Exhibit F

Documentation Attesting to the Applicant's Proposed Interactions With Other Carriers

(Attached)

Applicant provides service as a non-facilities-based reseller of interexchange telecommunications services. Its rates are derived from, and based upon, underlying carrier rates. As Applicant will provide statewide interexchange telecommunications services, Applicant does not maintain – because it does not require – an interconnection or resale agreement from a local exchange carrier. Further, because Applicant will provide statewide interexchange telecommunications services, provisions governing the submission of bona fide letters requesting negotiation pursuant to Sections 251 and 252 of the Telecommunications Act of 1996 and a proposed timeline for construction, interconnection, and offering of services to end users is inapplicable to Applicant's interexchange operations.

Exhibit G

Documentation Attesting to the Applicant's Proposed Interactions With Customers

(Attached)

Applicant proposes to provide interexchange telecommunications services exclusively. The provisions requiring Explanation of whether applicant intends to provide Local Services which require payment in advance of Customer receiving dial tone, listing of Ohio ILEC Exchanges the applicant intends to serve, and discussion regarding local service territory are inapplicable.

Applicant's billing is performed under arrangements with incumbent local exchange carriers for Applicant's charges to appear with the incumbent's local exchange bill. Applicant does not bill end users directly, and has no bill, accordingly. Applicant has entered into a billing arrangement with B.S.G. Clearing Solutions, Inc. ("BSG" f/k/a "Billing Concepts") to coordinate billing on behalf of Applicant with incumbent local exchange carriers. This is a common billing arrangement that enables BSG long distance client subscribers to receive a combined local and long distance bill through the incumbent local exchange carrier's bill.

Under this arrangement, BSG collects billing data from Applicant and other BSG clients and delivers consolidated billing data to the incumbent local exchange carriers, such as AT&T. The incumbent then bills its own local exchange subscriber customers who are also BSG client company long distance subscribers for long distance charges and related surcharges. The incumbent then compensates BSG in accordance with the terms of its billing arrangement. BSG in turn compensates Applicant through a single lump sum payment. CTLD receives no revenue from its subscribers.

Applicant verifies all account subscriptions using independent third party verification. No separate account registration form is used to presubscribed new subscribers, accordingly.
