I. INTRODUCTION

1 **Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

2 A. My name is William Don Wathen Jr. and my business address is 139 East Fourth
3 Street, Cincinnati, Ohio 45202

4 **Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?**

5 A. I am employed by the Duke Energy Corporation (Duke Energy) affiliated companies
6 as Director, Revenue Requirements.

7 **Q. PLEASE SUMMARIZE YOUR EDUCATION AND PROFESSIONAL**
8 **QUALIFICATIONS.**

9 A. I received Bachelor Degrees in Business and Chemical Engineering, and a Master
10 of Business Administration Degree, all from the University of Kentucky. After
11 completing graduate studies, I was employed by Kentucky Utilities Company as a
12 planning analyst. In 1989, I began employment with the Indiana Utility
13 Regulatory Commission as a senior engineer. From 1992 until mid-1998, I was
14 employed by SVBK Consulting Group, where I held several positions as a
15 consultant focusing principally on utility rate matters. I was hired by Cinergy
16 Services, Inc. in 1998, as an Economic and Financial Specialist in the Budgets and
17 Forecasts Department. In 1999, I was promoted to the position of Manager,
18 Financial Forecasts. In August 2003, I was named to my current position as
19 Director of Revenue Requirements in the Rates Department.

20 **Q. HAVE YOU PREVIOUSLY TESTIFIED BEFORE THIS COMMISSION?**

21 A. Yes. I previously testified in a number of cases before this and other regulatory
22 commissions.

1 Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS
2 PROCEEDING?

3 A. I sponsor Schedules A-1, A-2, B-1, B-5, B-5.1, B-6, B-6.1, B-7, B-7.1, B-7.2, B-8,
4 C-1, C-2, C-2.1, C-3, C-3.1 through C-3.23, C-5 through C-10, C-12.1 through C-
5 13, and D-5. In addition, I will address certain test period operating income and
6 rate base adjustments. I also sponsor Supplemental Filing Requirements (C)(7),
7 (C)(8), and (C)(14). Finally, I will be proposing methodologies to be used a new
8 rider being proposed by Duke Energy Ohio (DE-Ohio or Company), namely, the
9 Distribution Rider (Rider DR).

II. TEST PERIOD AND DATE CERTAIN

10 Q. WHAT ARE THE TEST PERIOD AND DATE CERTAIN IN THIS
11 PROCEEDING?

12 A. Pursuant to the Company's Motion to Set Test Period filed in this proceeding on
13 June 25, 2008, which was approved by the Commission in its order on July 23,
14 2008, the test year consists of the twelve months ended December 31, 2008, and
15 the date certain is March 31, 2008.

III. SCHEDULES AND SUPPLEMENTAL FILING REQUIREMENTS SPONSORED BY WTNESS

16 Q. PLEASE DESCRIBE SCHEDULE A-1.

17 A. Schedule A-1 is the overall financial summary of DE-Ohio's electric distribution
18 operations. The data presented on Schedule A-1 shows that the Company will
19 earn a 3.56% overall return for the test year and that an increase of \$85.6 million
20 over current electric distribution revenue is required to earn a reasonable rate of
21 return on its electric distribution rate base at the Company's current cost of capital

1 of 9.10%.

2 **Q. PLEASE DESCRIBE SCHEDULE A-2.**

3 A. Schedule A-2 is a calculation of mirrored Construction Work in Progress (CWIP)
4 revenue surcredit rider. As indicated on this schedule, the Company has no
5 mirrored CWIP revenue.

6 **Q. PLEASE DESCRIBE SCHEDULE B-1.**

7 A. Schedule B-1 is the jurisdictional rate base summary. The rate base components
8 listed on this summary are supported by the various Section B schedules. The
9 plant in service and reserve for accumulated depreciation were summarized from
10 Schedules B-2 and B-3, sponsored by DE-Ohio witness Mr. Carl J. Council, Jr.
11 The working capital and other items of rate base were summarized from
12 Schedules B-5 and B-6, which I sponsor. The total jurisdictional rate base, as
13 shown on this schedule, is \$979,490,589 at the date certain, March 31, 2008.

14 **Q. PLEASE DESCRIBE SCHEDULES B-5 AND B-5.1.**

15 A. Schedule B-5 is a summary of allowance for working capital, which includes cash
16 working capital, materials and supplies (M&S) and customer service deposits.
17 Additional detail for all of these items is shown on Schedule B-5.1, including the
18 average thirteen-month balance and the actual balance as of March 31, 2008, the
19 date certain in this proceeding.

20 **Q. HOW MUCH CASH WORKING CAPITAL ALLOWANCE IS BEING**
21 **REQUESTED BY DE-OHIO IN THIS CASE?**

22 A. DE-Ohio is not making a request for Cash Working Capital Allowance in this
23 proceeding.

1 **Q. IS THE COMPANY'S REQUEST FOR \$0 CASH WORKING CAPITAL IN**
2 **ITS RATE BASE A REASONABLE REQUEST?**

3 A. It is. Although the Commission Staff often uses a lead/lag study to determine a
4 utility's cash working capital, it has recognized that methods other than strict
5 adherence to lead/lag studies can produce reasonable results for estimating cash
6 working capital. A very recent example can be found in the Staff Report issued in
7 the recent gas rate case involving Suburban Natural Gas Company (Suburban),
8 Case No. 07-689-GA-AIR. In the report, the Staff made no mention of any
9 requirement for Suburban to develop a lead/lag study. Instead, the Staff
10 advocated the use of the "one-eighth method"¹ for estimating cash working capital
11 (see Attachment WDW-1, which is an excerpt from the Staff Report in Case No.
12 07-689-GA-AIR, filed January 9, 2008). It should be noted that Suburban and
13 DE-Ohio are subject to the same filing requirements under O.A.C. 4901-7-01 for
14 "large" utilities.

15 **Q. WHY HAS THE COMPANY INCLUDED NO CASH WORKING**
16 **CAPITAL IN RATE BASE?**

17 A. The question in determining the appropriate level of cash working capital to
18 include in rate base is essentially one of reasonableness. Many jurisdictions
19 consistently use a formula method, such as the one-eighth method discussed
20 above, to estimate cash working capital. This method is accepted at the Federal
21 Energy Regulatory Commission and by several other state regulators, including

¹ The "one-eighth" method, sometimes called the 45-day method, involves estimating cash working capital requirements by dividing a utility's annual non-fuel operating and maintenance expense by eight.

1 the Kentucky Public Service Commission, which regulates DE-Ohio's subsidiary
2 company, Duke Energy Kentucky.

3 Admittedly, a lead/lag study is a more detailed approach but it is a costly
4 and time consuming exercise, and it typically invites considerable dispute over the
5 assumptions used to develop the study. In addition to these reasonable approaches
6 of using the lead/lag study or the one-eighth method, the Company submits that its
7 proposal to include \$0 for its cash working capital allowance is well within the
8 bounds of reasonableness, particularly in light of the Commission Staff's recent
9 recommendations on this topic.

10 **Q. DESCRIBE HOW YOU ESTIMATED THE BALANCE OF MATERIALS**
11 **AND SUPPLIES TO INCLUDE ON SCHEDULES B-5 AND B-5.1.**

12 A. The Company does not project changes in its other M&S balance as part of the
13 budget process. Consequently, in order to reasonably estimate the monthly
14 balance during the test period, the Company has reflected the actual average
15 balance for the thirteen-months ended March 31, 2008. Using a thirteen month
16 average is preferable to using the balance at any single point in time as an average
17 eliminates the impact of any seasonal fluctuations, favorable or unfavorable, that
18 may exist at any point in time. The process of allocating the M&S balance to
19 electric distribution is described in Supplemental Filing Requirement (C)(14),
20 which is discussed later in my testimony.

1 **Q. PLEASE EXPLAIN WHY CUSTOMER SERVICE DEPOSITS ARE**
2 **INCLUDED AS A SOURCE OF WORKING CAPITAL ON SCHEDULE B-**
3 **5.**

4 A. Customer service deposits represent funds held by the Company in advance of
5 service. These funds are included on Schedule B-5 because they provide the
6 Company with a source of capital. The Commission's rules (O.A.C. 4901-7-01)
7 specifically identify this item as one to be included on Schedule B-5. It also
8 prescribes that items included on Schedule B-5 are to be calculated on a thirteen-
9 month average.

10 **Q. HOW DID YOU DERIVE THE FIGURE SHOWN ON SCHEDULES B-5**
11 **AND B-5.1 FOR CUSTOMER SERVICE DEPOSITS?**

12 A. The estimate of customer service deposits to be included in Schedule B-5 reflects
13 the actual thirteen-month average balance for the period ended March 31, 2008,
14 allocated to electric operations based on the ratio of electric customers to total gas
15 and electric retail customers.

16 **Q. DID YOU MAKE ANY FURTHER ADJUSTMENTS TO REFLECT THE**
17 **APPROPRIATE LEVEL OF CUSTOMER DEPOSITS TO DEDUCT**
18 **FROM DE-OHIO'S ELECTRIC DISTRIBUTION RATE BASE?**

19 A. Yes. Because this case only relates to the Company's electric distribution
20 business, we included only the portion of customer deposits attributable to the
21 electric distribution business. This methodology is consistent with the method
22 approved in our prior case (Case No. 05-59-EL-AIR) and was also supported by
23 the Staff in the recent case involving First Energy Corp.'s electric distribution

1 operations (Case No. 07-551-EL-AIR).

2 **Q. PLEASE DESCRIBE SCHEDULE B-6.**

3 A. Schedule B-6 is a summary of other rate base items including any adjustments to
4 these balances as contained on Schedule B-6.1. The items include: customer
5 advances for construction, post-retirement benefits, accumulated deferred
6 investment tax credits, accumulated deferred income taxes, and other rate base
7 adjustments. The investment tax credit balances for the 6% and the 10% credits
8 are non-jurisdictional pursuant to the normalization requirements of the Internal
9 Revenue Code.

10 **Q. PLEASE EXPLAIN THE ADJUSTMENT FOR POST-RETIREMENT**
11 **LIFE INSURANCE AND HEALTH INSURANCE BENEFITS INCLUDED**
12 **ON SCHEDULE B-6 AS A REDUCTION IN RATE BASE.**

13 A. In prior proceedings, the Commission has allowed the Company to internally fund
14 its post-retirement life insurance and health insurance benefits. Accordingly, the
15 amount included on Schedule B-6 represents cumulative expense recovery included
16 in rates, net of benefits paid.

17 **Q. PLEASE DESCRIBE SCHEDULE B-6.1.**

18 A. Schedule B-6.1 summarizes the adjustments to the various other rate base item
19 balances contained on Schedule B-6. Certain balances are eliminated or adjusted
20 to reflect the ratemaking treatment of these or related items in this filing.

21 **Q. PLEASE DESCRIBE SCHEDULE B-7.**

22 A. Schedule B-7 is a summary of the jurisdictional allocation factors used in the
23 development of the revenue requirement. Prior to deregulation of the generation

1 business and the associated unbundling of electric utility services, the distinction
2 “jurisdictional” and “non-jurisdictional” costs was more associated with retail
3 versus wholesale costs. With unbundling, the only “jurisdictional” costs, *i.e.*,
4 costs regulated by the Commission, are distribution costs and there are no
5 “jurisdictional” wholesale distribution customers. Therefore, the allocation
6 factors shown are those used to allocate certain costs between distribution and
7 other electric functions (*i.e.*, transmission and generation).

8 **Q. PLEASE DESCRIBE SCHEDULES B-7.1 AND B-7.2.**

9 A. Schedule B-7.1 provides statistics used to develop the jurisdictional allocation
10 factors shown on Schedule B-7. The requirement for Schedule B-7.2 is to provide
11 an explanation of changes to allocation factors since the prior case.

12 **Q. PLEASE DESCRIBE SCHEDULE B-8.**

13 A. Schedule B-8 is titled “Reserve Capacity Discussion.” DE-Ohio requested a
14 waiver from this standard filing requirement because it relates to generation
15 information. The Commission granted this waiver request by the entry dated July
16 23, 2008.

17 **Q. PLEASE DESCRIBE SCHEDULE C-1.**

18 A. Schedule C-1 sets forth the Company's jurisdictional *pro forma* income statement
19 for the twelve months ending December 31, 2008, at both the current and
20 proposed rates, and assumes that the total amount of the requested increase
21 calculated on Schedule A-1 is authorized in this proceeding. The current adjusted
22 operating results for the test year were summarized from Schedule C-2. Test year
23 revenue at the proposed rates was developed by adding the increase in revenue as

1 set forth on Schedule E-4 to the adjusted operating revenues. The *pro forma*
2 results (column C) were developed by calculating the operating income effect of
3 the requested increase (column B) and adding these amounts to the adjusted
4 revenue and expense (column A). If the full increase were to be authorized, the
5 resulting rate of return would be 9.10%, which is the Company's proposed rate of
6 return.

7 **Q. PLEASE DESCRIBE SCHEDULE C-2.**

8 A. Schedule C-2 shows the Company's jurisdictional adjusted electric operating
9 income associated with its distribution operations for the test year at current rates.

10 This schedule includes unadjusted jurisdictional revenue and expense amounts
11 from Schedule C-2.1, and a summary of the adjustments per Schedule C-3.

12 **Q. PLEASE DESCRIBE SCHEDULE C-2.1.**

13 A. Schedule C-2.1 lists the unadjusted test period operating revenue and expenses, by
14 account. These amounts were derived from the Company's financial records and are
15 summarized and carried forward to Schedule C-2. Also shown on Schedule C-2.1
16 is the jurisdictional allocation of each cost to electric distribution.

17 **Q. PLEASE DESCRIBE SCHEDULE C-3 AND THE ADJUSTMENTS**
18 **SHOWN ON SCHEDULES C-3.1 THROUGH C-3.23.**

19 A. Schedule C-3 is a summary of the jurisdictional adjustments to operating revenues
20 and expenses set forth on Schedules C-3.1 through C-3.23. The effect of each
21 adjustment on Net Operating Income is shown on Line 43. The cumulative
22 impact of the adjustments is summarized on Schedule C-3, page 1 of 4, and
23 carried forward to Schedule C-2.

1 **Q. WHY ARE ADJUSTMENTS TO TEST YEAR ACTUAL AND BUDGET**
2 **INFORMATION NECESSARY?**

3 A. These adjustments are required to reflect the representative ongoing level of
4 revenues and expenses that the Company would experience in a normal year. Some
5 adjustments are required to even out or eliminate the impacts of journal entries
6 made to the actual book accounting data that comprise the first three months in our
7 test year. Other adjustments are to reflect the level of revenue and expenses that
8 would have occurred had all known prospective changes been in effect during the
9 test year.

10 The test year adjustments ensure that prevailing revenues and expenses are
11 properly included in the determination of an ongoing level of rates. We must
12 reflect a proper level of cost in order to give the Company a reasonable
13 opportunity to earn its authorized return. Not capturing these adjustments and
14 reflecting them in the Company's test year would impair the Company's ability to
15 earn a fair rate of return on its electric distribution operations or could result in the
16 Company over-recovering its costs.

17 **Q. PLEASE EXPLAIN THE ADJUSTMENTS TO OPERATING INCOME.**

18 A. Schedule C-3.1 adjusts test period revenue and expense in order to: (1) annualize
19 revenue; (2) eliminate "unbilled" revenue; (3) eliminate Rider TCR revenue; (4)
20 reflect the impact of a proposed change to certain pole attachment fees; and (5)
21 include in the test year revenue attributable to two special contracts. The federal
22 income tax effects of this adjustment are shown on Schedule C-3. The combined
23 jurisdictional adjustment is a net \$10,964,586 decrease in operating revenue.

1 **Q. PLEASE EXPLAIN WHY YOU ANNUALIZE REVENUE.**

2 A. Because the test year includes three months of actual data, it is necessary to make
3 certain adjustments to ensure that the revenue included in the test year is
4 representative of the annual level the Company can expect from its ongoing
5 operations. Also, the methodology employed by the Company to budget revenue
6 for the nine months used in the test year is based on averages to simplify the
7 budgeting process. The revenue by Rate Code as developed on Schedule E-4,
8 applying currently approved rates to test year sales, is a more precise method for
9 determining the test year revenue and is the level that should be used in this
10 proceeding.

11 **Q. WHY DID THE COMPANY ELIMINATE UNBILLED REVENUE AND**
12 **EXPENSE?**

13 A. The Company eliminated the estimated unbilled revenue and expense from its
14 operating results to be consistent with the revenue and volume computations
15 contained on Schedule E-4. The revenue and volume amounts on Schedule E-4 are
16 based on adjusted test year billing statistics and do not reflect estimated unbilled
17 sales.

18 **Q. PLEASE DESCRIBE THE OTHER ADJUSTMENTS INCLUDED IN THE**
19 **FILING.**

20 A. Schedule C-3.2 eliminates Demand Side Management/Energy Efficiency revenue
21 and expense levels from the test year since these amounts are recovered from
22 customers through a separate rider. This jurisdictional adjustment results in a

1 decrease in revenue of \$19,238,882 and a decrease in operating and maintenance
2 (O&M) expense of \$10,552,012.

3 Schedule C-3.3 adjusts operating income for the estimated cost of
4 presenting this case. The Company proposes to defer this expense and amortize it
5 over a three-year period. The Company also proposes to eliminate the
6 amortization of rate case expense approved in Case No. 05-59-EL-AIR that is
7 included in the test year. The rate case expense approved in that case will be fully
8 amortized before the new rates go into effect; consequently, we made an
9 additional adjustment to eliminate existing rate case expense amortization from
10 the test period. The three-year amortization period reflects the approximate time
11 we expect between rate cases and is consistent with the Staff's recommendation in
12 the most recently filed electric distribution rate case, Case No. 07-551-EL-AIR,
13 involving the First Energy Companies. A copy of the relevant pages of the Staff
14 Reports in that case is attached as Attachment WDW-2 to this testimony
15 supporting the three-year amortization period. The net jurisdictional adjustment
16 results in a decrease in annual operating expenses of \$90,475.

17 Schedule C-3.4 adjusts operating income to reflect the annualization of the
18 Company's payroll costs based on the number of full-time, part-time, and
19 temporary employees, and their respective rates of pay in effect at May 1, 2008.
20 This schedule details the calculation of DE-Ohio's direct labor as well as labor
21 allocated to DE-Ohio from the service company and other affiliated companies,
22 consistent with the service agreements previously filed with the Commission and
23 consistent with the methodology approved in the Company's prior retail rate

1 cases.

2 Specifically, as detailed on work paper WPC-3.4b through WPC-3.4i, the
3 annualized straight-time labor for DE-Ohio employees is calculated, by employee
4 classification, by multiplying the number of employees times the annual hours
5 worked to arrive at the number of straight-time hours worked. The hours are then
6 multiplied by an average hourly rate to arrive at the total straight-time labor
7 dollars. Overtime is then added based on percentages derived from actual data for
8 the twelve months ended December 31, 2007, to arrive at total labor. Total labor
9 is then multiplied by an electric O&M expense percentage, also derived from
10 actual data for the twelve months ended December 31, 2007, to calculate the
11 electric O&M labor expense. The calculation is similar for labor expense
12 allocated from the service and affiliated companies. The only difference is that
13 the service company/affiliate total labor expense is multiplied by a percentage
14 derived from actual data for the twelve months ended December 31, 2007, to
15 allocate to DE-Ohio its proportionate share of labor before the electric O&M
16 expense percentages are applied. This jurisdictional adjustment to salaries and
17 wages represents a decrease in expenses of \$5,409,871.

18 Schedule C-3.5 adjusts operating income to annualize depreciation expense
19 based on the utility plant included in rate base and the depreciation accrual rates
20 proposed in this proceeding. Annualized depreciation expense is calculated on
21 Schedule B-3.2, and is sponsored by Mr. Council. This jurisdictional adjustment
22 results in an increase in depreciation expense of \$7,979,420.

23 Schedule C-3.6 adjusts operating income to include, as an operating

1 expense, interest computed at 5% per annum on the thirteen-month average of
2 distribution business's share electric operations customer service deposits. This
3 jurisdictional adjustment results in an increase in O&M expense of \$177,590.

4 Schedule C-3.7 adjusts operating income to eliminate test year revenue
5 and expense related to the existing Distribution Reliability Investment Rider
6 (Rider DRI) approved in the prior case, Case No. 05-59-EL-AIR. The adjustment
7 results in a \$7,072,470 decrease in operating revenue and a corresponding
8 decrease in amortization expenses.

9 Schedule C-3.8 adjusts operating income to annualize property tax
10 expense based on the Ohio Average Property Tax Rate for 2007 (per \$1,000 of
11 valuation) and the estimated valuation percentages on date certain plant. Also
12 included in this computation is the property tax on the average electric distribution
13 M&S balance. This jurisdictional adjustment to property tax expense results in a
14 decrease in taxes other than income taxes of \$567,398.

15 Schedule C-3.9 is an adjustment to eliminate from the test year, non-
16 jurisdictional operating expenses that were allocated to DE-Ohio from Duke
17 Energy Shared Services, Inc. This adjustment results in decrease in O&M
18 expense of \$84,870.

19 Schedule C-3.10 adjusts operating income to reflect interest expense
20 deductible for federal income tax purposes. The *pro forma* tax deduction is based
21 on the embedded weighted cost of long-term debt of 2.69% as shown on Schedule
22 D-1A. This adjustment reflects federal income tax at 35% on the interest cost
23 included in the cost of capital. The adjustment has been determined by

1 multiplying the weighted cost of long-term debt and the jurisdictional rate base, as
2 indicated on Schedule B-1. Also included as a part of this adjustment is the
3 elimination of interest-related tax Schedule M items and deferred taxes. This
4 jurisdictional adjustment results in a \$667,709 decrease in income tax expense.

5 Schedule C-3.11 is an adjustment to eliminate, consistent with past
6 Commission precedent, a portion of the Company's Edison Electric Institute dues
7 that are not traditionally approved for recovery in retail rates by the Commission.
8 This adjustment also adds to expense an amount of the dues that was
9 inappropriately allocated to gas operations. The net effect of this adjustment
10 decreases O&M expense by \$80,108.

11 Schedule C-3.12 adjusts operating income to eliminate the Ohio Excise
12 Tax Rider ("kWh tax") revenues and expenses from the test year. This
13 jurisdictional adjustment results in a decrease in revenue of \$73,173,261 and a
14 decrease in taxes other than income taxes of \$73,128,969.

15 Schedule C-3.13 adjusts operating income to eliminate the "non-business"
16 expenses related to the Hartwell Recreation Center. These costs were summarized
17 from Schedule B-2.5 and have been allocated to electric operations. This
18 adjustment is similar to the adjustment performed in prior cases and adopted by
19 the Commission. This jurisdictional adjustment results in a \$32,901 decrease in
20 O&M expense and a decrease in taxes other than income taxes of \$10.

21 Schedule C-3.14 adjusts operating income to eliminate non-jurisdictional
22 expenses from the test year. Included in unadjusted test year expense are club
23 dues, amortization of wholesale merger expense, and advertising expenses that are

1 not recoverable in electric distribution rates. The Company proposes to eliminate
2 these charges through a jurisdictional adjustment that decreases O&M expense by
3 \$95,962.

4 Schedule C-3.15 adjusts operating income to annualize the Commission
5 and Ohio Consumers' Counsel annual assessments to the latest known levels.
6 This jurisdictional adjustment results in a \$124,473 decrease in O&M expense.

7 Schedule C-3.16 adjusts operating income to annualize uncollectible
8 expense based on the adjusted base revenue shown on Schedule C-2, less
9 interdepartmental revenue times the uncollectible expense factor shown on
10 Schedule C-10. This adjustment is consistent with the methodology used in prior
11 proceedings. This jurisdictional adjustment results in a \$22,958,114 decrease in
12 O&M expense.

13 Schedule C-3.17 adjusts operating income to annualize pension and
14 benefits expense based on annualized labor expense, as determined on Schedule
15 C-3.4, and the budgeted loading rate. This jurisdictional adjustment is similar to
16 the adjustment performed in prior cases and adopted by this Commission and
17 results in a decrease in O&M expenses of \$3,849,322.

18 Schedule C-3.18 adjusts regulatory asset amortization approved in Case
19 No. 05-59-EL-AIR to (1) eliminate amortization of disconnect moratorium
20 expenses that will cease in 2008, and (2) adjust the amortization of the gain on the
21 sale of the Lattice Towers that is being credited to customers over a three-year
22 period. The Company is simply proposing to take the remaining amount of the
23 gain on the sale of the towers, which is the total amount of the gain less the

1 amount that has already been amortized, and amortize it over three years. Details
2 are provided on work paper WPC-3.18a. This jurisdictional adjustment results in
3 a net increase in O&M expense of \$201,326.

4 Schedule C-3.19 amortizes a portion of the merger savings already
5 provided to customers in 2006. As DE-Ohio witness Mr. Paul G. Smith discusses
6 in his direct testimony, the Company is proposing to ensure that it is made whole
7 on its prior agreement regarding the sharing of merger savings between customer
8 and shareholder. The regulatory asset he proposes to create will be amortized
9 over the same period as rate case expense - three years. This jurisdictional
10 adjustment results in a net increase in O&M expense of \$6,836,400.

11 Schedule C-3.20 is marked as "Reserved for Future Use", which indicates
12 that no adjustments have been made on this schedule.

13 Schedule C-3.21 adjusts federal and state income tax expense to reflect a
14 100% phase-out of the Ohio Franchise Tax and a 100% phase-in of the
15 Commercial Activities Tax. This jurisdictional adjustment results in a net
16 decrease in income tax expense of \$209,356.

17 Schedule C-3.22 adjusts operating income to annualize payroll taxes based
18 on annualized salaries and wages as of May 1, 2008, as determined on Schedule
19 C-3.4. This adjustment includes payments for Social Security under the Federal
20 Insurance Contributions Act for both Old Age Survivors and Disability Insurance
21 and for Medicare tax at the current tax rates. The percent of wages taxable used in
22 this calculation represents the actual 2007 level. This jurisdictional adjustment
23 results in a decrease in taxes other than income expense of \$842,513.

1 Schedule C-3.23 adjusts operating income to annualize unemployment
2 taxes based on annualized salaries and wages as of May 1, 2008, as determined on
3 Schedule C-3.4. This adjustment includes federal and state unemployment taxes.
4 The tax rates and taxable bases used for each tax represent the latest known
5 information at the time this case was prepared. This jurisdictional adjustment
6 results in a decrease in taxes other than income tax expense of \$28,193.

7 **Q. PLEASE DESCRIBE SCHEDULES C-5, C-6, AND C-7.**

8 A. Schedule C-5 is entitled "Social and Service Club Dues." No costs are reflected
9 in this case for employee social or service clubs membership dues. Schedule C-6
10 entitled "Charitable Contributions" indicates that there are no charitable
11 contributions charged to jurisdictional electric operating expenses. Schedule C-7
12 provides detail, by account, of test year Customer Service and Informational
13 Expense, Sales Expense, and General Advertising Expense.

14 **Q. PLEASE DESCRIBE SCHEDULE C-8.**

15 A. Schedule C-8 sets forth the estimated expense of presenting this case. The top
16 half of this schedule compares the expenses estimated to be incurred in this
17 proceeding versus the expenses for the Company's prior two rate cases. The
18 Company proposes to defer this expense and amortize it over a three-year period.
19 This amount is included in test year operating expense through the adjustment
20 contained in Schedule C-3.3.

21 **Q. PLEASE DESCRIBE SCHEDULE C-9.**

22 A. Schedule C-9 contains a summary of all payroll costs and related benefits and taxes
23 included in O&M expense for the test year. The adjustments made to labor expense,

1 pension and benefits expense, FICA taxes, and unemployment taxes from Schedules
2 C-3.4, C-3.17, C-3.22, and C-3.23 were also included on this schedule to arrive at
3 the total adjusted payroll cost.

4 **Q. PLEASE DESCRIBE SCHEDULE C-9.1.**

5 A. Schedule C-9.1 is the Total Company Payroll Analysis for the most recent five
6 years. Page 1 summarizes the total Company payroll information while pages 2
7 through 4 reflect the same information for the various employee classifications.

8 **Q. PLEASE DESCRIBE SCHEDULE C-10.**

9 A. Schedule C-10 sets forth the calculation of the gross revenue conversion factor.
10 The revenue conversion factor is used on Schedule A-1, Line 7 to compute the
11 revenue deficiency.

12 **Q. WHAT ITEMS ARE INCLUDED IN THIS REVENUE CONVERSION**
13 **FACTOR?**

14 A. The revenue conversion factor includes the City of Cincinnati Franchise Tax; the
15 Commercial Activities Tax, the Commission and Ohio Consumers' Counsel
16 assessments, municipal income taxes, and federal income taxes. The rates used
17 represent either the latest known rates or statutory rates. Also included in this factor
18 is an uncollectible account factor of 1.677%. The conversion factor does not
19 include any state income tax rate since it is being phased out by and replaced by the
20 Commercial Activities Tax as discussed further in the direct testimony of DE-Ohio
21 witness Mr. Keith G. Butler.

22 **Q. PLEASE DESCRIBE SCHEDULES C-12.1, C-12.2, C-12.3, AND C-12.4.**

23 A. Schedules C-12.1 through C-12.4 set out the electric sales statistics for the total

1 company and the jurisdictional revenues in this proceeding. The years 2003
2 through 2007 are based on actual data. The test year twelve months ending
3 December 31, 2008, reflects three months actual and nine months projected data.
4 Years 2009 through 2013 are projected and provide information from the
5 Company's electric sales forecast.

6 **Q. PLEASE DESCRIBE SCHEDULE C-13.**

7 A. Schedule C-13 is an analysis of the reserve for uncollectible accounts for the most
8 recent three calendar years and the test year. Shown on this schedule is the
9 beginning reserve balance, the current year provision, recoveries, charge-offs, and
10 ending balances. The ratio of net write-offs and the ratio of uncollectible expenses
11 are also computed. Beginning in February 2002, DE-Ohio's receivables have been
12 sold to Cinergy Receivables Company LLC. The reserve that existed at that time
13 has been reversed over time and no additional reserves are necessary; therefore, the
14 balance is \$0.

15 **Q. PLEASE DESCRIBE SCHEDULE D-5.**

16 A. Schedule D-5 contains comparative financial data for the years 1998 through 2007
17 and the test year ending December 31, 2008. This information was obtained from
18 various departments throughout the Company.

19 **Q. PLEASE DESCRIBE SUPPLEMENTAL FILING REQUIREMENT (C)(7).**

20 A. Supplemental Filing Requirement (C)(7) requires the filing of working papers
21 supporting the schedules provided in the Application. The electronic worksheet
22 files are supplied on compact disc as part of the Application. A list of these
23 electronic files is provided as Supplemental Filing Requirement (C)(7).

1 **Q. PLEASE DESCRIBE SUPPLEMENTAL FILING REQUIREMENT (C)(8).**

2 A. Supplemental Filing Requirement (C)(8) is a worksheet showing, by FERC
3 account, monthly test year data, which agrees with Schedule C-2.1, Column 1.
4 Taxes Other Than Income Taxes are itemized and totaled.

5 **Q. PLEASE DESCRIBE SUPPLEMENTAL FILING REQUIREMENT (C)(14).**

6 A. The information provided in response to Supplemental Filing Requirement (C)(14)
7 describes the calculation of the M&S component listed on Schedule B-5.1.
8 Supplemental Filing Requirement (C)(14)(a) asks for the computation of the M&S
9 used for construction, additions, and extensions. The percentage of M&S applicable
10 to new construction is developed on Supplemental Filing Requirement (C)(14)(c).
11 Supplemental Filing Requirement (C)(14)(b), page 1, lists the monthly balances of
12 M&S by function, and page 2, lists the balances by account. The Company does not
13 maintain its inventory in such a way that it can list the balances by function. The
14 functional balances were estimated using a percentage developed on Supplemental
15 Filing Requirement (C)(14)(c), which also lists monthly withdrawals by function.

16 **Q. PLEASE DESCRIBE SUPPLEMENTAL FILING REQUIREMENT (C)(23).**

17 A. Supplemental Filing Requirement (C)(23) requests information regarding the Fuel
18 Stock component of working capital listed on Schedule B-5.1. DE-Ohio
19 requested a waiver of this Supplemental Filing Requirement as it relates to
20 generation, which is not part of this proceeding. The Commission granted this
21 waiver by the entry dated July 23, 2008.

1 Q. WHAT INFORMATION DID YOU RECEIVE FROM OTHER DE-OHIO
2 WITNESSES IN THIS PROCEEDING?

3 A. I received Plant in Service data from Mr. Council, which he presented on
4 Schedules B-2 through B-4.2 and B-6.2. I received accumulated deferred
5 investment tax credit and accumulated deferred income tax balance information
6 from Mr. Butler, which I used on Schedule B-6. I also received the federal
7 income tax rate, Ohio property tax valuation notice, and average Ohio property tax
8 rate from Mr. Butler. I received cost of capital information from Mr. De May,
9 which he presented on Schedule D-1. This schedule also includes the
10 recommended rate of return on common equity proposed by DE-Ohio witness Dr.
11 Roger Morin.

12 IV. DISTRIBUTION RIDER

13 Q. PLEASE DESCRIBE THE DISTRIBUTION RIDER BEING PROPOSED
14 BY THE COMPANY IN THIS PROCEEDING?

15 A. As DE-Ohio witness Mr. James E. Mehring discusses in his direct testimony, the
16 expectation for the next few years is that the Company will make substantial
17 investments in its distribution system.

18 The Distribution Rider (Rider DR) is intended to balance the needs of the
19 Company to maintain its financial stability and its commitment to shareholders,
20 with the needs of its customers to minimize costs and provide safe, reliable, and
21 efficient service. Rider DR is loosely modeled after the Company's Rider AMRP
22 (Accelerated Main Replacement Program) for gas service. The objective is timely
23 recovery of a return of and on incremental investment in electric distribution plant

1 and recovery of incremental electric distribution expenses, net of any benefit
2 derived from growth in the number of customers. The rider will be charged on a
3 "per bill" basis to all customers based on the cost of service study approved in this
4 case.

5 **Q. WHAT TYPES OF COSTS WOULD BE INCLUDED IN RIDER DR?**

6 A. Rider DR will be limited to only those plant and O&M accounts that are
7 specifically distribution or distribution-related, including investments associated
8 with the SmartGrid project. All of the information will be auditable and much of
9 the information will be readily available in the Company's Form 1 filed with the
10 Federal Energy Regulatory Commission (FERC). (The same information is filed
11 in the Company's annual reports to the Commission.)

12 For incremental net plant, Rider DR would be based on the year-end
13 electric distribution plant original cost net of accumulated depreciation and will
14 not include any construction work in progress (CWIP). Electric distribution plant
15 original cost and accumulated depreciation is provided in the Form 1. Net plant
16 will also include DE-Ohio's electric distribution share of hardware and software
17 development (collectively, information technology or IT) costs included in plant
18 accounts other than electric distribution plant accounts. The adjustments to be
19 included in the calculation of electric distribution rate base are for accumulated
20 deferred income taxes (ADITs) associated with electric distribution plant (account
21 282), 3% and 4% Accumulated Deferred Investment Tax Credit (ADITC) on
22 electric distribution plant, ADIT on uncollectible accounts, and the balance of
23 Regulatory Assets - Meters being requested in Case No. 08-711-EL-AAM.

1 Although detailed information on ADITs and ADITC is not publicly available, it
2 is readily available from the Company and will be included in the proposed annual
3 filings.

4 Incremental operation and maintenance expense would be limited to direct
5 electric distribution expenses, FERC Accounts 580 through 598, and distribution-
6 related Administrative and General Expense (A&G) accounts, FERC Accounts 901
7 through 910. The eligible direct distribution O&M expenses include such costs as
8 vegetation management and meter expenses. The distribution-related A&G
9 accounts include such costs as call center and customer billing expenses. All of
10 this information is available in the Form 1.

11 Finally, we propose to include depreciation expense on electric
12 distribution plant (also available in the Form 1), property taxes on electric
13 distribution plant, and allocated IT costs. Property taxes are not reported in the
14 Form 1 on a distribution-only basis but the information is estimable and will be
15 included in the annual filings.

16 The return on the incremental electric distribution rate base will be the
17 overall pre-tax weighted-average cost of capital established in this proceeding.
18 Unlike the Rider AMRP, however, we are not proposing to recover any post-in-
19 service costs (e.g., depreciation, carrying costs, etc.).

20 Attachment WDW-3 is an illustration of the Rider providing estimated
21 calculations for years 2009 through 2011.

22 **Q. HOW DOES DE-OHIO PROPOSE TO ADJUST RIDER DR?**

23 **A.** DE-Ohio proposes to make an annual filing seeking approval to recover the Rider

1 DR revenue requirement, including investments related to the SmartGrid project.
2 DE-Ohio proposes to make an annual pre-filing on or before November 30 using
3 nine months of actual data and three months of estimated data of Rider DR
4 costs/benefits for the current calendar year. DE-Ohio will update the filing by
5 February 28 with an application and twelve months of actual data for Rider DR
6 costs/benefits. DE-Ohio will use its best efforts to resolve any stakeholder
7 objections by April 1, and DE-Ohio requests that, if any Commission hearing is
8 required to resolve stakeholder objections, that such hearing be held in early
9 April, such that the new Rider DR rates can be implemented with the May billing
10 cycle.

11 In addition, DE-Ohio commits that it will file a deployment plan with the
12 Commission by August 1 annually, setting forth the SmartGrid deployment
13 activities and other distribution investments that DE-Ohio plans to make during
14 the following calendar year. DE-Ohio will include the expected costs, how the
15 customer benefits for SmartGrid will be calculated, and the rate impacts. Absent
16 any Commission ruling to the contrary by October 1 each year, DE-Ohio requests
17 that such expenditures be presumed to be prudent such that, if any stakeholder
18 seeks to assert in a subsequent Rider DR proceeding or a subsequent general rate
19 proceeding that such expenditures were imprudent, then that stakeholder shall
20 bear the burden of proof the expenditures were imprudent and should be
21 disallowed.

22 Finally, DE-Ohio recognizes that, in modern times, technologies
23 occasionally become obsolete within a short time frame – as seen with personal

1 computers, cellular phones and music formats, to name a few examples. If,
2 therefore, some unexpected change occurs in technology, customer needs or DE-
3 Ohio's business operations occurs, such that DE-Ohio determines that all or part of
4 the SmartGrid project should be suspended or abandoned, then DE-Ohio requests
5 that it be permitted to recover such costs, even though the costs might not meet the
6 Commission's traditional "used and useful" standard for cost recovery, as long as
7 the costs were subject to Commission review and approval as part of DE-Ohio's
8 annual deployment plan.

9 **Q. ARE THERE ANY SPECIAL CIRCUMSTANCES RELATED TO THE**
10 **SMARTGRID PROJECT THAT NEED TO BE ADDRESSED FOR**
11 **DEVELOPING RATES?**

12 A. There is an issue with the treatment of costs for the existing meters that will be
13 replaced as part of the SmartGrid project.

14 **Q. PLEASE EXPLAIN.**

15 A. A cornerstone feature of the SmartGrid project is the replacement of existing
16 meters that have limited technological capabilities, with much more advanced
17 "smart" meters. As discussed by DE-Ohio witness Todd W. Arnold, the
18 Company plans to begin switching out existing meters with advanced meters
19 before year-end 2008 and to have all of the meters completely switched out within
20 the next few years. The issue is that the existing meters have book value
21 remaining to be recovered after they have been replaced.

22 Generally Accepted Accounting Principles require that these costs be
23 removed from plant in-service and accumulated depreciation as retired. The

1 Company is proposing to establish a regulatory asset to ensure full recovery of the
2 investment in existing meters replaced as part of the SmartGrid in a manner,
3 which will have the least economic impact to customers.

4 **Q. HOW WILL THE REGULATORY ASSET BE DETERMINED?**

5 A. In the current case, the Commission will approve in rates some level of annual
6 depreciation on existing meters. As these meters are replaced, the net book value
7 of the meters retired plus the depreciation expense on the balance of existing
8 meters less the depreciation expense allowed in rates will be the amount of
9 activity booked to the Regulatory Asset. As the existing meters are being retired,
10 the Regulatory Asset will generally increase. Thereafter, the Regulatory Asset
11 will begin decreasing. Any remaining balance will be included in the Company's
12 next electric base rate case.

13 The ultimate effect of this regulatory asset treatment is that remaining
14 book value of the existing meters will be expensed over the same period as if they
15 were never replaced. Attachment WDW-4 provides an illustration of how the
16 Regulatory Asset will be calculated.

17 **Q. WILL THIS REGULATORY ASSET AMORTIZATION BE REFLECTED**
18 **IN RIDER DR?**

19 A. Yes. The sum of the actual depreciation on existing meters and the amortization
20 expense on the regulatory asset, described above, will essentially equal the dollar
21 amount of depreciation expense proposed in this case for existing meters. The
22 combined expense will continue at this fixed amount and will be included in
23 Rider DR until the balance of the regulatory asset is \$0. Similarly, the

1 unamortized balance of the regulatory asset, combined with the net plant of the
2 unretired meters and ADITs, will be included in the rate base component of Rider
3 DR.

V. CONCLUSION

4 **Q. WERE ALL OF THE SCHEDULES AND SUPPLEMENTAL FILING**
5 **REQUIREMENTS YOU SPONSOR PREPARED BY YOU OR UNDER**
6 **YOUR DIRECT SUPERVISION?**

7 **A. Yes.**

8 **Q. DOES THIS CONCLUDE YOUR PRE-FILED DIRECT TESTIMONY?**

9 **A. Yes.**

Public Utilities Commission of Ohio

Suburban Natural Gas Company

Case No. 07-689-GA-AIR

This is to certify that the images appearing are an
accurate and complete reproduction of a case file
document delivered in the regular course of business.
Technician S.M Date Processed 1/9/08

SUBURBAN NATURAL GAS CO.
Case No. 07-689-GA-AIR

Depreciation Reserve

The Applicant maintains depreciation reserve, by account, on a total company basis. In order to determine if the Applicant's booked reserve for depreciation is proper and adequate, the Staff generally finds it useful to compare the booked reserve with a calculated theoretical reserve as a guide to whether past accrual rate calculations have been appropriate. The Staff compared the Applicant's total company booked reserve level with a calculated theoretical reserve based on December 31, 2006 plant balances and the Staff's recommended accrual rates discussed below. The Staff determined that the overall booked reserve is in close agreement with the theoretical reserve calculation. The Staff is of the opinion that the jurisdictional reserve, as adjusted by the Staff on Schedule B-3, is reasonable and recommends its use for purposes of this proceeding. The Staff adjusted the Applicant's depreciation reserve to exclude reserve associated with the adjustments as discussed in the Plant in Service section. These adjustments are summarized on Schedule B-3.1

Depreciation Accrual Rates and Depreciation Expense

The Applicant's current depreciation accrual rates were prescribed by this Commission in Case No. 05-1246-GA-AAM. The Staff is of the opinion that the current accrual rates are proper and adequate for use in this proceeding.

The Staff's calculation of depreciation expense, based on the jurisdictional plant in service balances at date certain and the Staff recommended accrual rates discussed above, is shown on Schedule B-3.2.

Construction Work In Progress (CWIP)

The Applicant did not request an allowance for construction work in progress in this case and none is recommended by the Staff as indicated on Schedule B-4.

Working Capital

The working capital allowance is based upon the formula approach, which has been approved by the Commission in previous cases. Under this method, the revenue/expense lag dollars of working capital represents one-eighth of adjusted operation and maintenance expense. The materials and supplies component reflects the test year thirteen-month average balance of materials and supplies held for normal operations and maintenance. One-fourth of adjusted taxes other than income taxes (excluding FICA and the .75% portion of Ohio Gross Receipts Tax) and current federal income taxes are used to partially offset working capital.

Case Nos. 07-551-EL-AIR et al.

Reclassification of Interest on Customers' Deposits

Consistent with the treatment of customers' deposits as an offset to the Applicant's rate base, the Staff reclassified the associated interest expense to operating expenses. The Staff's adjustment is on Schedule C-3.16.

Rate Case Expense

The Staff used the Applicant's estimated rate case expense of \$447,000 for this proceeding, for all three operating companies and the service Company. The Staff amortized the expense over a three-year period. The Staff's adjustment can be found on C-3.17.

The Staff recommends that the Commission review the Applicant's revised estimate of rate case expense which should be submitted as a late filed exhibit before making a final determination of the appropriate level of rate case expense for use in this proceeding.

Forfeited Discounts Revenue

The Staff adjusted test year forfeited discounts revenues to reflect the Staff's adjustment to operating revenues. Staff's adjustments are shown on Schedule C-3.18.
