**SECTION 6.0 - MISCELLANEOUS SERVICES****6.1 Optional Calling Features**

Optional Calling Features are services offered as additions to regular telephone exchange service.

**6.1.1 Feature Descriptions**

Call Waiting: Permits the Customer engaged in a call to receive a tone signal indicating a second call is waiting and, by operation of the switchhook, to place the first call on hold and answer the waiting call. The Customer may alternate between the two calls by operation of the switchhook, but a three-way conference cannot be established.

Call Forward: Allows the Customer to automatically transfer all incoming calls to a telephone number at another local or toll location.

Call Forward Deluxe: Allows the Customer to activate routing of incoming calls to another line or to an external number.

Call Forward Busy: – Allows incoming calls to a line that is busy to be forwarded to another line specified by the Customer.

Call Forward-Don't Answer: Allows incoming calls to a line that is not answered after a specific number of rings designated by the Customer to be forwarded to another line specified by the Customer.

Selective Call Forwarding: Allows the Customer to select a specified number of telephone numbers for forwarding.

**SECTION 6.0 - MISCELLANEOUS SERVICES****6.1 Optional Calling Features, (Cont'd.)****6.1.1 Feature Descriptions, (Cont'd.)**

Three-Way Calling: Permits the Customer to add a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference. The Customer initiating the conference controls the call and may disconnect the third party to reestablish the original connection or establish a connection to a different third party. The feature may be used on both outgoing and incoming calls.

Call Screening: Provides the Customer with the ability to prevent repeated calls from an unwanted caller whose number may or may not be known. In addition, the Customer has the ability to create a list of telephone numbers from which the Customer may not wish to receive calls. Calls from these telephone numbers will be sent an appropriate announcement indicating that the call cannot be completed because the Customer has activated Call Screening.

Auto Call Back (\*69): Allows the Customer to return a call to the last incoming call whether answered or not. Upon activation, it will redial the number automatically and continue to check the number every 45 seconds for up to 30 minutes, if the number is busy. The Customer is alerted with a distinctive ringing pattern when the busy number is free. When the Customer answers the ring, the call is then completed.

Distinctive Ring: Allows the Customer to have an additional telephone number assigned to one dial tone line in addition to the main number. Each number when dialed will result in a distinctive ring that enables the Customer to determine which number is being called.

Hunting: Routes a call to an idle station line in a prearranged group when the called station line is busy.

**SECTION 6.0 - MISCELLANEOUS SERVICES****6.1 Optional Calling Features, (Cont'd.)****6.1.1 Feature Descriptions, (Cont'd.)**

Auto Redial: Permits the Customer to have calls automatically redialed when the first attempt reaches a busy number. The line is checked every 45 seconds for up to 30 minutes and alerts the Customer with a distinctive ringing pattern when the busy number and the customer's line are free. The Customer can continue to make and receive calls while the feature is activated.

Caller ID: Displays the telephone number of an incoming call on a specially designed telephone or device that the Customer attaches to their existing telephone. Obtaining and maintaining the display device is the responsibility of the Customer.

Caller ID Name Display: Displays the name and telephone number of an incoming call on a specially designed telephone or device that the Customer attaches to their existing telephone. Obtaining and maintaining the display device is the responsibility of the Customer.

Call Trace: Allows a Customer to initiate an automatic trace of the last call received. After receiving the call that is to be traced, the Customer dials a code and the traced telephone number is automatically sent to the Company. The Customer using Call Trace is required to contact the Company for further action. The Customer originating the trace will not receive the traced telephone number. The results of a trace will be furnished only to legally constituted authorities upon proper request by them.

Calling Party Number Blocking: Allows the name and number of the calling party to be blocked from being transmitted when placing outbound calls.

Speed Calling 30: Allows the Customer to dial an abbreviated code to originate a call to any of 30 programmed telephone numbers.
