Deluxe customer to select a disposition option based on information about the waited party. The CPE will determine how Call Waiting Deluxe options are displayed, selected and in some cases, how they behave.

The Call Waiting Deluxe customer must also subscribe to Call Forwarding Don't Answer Service in order to forward a waiting call to another location.

Call disposition options provided with Call Waiting Deluxe include:

- Answer the call and put the existing call on hold,
- Answer the call and disconnect the existing call,
- Forward the call,
- Connect the call to an announcement,
- Put the call on hold,
- Conference the call with the existing call.

Utilization of the full capabilities of Call Waiting Deluxe requires the use of compatible CPE at the customers' premises. The installation and maintenance of the compatible CPE and the technical capability of that CPE to function in conjunction with features of Call Waiting Deluxe is the responsibility of the customer.

CUSTOM CALLING SERVICE

A. GENERAL (Continued)

2. Custom Calling Service includes one or more of the following service features (Continued)

j. Call Transfer Service

Call Transfer Service (Call Transfer) is a feature that allows a customer (POTS customer) to transfer an established call terminating on their telephone line to any other telephone line. Call Transfer allows the customer to (1) transfer the call and then hang-up leaving the other two-parties on a two-way call, or (2) to bridge the call and establish a three-way call. If the Call Transfer subscriber hangs up once a three-way call has been established the call will be considered transferred and the other two parties will be able to continue on a two-way call. The Call Transfer customer is free to originate and terminate additional calls after the call has been transferred. Any charges applicable to the call will be billed to the Call Transfer subscriber. Any toll usage will appear on the Call Transfer Service Customer's bill.

k. Talking Call Waiting

Talking Call Waiting Service is a feature that allows a subscriber on a call in progress, upon receiving a tone signal indicating that another call is waiting, to hear the name of the second calling party. The name is spoken to the subscriber directly after the call waiting tone is sent. The Talking Call Waiting subscriber does not need to hit the flash button in order to hear the spoken name of the incoming caller.

The subscriber has the option to accept the incoming call by placing the existing call on hold (depressing the switch hook) and answering the waiting call or to ignore it.

l. Anywhere Call Forwarding

Anywhere Call Forwarding allows subscribers the capability to remotely change the termination of their incoming calls to another telephone line using any tone signaling telephone. The customer can activate, deactivate, or change the destination number using a personal identification number (PIN).

CUSTOM CALLING SERVICE

A. GENERAL (Continued)

4. Normal quality of transmission may not be maintained on all calls.
5. When the Call Forwarding features *Busy Line* and *Don't Answer* are provided on the same line, the forwarded-to number must be the same. When either Call Forwarding *Busy Line* or Call Forwarding *Don't Answer* are provided, it may be necessary for the forwarded-to number to be in the same central office, as determined by the facilities available in the customer's serving central office.
6. Customers subscribing to Custom Calling Services are provided with a thirty (30) day Customer Satisfaction Guarantee. The 30 day Customer Satisfaction Guarantee will provide the customer up to a 30 day credit for the monthly charge associated with the service, if they are not satisfied with the service. The credit will be provided only for the time the customer has the service, up to a maximum of 30 days. To receive the credit the customer must notify the Telephone Company of their dissatisfaction with the service and place an order to discontinue the service within 30 days of the time that the service was installed. The customer will also be credited for the nonrecurring charge associated with the service if one was charged.

Note 2: Usage charge applies on a pay-per-use basis. There is no service activation or nonrecurring charge associated with services provided on a pay-per-use basis.

Note 3: Tier 1-Noncore (BLES Alt-Reg) rates are subject to Tier 2 pricing flexibility.

Note 4: Tier 1-Noncore rates can be increased to a maximum cap of double the initial rate, other than the second local exchange access line and Call Waiting, which are limited to a ten percent increase per year until they cap at the double initial rate. This pricing flexibility is in accordance with O.A.C. 4901:1-4 and Alt Reg Case No. 04-720, effective July 1, 2004.

CUSTOM CALLING SERVICE

B. RATES (Continued)

The following rates and charges apply to Custom Calling Service features and are in addition to the rates and charges applicable to the associated service, equipment and facilities:

1. Recurring Charges (Continued)

	Tier Classification	Monthly Rate		USOC
		Residence	Non-Residence	
f. Call Waiting Deluxe	2	\$7.00	\$9.50 (I)	PKR
g. Message Waiting Indicator	2	.25	.25	MWN
h. Call Transfer	2	5.00	7.50 (I)	TFI
i. Combination of Call Forwarding Busy, Call Forwarding Don't Answer, and Message Waiting Indicator	2	1.75	6.50 (I)	NLR3M
j. Talking Call Waiting	2	4.00	N/A	TW1

2. Discounts

The Call Manager package (Section 42) is grandfathered as of July 5, 2001. Call Manager customers who subscribed to any Custom Calling or Custom Calling Plus services prior to July 5, 2001 will continue to receive the discounted \$2.00 rate for those services as described in the following paragraph. Call Manager customers who subscribe to additional Custom Calling or Custom Calling Plus services after July 5, 2001 will be required to pay the tariffed rates for the newly added services.

Subscribers to the Call Manager/Business Manager Package as described in Section 42 of this tariff may purchase any Custom Calling or Custom Calling PLUS Service that is not part of the Call Manager/Business Manager Package and that is priced at \$3.00 per month for \$2.00 per month.

INTERCEPT SERVICES

A. TEMPORARY INTERCEPTION OF CALLS SERVICE

1. General

- a. At the request of the customer and where the facilities permit, any grade of nonresidence or residence service will be intercepted temporarily without termination of the contract. Only outward service will be provided during the period Temporary Interception of Calls Service is active.
- b. Referral of calls will be made if the customer desires. Only referrals to individual lines will be made from nonresidence lines.
- c. In view of the possibility of errors, arrangements for interception with or without referrals are made with the understanding that the customer assumes all risk in connection therewith, and that no liability attaches to the Telephone Company by reason of failure to complete any calls. For additional liability information see Section 2, paragraph B. 1.
- d. The minimum period for which Temporary Interception of Calls service is furnished is 24 hours. Each period of interception must start and end during normal working hours of the Telephone Company. A period of interception is considered to be terminated and a new period of interception established when a change is made at the customer's request.

2. RATES AND CHARGES

The regular recurring charges for service apply during the period of interception of calls. In addition to all other charges of the Telephone Company, the following charges apply for each period of interception per number intercepted.

	Initial Charge	Monthly Charge	USOC
Nonresidence	\$ 18.30	\$ 28.40 (I)	TYS
Residence	18.30	19.10 (I)	TYS

INTERCEPT SERVICES

B. BASIC INTERCEPT SERVICE

1. General

- a. Basic Intercept Service is the service in which a telephone call directed to a disconnected, changed or non-assigned telephone number is re-directed to an operator or to a recording. The intercept operator or the recording informs the calling party why the call could not be completed and, if possible gives the telephone number where the call can be completed.
- b. Basic Intercept Service is generally provided at no charge when a subscriber voluntarily or involuntarily changes their telephone number. However, where the subscriber has multiple lines that are in a hunt system, or subscribes to DID service, only the primary directory listing telephone number is provided Basic Intercept Service at no charge.
- c. Changed telephone numbers will be provided Basic Intercept Service at no charge for a period of not less than ninety days or until the issuance of a new Cincinnati Bell Telephone Area Alphabetical Directory which contains their new directory listing information, whichever comes first.
- d. If a subscriber wants to continue Basic intercept beyond the period of time stated above, the customer must subscribe to one of the billable intercept services listed in this tariff.

2. RATES AND CHARGES

There is no charge for this service. This service is provided in order to comply to the Ohio Minimum Service Standards.

INTERCEPT SERVICES

C. EXTENDED BASIC INTERCEPT SERVICE

1. General

- a. Extended Basic Intercept service allows a nonresidence service customer to extend the length of time that their telephone number is provided Basic Intercept beyond the period in which Basic Intercept is normally provided and/or to purchase intercept on numbers other than the directory listed telephone number.
- b. Extended Basic Intercept will be provided until the customer calls to have it removed or for a maximum of 360 days.

INTERCEPT SERVICES

D. CUSTOMIZED MESSAGE INTERCEPT SERVICE

1. General

- a. This service allows nonresidence and residence customers to record their own intercept message in order to inform callers of their change of telephone number.
- b. The customized intercept message will be limited to a maximum of 35 seconds. The intercepted call will be terminated at that point.
- c. The customer subscribing to Customized Message Intercept Service will be given a telephone number to call to set up the message. Once the message is recorded the customer may change their intercept message as often as they wish.
- d. Customized Message Intercept Service will be provided until the customer places an order to have it removed or for a maximum of 360 days for nonresidence customers or 90 days for residence customers when associated with disconnected service.
- e. This service may be associated only with a disconnected nonresidence or residence service telephone line.

INTERCEPT SERVICES

E. CUSTOMIZED MESSAGE WITH COMPLETION

1. General

- a. This service allows nonresidence service customers to record their own intercept message and have calls forwarded to a new telephone number.
- b. The customized intercept message will be limited to a maximum of 35 seconds. The message portion of the intercepted call will be terminated at that point.
- c. The customer will be given a telephone number to call to set up the message. Once the message is recorded the customer may change their intercept message as often as they wish.
- d. Customized Message With Completion Service may be provided until the customer places an order to have it removed or for a maximum of 360 days when associated with disconnected service.
- e. The call will be connected to the new number automatically after the personalized intercept message is played. The caller does not have to dial the new number. There is no time limit on the length of the call once it has been connected to the new telephone number.
- f. Customized Message with Completion does not provide for completion of calls to Calling Party Pays Cellular, Local Area Service (LAS) line types or to toll numbers. Calls may be completed to 1-800 type numbers.
- g. This service may be associated only with a disconnected nonresidence service telephone line.

INTERCEPT SERVICES

F. SPLIT INTERCEPT WITH CUSTOMIZED MESSAGE

1. General

- a. This service allows nonresidence service customers with multiple parties on one line who are separating to intercept calls to that telephone number, provide two or more names and telephone numbers, and to record their own intercept message to provide the caller, information on how to reach the parties.
- b. The customized intercept message will be limited to a maximum of 35 seconds. The message portion of the intercepted call will be terminated at that point.
- c. The customer will be given a telephone number to call to set up the message. Once the message is recorded customers may change their intercept message as often as they wish.
- d. If the customer does not call and record their own intercept message, the Telephone Company will provide a default intercept message that will provide limited listings information.
- e. Split Intercept with Customized Message Service may be provided until the customer places an order to have it removed or for a maximum of 360 days when associated with disconnected service.
- f. This service may be associated only with a disconnected nonresidence service telephone line.

G. NON-DIRECTORY NUMBER INTERCEPT SERVICE

1. General

- a. This service allows nonresidence service customers who receive calls on telephone numbers that are not entitled to free basic intercept service i.e. non directory Centrex numbers, non directory DID numbers and additional numbers in multi-line (hunt groups) to purchase basic intercept (as described in this Section of the tariff).
- b. Non-directory number intercept will only be provided in association with service that is either changing telephone numbers or moving to a new address (C and T/F order types).
- c. Once ordered, Non-Directory Number Intercept service may be provided until the customer places an order to have it removed or for a maximum of 360 days when associated with associated with disconnected telephone service.

OPERATOR SERVICES CHARGES

A. LOCAL DIRECTORY ASSISTANCE SERVICE

(T)

1. General

In addition to providing telephone directories to all Local Exchange Service subscribers, the Telephone Company furnishes Local Directory Assistance Service upon request whereby customers may obtain assistance in determining telephone numbers, names, directory addresses and zip codes.

(T)

The rates shown in paragraph 3 below apply when customers of the Telephone Company request assistance in determining or attempting to determine the telephone number, name and/or address of any party (1) located in or thought to be located in the same local service area, or (2) who are not located in the same local service area but who are located or thought to be located within the portion of Ohio for which the Telephone Company furnishes centralized Local Directory Assistance Service.

(T)

Local Directory Assistance Service allows a subscriber to provide a name to get a telephone number, zip code and/or directory address.

(T)

(T)

Local Directory Assistance Service does not provide the telephone number, name, address or zip code for a nonpublished listing. However, this information will be provided in those situations where a customer's listing is not in the directory and the customer is not specifically paying for nonpublished service.

(T)

Directory Assistance Call Completion Service is included as part of Local Directory Assistance Service at no additional charge. Directory Assistance Call Completion Service provides Local Directory Assistance customers the option of having their calls to the requested directory number completed automatically by the Operator Services Switch (OSS). Toll, message, or local usage charges as a result of Directory Assistance Call Completion Service will be applicable. Section 27, Paragraph D provides additional information regarding Directory Assistance Call Completion Service.

(C)

(C)

Wide Area Telecommunications Service (OutWATS) customers are subject to the rates and regulations applicable to non-residence customers pertaining to directory assistance.

OPERATOR SERVICES CHARGES

B. LOCAL OPERATOR VERIFICATION/INTERRUPTION SERVICE

1. General

Verification service provides operator assistance in determining if a called line is in use. Interruption service provides for operator interruption of a conversation in progress on a called line. The customer may request these services for a charge, where facilities are available, by calling the "O" Operator.

2. Application of Charges

a. The charges specified in paragraph 3. following will apply to all requests except:

- (i) Emergency requests from official emergency agencies when the request is received on an agency line from agency personnel.
- (ii) Emergency requests in which the caller identifies that the request is to (1) an official public emergency agency; (2) an emergency medical number; or (3) a privately endowed and operated suicide, drug, alcohol, or runaway crisis reporting center.
- (iii) Requests in which the operator encounters a trouble condition or has reason to believe a trouble condition exists.

3. Rates

a. Verification: A charge of \$0.84 applies each time the operator verifies a called line and hears voice communication.

B. LOCAL OPERATOR VERIFICATION/INTERRUPTION SERVICE (Continued)

3. Rates (Continued)

- b. Interruption: A charge of \$1.61 applies each time the operator interrupts a conversation in progress on the called line. The charge is for the interrupt service and does not depend on whether the called party agrees to release the line and accept the call. (I)
- c. If an operator both verifies the condition of the line and interrupts conversation on the same request, only the interrupt charge applies.
- d. The charges for Verification/Interruption service are in addition to any applicable message rates. These charges are not permitted to be billed on a "collect" basis.

C. LOCAL CONFERENCE SERVICE

1. General

- a. Local conference service consists of furnishing local connections on three or more exchange access lines subject to equipment limitations; or combinations of three or more exchange access lines on one connection at the same time so that each may communicate with all the others. Service between all connections must be local. If service between any two of the connections is toll, the service is classified as toll conference service. For regulations and rates for toll conference service, refer to the Toll Tariff.
- b. Local conference service is offered only when all connections are between exchange access lines having the Cincinnati and Kentucky Metropolitan exchanges in their local calling areas.
- c. One class of service is offered, whether the call is to specified persons or specified numbers. Subject to the provisions in paragraph a. preceding, the Telephone Company will upon request, endeavor to arrange for the establishment of a local conference connection at a specified time.

OPERATOR SERVICES CHARGES

C. LOCAL CONFERENCE SERVICE (Continued)

1. General (Continued)

- d. Charges for local conference calls are billed only to the originating customer. Chargeable time begins when connection is established between all the persons on the conference and ends when the connection is terminated at all points. A customer's request that a conferee be added to or disconnected from a conference call on which conversation is in progress, is considered as terminating the call and initiating a new call to the revised group.

2. Rates

a. Each exchange access line

For the first three minutes or fraction thereof	\$.55
For each additional one minute or fraction thereof	.11

D. DIRECTORY ASSISTANCE CALL COMPLETION

1. General

The Telephone Company provides Directory Assistance Call Completion (DACC) Service to customers who have accessed local Directory Assistance. Directory Assistance Call Completion Service provides Local Directory Assistance customers the option of having their calls to the requested directory number completed automatically by the Operator Services Switch (OSS).

(T)

Directory Assistance Call Completion is activated by the customer when the customer depresses a specific digit on a touch-tone telephone during the DACC announcement prompt. The DACC announcement prompt will be given when the customer receives the requested directory number from the automated Interactive Voice System (IVS).

2. Regulations

- a. The calling number and the number requested to be completed must be in the same Local Access Transport Area (LATA) or the local calling area where the request originated.
- b. Only the second provided Directory Assistance telephone number will be completed if two Directory Assistance requests are made by the customer during the same call.
- c. Directory Assistance Call Completion Service is included as part of Local Directory Assistance Service (Section 27, Paragraph A) and Directory Assistance Business Category Search (Section 27, Paragraph G) at no additional charge. However, toll, message or local measured usage charges as a result of Directory Assistance Call Completion will be applicable.

E. OPERATOR COMPLETION OF LOCAL CALLS

1. General

The charge for the Operator Completion of Local Calls applies when a customer requests the assistance of the Telephone Company operator to complete a local call or to complete a call to a Cellular Telephone Service Number.

2. Regulations

- a. This service is only provided upon customer request and on a per call basis. This is not a monthly subscription service.
- b. All existing usage charges are applicable in addition to the charge for the operator completion of the local call.
- c. The Operator Completion of Local Calls service charge does not apply, to calls placed for customers with special needs, to emergencies such as 911 calls, to calls arising from telephone company problems such as calls to the Company's repair office or problems on the line which prevent completing the call, and to sent paid calls from Public, Semi-public and Customer-Provided Public Telephone Service telephones.
- d. This service will be provided where technically feasible.

3. Rates and Charges

The following rates and charges apply for the Operator Completion of a Local Calls.

	<u>Per Call</u>
When the call originates on a residence service line	\$ 1.50
When the call originates on a nonresidence service line	1.50

F. NATIONAL DIRECTORY ASSISTANCE SERVICE

1. General

National Directory Assistance Service (NDA) provides the name address, telephone number, and area code information of telephone service subscribers located outside of Cincinnati Bell Telephone (CBT) Company's Local Access Transport Area (LATA). The NDA information may include directory assistance information for anywhere in the United States except for listings that are normally provided as part of the CBT's local Directory Assistance Service. International information will be provided where available. The information utilized to provide this service is obtained from a third party.

- a. The NDA information provided may be all or any portion of the directory assistance information listed above. NDA service information will only be provided to customers located within the CBT's local service area.
- b. NDA information may be obtained by giving a name to get a telephone number, zip code and/or directory address. NDA information may also be obtained by giving a telephone number ("reverse search") to get a name, zip code and/or directory address.
- c. NDA Service charges apply instead of local Directory Assistance Business Category Search Service charges when the information provided to customers is based on category or type of business requested rather than the name or telephone number. This provision only applies when the business type or category search information is provided for a location outside of CBT's local Directory Assistance Service area.
- d. NDA Service calls may be answered by and information may be given by an Audio Response Unit (ARU) or by an operator.

2. Regulations

- a. Calls from customers who request directory listing information for a location outside of CBT's LATA (except directory information provided via CBT's existing Local Directory Assistance Service) will automatically be designated as an NDA Service call.
- b. The rates listed in Paragraph 3 below will apply for all calls classified as NDA Service.
- c. A maximum of two requests or searches will be provided for each NDA Service charge. One of the two requests or searches may be one of the other Directory Assistance Services in this section of the tariff (Local Directory Assistance Service, Directory Assistance Business Category Search Service, or Reverse Search Directory Assistance Service). The higher charge of the two types of requests will be applicable.

G. DIRECTORY ASSISTANCE BUSINESS CATEGORY SEARCH SERVICE

1. General

Directory Assistance Business Category Search Service is a separate local directory assistance service that provides information to customers based on the category or type of business requested rather than the name of the business. The service provides information to the calling party based on a search of the data base for product and/or service listings, e.g. flowers, hardware, etc. Where technically possible and economically feasible the service will also include searching for geographic locations such as a "hardware store on the east side".

- a. Directory Assistance Business Category Search Service will only be available to customers located within CBT's local service area.
- b. Business Category Search type information provided for locations outside of CBT's local Directory Assistance Area will be provided as National Directory Assistance Service (NDA) as described in Section 27, Paragraph F. above.
- c. Only nonresidence service listings will be included in the database.
- d. Directory Assistance Business Category Search Service calls may be answered by and information may be given by an Audio Response Unit (ARU) or by an operator.
- e. Directory Assistance Call Completion Service is included as part of Directory Assistance Business Category Search Service at no additional charge. Directory Assistance Call Completion Service provides Local Directory Assistance customers the option of having their calls to the requested directory number completed automatically by the Operator Services Switch (OSS). Toll, message, or local usage charges as a result of Directory Assistance Call Completion Service will be applicable. Section 27, Paragraph D provides additional information regarding Directory Assistance Call Completion Service.

J. REVERSE SEARCH DIRECTORY ASSISTANCE SERVICE

1. Description

- a. Reverse Search Directory Assistance Service (RSDAS) is an operator based Directory Assistance Service which allows a requesting party to obtain directory assistance information (name and address) by utilizing the telephone number as the search key.
- b. RSDAS information may be accessed by dialing 411.

2. Terms and Conditions

- a. There are no call allowances or exemptions for RSDAS.
- b. If a customer calls Directory Assistance for the purpose of obtaining information via RSDAS and also asks for other Directory Assistance Service information, such customer shall be charged the rates in Paragraph 3. below. In addition, the appropriate charge for the other Directory Assistance Service provided shall be applied.
- c. A maximum of two searches will be provided for each RSDAS. One of the two requests or searches may be one of the other Directory Assistance Services in this section of the Tariff (Local Directory Assistance Service, National Directory Assistance Service, or Directory Assistance Business Category Search Service). The higher charge of the two types of requests will be applicable. (C)
- d. The Telephone Company shall not be liable to the RSDAS customer for any errors or omissions, whether arising through negligence or otherwise, in the information furnished, and the RSDAS customer shall save The Telephone Company harmless against all claims (including costs and legal fees) that may arise from the use of such information.
- e. All Telephone Company customers, upon request, will be given an option at no charge to exclude any listing information that they do not want included in their listing. Domestic shelters have been directly contacted and will be excluded upon request.
- f. RSDAS Service does not provide telephone numbers, name, or address of its non-published listings. However, the name, telephone number and address information will be provided in those situations where a customer's listing is not in the directory and the customer has not requested non-published service.
- g. RSDAS calls will not be accepted from the following groups:

TOLL RESTRICTION

A. GENERAL

Toll restriction is a central office service arrangement in which calls dialed to other than the local toll free service area over residence and nonresidence lines or trunk lines, receive a recorded restriction announcement or are automatically routed to the PBX customer's attendant position.

B. REGULATIONS

1. Toll restriction is offered only from central offices where the Telephone Company has arranged the facilities for this service, and is furnished subject to the availability of facilities.
2. Toll restriction does not allow 1+, 0+, 0-, 900, or 700 calls.
3. Subscribing to toll restriction does not relieve customers of responsibility for calls charged to their telephone number(s).
4. Toll restriction does not provide restriction of nonchargeable calls to numbers such as repair service, public emergency service (911), or 1+800 calling.
5. Toll restricted lines do not have dial access to Telephone Company operators.
6. Toll restriction is not provided on public, semi-public, COCOT or coinless service.
7. The Company will not be liable to the customer or any other person or entity for damages of any nature or kind arising out of, resulting from, or in connection with the provision of the service, including without limitation, the inability to access the operator or any non-toll-free number for any purpose. For additional liability information see Section 2, paragraph B.1.

VARIABLE TERM PAYMENT PLAN

A. GENERAL

1. The Variable Term Payment Plan (VTPP) is a payment plan which allows customers to pay a fixed rate for services over one of any currently available payment periods. A different monthly rate applies for the duration of each period. The monthly rate varies inversely with the length of the payment period, e.g., the monthly rate for a short period is greater than that for a long period.
2. The minimum period is 12 months, unless otherwise specified in product tariffs.
3. During the effective term of a customer's initial payment period, the monthly rate is not subject to Company-initiated changes.
4. Unless specifically exempted, services furnished under the Variable Term Payment Plan are subject to all general regulations applicable to the provision of service by the Company as stated elsewhere in this and other tariffs.

B. TERMS AND CONDITIONS

1. Definitions

a. Downgrade

Changes for an installed service generally resulting in a decrease in capacity, capability and/or a lower monthly charge.

b. Initial Payment Period

The original term (12, 24, 36 or 60-month) that is selected by a customer when subscribing to a business service and which appears on the customers contract.

c. Payment Period

A period of time selected by the customer from among those currently offered by the Company, over which the customer agrees to pay a specified rate for a product and/or service.

d. Subsequent 12-Month Payment Period

The 12-month automatic renewal payment periods that takes place after the customer's initial payment period expires.

e. Upgrade

Changes for installed services generally resulting in a higher monthly charge.

(T)

B. TERMS AND CONDITIONS (Continued)

(T)

(D)(M)

(D)(M)

2. Regulations

(T)

a. Application of Rates and Charges (unless stated otherwise in the product tariffs)

1. The monthly rate applicable at the time a customer subscribes to a product or service under the Variable Term Payment Plan is not subject to Company-initiated change during the initial payment period, providing there are no customer-initiated delays in the establishment of the subscribed-for product or service.

(C)

(C)

2. Monthly rate after the expiration of the initial and subsequent payment periods:

(C)

- a. For services installed prior to February 1, 2005, the monthly rate will revert to the tariffed month-to-month rates found in the specific product tariffs and will be subject to Company-initiated changes.
- b. For services installed on or after February 1, 2005, the monthly rate will not change but will be the same rate that the customer paid under their initial term agreement and may be subject to Company-initiated changes with a 60-day written notice to the customer during which time the customer shall have the right to terminate the agreement, without incurring termination charges. The rate adjustment would not exceed the tariffed rate.

(C)

3. Nonrecurring charges are to be paid in full at the time of installation.

VARIABLE TERM PAYMENT PLAN

B. TERMS AND CONDITIONS (Continued)

2. Regulations (Continued)

a. Application of Rates and Charges (Continued)

4. In the event that all or any part of the service is disconnected at customer request before expiration of any selected payment period of greater than one month's duration, the customer will be required to pay termination charges as stated in the product tariffs.
5. Rates and charges apply according to the appropriate schedules for products and services offered under the Variable Term Payment Plan, filed in this and other tariffs.

b. Renewal Options

The customer has the following renewal options:

1. Prior to completion of the present VTPP payment period and upon notification to the Company, a customer may renew for any payment period currently available under VTPP. The rates will be those currently in effect for new customers at the time of renewal. The new payment period starts the day following completion of the prior payment period.
2. If upon completion of the current payment period the customer has not chosen a new payment period and has not requested discontinuance of service:
 - a. For services installed prior to February 1 2005 service may be continued on a month-to-month basis at the current rate for the one-month payment period, unless otherwise specified in product tariffs. The customer has no additional service commitment and consequently, when service is terminated, will not be subject to any termination charge. The one-month service will be subject to Company-initiated rate adjustments when approved by the appropriate regulatory authority.
 - b. For services installed on or after February 1, 2005, the customer's agreement will automatically renew for a 12-month period at the rate the customer is paying under their current agreement unless either party notifies the other in writing or verbally of its intention not to renew, at least 30 days before the end of the then-current term.

VARIABLE TERM PAYMENT PLAN

B. TERMS AND CONDITIONS (Continued)

2. Regulations (Continued)

c. Early Contract Termination

Unless otherwise noted in individual product tariffs, if the customer terminates their service prior to the expiration date of the term agreement, the customer will be required to pay early termination charges that equate to the monthly charges for the remainder of either the initial payment period or the subsequent 12-month payment period. If nonrecurring charges associated with the installation of the business services were waived, the customer will become liable for payment of the waived charges.

Inclusion of early termination liability by the company in its tariff or a contract does not constitute a determination by the Commission that the termination liability imposed by the company is approved or sanctioned by the Commission. Customers shall be free to pursue whatever legal remedies they may have should a dispute arise.

d. Additions

If the customer wishes to make additions, the customer may also select, from those currently available in the tariff, a different payment period of equal or shorter length than the time remaining in the period selected for the existing service at the current filed rates for the selected period. The additions may then have a different expiration date than the existing service.

(T)

B. TERMS AND CONDITIONS (Continued)

(T)

2. Regulations (Continued)

(T)

e. Upgrades (Continued)

2. A customer who elects to upgrade an installed product may choose one of two options, unless otherwise specified in the product tariffs:

(T)

- a. The existing payment period may be extended by a period of time specified in the product tariff, and the new and the previously installed service will expire on the same date. The rate level applicable for the new service is the one currently in effect for the payment period which the customer had selected prior to the upgrade, while the rates for services previously installed and continuing in service are unaffected. (If the payment period selected by the customer prior to the upgrade has been discontinued in the tariff, the new service will be billed at rates applicable for the next shorter payment period in the current tariff.)

(T)

(T)

(T)

(T)

- b. The new service may be billed over a currently available payment period of equal or shorter length than the time remaining in the existing payment period. Current rates apply for the selected payment period for the new service. Rates for service previously installed and continuing in service are unaffected. The expiration date of the new service is then either the same as or earlier than that of the previously installed system.

(T)

(T)

(T)

When the expiration date of the new service is earlier, the customer must select another payment period for the service according to the terms and conditions stated in the preceding paragraph at the time of expiration.

B. TERMS AND CONDITIONS (Continued)

2. Regulations (Continued)

f. Downgrades

1. Allowable downgrades for installed services are specified in product tariffs. (T)
2. A customer has the option to place any new service on a coterminous payment unless otherwise specified in the product tariff. Rates for the new service are those currently in effect for the original payment period (or, if the period is no longer available, for the next shorter one). The rates for services remaining after the downgrade will not be affected. (T)
3. When a coterminous payment period is not chosen for new service, the customer must select a payment period of equal or shorter length than the time remaining in the current payment period. Current rates apply for the equal or shorter payment period. Service remaining on the customer's premises will continue to be billed at the rates in effect before the downgrade. The new service may then have a different expiration date from the service which remained after downgrading. (T)
(T)
(T)
4. When the expiration dates differ, the customer must select a new payment period for the service (at the time of expiration) added at the time the service was downgraded, according to the terms and conditions in this section. (T)

g. Requests for Changes in Length of Initial Payment Period

(T)

Following the establishment of service for a service furnished under a Variable Term Payment Plan period and before the completion of that period, the existing payment period may be replaced by a currently offered payment period at the current rates, subject to the following conditions:

(T)

- a. No credit will be given for payments made during the formerly selected period. However, nonrecurring charges will not be reapplied.
- b. The new payment period begins with the date requested.
- c. No termination charge applies provided the customer selects a new payment period equal to or longer than the time remaining under the former payment period. Otherwise, a termination charge applies for the former payment period.
- d. The new payment period selected for a component of a service must be equal to or shorter than the time remaining in that service's existing payment period.

OPTIONAL CENTRAL OFFICE SERVICES AND/OR FEATURES

A. GENERAL

1. Optional services and/or features described in this section are offered only to customers whose intercom switching is provided by a central office equipped to furnish these optional services and/or features.
2. Combinations of optional services and/or features selected by customers for use on the same system, station, station set (telephone), or line must be both functionally compatible and complementary.
3. The initial service period and termination of service are as shown in Section 11 of this tariff.
4. Rates and charges listed in this section are in addition to rates and charges applicable to the associated service, equipment, and facilities.
5. Variable Term Payment Plan (VTPP)

Items of service and equipment designated in this section are offered under the VTPP, provided these items are associated with a service whose intercommunications switching equipment is also furnished or will be furnished under the VTPP. The VTPP rates are payable over a period selected by the customer from those available. All conditions and regulations pertaining to the VTPP are included in Section 29 of this tariff and apply to the designated items except as modified by paragraphs 5.a. through 5.i. following.

a. General

- (1) A customer must select the same VTPP period for all items associated with the same service subject to its availability. In instances where customer premises equipment is involved, the VTPP or any other payment plan will be the one provided for the equipment. When the VTPP or any other payment plan is provided through any other section in this tariff; regulations, rates and charges, contract periods, termination liability, and all other aspects relating to the plan will be as specified in that section, except to the extent where a conflict would exist between the regulations applicable to the controlling service and the associated equipment. In that case, the controlling service prevails.

OPTIONAL CENTRAL OFFICE SERVICES AND/OR FEATURES

A. GENERAL (Continued)

5. Variable Term Payment Plan (Continued)

a. General (Continued)

- (2) The initial service period applicable to the designated items furnished under this plan is covered in Section 11 of this tariff.
- (3) Initial charges as covered in this section apply to connections, moves, or changes of service furnished under this VTPP.

b. Definitions

Conversion, license fee, minor equipment modifications, release, and version as defined in Section 29 of this tariff do not apply within the context of this VTPP.

c. Additions, Upgrades, Removals, and Downgrades

In lieu of regulations for additions, upgrades, removals, and downgrades covered in Section 29 of this tariff, the following regulations apply.

(1) Additions and Removals

- (a) A customer will be permitted to add the VTPP-designated items subject to the monthly rates in effect at the time the customer subscribed to the VTPP on the controlling service.
- (b) Removal of the VTPP-designated items is permitted subject to termination charges specified in Section 11 of this tariff.

- (2) Upgrades and downgrades do not fall within the scope of the service and equipment provided.

d. Conversions, Releases, and Versions

The regulations covered in Section 29 of this tariff do not apply.

e. Moves of Equipment

In lieu of the regulations covered in Section 29 of this tariff, moves of services and equipment provided for in this section will be subject to the regulations prevailing on the controlling service.

f. Minor Equipment Modifications, Change of Tariff Jurisdiction, and Two-Tier Transition to Variable Term Payment Plan (VTPP).

The regulations covered in Section 29 of this tariff do not apply.

g. Requests for Changes in Length of Optional Payment Period

The regulations in paragraph A.16. of Section 29 of this tariff apply to VTPP customers, subject to paragraph 5.a.(1) preceding.

h. Renewal Options

In lieu of the regulations in paragraph A.17., Section 29 of this tariff, the following will apply. The VTPP customer may renew the selected payment period at the rates in effect for new customers at the time of renewal, anytime before the end of the current payment period. The new payment period starts the day following completion of the prior payment plan and at the rates in effect for new customers.

i. Supersedure, Suspension of Service, and Concession Service

The regulations covered in Section 29 of this tariff do not apply separately to this VTPP but are applied to the extent indicated by the controlling service.

OPTIONAL CENTRAL OFFICE SERVICES AND/OR FEATURES

B. AUTOMATED ATTENDANT FEATURES

1. Automatic Route Selection-Basic (ARS-B)

a. General

- (1) ARS-B is an optional feature available where facilities permit, which allows station users to automatically select the preferred route subscribed to by a customer for network calls, by dialing a preselected code. Alternate routing to other facilities subscribed to by the customer is also provided. This arrangement is available for use with foreign exchange (FX), wide area telecommunications service (WATS), common control switching arrangement (CCSA) off-net, tie, interexchange carrier (IXC) access lines which are compatible with ARS-B and the message telecommunications system (MTS) network, and MTS network facilities. Tie lines and IXC access lines require senderized operation and uniform numbering compatible with the MTS network.
- (2) ARS-B is accessed by dialing a single code (1, 2, or 3 digits) which automatically selects the appropriate route (FX, WATS, CCSA off-net, tie line, IXC access line, or the MTS Network) to complete the call. If all facilities in the initial route selected are busy, the call will advance to other routes in the selected pattern. Patterns may consist of up to four (4) private routes. If no route is available, the call will route to the MTS Network or overflow tone (customer option). All patterns accessed by a single access code will have the same final route, either the MTS network or overflow tone.
- (3) For calls using FX, WATS, CCSA off-net, or IXC access line facilities, the routing may be based on a Number Plan Area (NPA) and limited to specified central office codes within the NPA as designated by the customer. This is referred to as Foreign Area Discrete Translation.

OPTIONAL CENTRAL OFFICE SERVICES AND/OR FEATURES

B. AUTOMATED ATTENDANT FEATURES (Continued)

1. Automatic Route Selection-Basic (ARS-B) (Continued)

b. Definitions

Certain terms as used in this section are defined as follows:

Facility

A facility denotes a specific FX, CCSA, WATS, tie line, or IXC access line circuit.

Foreign Area Discrete Translation

Foreign Area Discrete Translation is the screening of a specific group of digits, by the switching equipment, to determine proper call routing.

For example: In the configuration of Automatic Route Selection patterns, the NPA code only is screened to determine the preferred route. This is referred to as 3 digit translation.

Further, where the calls are limited to specific central office designations within the Number Plan Area, the NPA code and the central office code (the first 6 digits) must be screened. This is referred to as 6 digit translation.

OPTIONAL CENTRAL OFFICE SERVICES AND/OR FEATURES

B. AUTOMATED ATTENDANT FEATURES (Continued)

1. Automatic Route Selection-Basic (ARS-B) (Continued)

b. Definitions (Continued)

Pattern

A group of routes arranged to be selected in a sequence specified by the customer. For example:

Access Code 9

<u>Pattern #1</u>	<u>Pattern #2</u>	<u>Pattern #3</u>
FX	WATS Band 1	FX
WATS Band 1	WATS Band 2	WATS Band 2
CCSA	CCSA	WATS Band 4
MTS Network	MTS Network	WATS Band 5
		MTS Network

Access Code 182

<u>Pattern #1</u>	<u>Pattern #2</u>	<u>Pattern #3</u>
FX	WATS Band 1	IXC
IXC	IXC	WATS Band 1
WATS Band 3	WATS Band 3	WATS Band 3
Overflow Tone	FX	WATS Band 5
	Overflow Tone	Overflow Tone

Route

A route is a group of one or more facilities of the same type used to complete 7 or 10 digit calls between the same points. (e.g., 1FX to Chicago, or 3 WATS Band 1 lines, or 2 WATS Band 5 lines, or 1 CCSA, etc. A WATS Band 1 and a WATS Band 5 are considered to be two routes. Exception: Where a customer has "WATS Route Advance", the route capacity of a pattern is only reduced by one route.)

B. AUTOMATED ATTENDANT FEATURES (Continued)

1. Automatic Route Selection-Basic (ARS-B) (Continued)

b. Definitions (Continued)

Route Selection

The automatic selection of the preferred route as predetermined by the customer, when an access code is dialed by the station user.

c. Regulations

- (1) ARS-B is offered only to customers served from central offices equipped to furnish this feature, where facilities permit.
- (2) Preferred routes and alternate routing patterns will be specified by the customer.
- (3) All rates and charges specified for ARS-B are in addition to the rates and charges for the associated facilities.
- (4) The number of patterns required by a customer is governed by the type and variety of facilities to which the customer subscribes.
- (5) A single rate per facility will apply regardless of the number of patterns having access to that facility. The monthly rate specified is applicable to each facility available to the patterns.
- (6) Patterns without final route to the MTS network may be offered only if a customer subscribes to a sufficient number of facilities which, in the judgment of the Telephone Company, provide an adequate level of service so as to avoid interfering with the service of others or to prevent others from making or receiving calls over their telecommunications service.

B. AUTOMATED ATTENDANT FEATURES (Continued)

1. Automatic Route Selection-Basic (ARS-B) (Continued)

c. Regulations (Continued)

- (7) Where a route is used in one pattern, only one translation may be provided per pattern. Where a route is used in two or more patterns, one translation per pattern may be provided subject to the appropriate charges as specified in paragraph B.1.d.(2) following. Where central office code translation is required for more than one number plan area per single facility group or route, rates and charges specified in paragraph B.1.d.(2) following apply for each number plan area translated.
- (8) A group of patterns may have either the MTS network or overflow tone as a final route. A combination of both within the same pattern group, that is, a group of patterns accessed by one code, is not permitted. Dial "9" may be used as an access code only if the patterns accessed have the MTS network as a final route.
- (9) Where toll-restricted service lines have access to ARS-B patterns with final route to the MTS network, apply the rate and charge as specified for patterns with overflow to tone in lieu of the rate and charge specified for final route to the MTS Network.
- (10) The customer is responsible for notifying the Company whenever any of the items specified in paragraph B.1.d.(3) following are required.

2. Station Message Detail Recording (SMDR)

a. General

- (1) SMDR is an arrangement to provide a record, by service line number, of originating traffic routing over dial type tie lines, FX, WATS, CCSA, IXC access lines, and/or the MTS network (toll) for customers served from a central office where facilities have been made available.

The station message detail will include the calling service line number, the called number, date, time of day, duration of call, and the type of facility used (Note). The record will be provided on magnetic tape or floppy diskette to customers requiring message detail for cost allocation and telecommunications system management purposes. The detail will be provided on all facilities in routes selected by the customer for SMDR.

(C)
(C)

Note: "Type of facility used" is only provided on magnetic tape. It is not provided on floppy diskette.

OPTIONAL CENTRAL OFFICE SERVICES AND/OR FEATURES

B. AUTOMATED ATTENDANT FEATURES (Continued)

2. Station Message Detail Recording (SMDR) (Continued)

b. Regulations

(1) SMDR may be offered to service lines of customers whose intercom switching is provided by a central office where facilities permit and where the Telephone Company's message billing process has been arranged to provide this optional feature.

(2) SMDR is not represented to be a provision of billing detail. Where tie line, IXC access line, or FX facilities are involved, all such call attempts, whether completed or not, will appear in the SMDR.

(3) Station message detail will be provided on magnetic tape or floppy diskette. The tape density and number of tracks will be those used by the program and data processing system in use by the Telephone Company.

(C)

The floppy diskette is only available to accounts with fewer than 45,000 call records per billing period. The diskette will be designed for use with an IBM compatible PC with a 3 1/2 or 1/4 inch, high density disk drive. The call data may be compressed. If compression is used, the customer will be provided with the software necessary to expand the compressed data.

(N)

(4) Station message details may be provided on all facilities subscribed to by the customer, including the MTS network (toll), but will not include intercom calls originated by station users. The customer may designate the group or groups of facilities on which SMDR is to be provided.

(N)

(5) SMDR is limited to an entry code, the called service line number or called tie line access code, time of day, date, and duration of call. Calls to service lines or tie lines found busy are ordinarily not recorded.

3. Outgoing Trunk Queuing (OTQ)-WATS Phase 1

a. General

- (1) OTQ-WATS is an optional feature, available where facilities permit, which allows service line users to have their calls held in a queue (stored) by dialing a pre-selected code, if all the associated WATS facilities are in use for prior calls. The call is completed without further dialing when a facility becomes available; or on reaching the time limit in queue, is advanced to the pre-selected option. The calling service line must remain in an off-hook condition to retain the call in queue. When compatible, tie lines (trunks) may be given access to queuing.

- (2) Options available with OTQ-WATS Phase 1 are:

Customer-specified time limit in queue

Overflow calls routed to the message telecommunications system-toll (MTS-toll) or to overflow tone

Routing calls to the optional feature of Automatic Route Selection-Basic (ARS-B) before routing to OTQ-WATS

Recorded announcements, music (customer-supplied), or silence to calls held in queue

Priority queuing on an individual service line basis

Attendant control of calls where two or more separate queues are provided (inflow/outflow)

3. Outgoing Trunk Queuing (OTQ)-WATS Phase 1 (Continued)

b. Regulations

- (1) The OTQ-WATS Phase 1 feature is available only from central offices which have been equipped to provide this feature.
- (2) Calls in queue may overflow to the MTS-toll or to tone at the customer's option.
- (3) The Inhibit Inflow/Outflow optional features require one separate control channel per queue between the central office and the control key at the customer premises.
- (4) The text and announcement provided with the Recorded Announcement optional feature will be provided by the Telephone Company.
- (5) The Music on Queue optional feature requires a program grade audio channel between the central office and the customer-provided music source at the customer's premises.
- (6) Priority queuing is available with initial installation of OTQ-WATS Phase 1 at no additional charge.
- (7) The customer may specify the length of time a call is held in queue (threshold time limit) before overflowing to the MTS network or to the overflow tone.

OPTIONAL CENTRAL OFFICE SERVICES AND/OR FEATURES

C. KEY EQUIVALENT FEATURES

1. General

Key Equivalent Features are optional features which can effectively perform functions traditionally provided by key equipment when used in certain combinations. However, most of these features can be provided independently of each other. Examples of such features include Call Hold and Call Pickup.

2. Regulations

a. Explanation of Terms

(1) Automatic Callback

A service line user who attempts an intercommunicating call to a busy service line will be automatically connected to that line when both the called and calling lines are later idle.

(2) Call Forwarding - Busy Line

When certain types of non-intercom calls are originated to a busy service line, the calls are routed to the attendant or a designated service line within the same system.

(3) Call Forwarding - Busy Line, Intragroup

When certain types of non-intercom and intercom calls are originated to a busy service line, the calls are routed to the attendant or a designated service line within the same system.

OPTIONAL CENTRAL OFFICE SERVICES AND/OR FEATURES

C. KEY EQUIVALENT FEATURES (Continued)

2. Regulations (Continued)

a. Explanation of Terms (Continued)

(4) Call Forwarding - Don't Answer

When certain types of non-intercom calls which have been originated to a service line are not answered within a prescribed time interval which is dependent upon the arrangement of the serving central office equipment, the calls are forwarded to the attendant or a designated service line within the same system.

(5) Call Forwarding - Don't Answer, Intragroup

When certain types of non-intercom and intercom calls which have been originated to a service line are not answered within a prescribed time interval which is dependent upon the arrangement of the serving central office equipment, the calls are forwarded to the attendant or a designated service line within the same system.

(6) Call Forwarding Over Private Facilities

A service line user may establish automatic routing of incoming calls designated for that line to a specific private facility when the private facility is terminated in the user's system. As used in this section, the term "private facility" applies to CCSA, EPSCS, ETS, WATS, FX, and tie lines arranged for senderized operation, and the local and toll message network.

(7) Call Forwarding - Variable

A station or station set (telephone) user or the attendant may establish automatic routing of certain incoming calls destined for that service line to another service line selected by the user, or to the attendant in the same system.

Issued: March 23, 1992

a. Explanation of Terms (Continued)

(8) Call Forwarding - Variable, Outside

A station or station set (telephone) user or the attendant may establish the automatic routing of certain incoming calls destined for that service line to another service line selected by the user or to the attendant in the same system; or the user may establish the automatic routing to a number outside the system.

(9) Call Hold

A station or station set (telephone) user may usually place any established call involving his or her service line on hold by operating the switchhook and dialing a preset code.

(10) Caller ID

Displays the telephone number of the caller after the first ring.

(N)
|
(N)

(11) Call Pickup

A station or station set (telephone) user may answer calls directed to another service line within the same call pickup group by dialing a preset code.

C. KEY EQUIVALENT FEATURES (Continued)

2. Regulations (Continued)

a. Explanation of Terms (Continued)

(12) Call Transfer - Unlimited

A station or station set (telephone) user can transfer any established call (incoming, outgoing or intrasystem) to another service line within the same system without assistance from the attendant. This is accomplished by hanging up after utilizing consultation hold and/or add-on, which are integral parts of Call Transfer.

(13) Call Transfer - Outside

A station or station set (telephone) user can transfer any established call (incoming, outgoing or intrasystem) to another service line within the same system without assistance from the attendant. This is accomplished by hanging up after utilizing consultation hold and/or add-on, which are integral parts of Call Transfer. A station or station set (telephone) user may also employ add-on and/or consultation hold for any established external call, but cannot transfer the call to another external call.

(14) Call Waiting - Originating

When a called service line in the same system is busy, the calling service line will cause an audible tone to be transmitted, indicating a call is waiting.

(15) Call Waiting - Terminating

When a service line is busy, the user will receive an audible tone to indicate that a non-intercom call is waiting.

(16) Call Waiting - Terminating, Intragroup

When a service line is busy, the user will receive an audible tone to indicate that either a non-intercom or an intercom call is waiting.

2. Regulations (Continued)

a. Explanation of Terms (Continued)

(17) Calling Name and Number

On incoming calls, provides for the delivery of the listed name and telephone number associated with the calling party. Information may be displayed on a customer-provided display device attached to the subscriber's line or telephone set. Based on the current technology of the network, the name and telephone number of the calling party may be truncated. This service is not available for electronic or ISDN lines.

(18) Dial Call Waiting

When a called service line in the same system is busy, the calling service line user can cause an audible tone to be transmitted to indicate a call is waiting , by dialing a preset code.

(19) Directed Call Pickup

Any station or station set (telephone) user can intercept a call which has been answered or is ringing at another service line, provided the called service line is equipped, by dialing a preset code.

(20) Directed Call Pickup - Non-Barge-In

Any station or station set (telephone) user may, by selecting a line equipped with this feature and by dialing a preset code, intercept a call which is ringing at another service line, provided the called service line is included in a Call Pick-up Group.

(21) Distinctive Ringing and Call Waiting Tone

This feature allows a service line user to determine the type of incoming call before answering it by associating a distinctive ringing pattern or distinctive call waiting tone pattern with the particular call type.

(22) Reminder Ring

This feature provides a distinctive ringing signal on a service line at the time a call is forwarded, whenever the service line is equipped with Call Forwarding--Variable or Call Forwarding Over Private Facilities and the call forwarding feature is activated.

OPTIONAL CENTRAL OFFICE SERVICES AND/OR FEATURES

C. KEY EQUIVALENT FEATURES (Continued)

2. Regulations (Continued)

- b. These features are furnished subject to the availability of facilities and capacity.
- c. The Call Hold and/or Call Pickup feature is common to each service line in a multiline hunt group. Consequently, rates and charges specified for these features apply to each service line in the same multiline hunt group.
- d. Call Waiting - Terminating and Call Forwarding - Busy Line are mutually exclusive on the same line.
- e. Lines arranged for both Call Forwarding - Busy Line and Call Forwarding - Don't Answer must forward to the same designated line. At the time a service line is initially equipped for Call Forwarding - Don't Answer, it will be arranged for a predetermined number of ringing cycles to be completed before the incoming call is forwarded.
- f. Calls forwarded to lines outside the system can be subject to local and toll message charges. These calls are also subject to transmission limitations.
- g. The Call Hold feature can be provided only on service lines equipped with the Call Transfer feature.
- h. Equipping any service line with Call Transfer--Unlimited or Outside will require all service lines within the same system or group also to be equipped. Call Transfer--Unlimited or Outside cannot be provided on a service line unless the line is also equipped with Call Transfer - Individual.

C. KEY EQUIVALENT FEATURES (Continued)

2. Regulations (Continued)

- i. Equipping any service line with Call Waiting--Terminating, Intragroup will require all service lines within the same system or group that are equipped with Call Waiting--Terminating also to be equipped with Call Waiting--Terminating, Intragroup.
- j. When Call Forwarding - Variable, Outside is provided on any service line within the same system or group, all service lines within the same system or group equipped with Call Forwarding--Variable must be equipped for Call Forwarding - Variable, Outside.
- k. Automatic Callback is only operational for intercommunication calls between service lines served by the same customer group. Only one Automatic Callback request is permitted the calling and called service lines at one time. Once requested, it will remain active for a period not to exceed 30 minutes unless deactivated by the calling service line.
- l. The Call Forwarding Over Private Facilities routing of calls to FX and CCSA network access lines requires special central office modification. Initially, this optional service feature will not be available for the routing of calls via any facility, Automatic Route Selection pattern, or switching service network involving FX. When the central office equipment is subsequently modified, the routing will be made available to the customer at no additional charge.

The Call Forwarding Over Private Facilities routing of calls to Enhanced Private Switched Communications Service (EPSCS) and Electronic Tandem Switching (ETS) requires special central office modifications separate from the modification specified above.

C. KEY EQUIVALENT FEATURES (Continued)

2. Regulations (Continued)

1. Call Forwarding over Private Facilities (Continued)

Initially, this optional service feature will not be available for the routing of calls via EPSCS and ETS. When the central office equipment is subsequently modified, the routing will be made available to the customer at no additional charge.

Incoming local and toll message network and inward WATS calls to service lines arranged for Call Forwarding Over Private Facilities routing are subject to the appropriate charges for such calls and a common recorded announcement is furnished to inform the caller that the call is being forwarded.

Calls forwarded to the local and toll message network and WATS are subject to the appropriate charges for such calls.

When the Attendant Control of Facilities optional service arrangement has been activated, so that calls routed to a specific private facility by the Call Forwarding Over Private Facilities feature are denied, access, those calls will be routed instead to a common recorded announcement which refers the caller to the system's attendant.

- m. When Reminder Ring is requested to be added to a service line and the line is or will be equipped with Call Forwarding--Variable or Call Forwarding Over Private Facilities, the initial charge as specified in "Rates and Charges" following applies per service line affected.

OPTIONAL CENTRAL OFFICE SERVICES AND/OR FEATURES

C. KEY EQUIVALENT FEATURES (Continued)

2. Regulations (Continued)

- n. Distinctive Ringing and Call Waiting Tone are furnished in different classes which permit service line users to identify the source of calls. These three classes identify:

<u>Class</u>	<u>Call Source</u>
A	Intercommunication
B	Direct inward dialed local and toll Attendant completed CCSA access line Tie line
C	Preemptible SCAN access line Dial Call Waiting Call Waiting—Originating 51A Console night service arrangement

Distinctive ringing is furnished to indicate the source of calls to idle service lines. Distinctive tone is furnished to indicate the source of calls to busy service lines equipped for Call Waiting optional service features.

A distinctive ring/tone is furnished to each class and is used to identify all call sources within each class.

Class A ring/tone is not furnished separately and is included at no additional charge to service lines arranged for Class B ringing/tone. Class C ringing/tone may be furnished separately or in association with Class B ringing/tone.

2. Regulations (Continued)

n. Distinctive Ringing and Call Waiting Tone (Continued)

Class C tone associated with Call Waiting--Originating or Dial Call Waiting will only be provided where all service lines in the same customer group are commonly arranged for Class C tone.

Where a customer's system is equipped with a 51A Console and is arranged for Class B ringing/tone, Class C ringing will be provided at no additional charge to identify night service arrangement extended calls to service lines.

- o. Caller ID is available for customers with Centrex 90, Centrex 90 PLUS, Centrex 2000, and ESSX Service. This feature will only be available from appropriately equipped Central Offices. This feature will not be included in any current Custom Calling discounts.

- p. Calling Name and Number will deliver the calling party's name and number information, except when the calling party name and/or number is not accessible to the network because of where the call originates or when the calling party invokes a per call or per line blocking feature which prevents the name and/or telephone number from being passed.

The subscriber to Calling Name and Number service will be responsible for the provision of the display device which shows the calling party's name and telephone. The installation, repair and technical capability of the device in functioning with Calling Name and Number service will be the responsibility of the subscriber. The telephone Company assumes no liability and will be held harmless for any incompatibility of this equipment to perform satisfactory with network features associated with this service.

Calling Name and Number service is offered in appropriately equipped central offices and is available with individual nonresidence and residence lines. It is available for customers with Centrex Types I and II, Centrex 90, Centrex 2000 and ESSX Services.

D. SPEED CALLING

1. Regulations

a. Explanation of Terms

(1) Speed Calling 6

A service line user can place calls to a repertory of six telephone numbers by dialing a unique code. Telephone numbers, including routing codes, are limited to a maximum of sixteen digits. Number changes in the list can be made where equipment permits, by the customer's dialing a preset code.

(2) Speed Calling 30

A service line user can place calls to a repertory of thirty telephone numbers by dialing a unique code. Telephone numbers, including routing codes, are limited to a maximum of sixteen digits. Number changes in the list can be made where equipment permits, by the customer's dialing a preset code.

- b. These features are furnished subject to the availability of facilities and capacity.
- c. The Speed Calling feature is common to each service line in a multiline hunt group. Consequently, rates and charges apply to all service lines in the same multiline hunt group.
- d. The option of Speed Calling--6 or 30 is not available to an individual service line when that line is in a multiline hunt group. All lines in the same multiline hunt group must use the same Speed Calling--6 list or Speed Calling--30 list.
- e. The maximum number of lists available for Speed Calling--30 is 100 per customer group.

E. CUSTOMER TRAFFIC RECORDING FEATURE

1. Regulations

a. Explanation of Terms

- (1) The customer traffic recording feature (CTRF) provides traffic measurements related to the customer's attendant positions, trunk groups, or simulated facility groups, and other miscellaneous measurements via a private line channel between the customer's premises and the serving central office.
 - (2) Non-usage trunk scan (NUTS) is an option for use with CTRF which automatically provides a list of individual customer trunks except those using simulated facility groups, which have not been found busy during the preceding two hours.
 - (3) Locked-up trunk scan (LUTS) is an option for use with CTRF, which automatically provides a list of individual customer trunks except those using simulated facility groups, which have been found busy during the entire preceding two hours.
- b. CTRF can be provided only on services and facilities which are arranged to provide the capability.
- c. The groups of facilities to be measured, the column and row labels, if required, and the printout time schedule can be specified by the customer. The time schedule (traffic timetable map) includes both the days of the week and the hours during the day that the printout is to occur. Printouts may be scheduled on the 1/4-hour, 1/2-hour, 3/4 hour, or on-the-hour, with a maximum of two printouts per clock hour.
- d. CTRF traffic data is collected on groups of trunks or simulated facility groups. The available data may include incoming peg count, outgoing peg count, overflow peg count, traffic usage, and maintenance usage. Other miscellaneous measurements may be provided for other groups of circuits where facilities permit.

E. CUSTOMER TRAFFIC RECORDING FEATURE (Continued)

1. Regulations (Continued)

- e. NUTS and LUTS are furnished only as an option of CTRF. The NUTS and LUTS report, occurring every two hours, is normally printed on a customer-premises teletypewriter or computer terminal.
- f. Forty-nine lines or less of data (traffic counts) with five or less measurements per line can be provided per CTRF group. Up to 254 customer-designated labels can be provided per CTRF group, with each label being three characters long. A blank space is equivalent to one character.
- g. The private line channel, Series 1000, type 1006, and station arrangement may be interfaced with a customer computer system instead of the teletypewriter originally utilized for output. Computer software development will be the responsibility of the customer.

F. BUSY VERIFICATION OF TRUNKS

1. Regulations

a. Explanation of Terms

- (1) Busy verification of trunks (BVT) is a feature which allows a 51A Customer Premises System (data link type console or consoles) attendant to establish a connection to a busy trunk to determine if it is in working order.
- (2) Attendant call-through test (ACTT) is a feature inherent to BVT which permits an attendant to verify the operation of a trunk by making a test call.

b. BVT can be provided only to customers whose attendant position equipment is a 51A Customer Premises System.

c. BVT can access trunk groups of the tie line, tandem tie line, foreign exchange, or equivalent tie line type. Trunk groups associated with simulated facilities cannot be equipped with BVT.

d. All trunks within a trunk group must be equipped with BVT when this option is provided.

G. UNIFORM CALL DISTRIBUTION

1. General

Uniform Call Distribution is a hunting arrangement available to lines arranged in a multiline hunt group. Incoming calls to the line (main hunt) number of the group will hunt throughout the lines in a fixed sequence, except that once a call has been completed to a line, a pointer within the switching equipment will advance to the next idle line. The next incoming call will go directly to that line if it is still available. If it is not, the call will either be directed to the next idle line in the hunting sequence or, if all lines in the hunting group are busy, it will receive a busy tone.

2. Regulations

a. Explanation of Terms

(1) Calls Waiting Indication

A feature in the switching equipment which provides control for lamp indicators located on a customer's premises to indicate that calls have been waiting in queue longer than a specified time limit. Up to three separate lamp indicators may be provided to indicate different lengths of delay.

(2) Delay Announcement

A feature in the switching equipment which provides for a recorded message to be given to calls waiting in queue longer than a customer specified time interval (6-42 seconds in six second increments).

G. UNIFORM CALL DISTRIBUTION (Continued)

2. Regulations (Continued)

a. Explanation of Terms (Continued)

(3) Make Busy (Group and/or Line)

A feature in the switching equipment through which all lines in the UCD group or individual lines within the UCD group can be artificially made busy by manually operating a key or keys located on a customer's premises.

(4) Queuing (UCD/Q)

Reserves space within the switching equipment for incoming calls to the UCD main line hunt number to be held in their order of arrival if all lines within the UCD group are busy, and there is sufficient reserved space for the calls.

(5) Uniform Call Distribution (UCD)

Provides even distribution of incoming message network and/or intercommunicating calls to the group of lines designated as part of the UCD group.

- b. This feature and options are furnished subject to the availability of facilities, capacity, and compatibility.
- c. Individual lines in the UCD group may have line numbers assigned so that calls may be directed to them. Calls directed to these lines, except the main line hunt group number, will not have access to any of the UCD group features.

OPTIONAL CENTRAL OFFICE SERVICES AND/OR FEATURES

G. UNIFORM CALL DISTRIBUTION (Continued)

2. Regulations (Continued)

- d. All call forwarding features as specified in this tariff cannot be provided on lines in a UCD group with the queuing option. However, Call Forwarding--Busy Line can be provided in conjunction with Group Make Busy. This provision will negate the queuing option and can be provided only with the lead line number of the group (group option).
- e. Call Pickup and Call Hold may be provided to lines in the UCD group on a group basis only. When provided, each line in the group will be subject to the rates and charges for the feature(s). However, Call Pickup is not compatible with the queuing option.
- f. The call waiting audible indication is not available to lines in a UCD group.
- g. Speed Calling 6 and Speed Calling 30 may be provided to lines in a UCD group on a group basis only. Each line in a UCD group will be equipped for speed calling; consequently, each line will be subject to the rates and charges specified in this section for the speed calling feature. However, Speed Calling 6 and Speed Calling 30 cannot both be provided to the same service line in a UCD group.
- h. Optionally, a customer may subscribe to Group Make Busy, Line Make Busy, and UCD queuing. Instead of Line Make Busy, Directed Call Pickup as specified in this section may be provided to the UCD group in order for calls directed to unoccupied lines to be answered from another location. When queuing is added to a UCD group, delay announcement and calls waiting lamp indication can also be provided.
- i. Any other optional service and/or features which are compatible with UCD and UCD/Q may be provided, subject to rates and charges specified in this section or elsewhere in this tariff.

H. SELECTED CUSTOMER CONTROL OF FACILITIES

1. General

Selected Customer Control of Facilities is an optional service arrangement which permits the customer to restrict the access of all service lines to specific facility groups which are a part of a predetermined routing pattern, by operating a key.

2. Regulations

- a. When this optional service arrangement is activated for a facility group, calls directed to that group will automatically proceed to the next idle route designated in the routing pattern.
- b. Access to a facility group is restricted whether the call attempt is via a predetermined routing or normal access method, including calls placed by the attendant, when Selected Customer Control of Facilities is activated.

3. Rates and Charges

	Service Establishment Charge	Initial Charge	Monthly Rate	Monthly Rate, Variable Term Option, 24 Months	UISOC
a. Common equipment, per system	\$ 250.00	\$ 78.00	\$ 19.20	\$ 19.20	SFY
b. Per facility group to which access is denied *	---	24.40	5.60	5.60	SFF

- * In addition, rates and charges as specified in the Private Line Tariff for a Series 900, type 901 channel between the serving central office and the customer's premises. (Grandfathered, see Note A at Page 77)

OPTIONAL CENTRAL OFFICE SERVICES AND/OR FEATURES

I. ELECTRONIC TANDEM SWITCHING FEATURES

1. General

Electronic Tandem Switching (ETS) Features are provided only in association with Centrex/ESSX-1 Service furnished from central office equipment located on Telephone Company premises and may be provided, subject to the availability of facilities, to Centrex/ESSX-1 systems which are served by the same equipment.

2. Explanation of Terms

a. ETS Features

ETS features are Centrex/ESSX-1 optional features which are, except as specified in paragraph I.3.e following, comprised of both Automatic Route Selection-Deluxe (ARS-D) and Facilities Restriction Levels (FRL) and, at the customer's option, the following service features and arrangements:

Time of Day Routing
Authorization Codes
Deluxe Queuing
Station Message Detail Recording to Premises
Account Codes
Facility Administration and Control
Traffic Data to Customer (Pollable)
Facility Assurance Reports
Uniform Numbering/Automatic Alternate Routing
Automatic Overflow to DDD

Section 30
Original Page 53

OPTIONAL CENTRAL OFFICE SERVICES AND/OR FEATURES

I. ELECTRONIC TANDEM SWITCHING FEATURES (Continued)

2. Explanation of Terms (Continued)

b. Automatic Route Selection-Deluxe (ARS-D)

ARS-D provides for the origination of only ten digit off-network calls to a public network telephone number, after the Centrex/ESSX-1 ARS-D access code, (e.g., "8"), automatically scans the digits and selects a first choice completing route when available, or subsequent route if the first choice route is not available. Routes may include FX trunk lines, WATS lines, exchange trunk lines to the toll network or access lines to CCSA or other arrangements where compatible.

The final completing route may be the toll network or, at the customer's option, the call attempt is routed to overflow tone if a Facilities Restriction Level (FRL) is insufficient to complete the call.

When ARS-D is provided in conjunction with Uniform Numbering/Automatic Alternate Routing (UN/AAR), incoming tie lines from other Centrex/ESSX-1 or PBX systems connected directly to the Centrex/ESSX-1 System may be arranged to have automatic access to the ARS-D and UN/AAR features. When these arrangements are provided, the tie lines to the ARS-D become "dedicated" tie lines and separate tie lines are required from the distant Centrex/ESSX-1 or PBX System if access is to be provided to other Centrex/ESSX-1 functions at the ARS-D equipped Centrex/ESSX-1 system. In addition, when ARS-D is provided in conjunction with UN/AAR, routes may include tie lines to a distant Centrex/ESSX-1 or PBX system equipped with an ARS-D-like capability for subsequent access to the toll network.

The ARS-D feature provides all-number translation and supervision necessary to route the call. "More Expensive Route" (MER) Tone is supplied, at the customer's option, as a function of the route selected for a particular call.

Section 30
Original Page 54

OPTIONAL CENTRAL OFFICE SERVICES AND/OR FEATURES

I. ELECTRONIC TANDEM SWITCHING FEATURES (Continued)

2. Explanation of Terms (Continued)

c. Time of Day (TOD) Routing

TOD routing is an ARS-D option which permits preprogrammed selection of alternate routing pattern groups for off-network calls (up to three sets of ARS-D routing pattern groups) on a time-of-day and day-of-week basis. Manual override is available with the Facility Administration and Control feature. The maximum number of programmed changes per week is sixteen.

d. Facilities Restriction Levels (FRL)

FRL is required in connection with ARS-D and is provided on each service line and incoming tie line to determine both the types of calls and types of facilities within the privileges of the associated user. When the FRL is transmitted over a tie line to a distant PBX or Centrex/ESSX-1 system equipped with ARS-D (for call screening at the distant point), it is identified as a Traveling Class Mark (TCM).

e. Authorization Codes

Authorization codes are an FRL option which provides for a service line user to dial a code which overrides the FRL associated with that service line or incoming tie line. The Centrex/ESSX-1 requests dialing of the authorization code when the default FRL (i.e., the FRL associated with the service line or incoming tie line) has insufficient privileges to complete the call. The authorization code is also inspected for validity as a security check. The authorization code is recorded in the SMDR-P record of the call when the SMDR-P feature is provided.

CINCINNATI BELL TELEPHONE COMPANY

Section 30
Original Page 55

OPTIONAL CENTRAL OFFICE SERVICES AND/OR FEATURES

I. ELECTRONIC TANDEM SWITCHING FEATURES (Continued)

2. Explanation of Terms (Continued)

f. Deluxe Queuing

Deluxe Queuing permits service line users to be placed in a queue whenever the first choice route for completing a particular call is already in use. Two queuing arrangements are available;

A Ring-Back Queue (RBQ), in which case the calling station goes on-hook and is called back when a facility becomes available.

An Off-Hook Queue (OHQ), in which case the calling station remains off-hook and is held in queue until a facility becomes available.

Calls held in queue beyond a predetermined time limit will be removed from the queue and be routed, at the option of the customer, via either subsequent route choices or to overflow tone.

g. Station Message Detail Recording to Premises (SMDR-P)

SMDR-P provides a record of calls originating from Centrex/ESSX-1 service lines to locations outside the same Centrex/ESSX-1 System, on magnetic tape equipment located at the customer's premises. Facility groups may also be designated as requiring originating and/or terminating records.

h. Account Codes

Account codes are an SMDR-P option which permits a service line user to dial a series of digits (code) which will appear in the SMDR-P record for that particular call. The account code can be used by the customer for account or project identification. Adding an account code to a call is at the discretion of the service line user, where arrangements have been made to provide this capability. Each customer's account code must contain the same number of digits, not to exceed eight, and must not conflict with on-network code assignments.

Section 30
Original Page 56

OPTIONAL CENTRAL OFFICE SERVICES AND/OR FEATURES

I. ELECTRONIC TANDEM SWITCHING FEATURES (Continued)

2. Explanation of Terms (Continued)

i. Facilities Administration and Control

Facilities Administration and Control permits customer control of parameters which determine user calling privileges; i.e., authorization codes and associated FRL. In addition, FRL associated with service lines, tie lines and authorization codes may be collectively upgraded or downgraded by invoking a predetermined set of FRL's identified as Controlled Alternate FRL's. Manual control (override) of TOD pattern groups and activation or deactivation of queuing is also provided.

j. Traffic Data to Customer (Pollable)

Traffic Data to Customer (Pollable) permits the customer to poll the switching equipment on a daily or hourly basis to obtain certain traffic measurements. Equipment must be provided at the customer's premises to record the traffic data.

k. Facility Assurance Reports (FAR)

Facility Assurance Reports (FAR) provide the customer the ability to obtain automatic circuit assurance data via the same equipment utilized to record traffic data. FAR includes, for example, the identity of facilities not accessed or facilities constantly off-hook during a specified period of time.

l. Uniform Numbering (UN) (Referred to as UN/AAR)

UN permits service line users to place calls via tie lines using a uniform dialing plan. The user dials an access code, followed by a seven digit number which uniquely identifies a specific on-network service line. The number consists of a three digit location code and a four digit service line code. (When the same access code is followed by a ten digit public network number, the call is routed via the ARS-D feature.) The feature provides the number translation and supervision necessary to route the call. (Note: UN is a feature which includes Automatic Alternate Routing.)

m. Automatic Alternate Routing (AAR) (Referred to as UN/AAR)

AAR provides automatic routing of on-network calls to alternate tie line routes when primary tie line routes are busy. (Note: Included in the feature of UN.)

n. Automatic Overflow to DDD

Automatic overflow to DDD provides completion of on-network calls via the toll network when all primary and alternate tie line routes are busy.

3. Regulations

a. Automatic Route Selection-Deluxe (ARS-D)

(1) ARS-D is furnished only in association with FRL.

(2) Preferred routes and alternate routes in patterns will be specified by the customer.

(3) A maximum of three ARS-D pattern groups with a maximum of sixty-four patterns in each pattern group will be provided. The three pattern groups referred to will consist of one primary and two additional pattern groups for TOD routing.

(4) A maximum of ten routes will be provided in a pattern.

(5) Each WATS band is treated as a separate route.

(6) A maximum of sixty-four Number Plan Areas (including the home NPA) may be designated by the customer for routing of calls by central office codes (six digit translation).

(7) All rates and charges specified for ARS-D are in addition to the rates and charges for the associated facilities and facility terminations.

3. Regulations (Continued)

a. Automatic Route Selection-Deluxe (ARS-D) (Continued)

- (8) A single rate "per facility terminated in patterns" will apply regardless of the number of patterns having access to that facility. The monthly rate specified is applicable to each facility available to the patterns.
- (9) The charges specified in "Rates and Charges" following for each code addition or change are applicable whether customer or Company initiated.
- (10) Where ARS-D is furnished in connection with UN/AAR, tie lines to other PBX or Centrex/ESSX-1 system locations may appear as routes in ARS-D patterns when these tie lines are provided for subsequent access to the toll network at the distant PBX or Centrex/ESSX-1 system location.
- (11) The TOD routing feature permits up to sixteen programmed changes in pattern groups per week. When additional ARS-D patterns are required due to TOD changes, rates and charges as specified in paragraph I.4. following apply to each additional pattern.
- (12) CCSA access lines (off-net calls) and access lines to other similar arrangements compatible with ARS-D may be included as routes in patterns.
- (13) Centrex/ESSX-1 toll diversion and/or restriction do not function on calls routed via ARS-D.

b. Facilities Restriction Levels (FRL)

- (1) FRL is only furnished in association with ARS-D.
- (2) A maximum of eight facilities restriction levels will be available for each Centrex/ESSX-1 system.
- (3) A maximum of twenty thousand authorization codes will be available for each Centrex/ESSX-1 system.
- (4) Authorization codes must consist of a uniform number of digits, with a minimum of three digits and a maximum of six digits.
- (5) Customer implementation of change of authorization codes or associated facilities restriction level requires the Facilities Administration and Control feature.
- (6) All service lines and incoming tie line terminations with access to ARS-D must be equipped with FRL.

c. Deluxe Queuing

- (1) Calls in queue may overflow to subsequent routes or to tone at the customer's option.
- (2) Deluxe queuing is available with facilities appearing as the primary (first choice) route in ARS-D or UN/AAR patterns.
- (3) The text and announcement provided with the recorded announcement option will be provided by the Telephone Company.
- (4) The music for the music-on-queue option must be provided by the customer.
- (5) The music-on-queue option requires a private line channel between the central office and the customer-provided music source at the customer's premises. This feature is available only with OHQ.

Issued: March 23, 1992

By: B. J. Stonebraker, Senior Vice President
Cincinnati, Ohio

3. Regulations (Continued)

c. Deluxe Queuing (Continued)

- (6) The customer must specify the length of time a call will be held in queue (threshold time limit) before overflowing to subsequent routes or to overflow tone.
- (7) Incoming tie lines can be arranged for OHQ only.
- (8) Centrex/ESSX-1 service lines can be provided either RBQ or OHQ. All such lines must be equipped with the same type of queuing.
- (9) OHQ must be equipped for either recorded announcement or music-on-queue.

d. Station Message Detail Recording to Premises (SMDR-P)

- (1) SMDR-P is not represented to be a provision of billing detail.
- (2) Station message detail records will be provided on terminal equipment located at the customer's premises at the rates and charges specified in "Rates and Charges" following.
- (3) The customer must provide suitable space, environmental conditions, 110 volt AC power, and magnetic tape for the equipment located on the customer's premises.
- (4) Processing of message detail information (SMDR) by the Telephone Company accounting center is not provided with this arrangement.
- (5) The customer must designate all service lines in an ESS customer group and/or selected facility groups on which SMDR-P originating and terminating records are to be provided.
- (6) Additions or deletions of SMDR-P recording are provided by Telephone Company service orders.

3. Regulations (Continued)

d. Station Message Detail Recording to Premises (SMDR-P) (Continued)

- (7) Where SMDR-P is provided, a detailed record may be made for each completed call. At the customer's option, arrangements can be made to provide records of calls attempted as well as calls completed. Under certain exceptional conditions, with SMDR-P, calls may be processed without recording the call detail.
- (8) SMDR-P includes the recording of account codes and authorization codes where these optional features are provided.
- (9) Account codes are available with the initial installation of SMDR-P at no additional charge.

e. Customer Administration and Control

- (1) Customer administration and control features are comprised of either or both the Facilities Administration and Control ETS optional feature and the Traffic Data to Customer (pollable)/FAR ETS optional feature.
- (2) Traffic Data to Customer (pollable)/FAR may be provided to Centrex/ESSX-1 systems which are not equipped with the ETS features of ARS-D and FRL.
- (3) An exchange service line termination in each central office unit accessed is required. Filed tariff rates and charges for an exchange flat rate nonresidence individual line apply for each such termination provided.
- (4) Facilities Administration and Control provides the ability to:
 - Select ARS-D patterns groups and determine status.
 - Activate/deactivate queuing and determine status.
 - Change authorization codes and associated FRL's.

e. Customer Administration and Control (Continued)

(5) Traffic Data to Customer (pollable) provides:

FAR reports listing trunks not accessed and all trunks constantly off-hook in the previous two hours.

Traffic data reports on trunk groups and queues.

f. Uniform Numbering/Automatic Alternate Routing (UN/AAR)

- (1) All calls must consist of a seven digit called number, after the access code (or after the access code and account code where this option is provided).
- (2) The customer must specify the first choice route and each subsequent route to each Centrex/ESSX-1 or PBX System involved.
- (3) The customer must notify the Telephone Company when any change in route or routing sequence is desired.
- (4) The maximum number of routes in a pattern is four.
- (5) The maximum number of patterns is 180.
- (6) Where calls are routed via the toll network, the rates and charges specified for automatic overflow to DDD, trunk lines, and toll messages are applicable.
- (7) The rates and charges specified in "Rates and Charges" following apply per tie line facility terminated in UN/AAR and/or ARS-D patterns and apply once per facility, whether terminated in one or both patterns.

Change authorization codes and associated FRL's.

Note: This Private Line tariff will be "GRANDFATHERED" as of May 6, 1994 and withdrawn as of May 5, 1997 in Accordance with Case No. 93-432-TP-ALT, issued by The Public Utilities Commission of Ohio. Customers with existing services will be able to maintain those services under the existing rate structure for three years from the period the order is issued by the Public Utilities Company of Ohio. This order allows customers to remove legs from multipoint circuits, but additions and other modifications will not be permitted. New services, and additions or modifications to existing local private line services, must be ordered from the Access Service Tariff.

EMERGENCY NUMBER SERVICES (911 SERVICES)

I. ENHANCED UNIVERSAL EMERGENCY NUMBER SERVICE (E-911 Service)

A. GENERAL

1. Enhanced Universal Emergency Number Service, also referred to as E911 service or E911, is a telephone exchange communication service through which a Public Safety Answering Point (PSAP) designated by the E911 customer may receive telephone calls dialed to the telephone number 911. E911 service includes lines, equipment and software necessary for the answering, transferring and dispatching of public emergency telephone calls originated by persons within the serving area who dial 911.
2. E911 Service is offered subject to availability of facilities.
3. The E911 customer may be a municipality or other state or local governmental unit, or an authorized agent of one or more municipalities or other state or local governmental units to whom authority has been lawfully delegated. The E911 customer may be legally authorized or required to subscribe to the service and have public safety responsibility by law to respond to telephone calls from the public for police, fire, ambulance, rescue, medical or other emergency services within the telephone central office areas arranged for 911 calling.

B. DEFINITION OF TERMS

Additional E911 Exchange Line: Additional terminating line at a PSAP that may be ordered by the E911 customer as an optional feature.

Alternate Routing (AR): A feature provided to allow 911 calls to be routed to a designated alternate location if (1) all E911 exchange lines to the primary PSAP (see definition of PSAP below) are busy, or (2) the primary PSAP closes down for a period (night service).

Automatic Location Identification (ALI): A feature by which the name and address associated with the calling party's telephone number (identified by ANI as defined below) may be forwarded to the PSAP for display. Additional telephones with the same number as the calling party's (secondary locations, off premises, etc.) will be identified with the address of the telephone number at the main location.

EMERGENCY NUMBER SERVICES (911 SERVICES)

I. ENHANCED UNIVERSAL EMERGENCY NUMBER SERVICE (E-911 Service)

B. DEFINITION OF TERMS (Continued)

Automatic Number Identification (ANI): A feature by which the calling party's telephone number is forwarded to the E911 control office and to the PSAP's Display and Transfer Units.

Data Management System (DMS): A system of manual procedures and computer programs used to create, store and update the data required to provide the Selective Routing (SR) and ALI features.

Default Routing (DR): A feature activated when an incoming 911 call cannot be selectively routed due to an ANI failure, garbled digits or other causes. Such incoming calls are routed from an E911 facility group to the control office to a default PSAP. Each incoming E911 facility group to the control office is assigned to a designated default PSAP.

Display and Transfer Unit: A selector console and associated common equipment for displaying ANI numbers at the PSAP attendant position and used by the attendant to activate Fixed and/or Selective Transfer functions.

End Office: The central office(s) in the E911 system which receive originating 911 calls.

Enhanced 911 (E911) Control Office: The office providing tandem switching capability for E911 calls. It controls switching of ANI information to the PSAP and also provides the SR feature, standard ESS speed calling features, call transfer capability and certain maintenance functions for each PSAP.

Enhanced 911 Service Area: The geographic area in which the E911 customer will respond to all 911 calls and dispatch appropriate emergency assistance.

Fixed Transfer: A feature which enables a PSAP attendant to transfer incoming 911 calls to secondary PSAPs by use of a single button on the Display and Transfer Unit.

EMERGENCY NUMBER SERVICES (911 SERVICES)

I. ENHANCED UNIVERSAL EMERGENCY NUMBER SERVICE (E-911 Service)

B. DEFINITION OF TERMS (Continued)

Forced Disconnect: A function of the E911 central office trunk circuit which enables the PSAP attendant to release a connection even though the calling party has not hung up. This feature prevents the jamming of the E911 exchange lines.

Manual Transfer: A feature that enables the PSAP attendant to transfer an incoming call by depressing the switch hook of the associated telephone or the "add" button on the Display and Transfer Unit and dialing either a 7-digit or 10-digit telephone number or a 2-digit Speed Calling code.

Public Safety Answering Point (PSAP): An answering location for 911 calls originating in a given area. A PSAP may be designated as primary or secondary, which refers to the order in which calls are directed for answering. Primary PSAPs respond first; secondary PSAPs receive calls on a transfer basis only and generally serve as a centralized answering location for a particular type of emergency call. PSAPs are staffed by employees of public safety agencies such as police, fire or emergency medical personnel, or by employees of a common bureau serving a group of such entities.

Selective Routing (SR): A feature that routes a 911 call from the E911 control office to the designated primary PSAP based upon the identified number of the calling party.

Selective Transfer: A feature providing persons at the PSAP the ability to transfer an incoming call to another agency by depressing a single button labeled with the type of agency, e.g., "Fire," on the Display and Transfer Unit.

Serving Central Office: The central office from which a PSAP, either primary or secondary, is served.

EMERGENCY NUMBER SERVICES (911 SERVICES)

I. ENHANCED UNIVERSAL EMERGENCY NUMBER SERVICE (E-911 Service)

B. DEFINITION OF TERMS (Continued)

Universal Emergency Number Service: A telephone exchange communication service for receiving telephone calls placed by persons in need of assistance who dial the number 911. These calls are answered at PSAPs established and operated by the E911 customer. The lines and equipment associated with the service arrangement for the answering, transferring and dispatching of public emergency telephone calls are included.

Universal Emergency Number Service Customer (E911 Customer): A municipality or other state or local governmental unit or an authorized agent of one or more municipalities or other state or local governmental units, to whom authority has been lawfully delegated within a defined geographic area to respond to public emergency telephone calls including police, fire, ambulance, rescue and medical service.

C. RULES AND REGULATIONS

1. This service is limited to the use of central office telephone number 911 as the universal emergency telephone number. Only one E911 service will be provided within any government agency's locality.
2. The 911 emergency telephone number is not intended as a total replacement for the telephone service of the various public safety agencies which participate in the use of this number. The public safety agencies will subscribe to other exchange telephone service as provided in the Exchange Rate Tariff PUCO NO. 2.
3. The service is furnished to an E911 customer only for the purpose of receiving reports of emergencies from the public.
4. E911 Service is classified as non-residence exchange service and is arranged for one-way incoming service to the appropriate PSAP. Outgoing calls can only be made on a transfer basis.

EMERGENCY NUMBER SERVICES (911 SERVICES)

I. ENHANCED UNIVERSAL EMERGENCY NUMBER SERVICE (E-911 Service)

C. RULES AND REGULATIONS (Continued)

5. E911 Service is provided solely for the benefit of the E911 customer operating the PSAP. The provision of E911 Service by the Telephone Company is not to be interpreted, construed, or regarded, either expressly or by implication, as being for the benefit of or creating any Telephone Company obligation toward any third person or legal entity other than the E911 customer.
6. The Telephone Company furnishes the use of its facilities to enable the E911 customer's personnel to answer and forward 911 calls at the PSAP.
7. Any terminal equipment used in conjunction with E911 Service, whether the equipment is provided by the Telephone Company or the E911 customer, must be configured so that it is unable to extract any information from the Data Management System other than information relating to a number identified through the ANI feature as the source of an in-progress call.
8. E911 information consisting of the names, addresses and telephone numbers of calling parties whose listings are not published in directories or listed in Directory Assistance offices is confidential. The E911 calling party forfeits the privacy afforded by non-address and non-published service to the extent that the telephone number, address and name associated with the originating station location may be furnished to the PSAP on a call-by-call basis only for the purpose of responding to emergency calls.

Due solely to the technology of the Telephone Company Network portion of the E911 system, E911 information may be transmitted to E911 customers on calls that are not classified as emergency calls. In the circumstance of the inadvertent disclosure of such information, the E911 customer will not utilize or disclose such information.

9. Central offices which are not currently equipped to transmit ANI will not be modified to provide ANI only for the purposes of E911 Service. In such circumstances, default routing and central office identification will be provided in lieu of selective routing and ANI display.

EMERGENCY NUMBER SERVICES (911 SERVICES)

I. ENHANCED UNIVERSAL EMERGENCY NUMBER SERVICE (E-911 Service)

C. RULES AND REGULATIONS (Continued)

10. The Telephone Company will have no liability to any person in connection with E911 service as provided in Section 4931.49 (C) of the Ohio Revised Code, which states that a Telephone Company and its officers, directors, employees and agents are not liable in damages in a civil action for injuries, death or loss to persons or property incurred by any person resulting from the Telephone Company's, its officers', directors', employees' or agents' participation in or acts or omissions in connection with such participation in a 911 system, as defined therein.
11. The rates charged for E911 service do not contemplate the inspection or constant monitoring of facilities to discover errors, defects and malfunctions in the service, nor does the Telephone Company undertake this responsibility. The E911 customer will make whatever operational tests are, in the judgment of the E911 customer, required to determine whether the system is functioning properly for its use. The E911 customer must promptly notify the Telephone Company in the event the system is not functioning properly.
12. Each E911 customer agrees to release, indemnify, defend and hold harmless the Telephone Company and its directors, officers, employees and agents, from any or all loss, claims, demands, suits or other action, or any liability whatsoever (including attorneys' fees), whether suffered, made, instituted or asserted by the E911 customer or by any other party or person, for any personal injury to or death of any person or persons, or for any loss to persons or property, whether owned by the E911 customer or others.
