SUBJECT: Dayton Power and Light Engineering Drawings for Tait Unit #3

Ms. Wissman:

According to the Ohio Power Siting Board (OPSB) Order in case number 92-1475-EL-BGN, Dayton Power & Light (DP&L) is required to submit engineering drawings at least thirty days prior to construction. Construction for Tait Unit #3 is currently scheduled to begin August 31, 1997.

DP&L is installing the same model combustion turbine-generator as Units #1 and #2 which are currently in service. The engineering and construction drawings used for the previous units will be used for Unit #3. Since this installation is essentially the same as the previous units for which DP&L has already provided engineering drawings, we are only submitting the site arrangement plan drawing (Drawing # 25193-CSTU-S1001). This drawing locates the major plant equipment for the current installation.

If you require any additional information please contact Eric Garrett at (937) 331-4484.

Sincerely,

A. A. Farrell, Manager - Plant Betterment
