Subject: Commencement of Construction
AMP Generating Station
Case Number 06-1358-EL-BGN

Dear Mr. Kiesewetter,

Staff attended your July 17, 2009, pre-construction conference pertaining to construction of a fertilizer storage facility for the AMP generating station in Meigs County, Ohio. AMP has indicated that all associated permits for this portion of the project have been obtained. Commencement of construction activities is authorized for this phase, limited to the storage facility, including the necessary worker parking area and vehicular access road off of State Route 124.

Staff notes that an environmental specialist needs to be on site during construction, and associated equipment and grading must not encroach on existing or previously created Eastern Spadefoot pools on site, as mitigation for the species has not yet been cleared through Staff. Additionally, no clearing or grading is allowed to commence for the landfill or barge dock facilities at this time, nor is commencement of any additional work at the generating power site location.

Please keep Staff informed of progress of site activities, and notify the Board when construction is completed for this phase. Also, please coordinate with Staff any permit approvals or pre-construction meetings for additional phases of work as they become known.

Very truly yours,

Klaus Lambeck, Chief

Facilities, Siting & Environmental Analysis Division
