Attention Public Utilities Commission
of Ohio:

My letter is in regards to the
proposed Frontier-Verizon local telephone
mergers

The merger should be rejected by the PUCO
because there is lack of consumer benefits
and potential pitfalls of a merger of the two
companies. Is Frontier capable of making the
needed improvements to Verizon's residential
local telephone service if the merger is
approved at the State and Federal level.

Verizon has great telephone service
now, will Frontier be able to also give
great service and considering the fact that

Frontier serves just a small portion of
Williams county serving 480 residential customers,
merging with Verizon it would add Verizon
" 435,000 " residential customers in 77 counties
to Frontier.

If Frontier can't handle the amount of
residential customers that it serves right
now, just how are they going to be
able to handle the amount of residential
customers they will have if the merger
goes through.

Thank you so very much for your time
and concerns in this very important matter.
I truly hope for all of Ohio that the
merger will "NOT GO THROUGH"

Sincerely
Dianne Robbins
