TARIFF FORMAT

- A. Sheet Numbering - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. the Commission follows in their tariff approval process, the most current sheet number on file with the Commission is not always the tariff page in effect.
- C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a).I.
 - 2.1.1.A.1.(a).I.(i).
 - 2.1.1.A.1.(a).I.(i).(1).
- D. Check Sheets - When a tariff filing is made with the Commission, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. An asterisk designates all revisions made in a given filing (*). There will be no other symbols used on the check sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the Commission.

SECTION 1 - DEFINITIONS

For the purpose of this tariff, the following definitions will apply:

Access: Is connection to one carrier by a second carrier to obtain the services of any or all network facilities and services within the network, including unbundled elements.

Access Service Request ("ASR"): A written request for special access services executed by the Customer and the Company in the format devised by the Company. The signing of an ASR by the Customer and acceptance by the Company initiates the respective obligations of the parties as set forth therein and pursuant to this tariff, but the duration of the service is calculated from the Service Commencement Date. Should a Customer use the Company's access service without an executed ASR, the Company will then request the Customer to submit one.

Account Codes: Permits Centrex Stations and attendants to dial an account code number of up to eight digits. For use when placing calls over facilities arranged for Automatic Message Accounting (AMA) recording. The account or project number must be input prior to dialing the called number.

Advance Payment: Part or all of a payment required before the start of service.

Alternative Operator Services: Alternative Operator Services are those services provided by the carrier in which the customer and the End User are totally separate entities. The carrier contracts with the customer to provide the alternative operator services; however, the carrier does not directly contract with the End User to provide the services even though it is the End User who actually pays for the processing of the operator assisted calls.

Automatic Number Identification ("ANI"): Allows the automatic transmission of a caller's billing account telephone number to a local exchange company, interexchange carrier or a third party subscriber. The primary purpose of ANI is to allow for billing of toll calls.

Automatic Location Identification (ALI): An E911 feature that provides the name or address or both associated with the calling party's telephone number (identified by ANI as defined below) to the PSAP for display. Additional telephones with the same number as the calling party's (secondary locations, off-premise extensions, etc.) are identified with the address of the telephone number at the main location.

2.1 Undertaking of the Company (cont'd)

2.1.5 Notification of Service-Affecting Activities

The Company will provide the Customer reasonable notification of service-affecting activities that may occur in normal operation of its business. Such activities may include, but are not limited to, equipment or facilities additions, removals or rearrangements and routine preventative maintenance. Generally, such activities are not specific to an individual Customer but affect many Customers' services. No specific advance notification period is applicable to all service activities. The Company will work cooperatively with the Customer to determine the reasonable notification requirements. With some emergency or unplanned service-affecting conditions, such as an outage resulting from cable damage, notification to the Customer may not be possible.

2.1.6 Non-Routine Installation

At the Customer's request, installation and/or maintenance may be performed outside the Company's regular business hours, or in hazardous locations. In such cases, charges based on cost of the actual labor, material, or other costs incurred by or charged to the Company will apply. If installation is started during regular business hours but, at the Customer's request, extends beyond regular business hours into time periods including, but not limited to, weekends, holidays, and/or night hours, additional charges may apply.

2.1.8 Universal Emergency Telephone Number Service

- A. This tariff does not provide for the inspection or constant monitoring of facilities to discover errors, defects or malfunctions in the service, nor does the Company undertake such responsibility.
- B. 911 information consisting of the names, addresses and telephone numbers of all telephone customers is confidential. The Company will release such information via the Data Management System only after a 911 call has been received, on a call by call basis, only for the purpose of responding to an emergency call in progress.
- C. The 911 calling party, by dialing 911, waives the privacy afforded by non-listed and non-published service to the extent that the telephone number, name, and address associated with the originating station location are furnished to the Public Safety Answering Point.
- D. After the establishment of service, it is the Public Safety Agency's responsibility to continue to verify the accuracy of and to advise the Company of any changes as they occur in street names, establishment of new streets, changes in address numbers used on existing streets, closing and abandonment of streets, changes in police, fire, ambulance or other appropriate agencies' jurisdiction over any address, annexations and other changes in municipal and county boundaries, incorporation of new cities or any other similar matter that may affect the routing of 911 calls to the proper Public Safety Answering Point.

- B. The Company may require applicants for service who intend to use the Company's offerings for resale and/or for shared use to file a letter with the Company confirming that their use of the Company's offerings complies with relevant laws and the Commission's regulations, policies, orders, and decisions.
- C. The Company may block any signals being transmitted over its Network by Customers which cause interference to the Company or other Users. Customer shall be relieved of all obligations to make payments for charges relating to any blocked service and shall indemnify the Company for any claim, judgment or liability resulting from such blockage.

- (c) Any Customer who has been under billed for services rendered will be notified by the Telephone Company upon the discovery of the under billing. Notification will include the reason(s) that the under billing occurred. The Customer is responsible for payment of unbilled charges for services rendered up to and including twenty four (24) months prior to the issuance of the notification to the Customer.
- (d) The Customer agrees that the Telephone Company may conduct a credit verification at any time, and will supply such financial information as may be reasonably requested by the Telephone Company. If, in the sole opinion of the Telephone Company, a Customer presents an undue risk of nonpayment at any time, the Telephone Company may require that the Customer pay its bills within a specified number of days, pay in advance of the furnishing or continuation of any service, and/or make such payments in cash or the equivalent of cash.

2.15.1 Late Payment Charge

A late payment charge of 1 percent (1%) per month will apply to each Customer bill when the previous month's bill has not been paid in full, leaving an unpaid balance carried forward. 2.0 REGULATIONS - (cont.)2.15 Payments - (cont.)2.15.2 Disputed Bills

Any Customer who disputes a portion of a bill rendered for the Telephone Company's services shall pay the undisputed portion of the bill and provide written notice to the Telephone Company that such unpaid amount is in dispute within ninety (90) days of receipt of the bill. If such written notice is not received by the Telephone Company within ninety (90) days as indicated above, the bill statement shall be deemed to be correct and payable in full by the Customer.

- (a) In the event a Customer and the Telephone Company cannot resolve the dispute to their mutual satisfaction, the Customer may contact the Public Utilities Commission of Ohio, in accordance with the Commission's rules of procedure.
- (b) Once the investigation is completed the Customer shall submit payment of any outstanding amounts deemed due, to the Telephone Company, within five (5) working days.

2.15.3 Proration of Charges

Adjustments for the quantities of services established or discontinued in any billing period beyond the minimum period set forth for services in other sections of this tariff will be prorated to the number of days based on a 30 day month. The Telephone Company will, upon request, furnish within 30 days of a request and at no charge to the Customer such detailed information as may reasonably be required for verification of any bill.

2.0 REGULATIONS - (cont.)2.15 Payments - (cont.)2.15.4 Deposits

The Telephone Company will only require a Customer which has a proven history of late payments to the Telephone Company or does not have established credit, to make a deposit as a guarantee of the payment of rates and charges. Such deposit may be required prior to establishing a service or at any time after the provision of a service to the customer. For purposes of this section, a proven history of late payments is defined as two (2) or more occasions within the preceding twelve (12) months in which payment for undisputed charges was not received within three (3) business days following the payment due date, provided the outstanding undisputed amount of each such individual unpaid bill represented at least ten (10) percent of the total charges on that individual bill. The Telephone Company will provide notice via overnight delivery to the person designated by the customer to receive such notice of the requirement to pay a deposit. The customer will be required to make payment of such deposit prior to the provision of service in those cases where the customer has not established credit with the Telephone Company, or otherwise within fifteen (15) business days of such notice. Such notice period will start the day after the notice is sent by overnight delivery.

No such deposit will be required of a Customer which is a successor of a company which has established credit and has no history of late payments to the Telephone Company. For new service(s) being established such deposit will not exceed the estimated rates and charges for a two-month period. For existing service(s) such a deposit will not exceed the actual rates and charges for a two-month period associated with each individual bill that met the criteria for late payments specified above. The fact that a deposit has been made in no way relieves the Customer from complying with the Telephone Company's regulations as to the prompt payment of bills. At such time as the provision of the service to the Customer is terminated, the amount of the deposit will be credited to the Customer's account and any credit balance which may remain will be refunded.

INTRASTATE ACCESS TARIFF3.0 SWITCHED ACCESS SERVICES3.1 General Service Description

Switched access service, which is available to Customers for their use in furnishing their own services to End Users, provides a two-point communications path between a Customer's premise and an End User's premise. It provides for the use of terminating, switching, transport facilities and common subscriber plant of the Telephone Company. Switched access service provides for the ability to originate or terminate calls from an End User's premise.

3.2 FGD Service Description

FGD service provides a trunk-side termination through the use of end office or access tandem switch trunk equipment. Wink-start, start pulsing and answer-supervisory signaling are sent by the terminating office. Disconnect-supervisory signaling is sent from the originating or terminating office. When FGD uses SS7 out of band signaling, no signaling will be performed via the message channel.

FGD service is provided with multi-frequency address signaling or SS7 out of band signaling. Up to 12 digits of the called party number dialed by the Customer's End User using dual-tone multi-frequency or dial-pulse address signals will be provided by the Telephone Company's equipment to the Customer's premise where the switched access service terminates. Such address signals will be subject to the ordinary transmission capabilities of the switched transport provided.

FGD service, when used in the terminating direction, may be used to access valid NXX codes served by the Telephone Company's switch, community information services of an information provider, and other Customer services (by dialing appropriate codes) when such services can be reached using valid NXX codes. FGD may not be switched, in the terminating direction, to another trunkside switched access service.

3.0 SWITCHED ACCESS SERVICES - (cont.)3.2 FGD Service Description - (cont.)

The Telephone Company will establish a trunk group or groups for the Customer at the Telephone Company's end office host switch where FGD service is provided. When required by technical limitations, a separate trunk group will be established for each type of FGD switching arrangement provided. Different types of FGD or other switching arrangements may be combined in a single group at the option of the Telephone Company.

The access code for FGD switching is a uniform access code of the form 101XXXX. These uniform access codes will be the assigned access numbers of all FGD access provided to the Customer by the Telephone Company. No access code is required for calls to a Customer over FGD switched access service if the End User's telephone service is arranged for presubscription to that Customer.

Where no access code is required, the number dialed by the Customer's End User shall be a seven or ten-digit number for calls in the North American Numbering Plan (NANP). For international calls outside the NANP, a seven to fifteen-digit number may be dialed. The form of the numbers dialed by the Customer's End User is NXX-XXXX, 00, or 1 + NXX-XXX, NPA + NXX-XXX, 00 or 1 + NPA + NXX-XXXX, and, when the end office is equipped for International Direct Dialing, 01 + CC NN or 011 + CC + NN.

When 101XXXX access code is used, FGD switching also provides for dialing the digit 00 for access to the Customer's operator, or at the Customer's option, the end-of-dialing digit (#) for cut-through access to the Customer's premises.

A Customer may order 950 access service over FGD to activate a Customer's designated 950-XXXX access code. This will allow the Company to direct those designated 950-XXXX calls dialed by the Customer's End Users to the Customer's access service. The Customer must be prepared to handle normally dialed FGD calls, as well as calls dialed with the designated 950-XXXX access code which requires the Customer to receive additional address signaling. Such calls will be rated as FGD.
