September 9, 2008

Dear Public Utilities Commissioners,

Thank you for considering the comments from Environment Ohio in regards to advanced energy energy efficiency, and the greenhouse gas inventory rules. As a citizen-based, state-wide environmental group, we have provided our members and other supportive citizens with the opportunity to weigh in on these issues.

Environment Ohio staff and volunteers have collected over 1,000 supportive postcards and an additional 1,000 petition signatures from our members and other concerned citizens across the state. Included in this document is a sample of the postcard and the full list of petition signatures. We will also submit the individual signed postcards to Chairman Schriber to share with the rest of the Commissioners in a manner that will not overwhelm the official docket.

By investing in our clean energy resources, and by reducing our energy use with energy efficiency, we can build a cleaner and healthier future for all Ohioans. We appreciate your efforts to ensure a clean energy future for all Ohioans and look forward to continuing to work with you on these efforts.

Sincerely,

Amy Gomberg

Program Director
Environment Ohio

Here is a sample of one of the 1,000+ postcards that Ohioans have signed in support of strong renewable energy and energy efficiency standards:

Dear Public Utilities Commissioners,

By investing in local clean energy resources, such as wind and solar power, and by reducing our energy use with energy efficiency, we can build a cleaner and healthier future for all Ohioans.

I urge you to ensure that the implementation of Ohio's energy efficiency and renewable energy programs is fair and transparent. These programs should not include unnecessary barriers or loopholes that would allow Ohio's utilities or big businesses off the hook for saving energy and developing more clean sources of power.

Sincerely,

Below is the petition that our members signed via email to show their support for strong clean energy rules, regulations and programs.

Dear Public Utilities Commissioners,

We, the undersigned, urge you to implement strong energy efficiency and renewable energy programs for Ohio. These programs should not include unnecessary barriers or loopholes that would allow Ohio's utilities or big businesses off the hook for saving energy and developing more clean sources of power.

By investing in our clean energy resources, and by reducing our energy use with energy efficiency, we can build a cleaner and healthier future for all Ohioans.

Sincerely,
