Dear Sirs:

I am a concerned citizen of Chardon and my husband and I live at a condo complex off South Street (Hwy. 44 S). Our deck faces the bike trail and in fact we can see the cyclists, walkers, etc. and hear their voices. We are totally against the construction of the transmission line. Our property values will plummet I am sure and the resale value of our condo will drop drastically also.

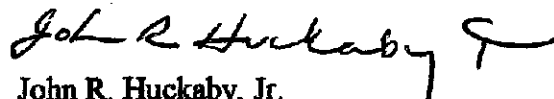

We don't want to view an ugly 138 kV transmission line nor do we want to live close to it. There are studies that indicate that even animals are affected adversely by these transmission lines. So, I am wondering why anyone would put this kind of a dangerous line right over the heads of the population of Chardon. We now have a lovely view in all directions; please don't spoil it and disturb all the wildlife we see in our backyard.

Chardon will be ruined if this plan is implemented! Please cancel the plans and put it somewhere more appropriate.

Thank you for your time.

Janice A. Huckaby
