RECEIVED-DOCKETING DIV

RE: DETARIFFING APPLICATION
Cert No. 90-9204

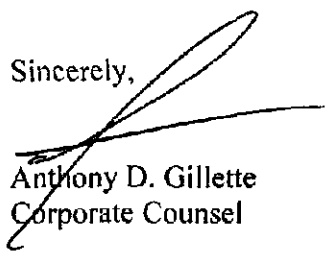

Dear Sir or Madam:

Enclosed is one (1) original and fifteen (12) copies of Kentucky Data Link, Inc.'s ("KDL") detariffing application, pursuant to Case No. 06-1345-TP-ORD. KDL has no customers affected by the detariffing, but it has submitted tariff pages removing those products.

Please acknowledge your receipt of this document by file-stamping the spare copy which is enclosed, and return it to me in the enclosed postage prepaid envelope.

Please contact me if you have any questions or concerns. I can be reached at either (913) 754-3341 or anthony.gillette@kdlinc.com.

Sincerely,

Anthony D. Gillette
Corporate Counsel

<input checked="" type="checkbox"/>	Exhibit F	Affidavit that the Customer Notice described in Exhibit C has been sent to Customers.

Part III. – Attestation

Registrant hereby attests to its compliance with pertinent entries and orders issued by the Commission.

AFFIDAVIT

Compliance with Commission Rules and Service Standards

I am an officer/agent of the applicant corporation, Anthony Gillette, and am authorized to make this statement on its behalf.
(Name)

I attest that these tariffs comply with all applicable rules, including the Minimum Telephone Service Standards (MTSS) Pursuant to Chapter 4901:1-5 OAC for the state of Ohio. I understand that tariff notification filings do not imply Commission approval and that the Commission's rules, including the Minimum Telephone Service Standards, as modified and clarified from time to time, supersede any contradictory provisions in our tariff. We will fully comply with the rules of the state of Ohio and understand that noncompliance can result in various penalties, including the suspension of our certificate to operate within the state of Ohio.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on (Date) 6/17/2008 at (Location) Overland Park, KS

*(Signature and Title)

(Date) 6-17-08

- This affidavit is required for every tariff-affecting filing. It may be signed by counsel or an officer of the applicant, or an authorized agent of the applicant.

VERIFICATION

I, Anthony Gillette

verify that I have utilized the Telecommunications Application Form for Detariffing and Related Actions provided by the Commission and that all of the information submitted here, and all additional information submitted in connection with this case, is true and correct to the best of my knowledge

*(Signature and Title)

(Date) 6-17-08

*Verification is required for every filing. It may be signed by counsel or an officer of the applicant, or an authorized agent of the applicant.

Send your completed Application Form, including all required attachments as well as the required number of copies, to:

**Public Utilities Commission of Ohio
Attention: Docketing Division

EXCHANGE ACCESS SERVICE

5.1 General

Exchange Access Service provides a Subscriber with a telephonic connection to, and a unique telephone number address on the public switched telecommunications network. Each Exchange Access Service enables users to:

- 5.1.1 receive calls from other stations on the public switched telecommunications network;
- 5.1.2 access other services offered by the Company as set forth in this tariff;
- 5.1.3 access certain interstate and international calling services provided by the Company;
- 5.1.4 access (at no additional charge) the Company's operators and business office for service related assistance;
- 5.1.5 access (at no additional charge) emergency services by dialing 0- or 9-1-1; and
- 5.1.6 access services provided by other common carriers that purchase the Company's Switched Access Services as provided under the Company's Federal and State tariffs, or that maintain other types of traffic exchange arrangements with the Company.

Each Exchange Access Service is available on a "Full" service basis, whereby service is delivered to a demarcation/connection block at the subscriber's premises.

The following Exchange Access Services are offered:

- Basic Line Service
- Basic Trunk Service
- DID Trunk Service
- Basic Rate ISDN Service
- Remote Call Forwarding

Issued: April 6, 2007

Effective: May 7, 2007

EXCHANGE ACCESS SERVICE

5.2 Basic Line Service

Basic Line Service provides a Subscriber with a single, voice-grade telephonic communications channel that can be used to place or receive one call at a time. Basic Lines are provided for connection of Subscriber-provided single station sets or facsimile machines to the public switched telecommunications network. Each Basic Line may be configured into a hunt group with other Company-provided Basic Lines at rates set outlined in Section 5.7. Additionally, subscribers wishing to purchase single calling features may order them from Section 5.7 Calling Features.

Each Basic Line is provided with the following standard features:

Touch Tone

Non-recurring and monthly recurring rates per Basic Line apply as follows:

	<u>Month-to-Month</u>	
	<u>Minimum</u>	<u>Maximum</u>
Ameritech Exchanges		
Business Line – Message Rate		
Zone B	\$17.34	\$20.08
Zone C	\$19.24	\$22.28

EXCHANGE ACCESS SERVICE

5.4 Basic Trunk Service

Basic Trunk Service provides a Subscriber with a single, loop start, voice-grade telephonic communications channel. There are two kinds of available trunks: combination and inward-only. The combination trunks can be used either to place or receive one call at a time, and the inward-only trunks can be used to receive one call at a time. PBX Trunks are provided for connection of Subscriber-provided private branch exchanges (PBX) to the public switched telecommunications network. Additionally, Subscribers wishing to purchase single calling features may order them from Section 5.7 Calling Features.

Each Basic Trunk is provided with the following standard features:

Touch Tone

Non-recurring and monthly recurring rates per PBX Trunk apply as follows:

	<u>Month-to-Month</u>

EXCHANGE ACCESS SERVICE**5.6 DID Trunk Service****5.6.1 Service Description**

DID service is an optional feature that can be purchased in conjunction with Company-provided Digital Trunks. DID service transmits the dialed digits for all incoming calls allowing the Subscriber's PBX to route incoming calls directly to individual stations corresponding to each individual DID number. Charges for DID capability and DID number blocks apply in addition to charges specified for Digital Trunks in Section 5.4.

One DID trunk termination charge applies for each DID-equipped Basic Trunk or DID-equipped channel on a Digital Trunk. The Subscriber is required to purchase at least one DID number block for each DID-equipped trunk or trunk group, or DID-equipped channel or channel group.

Termination charges are applicable for services that have a contract length greater than one month. The termination charges shall be equal to the number of months remaining in the contract multiplied by the monthly rate provided under the contract.

5.6.2 Service Components - Ameritech Exchanges

DID Trunk Service	Non-Recurring Rate (Minimum)	Non-Recurring Rate (Maximum)	Month-to-Month (Minimum)	Month-to-Month (Maximum)

EXCHANGE ACCESS SERVICE**5.7 Features****5.7.1 Calling Features Rates – Ameritech Exchanges**

900/976 Blocking - This feature enables customers to restrict the 976 and 900 calls from being placed over the line.

Call Forwarding Busy Line - Automatically redirects incoming calls to a pre-designated telephone number/service outside the subscriber's telephone system when the line is busy. The Subscriber selects the forward-to telephone number at time of service installation and can only be changed by a service order.

Call Forwarding Don't Answer - Allows incoming calls to be automatically routed to a pre-selected station line or attendant in the same system or outside the system, when the called station is not answered after a preset number of rings. Intercom calls can be arranged to be forwarded to a different number different from DID calls. The Subscriber selects the forward-to telephone number at time of service installation and can only be changed by a service order.

Call Forwarding Variable - Allows Subscriber to redirect all incoming calls to another telephone number.

Call Return - This feature allows customers to automatically return the last incoming call received.

Call Waiting - Call Waiting provides a tone to alert a customer with a call in progress that a second party is calling them, and allows the customer to answer the incoming call while holding the original connection.

Caller ID Basic - displays the telephone number of the calling party on a special display telephone or display unit on subscriber provided equipment.

Caller ID Deluxe - This feature enables the customer to view the calling party directory name and directory number on incoming telephone calls on a display unit. The ACR, or Anonymous Call Rejection, on this feature, allows customers to automatically reject incoming calls when the call originates from a telephone number which has invoked a blocking feature that prevents the delivery of their number to the called party.

Caller ID Block - This feature allows the customer to prevent the transmission of their directory number on a permanent basis. This is applicable on all outgoing calls from the customer's premise.

Caller ID Block – per call - This feature allows the customer to prevent the transmission of their directory number by dialing a preassigned code.

Hunting - Routes a call to an idle station line in a prearranged group when the called station line is busy.

Repeat Dialing - This feature, when activated, automatically redials the last number the customer attempted to call. If the called line is not busy, the call will be placed. If the called line is busy, a confirmation announcement is heard and the customer hangs up and a queuing process begins. For the next 30 minutes both the calling and the called lines are checked periodically for availability to complete the call. If during this queuing process the called line becomes idle, the customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone the call will automatically be placed.

5.7 Features

5.7.1 Calling Features Rates - Ameritech Exchanges (Cont.)

Ringmaster 1 - Customers subscribing to this feature will be able to receive calls dialed to two separate telephone numbers without having a second line. A distinctive ringing pattern will be provided for each of the additional telephone numbers to facilitate identification of incoming calls. A distinctive Call Waiting tone for each additional telephone number will be provided, where facilities permit, to customers subscribing to Call Waiting service.

Ringmaster 2 - Customers subscribing to this feature will be able to receive calls dialed to two or three separate telephone numbers without having a second or third line. A distinctive ringing pattern will be provided for each of the additional telephone numbers to facilitate identification of incoming calls. A distinctive Call Waiting tone for each additional telephone number will be provided, where facilities permit, to customers subscribing to Call Waiting service.

Three-Way Calling - Allows the customer to add a third party to an established call without operator assistance.

Three-Way Calling with Transfer - Allows a Subscriber to add a third party to an existing conversation.

900/976 Blocking - This feature enables customers to restrict the 976 and 900 calls from being placed over the line.

Call Forwarding Busy Line -- Automatically redirects incoming calls to a pre-designated telephone number/service outside the subscriber's telephone system when the line is busy. The Subscriber selects the forward-to telephone number at time of service installation and can only be changed by a service order.

Call Forwarding Don't Answer - Allows incoming calls to be automatically routed to a pre-selected station line or attendant in the same system or outside the system, when the called station is not answered after a preset number of rings. Intercom calls can be arranged to be forwarded to a different number different from DID calls. The Subscriber selects the forward-to telephone number at time of service installation and can only be changed by a service order.

Call Forwarding Variable - Allows Subscriber to redirect all incoming calls to another telephone number.

Call Return - This feature allows customers to automatically return the last incoming call received.

Call Tracing - This feature enables the customer to initiate an automatic trace of the last call received. Upon activation by the customer, the network automatically sends a message to the Company's Security Department indicating the calling number, the time the trace was activated, and in some locations, the time the offending call was received. The customer using this feature would be required to contact the Annoyance Call Bureau for further action. The customer is not provided the traced number.

Call Waiting - Call Waiting provides a tone to alert a customer with a call in progress that a second party is calling them, and allows the customer to answer the incoming call while holding the original connection.

Caller ID Basic - displays the telephone number of the calling party on a special display telephone or display unit on subscriber provided equipment.

Caller ID Deluxe - This feature enables the customer to view the calling party directory name and directory number on incoming telephone calls on a display unit. The ACR, or Anonymous Call Rejection, on this feature, allows customers to automatically reject incoming calls when the call originates from a telephone number which has invoked a blocking feature that prevents the delivery of their number to the called party.

Caller ID Block - This feature allows the customer to prevent the transmission of their directory number on a permanent basis. This is applicable on all outgoing calls from the customer's premise.

Caller ID Block - per call - This feature allows the customer to prevent the transmission of their directory number by dialing a preassigned code.

Hunting - Routes a call to an idle station line in a prearranged group when the called station line is busy.

EXCHANGE ACCESS SERVICE**5.7 Features****5.7.3 Calling Features - Cincinnati Bell Exchanges (Cont.)**

Repeat Dialing - This feature, when activated, automatically redials the last number the customer attempted to call. If the called line is not busy, the call will be placed. If the called line is busy, a confirmation announcement is heard and the customer hangs up and a queuing process begins. For the next 30 minutes both the calling and the called lines are checked periodically for availability to complete the call. If during this queuing process the called line becomes idle, the customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone the call will automatically be placed.

Ringmaster 1 - Customers subscribing to this feature will be able to receive calls dialed to two separate telephone numbers without having a second line. A distinctive ringing pattern will be provided for each of the additional telephone numbers to facilitate identification of incoming calls. A distinctive Call Waiting tone for each additional telephone number will be provided, where facilities permit, to customers subscribing to Call Waiting service.

Ringmaster 2 - Customers subscribing to this feature will be able to receive calls dialed to two or three separate telephone numbers without having a second or third line. A distinctive ringing pattern will be provided for each of the additional telephone numbers to facilitate identification of incoming calls. A distinctive Call Waiting tone for each additional telephone number will be provided, where facilities permit, to customers subscribing to Call Waiting service.

Selective Class of Call Screening - This feature enables a customer to secure central office blocking of originating 1+, 101XXXX 1+, 976 and 900 service calls. Additionally, specific screening information from the originating line is sent to the operator on Company handled intraLATA calls to prevent operator-assisted calls from being billed to the subscriber's line. Information digits are also passed to long distance providers, other than the Company, to identify the line as requiring special operator handling. All local calls and calls to Company numbers such as repair service, Directory Assistance Service and public emergency service numbers such as 911 and 1+ 800 calls will be permitted from the establishment.

Speed Calling - Allows a Subscriber to dial from 8 to 30 selected numbers by using fewer digits than normally required. This is accomplished through the assignment of abbreviated codes to frequently called numbers. The speed calling list is Subscriber -changeable.

Three-Way Calling - Allows the customer to add a third party to an established call without operator assistance.

Three-Way Calling with Transfer - Allows a Subscriber to add a third party to an existing conversation.

EXCHANGE ACCESS SERVICE

5.7 Features

5.7.5 Calling Features – Sprint Exchanges

900 Blocking - This feature enables customers to restrict the 976 and 900 calls from being placed over the line.

Call Forwarding Busy Line -- Automatically redirects incoming calls to a pre-designated telephone number/service outside the subscriber's telephone system when the line is busy. The Subscriber selects the forward-to telephone number at time of service installation and can only be changed by a service order.

Call Forwarding Don't Answer - Allows incoming calls to be automatically routed to a pre-selected station line or attendant in the same system or outside the system, when the called station is not answered after a preset number of rings. Intercom calls can be arranged to be forwarded to a different number different from DID calls. The Subscriber selects the forward-to telephone number at time of service installation and can only be changed by a service order.

Call Forwarding Variable - Allows Subscriber to redirect all incoming calls to another telephone number.

Call Return - This feature allows customers to automatically return the last incoming call received.

Call Return Blocking - This feature denies the customer the option of using the per-use call return feature.

Call Waiting - Call Waiting provides a tone to alert a customer with a call in progress that a second party is calling them, and allows the customer to answer the incoming call while holding the original connection.

Caller ID Basic - displays the telephone number of the calling party on a special display telephone or display unit on subscriber provided equipment.

Caller ID Deluxe - This feature enables the customer to view the calling party directory name and directory number on incoming telephone calls on a display unit. The ACR, or Anonymous Call Rejection, on this feature, allows customers to automatically reject incoming calls when the call originates from a telephone number which has invoked a blocking feature that prevents the delivery of their number to the called party.

Caller ID Block - This feature allows the customer to prevent the transmission of their directory number on a permanent basis. This is applicable on all outgoing calls from the customer's premise.

Caller ID Block – per call - This feature allows the customer to prevent the transmission of their directory number by dialing a preassigned code.

Hunting - Routes a call to an idle station line in a prearranged group when the called station line is busy.

Remote Access to Call Forwarding Variable - This feature provides a customer the Call Forwarding Variable feature and the capability to activate and deactivate the service remotely from any line/equipment capable of Touch-Tone signaling rather than only from the base station line.

EXCHANGE ACCESS SERVICE

5.7 Features

5.7.5 Calling Features – Sprint Exchanges (Cont.)

Repeat Dialing - This feature, when activated, automatically redials the last number the customer attempted to call. If the called line is not busy, the call will be placed. If the called line is busy, a confirmation announcement is heard and the customer hangs up and a queuing process begins. For the next 30 minutes both the calling and the called lines are checked periodically for availability to complete the call. If during this queuing process the called line becomes idle, the customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone the call will automatically be placed.

Speed Calling - Allows a Subscriber to dial from 8 to 30 selected numbers by using fewer digits than normally required. This is accomplished through the assignment of abbreviated codes to frequently called numbers. The speed calling list is Subscriber -changeable.

Three-Way Calling - Allows the customer to add a third party to an established call without operator assistance.

900/976 Blocking - This feature enables customers to restrict the 976 and 900 calls from being placed over the line.

Call Forwarding Busy Line -- Automatically redirects incoming calls to a pre-designated telephone number/service outside the subscriber's telephone system when the line is busy. The Subscriber selects the forward-to telephone number at time of service installation and can only be changed by a service order.

Call Forwarding Don't Answer - Allows incoming calls to be automatically routed to a pre-selected station line or attendant in the same system or outside the system, when the called station is not answered after a preset number of rings. Intercom calls can be arranged to be forwarded to a different number different from DID calls. The Subscriber selects the forward-to telephone number at time of service installation and can only be changed by a service order.

Call Forwarding Variable - Allows Subscriber to redirect all incoming calls to another telephone number.

Call Return - This feature allows customers to automatically return the last incoming call received.

Call Tracing - This feature enables the customer to initiate an automatic trace of the last call received. Upon activation by the customer, the network automatically sends a message to the Company's Security Department indicating the calling number, the time the trace was activated, and in some locations, the time the offending call was received. The customer using this feature would be required to contact the Annoyance Call Bureau for further action. The customer is not provided the traced number.

Call Waiting - Call Waiting provides a tone to alert a customer with a call in progress that a second party is calling them, and allows the customer to answer the incoming call while holding the original connection.

Caller ID Basic - displays the telephone number of the calling party on a special display telephone or display unit on subscriber provided equipment.

EXCHANGE ACCESS SERVICE

5.8 ISDN/BRI

5.8.1 Description of Service

ISDN BRI service provides simultaneous transmission of voice, data, and packet services on the same exchange access line. The basic channel structure for BRI is (2) 64 Kbps B channels and (1) 16 Kbps D channel. The B channels may be used to connect the subscriber's CPE to the Public Switched Network (e.g. outward, inward and two-way trunks, and WATS/800 Service access lines).

Each B Channel Packet Terminal will provide logical channels up to the technical capability of the serving central office. Each logical channel can carry an independent call with throughput of up to 64 Kbps. B Channel circuit switched services offer up to 64 Kbps intra-office transmission of voice or data. This option permits the subscriber to utilize either circuit voice or data transmission paths on a per call basis. Transmission on the B channel will be circuit switched at 64 Kbps within the switch and/or equipped facilities between ISDN compatible central offices. ISDN interconnection to non-ISDN equipped central offices will be potentially subjected to analog transmission or sub-rated to 56 Kbps. This option includes one directory number (DN).

ISDN BRI service rates under any Term Payment Plan are exempt from CTP initiated charges for the payment period selected. Rates in effect at the time service is installed, and/or of the service order application date, will be applicable until the contract expires. At the expiration date of the subscriber's payment period option, the subscriber may select a new payment period at current rates or revert to current rates on a month to month basis. ISDN features are priced at a per channel rate unless otherwise specified.

EXCHANGE ACCESS SERVICE

5.8 ISDN/BRI

5.8.2 Service Components

The required components of ISDN BRI service will be as follows:

Digital Service Loop

- BRI B Channels
- Integrated Service Access Feature Capability
- Network Access and Usage charges where applicable

The subscriber may choose any number of channels up to (2) per Basic Rate Interface, to be active with corresponding number of services. The subscriber may also choose to have more services selected than channels available for specific applications. The total number of communication paths may not exceed the number of channels subscribed.

5.8.3 Regulations

1. Customer Premises Equipment (CPE) that is compatible with the ISDN BRI service interface is the responsibility of the user for provisioning.
2. CTP will be responsible for publishing and maintaining ISDN Interface Specifications.
3. CTP shall not be responsible if changes in any of the equipment, operations, or procedures of CTP utilized in the provision of ISDN BRI service render any facilities provided by the subscriber obsolete or require modification or alteration of such equipment or system, or otherwise affect its use or performance.
4. Digital transmission rates at speeds less than those indicated may be accomplished as a function of the particular CPE furnished by the user.
5. Suspension of service is not allowed.
6. Busy line verification and Emergency Interrupt service is not available for ISDN BRI services.
7. IBS will be available where central office and outside plant facilities permit.
8. Each ISDN Basic Rate DSL Access Arrangement will be counted as one line in determining the application of the Service Charges and the End User Charges.

EXCHANGE ACCESS SERVICE

5.11 Remote Call Forwarding

5.11.1 Description of Service

Remote Call Forwarding allows calls made to a telephone number to be automatically forwarded to a different telephone number, which may be a local, toll number, or 800 number. There is no telephone equipment at the Remote Call Forwarding location, instead, the forwarding occurs in the Central Office.

Transmission of service and receipt of calls will not be guaranteed for calls forwarded to data or fax service. The end user must subscribe to a sufficient number of Remote Call Forwarding features and facilities to adequately handle calls without interference or impairment to any Company offered service. The Remote Call Forwarding number has one access path, which allows only one call at a time to be forwarded. Additional access paths are necessary to allow for the transmission of two or more simultaneous calls to the terminating location, with each path allowing one call. The line is not released when a call is forwarded.

The calling party is responsible for any charges between the originating location and the Remote Call Forwarding telephone number. The Remote Call Forwarding customer is responsible for the charges between the Remote Call Forwarding telephone number and the terminating station.

Subscribers to Remote Call Forwarding will receive one free directory listing. Additional listings may be provided pursuant to Section 6.1.

The following non-recurring and monthly recurring charges are for Remote Call Forwarding only and are in addition to applicable charges for service and equipment for which they were used. Service charges are also applicable to this service.

EXCHANGE ACCESS OPTIONAL FEATURES**6.1 Directory Listings**

For each Subscriber of Company-provided Exchange Access Service(s), the Company shall arrange for the listing of the Subscriber's main billing telephone number¹ in the directory(ies) published by the dominant Local Exchange Carrier in the area at no additional charge. At a Subscriber's option, the Company will arrange for additional listings at the following rates:

Rates

	<u>Monthly Recurring</u>	
	<u>Minimum</u>	<u>Maximum</u>
Each Additional Listing:	\$ 3.50	\$4.06
Each Foreign Listing:	\$ 3.50	\$4.06
Non-Listed:	\$ 1.96	\$2.27
Non-Published:	\$ 1.96	\$2.27

For Subscribers with multiple premises served by the Company, the Company will arrange for a listing of the main billing telephone number at each premise.

EXCHANGE ACCESS OPTIONAL FEATURES**6.3 Vanity Number Service**

Vanity Number Service is an optional feature by which a new Subscriber may request a specific or unique telephone number and fax number for use with the Company provided Exchange Access Services. This service provides for the assignment of a Subscriber requested telephone number other than the next available number from the assignment control list.

Vanity Number Service is furnished subject to the availability of facilities and the requirements of Exchange Access Service as defined by the Company. The Company reserves all rights to the Vanity Numbers assigned to Subscribers and may, therefore, change them if required.

Monthly recurring charges apply per Vanity Number.

MISCELLANEOUS SERVICES**9.1 Operator Services**

An outsourced provider will provide operator Handled Calling Services to a Subscriber and Users of Company-provided Exchange Access Services.

9.2 Service Implementation

Absent a promotional offering, service implementation charges will apply to new service orders or to orders to change existing service.

The Line Connection Charge is applicable for establishing new lines, trunks, or ISDN services. The Initial Line Connection Charge is applicable if the customer is only ordering one line, or for the first line in an order that has more than one line. The Additional Line Connection Charge is applicable for each additional line after the first line in a single order.

The Line Change Charge is applicable for when a customer requests a phone number change, service restored after suspension for non-pay, and directional changes. The initial charge is applicable if the customer is only requesting changes on one line, or for the first line in an order that has more than one line. The additional charges is for each additional line after the first line in a single order.

The Subsequent Order Charge is applicable for adding or rearranging features, and for rearranging or adding wiring or jacks. This is in addition to any applicable work charges. This charge is not applicable if the customer is already receiving an initial or additional Line Connection Charge for the order.

<u>Rates</u>	<u>Non-Recurring</u>	
	<u>Minimum</u>	<u>Maximum</u>
Line Connection Charge - Initial	\$55.50	\$64.27
Line Connection Charge - Additional	\$29.50	\$34.16
Line Change Charge - Initial	\$44.65	\$51.70

MISCELLANEOUS SERVICES**9.3 Restoration of Service**

A restoration charge applies to the re-establishment of service and facilities suspended because of nonpayment of bills and is payable at the time that the re-establishment of the service and facilities suspended is arranged for. The restoration charge does not apply when, after disconnection of service, service is later re-established.
