Regarding case number, 08-935-EL-SSO for First Energy Customers, rate increases and implementing Senate Bill 221, Ohio's new energy law: I insist decisions be based on what is best for the customer and the environment, and that Ohio-based utilities meet or beat the standards set in SB221. The PUCO also needs to encourage large scale governmental aggregation and ensure that organizations like the Northeast Ohio Public Energy Council can provide its customers with a competitive or lower rate while investing in the renewal energy future for our state that includes strong energy efficiency standard. That we do not propose more nuclear plants, but do increase promoting wind and solar power.
