Columbus, OH 43215-0573

Re: United Telephone Company of Ohio d/b/a Embarq
Case No. 90-5041-TP-TRF

Dear Ms. Jenkins:

Enclosed for filing are revisions to United Telephone Company of Ohio d/b/a Embarq P.U.C.O. No. 5 General Exchange Tariff. This filing should be processed as a zero day filing, to become effective July 30, 2008. The following tariff sheets are enclosed:

Section A	First Revised Sheet 7 Fourth Revised Sheet 8 First Revised Sheet 9 Original Sheet 10	Section 36 (Continued)	First Revised Sheet 11 First Revised Sheet 12 First Revised Sheet 13 First Revised Sheet 14 First Revised Sheet 15 Second Revised Sheet 16 Second Revised Sheet 17 First Revised Sheet 18 First Revised Sheet 19 First Revised Sheet 20
Section 1	Seventh Revised Sheet 1		
Section 36	First Revised Sheet 8 Original Sheet 8.1 First Revised Sheet 9 First Revised Sheet 10		

This filing grandfathers ISDN-BRI II for residential customers due to lack of demand. This filing also adds Contribution in Aid to Construction - Land Development reference.

If you have any questions regarding this filing, please call Gary Baki at 614-220-8629.

Sincerely,

/s/ Glenda L. Munson

**NOTE: During the interim period between the effective date of the rules and an Applicant's Detariffing Filing, changes to existing business Tier 2 and all toll services, including the addition of new business Tier 2 and all new toll services, will be processed as 0-day TRF filings, and briefly described in the "Other" section above.*

Section III. – Attestation

Registrant hereby attests to its compliance with pertinent entries and orders issued by the Commission.

AFFIDAVIT

Compliance with Commission Rules and Service Standards

I am an officer/agent of the applicant corporation, Embarq Communications, Inc., and am authorized to make this statement on its behalf.
(Name)

I attest that these tariffs comply with all applicable rules, including the Minimum Telephone Service Standards (MTSS) Pursuant to Chapter 4901:1-5 OAC for the state of Ohio. I understand that tariff notification filings do not imply Commission approval and that the Commission's rules, including the Minimum Telephone Service Standards, as modified and clarified from time to time, supersede any contradictory provisions in our tariff. We will fully comply with the rules of the state of Ohio and understand that noncompliance can result in various penalties, including the suspension of our certificate to operate within the state of Ohio.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on (Date) July 30, 2008 at (Location) Overland Park, KS 66211

*(Signature and Title) /s/ Glenda L. Munson, Tariff Analyst (Date) July 30, 2008

- *This affidavit is required for every tariff-affecting filing. It may be signed by counsel or an officer of the applicant, or an authorized agent of the applicant.*

VERIFICATION

I, Glenda L. Munson verify that I have utilized the Telecommunications Application Form for Routine Proceedings provided by the Commission and that all of the information submitted here, and all additional information submitted in connection with this case, is true and correct to the best of my knowledge.

*(Signature and Title)/s/ Glenda L. Munson, St. Tariff Analyst (Date) July 30, 2008

*Verification is required for every filing. It may be signed by counsel or an officer of the applicant, or an authorized agent of the applicant.

Send your completed Application Form, including all required attachments as well as the required number of copies, to:

Fifth Revised Sheet 1

P.U.C.O. NO. 5 GENERAL EXCHANGE TARIFF

GENERAL REGULATIONS

Payphone Line Service may be connected to the telephone network as outlined in Sections 9 and 13.

(T)

This tariff does not permit, by a certified local exchange carrier or any other entity, the purchase of local residential service for resale as business service. Nor does this tariff permit the purchase of lifeline telephone service, for resale to other than qualifying lifeline customers. Such resale is prohibited.

I. DESCRIPTION

The following general regulations are applicable in addition to other regulations, rates and charges specified in other sections of this tariff and in the Local Exchange Tariff as they may be revised, added to or supplemented by superseding sheets.

II. LIABILITY AND OBLIGATION OF TELEPHONE COMPANY

A. Availability of facilities

The Telephone Company's obligation to furnish service or to continue to furnish service is dependent on its ability to obtain, retain and maintain suitable facilities and rights-of-way without unreasonable expense and to provide for the installation and testing of those facilities required incident to the furnishing and maintenance of that service.

Original Sheet 8

P.U.C.O. NO. 5 GENERAL EXCHANGE TARIFF

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

(M)

II. BASIC RATE INTERFACE II (BRI II)

A. General

1. Integrated Services Digital Network - Basic Rate Interface II (ISDN-BRI II) is a local exchange telecommunications service that provides integrated voice and data communications capability. ISDN-BRI II service supports the simultaneous transmission of circuit switched voice and circuit switched data over a single exchange access line.

ISDN-BRI II provides a customer two B-channels with transmission speeds up to 64 Kbps each and one 16 Kbps D-channel. The service provides switched communication paths providing end user access to a variety of circuit-switched services and features including data, voice and video, which conform to internationally developed, published and recognized standards generated by the International Telecommunications Union.

2. Service Capabilities

- a. ISDN-BRI II consists of three distinct channels delivered to the customer's premises: two B (bearer) channels and one D (delta) channel. This is also known as 2B+D. ISDN-BRI II is not available in other channel configurations of 1B+D or 0B+D.
- b. The B-channel carries circuit-switched voice and/or circuit-switched data communications at speeds up to 64 Kbps, from the customer's premises, over the loop facility, to the central office. Packet data services are not available over the B-channel.
- c. The D-channel carries administrative signaling at 16 Kbps for call-control for either a voice or data B-channel call on the ISDN-BRI II line. The D-channel does not have voice capability. Packet data services are not available on the D-channel.
- d. Customers subscribing to ISDN-BRI II must comply with ISDN Basic Rate Network Interface specifications as specified by the Company. The ISDN Basic Rate Interface II is comprised of a limited set of standard user-network interfaces. The BRI II customer premises equipment (CPE) located at the customer premises must be compatible with the network interface. This interface is defined as follows:

A two-wire interface is the physical interface between a central office switch equipped with ISDN and the customer premises equipment which is necessary for terminating a telephone circuit or facility at the customer premises.

A. General (Continued)

3. Standard Features

- a. Closed User Group – allows the user to establish subnetworks within which the members of the Closed User Group can communicate. Each data terminal in a Closed User Group can be arranged in one of the following modes:
 - i. Outgoing Access -- The data terminal originates outgoing calls only.
 - ii. Incoming Access -- The data terminal receives incoming calls only.
 - iii. Incoming Calls Barred – The data terminal originates outgoing calls only to the data terminals in the Closed User Group with which it is associated.
 - iv. Outgoing Calls Barred – The data terminal receives incoming calls only from the data terminals in the Closed User Group with which it is associated.
 - v. Unrestricted Access – The data terminal receives and originates both incoming and outgoing calls.
- b. Configuration Group – Associates a button or buttons of an ISDN-CPE station to a feature or group of features. Each different telephone set button arrangement requires that a different Configuration Group be assigned.

4. Service Capability Packages*

- a. Customers shall subscribe to one of the following Service Capability Packages specifying the assignment of each B-channel. Through the North American ISDN Users' Forum, a set of ISDN Service Capability Packages have been defined and given a letter designation. Each of the Service Capability Packages describes a specific interface configuration as well as the features and capabilities of that interface. Detailed technical specifications are defined for each of the Service Capability Packages. These packages have been established to help simplify the ordering, provisioning, and installation of ISDN.

(M)

* ISDN terminal equipment is the responsibility of the customer and must support the configuration, optional services, and features chosen by the customer.

5. Optional Services and Features*

- a. The ISDN-BRI II offering provides the customer with the following features, where available.
 - i. Call Pickup – Originating and Terminating – This feature allows a station user to answer any call within an associated predesignated pickup group. If more than one line within the pickup group has an unanswered incoming call, the call to be answered is selected by the central office switching system.
 - ii. Flexible Calling - This feature includes:
 - Hold/Retrieve*
 - B-Channel Reservation
 - Three-Way Conference Calling
 - Add-on (previously held conference call)
 - Drop Last Call
 - Transfer
 - No Transfer Restriction
 - Consultation Hold
 - iii. Six-Way Conference Calling, Drop, Hold, Transfer – This feature allows the customer to add up to five parties to an existing call. This feature is for voice calls only.
 - iv. Automatic Callback (Repeat Dial) – This feature provides automatic callback to the last dialed number.

* ISDN terminal equipment is the responsibility of the customer and must support the configuration, optional services, and features chosen by the customer.

a. The ISDN-BRI II... (Continued)

- v. Additional Call Offering (ACO) – This feature allows multiple call appearances per telephone number (B-channel) per telephone set. Example: A customer can put up to 3 calls on hold and receive another call on the phone, with all calling parties dialing the telephone number associated with voice on B-channel.
- vi. Call Forwarding – This feature provides the customer with Call Forwarding Variable, Call Forward – Busy and Call Forward - No Answer with Message Waiting Indicator, either Visual or Audible.
- vii. Calling Number Identification - This feature permits the customer to receive and display the calling party telephone number for calls placed to the customer.
- viii. Calling Name Identification – This feature permits the customer to receive and display the calling party name for calls placed to the customer.
- ix. Additional Directory Numbers – Additional directory numbers are available on each B-channel in addition to the primary directory number assigned to the B-channel. Additional Directory Numbers are purchased separately.
- x. Multi-line Hunt Group – This feature is limited to hunting within ISDN-BRI II lines and on an individual customer location basis. Directory numbers within the multi-line hunt group may not have multiple call appearances.

(M)

* ISDN terminal equipment is the responsibility of the customer and must support the configuration, optional services, and features chosen by the customer.

- xi. Feature Package 1 - This package includes:
Calling Number ID/Calling Name ID
Call Forwarding
Flexible Calling
Automatic Callback
Additional Call Offering

- xii. Loop Extension – ISDN-BRI II is available only where the customer's service location is within the provisioning limitations as determined prior to installation of the service. This limitation is a cable plant distance of approximately 18,000 feet. The actual distance is dependent on decibel (db) loss and not just physical loop length. Should the customer's service location exceed said limitations, service will be provided where the Company has compatible facilities available, or where existing facilities can be made compatible by the addition of special equipment. This service, which carries an additional charge, is called Individual Line Loop Extension and will extend the loop to approximately 36,000 feet.

B. Regulations

1. This service is offered only where facilities and appropriate technology exist.
2. Local circuit-switched voice and data calls will be billed on a flat-rate basis, as shown in **paragraph** II.C. following. Toll charges shall apply when circuit-switched data or voice calls are made outside of the customer's designated local calling area. When two simultaneous B-channels are combined for a maximum data speed of 128 Kbps, the toll call will be billed as if two calls were dialed by the originating customer. (T)
3. In exchanges where IntraLATA Presubscription has been implemented, only one InterLATA and one IntraLATA Carrier may be selected for all B-channels associated with the same ISDN-BRI II Service. Access via 101XXXX to other Interexchange Carriers is available.
4. A minimum service period of three months is required. (M)
5. The Company shall terminate ISDN-BRI II Services at the Company Network Interface Device (NID) located at the customer's premises. (M1)
6. Two Primary Directory Numbers will be included with an ISDN-BRI II Service, one for each B-Channel. If Additional Directory Numbers are required on either channel, an additional charge, as specified in **paragraph** II.D. following of the Pricing List, will apply for each additional number. (T)
7. ISDN-compatible customer premises terminal equipment is required for proper operation. It is the customer's responsibility to provide necessary power and obtain such equipment. (M1)

B. Regulations (Continued)

8. The provisions for temporary suspension of service, as defined in Section 18 of this tariff, do not apply to ISDN-BRI II Service.
9. This service is available only from central offices, which have the necessary facilities to provide ISDN-BRI II on the standard network platform. In the event a customer is provided service from a non-ISDN compatible central office, the Company will provide ISDN-BRI II Service from an alternative serving central office. This provision is accomplished by utilizing a 'hubbing' architecture and the subscriber may be required to accept a foreign NXX.

When a foreign NXX is required, mileage charges for Foreign Exchange Service, as specified in the Private Line Service Tariff, P.U.C.O. No. 1, Section 2, will apply in addition to the rates and charges included in this section. Due to the nature of the 'hubbing' architecture and the use of a unique NXX, the local calling area may change.

Emergency 911 calls placed over ISDN-BRI II lines provisioned via this arrangement will be identified as the foreign service central office NXX and not the non-ISDN compatible central office NXX. The Company shall not be liable for any loss or damages arising from emergency calls placed from ISDN-BRI II lines provisioned via a foreign serving central office.

10. One directory listing will be provided with ISDN-BRI II. Additional listings are available as specified in Section 2 of this tariff.
11. ISDN-BRI II Service will be assessed the appropriate interstate charges (e.g. End User Common Line and Presubscribed Interexchange Carrier Charge), as defined in the Company's Interstate Tariff – F.C.C. No. 1.
12. ISDN-BRI II Service will be assessed the Intrastate Access Fee (IAF) as found in United Telephone Company of Ohio's P.U.C.O. No. 1, Access Service Tariff.

II. BASIC RATE INTERFACE II (BRI II) (Continued)

B. Regulations (Continued)

13. ISDN-BRI II does not provide for the transmission of packet data on either the D-channel or one of the B-channels.
14. ISDN-compatible terminal equipment is a requirement for operation and is the customer's responsibility. ISDN customer-premises equipment is dependent upon commercial power and not power from the Company central office. For their safety and well being, all ISDN customers are encouraged to maintain a non-ISDN access line on the premises for emergency calls in the event of a loss of commercial electrical power. In the event a subscriber elects to disconnect or not maintain a non-ISDN access line, the customer assumes full responsibility for telephone service in the event of an emergency.

(D)

(D)

15. Verification and Emergency Interrupt service is not available for ISDN-BRI II Service.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

II. BASIC RATE INTERFACE II (BRI II) (Continued)

C. Application of Rates

1. ISDN-BRI II Service is offered on an unlimited use basis. All applicable state and federal charges will apply. Extended Area Service (EAS) charges, if applicable as defined in the Local Exchange Tariff, P.U.C.O. No. 6, apply per ISDN-BRI II B-Channel. Toll charges apply when circuit-switched data or voice calls are completed outside the customer's designated local calling area.
2. The monthly rates for Service Capability Packages are applied on a per package basis.
3. The ISDN-BRI II monthly rates are in addition to the applicable individual residence or individual business **line access** line rate. These rates vary by service area and can be found in Section B of the Company's P.U.C.O. No. 6 tariff, and Section 30 of this tariff.
4. The Non-Recurring Charge for ISDN Service Capability Package installation will be discounted 50% when a customer commits to a 12-month service period or 100% when a customer commits to a 24-month service period. If termination of service prior to the end of the commitment occurs, the customer is responsible for payment of the discounted amount of the Non-Recurring Charge, which represents the installation charge initially waived.

(C)

However, this termination requirement will not apply when the customer converts to a next generation service offering of a separately tariffed service, provided that:

The service period for the new service offering is a minimum period equal to or exceeding the remaining service period of the disconnected arrangement, whichever is greater;

The service orders to install the new service and disconnect the old service are related together, and there is no lapse in service between installation of the new service and disconnection of the existing service; and

The service orders are for the same customer at the same location.

P.U.C.O. NO. 5
GENERAL EXCHANGE TARIFF

GENERAL REGULATIONS

Payphone Line Service may be connected to the telephone network as outlined in Sections 9 and 13.

This tariff does not permit, by a certified local exchange carrier or any other entity, the purchase of local residential service for resale as business service. Nor does this tariff permit the purchase of lifeline telephone service, for resale to other than qualifying lifeline customers. Such resale is prohibited.

I. DESCRIPTION

The following general regulations are applicable in addition to other regulations, rates and charges specified in other sections of this tariff and in the Local Exchange Tariff as they may be revised, added to or supplemented by superseding sheets.

II. LIABILITY AND OBLIGATION OF TELEPHONE COMPANY

A. Availability of facilities

The Telephone Company's obligation to furnish service or to continue to furnish service is dependent on its ability to obtain, retain and maintain suitable facilities and rights-of-way without unreasonable expense and to provide for the installation and testing of those facilities required incident to the furnishing and maintenance of that service.

1. Contribution in Aid to Construction - Land Development

Contribution in aid to construction may be required by the Company from an applicant to protect the general body of rate payers where construction is required and satisfactory assurance of demand for service is not provided by the applicant or forecasted by the Company. See Embarq's Business Terms and Conditions for additional detail.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

II. BASIC RATE INTERFACE II (BRI II) ⁽¹⁾

(C)

A. General

1. Integrated Services Digital Network - Basic Rate Interface II (ISDN-BRI II) is a local exchange telecommunications service that provides integrated voice and data communications capability. ISDN-BRI II service supports the simultaneous transmission of circuit switched voice and circuit switched data over a single exchange access line.

ISDN-BRI II provides a customer two B-channels with transmission speeds up to 64 Kbps each and one 16 Kbps D-channel. The service provides switched communication paths providing end user access to a variety of circuit-switched services and features including data, voice and video, which conform to internationally developed, published and recognized standards generated by the International Telecommunications Union.

2. Service Capabilities

- a. ISDN-BRI II consists of three distinct channels delivered to the customer's premises: two B (bearer) channels and one D (delta) channel. This is also known as 2B+D. ISDN-BRI II is not available in other channel configurations of 1B+D or 0B+D.
- b. The B-channel carries circuit-switched voice and/or circuit-switched data communications at speeds up to 64 Kbps, from the customer's premises, over the loop facility, to the central office. Packet data services are not available over the B-channel.

(M)

(M)

- ⁽¹⁾ **Effective July 30, 2008, this service is no longer available to new residential customers. Existing customers may retain their current service at the same location until such service is changed or discontinued by the customer.**

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

II. BASIC RATE INTERFACE II (BRI II) ⁽¹⁾ (Continued)

A. General (Continued)

2. Service Capabilities (Continued)

- c. The D-channel carries administrative signaling at 16 Kbps for call-control for either a voice or data B-channel call on the ISDN-BRI II line. The D-channel does not have voice capability. Packet data services are not available on the D-channel.
- d. Customers subscribing to ISDN-BRI II must comply with ISDN Basic Rate Network Interface specifications as specified by the Company. The ISDN Basic Rate Interface II is comprised of a limited set of standard user-network interfaces. The BRI II customer premises equipment (CPE) located at the customer premises must be compatible with the network interface. This interface is defined as follows:

A two-wire interface is the physical interface between a central office switch equipped with ISDN and the customer premises equipment which is necessary for terminating a telephone circuit or facility at the customer premises.

(M)

(M)

⁽¹⁾ **Effective July 30, 2008, this service is no longer available to new residential customers. Existing customers may retain their current service at the same location until such service is changed or discontinued by the customer.**

A. General (Continued)

3. Standard Features

- a. Closed User Group – allows the user to establish subnetworks within which the members of the Closed User Group can communicate. Each data terminal in a Closed User Group can be arranged in one of the following modes:
 - i. Outgoing Access -- The data terminal originates outgoing calls only.
 - ii. Incoming Access -- The data terminal receives incoming calls only.
 - iii. Incoming Calls Barred – The data terminal originates outgoing calls only to the data terminals in the Closed User Group with which it is associated.
 - iv. Outgoing Calls Barred – The data terminal receives incoming calls only from the data terminals in the Closed User Group with which it is associated.
 - v. Unrestricted Access – The data terminal receives and originates both incoming and outgoing calls.
- b. Configuration Group – Associates a button or buttons of an ISDN-CPE station to a feature or group of features. Each different telephone set button arrangement requires that a different Configuration Group be assigned.

4. Service Capability Packages ⁽²⁾

(T)

- a. Customers shall subscribe to one of the following Service Capability Packages specifying the assignment of each B-channel. Through the North American ISDN Users' Forum, a set of ISDN Service Capability Packages have been defined and given a letter designation. Each of the Service Capability Packages describes a specific interface configuration as well as the features and capabilities of that interface. Detailed technical specifications are defined for each of the Service Capability Packages. These packages have been established to help simplify the ordering, provisioning, and installation of ISDN.

⁽¹⁾ **Effective July 30, 2008, this service is no longer available to new residential customers. Existing customers may retain their current service at the same location until such service is changed or discontinued by the customer.**

(N)

(N)

⁽²⁾ ISDN terminal equipment is the responsibility of the customer and must support the configuration, optional services, and features chosen by the customer.

II. BASIC RATE INTERFACE II (BRI II) ⁽¹⁾ (Continued) (C)

A. General (Continued)

5. Optional Services and Features ⁽²⁾ (T)

a. The ISDN-BRI II offering provides the customer with the following features, where available.

i. Call Pickup – Originating and Terminating – This feature allows a station user to answer any call within an associated pre-designated pickup group. If more than one line within the pickup group has an unanswered incoming call, the call to be answered is selected by the central office switching system.

ii. Flexible Calling - This feature includes:
Hold/Retrieve ⁽²⁾ (T)
B-Channel Reservation
Three-Way Conference Calling
Add-on (previously held conference call)
Drop Last Call
Transfer
No Transfer Restriction
Consultation Hold

iii. Six-Way Conference Calling, Drop, Hold, Transfer – This feature allows the customer to add up to five parties to an existing call. This feature is for voice calls only.

iv. Automatic Callback (Repeat Dial) – This feature provides automatic callback to the last dialed number.

⁽¹⁾ **Effective July 30, 2008, this service is no longer available to new residential customers. Existing customers may retain their current service at the same location until such service is changed or discontinued by the customer.** (N)

5. Optional Services and Features ⁽²⁾ (Continued) (T)

a. The ISDN-BRI II... (Continued)

- v. Additional Call Offering (ACO) – This feature allows multiple call appearances per telephone number (B-channel) per telephone set. Example: A customer can put up to 3 calls on hold and receive another call on the phone, with all calling parties dialing the telephone number associated with voice on B-channel.
- vi. Call Forwarding – This feature provides the customer with Call Forwarding Variable, Call Forward – Busy and Call Forward - No Answer with Message Waiting Indicator, either Visual or Audible.
- vii. Calling Number Identification - This feature permits the customer to receive and display the calling party telephone number for calls placed to the customer.
- viii. Calling Name Identification – This feature permits the customer to receive and display the calling party name for calls placed to the customer.
- ix. Additional Directory Numbers – Additional directory numbers are available on each B-channel in addition to the primary directory number assigned to the B-channel. Additional Directory Numbers are purchased separately.
- x. Multi-line Hunt Group – This feature is limited to hunting within ISDN-BRI II lines and on an individual customer location basis. Directory numbers within the multi-line hunt group may not have multiple call appearances.

⁽¹⁾ **Effective July 30, 2008, this service is no longer available to new residential customers. Existing customers may retain their current service at the same location until such service is changed or discontinued by the customer.** (N)

xi. Feature Package 1 - This package includes:

Calling Number ID/Calling Name ID

Call Forwarding

Flexible Calling

Automatic Callback

Additional Call Offering

- xii. Loop Extension – ISDN-BRI II is available only where the customer's service location is within the provisioning limitations as determined prior to installation of the service. This limitation is a cable plant distance of approximately 18,000 feet. The actual distance is dependent on decibel (db) loss and not just physical loop length. Should the customer's service location exceed said limitations, service will be provided where the Company has compatible facilities available, or where existing facilities can be made compatible by the addition of special equipment. This service, which carries an additional charge, is called Individual Line Loop Extension and will extend the loop to approximately 36,000 feet.

⁽¹⁾ **Effective July 30, 2008, this service is no longer available to new residential customers. Existing customers may retain their current service at the same location until such service is changed or discontinued by the customer.** (N)

II. BASIC RATE INTERFACE II (BRI II) ⁽¹⁾ (Continued)

(C)

B. Regulations

1. This service is offered only where facilities and appropriate technology exist.
2. Local circuit-switched voice and data calls will be billed on a flat-rate basis, as shown in paragraph II.C. following. Toll charges shall apply when circuit-switched data or voice calls are made outside of the customer's designated local calling area. When two simultaneous B-channels are combined for a maximum data speed of 128 Kbps, the toll call will be billed as if two calls were dialed by the originating customer.
3. In exchanges where IntraLATA Presubscription has been implemented, only one InterLATA and one IntraLATA Carrier may be selected for all B-channels associated with the same ISDN-BRI II Service. Access via 101XXXX to other Interexchange Carriers is available.
4. A minimum service period of three months is required.
5. The Company shall terminate ISDN-BRI II Services at the Company Network Interface Device (NID) located at the customer's premises.
6. Two Primary Directory Numbers will be included with an ISDN-BRI II Service, one for each B-Channel. If Additional Directory Numbers are required on either channel, an additional charge, as specified in paragraph II.D. following of the Pricing List, will apply for each additional number.
7. ISDN-compatible customer premises terminal equipment is required for proper operation. It is the customer's responsibility to provide necessary power and obtain such equipment.

⁽¹⁾ **Effective July 30, 2008, this service is no longer available to new residential customers. Existing customers may retain their current service at the same location until such service is changed or discontinued by the customer.**

P.U.C.O. NO. 5
GENERAL EXCHANGE TARIFF

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

II. BASIC RATE INTERFACE II (BRI II) ⁽¹⁾ (Continued)

(C)

B. Regulations (Continued)

8. The provisions for temporary suspension of service, as defined in Section 18 of this tariff, do not apply to ISDN-BRI II Service.
9. This service is available only from central offices, which have the necessary facilities to provide ISDN-BRI II on the standard network platform. In the event a customer is provided service from a non-ISDN compatible central office, the Company will provide ISDN-BRI II Service from an alternative serving central office. This provision is accomplished by utilizing a 'hubbing' architecture and the subscriber may be required to accept a foreign NXX.

When a foreign NXX is required, mileage charges for Foreign Exchange Service, as specified in the Private Line Service Tariff, P.U.C.O. No. 1, Section 2, will apply in addition to the rates and charges included in this section. Due to the nature of the 'hubbing' architecture and the use of a unique NXX, the local calling area may change.

Emergency 911 calls placed over ISDN-BRI II lines provisioned via this arrangement will be identified as the foreign service central office NXX and not the non-ISDN compatible central office NXX. The Company shall not be liable for any loss or damages arising from emergency calls placed from ISDN-BRI II lines provisioned via a foreign serving central office.

10. One directory listing will be provided with ISDN-BRI II. Additional listings are available as specified in Section 2 of this tariff.
11. ISDN-BRI II Service will be assessed the appropriate interstate charges (e.g. End User Common Line and Presubscribed Interexchange Carrier Charge), as defined in the Company's Interstate Tariff – F.C.C. No. 1.
12. ISDN-BRI II Service will be assessed the Intrastate Access Fee (IAF) as found in United Telephone Company of Ohio's P.U.C.O. No. 1, Access Service Tariff.

⁽¹⁾ **Effective July 30, 2008, this service is no longer available to new residential customers. Existing customers may retain their current service at the same location until such service is changed or discontinued by the customer.**

II. BASIC RATE INTERFACE II (BRI II) ⁽¹⁾ (Continued)

(C)

B. Regulations (Continued)

13. ISDN-BRI II does not provide for the transmission of packet data on either the D-channel or one of the B-channels.
14. ISDN-compatible terminal equipment is a requirement for operation and is the customer's responsibility. ISDN customer-premises equipment is dependent upon commercial power and not power from the Company central office. For their safety and well being, all ISDN customers are encouraged to maintain a non-ISDN access line on the premises for emergency calls in the event of a loss of commercial electrical power. In the event a subscriber elects to disconnect or not maintain a non-ISDN access line, the customer assumes full responsibility for telephone service in the event of an emergency.
15. Verification and Emergency Interrupt service is not available for ISDN-BRI II Service.

⁽¹⁾ **Effective July 30, 2008, this service is no longer available to new residential customers. Existing customers may retain their current service at the same location until such service is changed or discontinued by the customer.**

II. BASIC RATE INTERFACE II (BRI II) ⁽¹⁾ (Continued)

(C)

C. Application of Rates

1. ISDN-BRI II Service is offered on an unlimited use basis. All applicable state and federal charges will apply. Extended Area Service (EAS) charges, if applicable as defined in the Local Exchange Tariff, P.U.C.O. No. 6, apply per ISDN-BRI II B-Channel. Toll charges apply when circuit-switched data or voice calls are completed outside the customer's designated local calling area.
2. The monthly rates for Service Capability Packages are applied on a per package basis.
3. The ISDN-BRI II monthly rates are in addition to the applicable individual residence or individual business line access line rate. These rates vary by service area and can be found in Section B of the Company's P.U.C.O. No. 6 tariff, and Section 30 of this tariff.
4. The Non-Recurring Charge for ISDN Service Capability Package installation will be discounted 50% when a customer commits to a 12-month service period or 100% when a customer commits to a 24-month service period. If termination of service prior to the end of the commitment occurs, the customer is responsible for payment of the discounted amount of the Non-Recurring Charge, which represents the installation charge initially waived.

However, this termination requirement will not apply when the customer converts to a next generation service offering of a separately tariffed service, provided that:

The service period for the new service offering is a minimum period equal to or exceeding the remaining service period of the disconnected arrangement, whichever is greater;

The service orders to install the new service and disconnect the old service are related together, and there is no lapse in service between installation of the new service and disconnection of the existing service; and

The service orders are for the same customer at the same location.

⁽¹⁾ **Effective July 30, 2008, this service is no longer available to new residential customers. Existing customers may retain their current service at the same location until such service is changed or discontinued by the customer.**

(C)

C. Application of Rates (Continued)

5. ISDN-BRI II provides for one Configuration Group to be established at the initial implementation of service. Subsequent additions of Configuration Groups or in excess of one group on the initial establishment of service will be charged an installation charge per Configuration Group.
6. A Change Charge will apply for a database change subsequent to the installation of an ISDN-BRI II Service. This includes changing, adding, or deleting features or feature packages, directory numbers, or number appearances.

⁽¹⁾ **Effective July 30, 2008, this service is no longer available to new residential customers. Existing customers may retain their current service at the same location until such service is changed or discontinued by the customer.**
