**SECTION 2.0 - REGULATIONS, *cont'd.*****2.14 IntraLATA Presubscription****2.14.1 IntraLATA Presubscription****(A) General**

IntraLATA Presubscription is a procedure whereby a Customer designates to the Company the carrier which the Customer wishes to be the carrier of choice for intraLATA toll calls. Such calls are automatically directed to the designated carrier, without the need to use carrier access codes or additional dialing to direct the call to the designated carrier. IntraLATA presubscription does not prevent a Customer who has presubscribed to an intraLATA toll carrier from using carrier access codes or additional dialing to direct calls to an alternative intraLATA toll carrier on a per call basis.

IntraLATA Presubscription will become effective upon the initial offering of certified local exchange service.

**(1) IntraLATA Presubscription Options**

Option A: Customer may select the Company as the presubscribed carrier for intraLATA toll calls subject to presubscription.

Option B: Customer may select her/his interLATA toll carrier as the presubscribed carrier for intraLATA toll calls subject to presubscription.

Option C: Customer may select a carrier other than the Company or the Customer's interLATA toll carrier as the presubscribed carrier for intraLATA toll calls subject to presubscription.

Option D: Customer may select no presubscribed carrier for intraLATA toll calls subject to presubscription which will require the Customer to dial a carrier access code to route all intraLATA toll calls to the carrier of choice for each call.

**SECTION 2.0 - REGULATIONS, *cont'd.*****2.14 IntraLATA Presubscription, *cont'd.*****2.14.2 Rules and Regulations**

Customers of record will retain their current dialing arrangements until they request that their dialing arrangements be changed.

Customers of record or new Customers may select either Options A, B, C, or D for intraLATA Presubscription.

Customers may changed their selected Option and/or their presubscribed intraLATA toll carrier at any time subject to charges specified in Paragraph 5 below.

**2.14.3 IntraLATA Presubscription Procedures**

New Customers will be asked to select an intraLATA toll carrier(s) at the time the Customer places an order to establish local exchange service with the Company. The Company will process the Customer's order for intraLATA service. The selected carrier(s) will confirm their respective Customer's verbal selection by third-party verification or return written confirmation notices. All new Customers' initial requests for intraLATA toll service presubscription shall be provided free of charge.

If a new Customer is unable to make a selection at the time the new Customer places an order to establish local exchange service, the Company will read a random listing of all available intraLATA carriers to aid the Customer in selection. If selection is still not possible, the Company will inform the Customer that he/she will be given 90 calendar days in which to inform the Company of an intraLATA toll carrier presubscription selection free of charge. Until the Customer informs the Company of his/her choice for intraLATA toll carrier, the Customer will not have a presubscribed intraLATA toll carrier, but rather will be required to dial a carrier access code to route all intraLATA toll calls to the carrier(s) of choice. Customers who inform the Company of a choice for intraLATA toll presubscription within the 90day period will not be assessed a service charge for the initial Customer request.

The regulations set forth in this section govern the application of rates for services contained in other sections of this tariff.

**3.2 Usage Based Charges**

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

- 3.2.1** Calls are measured in durational increments identified for each service. All calls which are fractions of a measurement increment are rounded-up to the next whole unit.
- 3.2.2** Timing on completed calls begins when the call is answered by the called party. Answering is determined by hardware answer supervision in all cases where this signaling is provided by the terminating local carrier and any intermediate carrier(s). Timing for operator service person-to-person calls start with completion of the connection to the person called or an acceptable substitute, or to the PBX station called.
- 3.2.3** Timing terminates on all calls when the calling party hangs up or the Company's network receives an off-hook signal from the terminating carrier.
- 3.2.4** Calls originating in one time period and terminating in another will be billed in proportion to the rates in effect during different segments of the call.

**SECTION 3.0 - APPLICATIONS OF RATES, *cont'd.*****3.3 Rates Based Upon Distance**

Where charges for a service are specified based upon distance, the following rules apply:

**3.3.1** Distance between two points is measured as airline distance between the rate centers of the originating and terminating telephone lines. The rate center is a set of geographic coordinates, as referenced in Local Exchange Routing Guide issued by Bellcore, associated with each NPA-NXX combination (where NPA is the area code and NXX is the first three digits of a seven-digit telephone number). Where there is no telephone number associated with an access line on the Company's network (such as a dedicated 800 or WATS access line), the Company will apply the rate center of the Customer's main billing telephone number.

**3.3.2** The airline distance between any two rate centers is determined as follows:

- (A) Obtain the "V" (vertical) and "H" (horizontal) coordinates for each Rate Center from the above-referenced Bellcore document.
- (B) Compute the difference between the "V" coordinates of the two rate centers; and the difference between the two "H" coordinates.
- (C) Square each difference obtained in step (b) above.
- (D) Add the square of the "V" difference and the square of the "H" difference obtained in step C) above.
- (E) Divide the sum of the squares by 10. Round to the next higher whole number if any fraction is obtained.
- (F) Obtain the square root of the whole number result obtained above. Round to the next higher whole number if any fraction is obtained. This is the airline mileage.
