**RE: Amended Application to Detariff Certain Tier 2 Services  
Case No. 08-802-TP-ATA - nii communications, Ltd. 90-9303-TP-TRF**

Dear Ms. Jenkins:

Enclosed for filing please find the Amended Application to Detariff Certain Tier 2 Services. With this filing the Company is resubmitting previously withdrawn 1<sup>st</sup> Revised Pages 45, 46, 47, and 53. These pages included with the Detariffing filing, however, after a conversation with Staff, it was suggested that these pages should not have been part of the Detariffing filing and should be reverted to its original state as they appeared prior to the Detariffing filing. Staff requested these pages to be resubmitted.

*The following amended tariff pages are included with this filing.*

Original Page 45

Original Page 47  
Original Page 53

Questions regarding this filing may be directed to my attention at (407) 740-3031 or via e-mail at [stthomas@tminc.com](mailto:stthomas@tminc.com). Please acknowledge receipt of this filing by date stamping the extra copy of this cover letter and returning it to me in the self-addressed, stamped envelope provided for this purpose. Thank you for your assistance.

Sincerely,

Sharon Thomas  
Consultant to nii Communications, Ltd.

**LOCAL EXCHANGE AND INTEREXCHANGE SERVICE**

---

**SECTION 3 - SERVICE DESCRIPTIONS (Cont'd)**

**3.1.3 Local Line**

Local line provides the customer with a single, voice grade communication channel.  
Each local line will include a telephone number.

3.1.3.1 Local Line Service is available in the following offerings:

- a. Basic Service: Each Basic Local Line service includes the following standard features at no additional charge:
  - Touchtone
  - One Directory Listing
  - Calling number delivery blocking/per call
  - Access to toll provider
  - 900/976 Blocking

3.1.3.2 Optional Features: A local line customer may order, in addition to the standard features, the following optional features, at the rates specified in Section 3.5.3, Section 3.5.5 and Section 3.5.5.1 provided that the customer pays for such services one month in advance of their use:

- \*69 Call Return
- Call Forward Busy
- Call Forward No Answer
- Call Waiting
- Conference Three-Way
- Message Waiting
- Calling Number Delivery (Caller ID)
- Directory Assistance on a per call basis
- Operator Assistance on a per call basis
- \*67 Caller ID and Call Return Blocking

---

**LOCAL EXCHANGE AND INTEREXCHANGE SERVICE**

---

**SECTION 3 - SERVICE DESCRIPTIONS (Cont'd)****3.1.3 Local Line (Cont'd)****69 Call Return**

Enables a customer to return the last incoming call, whether or not it was answered. The customer dials the activation code of \*69 from a touch-tone phone, or 1169 from a rotary dial phone, and the last incoming call is announced. If the incoming call was placed from a line designated as "private," a fast busy tone will be heard preventing the activation of the Call Return feature. *Office-wide Call Return-Block-to-Private prevents Call Return activation when a local or toll calling party blocks their number.*<sup>3</sup> To activate the Call Return function, the customer would then dial "1". If the line is busy when the customer activates the service, a confirmation announcement is heard, the customer hangs up, and a queuing process begins. For the next thirty minutes, both the calling and called parties' lines are checked periodically. The call setup is made when both the originating and terminating lines are idle. After activation of the feature, the originating and terminating customers may place other calls without affecting the Call Return service status. The call backs may be to areas where a toll charge would be applicable. This feature cannot be activated for all telephone numbers such as numbers with the 800 or 900 prefixes, or PBX extensions.

**Call Screening**

Provides the customer with a method of blocking calls from certain numbers, which may or may not be known to the customer. The customer may also activate the service after receiving a call, and thus place the number associated with that call on the Call Screening list. To activate that feature, the customer dials \*60 from a touch-tone phone, or 1160 from a rotary dial phone and the telephone number of each incoming call is checked against the customer's Call Screening list.

3 Office-wide Call Return-Block-to-Private is required.

**LOCAL EXCHANGE AND INTEREXCHANGE SERVICE**

---

**SECTION 3 - SERVICE DESCRIPTIONS (Cont'd)**

3.1.3 Local Line(Cont'd)

Caller ID:

Allows the customer to view the telephone number of the calling party when receiving a telephone call. The telephone number of the calling party is displayed on a customer-provided display device. However, the calling party may subscribe to services that will prevent the disclosure of their telephone number. In such instances, a privacy indication will appear on the customerprovided display device instead of the calling party's telephone number.

Repeat Dialing

Automatically redials the last outgoing number after (Automatic Callback) the customer activates the service by dial \*66 from a touchtone phone, or 1166 from a rotary dial phone. Repeat dialing monitors the busy line and performs a call setup when both the originating and terminating lines become idle. After activation of the feature, the originating and terminating customers may place other calls without affecting the Repeat Dialing service status. This service may also be used to recall a called party after the conversation has been terminated.

\*67 Blocking for Caller ID/Call Return

By a Customer dialing \*67 prior to dialing the number, the customer's telephone number will be blocked such that a customer with caller id cannot view the number and a customer with call return cannot call back the customer.

**LOCAL EXCHANGE AND INTEREXCHANGE SERVICE**

---

**SECTION 3 - SERVICE DESCRIPTIONS (Cont'd)****3.5.3      Optional Features**

<u>Tier One</u>	Maximum
Calling Number Delivery (Caller ID)	\$15.00
