Case No. 09-977-EL-AIS

PUCO

2009 OCT 21 PM 2:05

RECEIVED-DOCKETING DIV

APPLICATION AND STATEMENT

TO THE HONORABLE

THE PUBLIC UTILITIES COMMISSION OF OHIO:

Your Applicant, Ohio Valley Electric Corporation, respectfully shows:

FIRST: Applicant is an Ohio corporation, which owns and operates facilities for the generation, transmission and sale of electric power and energy in the State of Ohio and owns and operates facilities for the transmission of electric power and energy in the Commonwealth of Kentucky, Applicant being a public utility, as defined in the Ohio Revised Code ("Revised Code"). Applicant's wholly-owned subsidiary, Indiana-Kentucky Electric Corporation ("IKEC"), owns and operates facilities for the generation, transmission and sale of electric power and energy in the State of Indiana. The combined electric production capability of the generating stations owned and operated by Applicant and IKEC (which are known as the Kyger Creek and Clifty Creek Plants) is approximately 2,256 megawatts.

Applicant was organized on October 1, 1952 by the ten (now eleven) participating companies, which are the owners of all of the capital stock of Applicant, to supply, together with

the Sponsoring Companies (as defined below), the entire power requirements of the gaseous diffusion plant near Portsmouth, Ohio, owned and operated initially by the United States Atomic Energy Commission until January 19, 1975, and then, from that date until September 30, 1977, by the United States Energy Research and Development Administration, which, under the Energy Reorganization Act of 1974 succeeded to certain of the functions of the Atomic Energy Commission, and thereafter by the United States Department of Energy ("DOE") which, on October 1, 1977, pursuant to the Department of Energy Organization Act, succeeded to the functions of the Energy Research and Development Administration. Effective August 31, 2001, DOE became no longer entitled to any power generated by Applicant's and IKEC's generating stations, and the Sponsoring Companies have instead purchased that power.

The eleven participating companies that own all of the Applicant's common stock are currently as follows: Allegheny Energy, Inc.; American Electric Power Company, Inc. ("AEP"); Buckeye Power Generating, LLC, an affiliate of Buckeye Power, Inc.; Duke Energy Ohio, Inc. (formerly known as The Cincinnati Gas & Electric Company), a subsidiary of Duke Energy Corporation; Columbus Southern Power Company, a subsidiary of AEP; The Dayton Power and Light Company, a subsidiary of DPL Inc.; Kentucky Utilities Company, a subsidiary of E.ON LLC; Louisville Gas and Electric Company, also a subsidiary of E.ON LLC; Ohio Edison Company, a subsidiary of FirstEnergy Corp.; Southern Indiana Gas and Electric Company, a subsidiary of Vectren Corporation; and The Toledo Edison Company, also a subsidiary of FirstEnergy Corp. All of these participating companies or their affiliates ("Sponsoring Companies") currently purchase power from Applicant according to the terms of an Inter-Company Power Agreement.

Applicant is a public utility, within the meaning of Section 4905.02 of the Revised Code, being engaged in the business of supplying electricity for light, heat or power purposes within the State of Ohio, and is subject to the jurisdiction of your Honorable Commission. Applicant is also engaged in the business of transmitting electricity within the Commonwealth of Kentucky, the electric power and energy so transmitted being delivered in interstate commerce.

Reference is made herein to your Honorable Commission's Finding and Order in Case No. 08-1286-EL-AIS, in which your Honorable Commission authorized Applicant, through December 31, 2009: (a) to issue and sell secured or unsecured promissory notes, debentures or other debt securities in one or more series, (b) to borrow from or enter into other financing arrangements with the Ohio Air Quality Development Authority, any statutory successor thereto or other authorized issuer of tax-exempt bonds, through the issuance of tax-exempt bonds, (c) to enter into one or more secured or unsecured term loan or revolving credit agreements, (d) to issue and sell any combination of notes and credit facilities to one or more commercial banks, financial institutions or other institutional investors, or borrowing from the Ohio Air Quality Development Authority, any statutory successor thereto or other authorized issuer of tax-exempt bonds from time to time, in an aggregate principal amount of up to \$900,000,000, and (e) to enter into interest rate management agreements, all consistent with the parameters specified in the application made in such proceeding and its exhibits.

SECOND: Attached hereto as Exhibit A are financial statements, including a balance sheet and statements of income and retained earnings of the Applicant, as of June 30, 2009.

THIRD: To provide Applicant with necessary capital for the purposes set forth herein, Applicant proposes, with the consent and approval of your Honorable Commission, from January 1, 2010 through December 31, 2010, to issue and sell secured or unsecured promissory

notes, debentures or other debt securities ("Notes"), in one or more series, or to borrow from, or enter into other financing arrangements with, the Ohio Air Quality Development Authority, any statutory successor thereto or any other authorized issuer of tax-exempt bonds (including but not limited to the Indiana Finance Authority or any statutory successor thereto) (each, an "Authority"), or to enter into one or more secured or unsecured term loan or revolving credit arrangements (which may include increasing the amount available for borrowing under Applicant's existing revolving credit arrangement) ("Credit Facilities"), or to issue and sell or enter into any combination of Notes and Credit Facilities, to or with one or more commercial banks, financial institutions or other institutional investors, or make borrowings from, or enter into other financing arrangements with, one or more Authorities, in an aggregate principal amount outstanding at any time with respect to all Notes, Authority borrowings and other Authority financing arrangements and Credit Facilities of up to \$600,000,000. Applicant would issue and sell the Notes, borrow from, or enter into other financing arrangements with, one or more Authorities, or enter into the Credit Facilities pursuant to one or more note purchase agreements, indentures, term loan agreements, revolving credit agreements, conditional or installment sales agreements or leases, and security agreements or other ancillary agreements as applicable (each, a "Proposed Agreement"). In connection with the interest rate applicable to one or more of the Notes, Authority borrowings or Credit Facilities, Applicant may enter into interest rate management agreements ("Interest Rate Management Agreements"). The authority requested herein is in addition to the authority granted in Case No. 08-1286-EL-AIS.

A. Notes

Any Notes will mature in not less than nine (9) months and not more than sixty (60) years after issuance. The interest rate of the Notes may be fixed or variable or some combination of fixed and variable rates. Any fixed rate Note will be sold by the Applicant at a yield to maturity

which shall not exceed by more than 6.0% the yield to maturity on United States Treasury obligations of comparable maturity at the time of pricing. The interest rate on any variable rate Note will not exceed the London Interbank Offered Rate for U.S. dollar deposits of similar duration at the time of pricing by 600 basis points, and the initial interest rate on any variable rate Note will not exceed 12.0% per annum. Applicant will agree to specific redemption provisions, if any, including redemption premiums, at the time of the pricing. No compensating balances shall be maintained with, or fees in the form of substitute interest paid to, a lender or holder with respect to any Note provided that any such lenders or holders may receive up-front, arrangement or similar fees not to exceed in the aggregate 4.0% of the principal amount of the total borrowing. In addition, in the event a bank or financial institution arranges for a borrowing from a third party, such bank or institution may charge Applicant a placement fee, not to exceed 4.0% of the principal amount of such borrowing.

B. Authority Financing Arrangements

Any financing arrangement with an Authority will be entered into in connection with the issuance of revenue bonds by such Authority ("Authority Bonds"). Such a financing arrangement will be in the form of a loan agreement (including a promissory note evidencing its obligations under such loan agreement), a conditional or installment sale agreement or a lease with an option to purchase (each, an "Authority Financing Agreement") and be for a term or terms of not more than sixty (60) years. Applicant's obligations under any Authority Financing Agreements will include the making of payments sufficient to repay all the principal of, the premium, if any, and the interest on, the Authority Bonds issued in connection with such Authority Financing Agreements. Any Authority Bonds will be special obligations payable solely out of revenues derived from the payments by Applicant under the related Authority Financing Agreements. In connection with any Authority Bonds, Applicant may enter into one

or more guaranty agreements, bond insurance agreements and other similar undertakings guaranteeing repayment of all or any part of the obligations with respect to all or any part of such Authority Bonds and the related Authority Financing Agreements and may give mortgages and other liens and security to secure such obligations.

Any Authority Bonds may be issued as taxable or tax-exempt bonds or once issued may be converted from taxable to tax-exempt bonds. The interest rate of any Authority Bonds may be fixed or variable or some combination of fixed and variable rates. Any fixed rate Authority Bond will be sold at a yield to maturity which shall not exceed by more than 6.0% the yield to maturity on United States Treasury obligations of comparable maturity at the time of pricing, and the initial interest rate on any variable rate Authority Bond will not exceed 12.0% per annum. Applicant will agree to specific redemption provisions, if any, including redemption premiums, at the time of the pricing. Applicant may also agree to up-front, arrangement or similar fees not to exceed in the aggregate 4.0% of the principal amount of the total borrowing.

Because of the historical spread between long-term fixed interest rates and short-term rates, all or a portion of any Authority Bonds may be issued initially with an interest rate that fluctuates on a weekly, monthly or other basis, as determined from time to time by Applicant.

Applicant would reserve the option to convert any variable rate Authority Bonds at a later date to other interest rate modes, including a fixed rate of interest. Variable rate Authority Bonds also may be issued subject to tender by the holders thereof for redemption or purchase. In order to provide funds to pay the purchase price of such tendered variable rate Authority Bonds, Applicant may enter into one or more remarketing agreements with one or more remarketing agents whereby the remarketing agent would use its best efforts to remarket such tendered variable rate Authority Bonds to other purchasers at a price equal to the purchase price of such

variable rate Authority Bonds, which will be 100% of the par amount of such variable rate Authority Bonds. It is expected that the fees of the remarketing agent would not exceed approximately 25 basis points.

Also, in the event that variable rate Authority Bonds are issued, Applicant may enter into one or more liquidity or credit facilities (each, a "Bank Liquidity Facility") with a bank or banks (each, a "Bank") to be selected by Applicant. Any Bank Liquidity Facility would be a credit agreement designed to provide Applicant with immediately available funds with which to make payments with respect to any variable rate Authority Bonds that have been tendered for purchase and are not remarketed. Pursuant to a Bank Liquidity Facility, Applicant may be required to execute and deliver to the applicable Bank a note evidencing Applicant's obligation to such Bank under such Bank Liquidity Facility.

In order to obtain terms and conditions more favorable to Applicant than those provided in a Bank Liquidity Facility or to provide for additional liquidity or credit support to enhance the marketability of variable rate Authority Bonds, Applicant may desire to be able to replace a Bank Liquidity Facility with (or to initially use) one or more substitute liquidity support and/or credit support facilities (the instrument providing the liquidity support and/or credit support and any subsequent replacement support facility thereof, including any replacement facility which would replace a replacement facility, is hereinafter referred to as a "Liquidity Facility") with one or more banks, insurance companies (including municipal bond insurance companies) or other financial institutions to be selected by Applicant from time to time (each such financial institution hereinafter referred to as a "Liquidity Facility Provider"). A Liquidity Facility may be in the nature of a letter of credit, revolving credit agreement, standby credit agreement, bond purchase agreement or other similar arrangement designed to provide liquidity or credit support,

or both, for variable rate Authority Bonds. It is contemplated that, in the event variable rate Authority Bonds are converted to bear interest at a fixed rate to maturity, any Bank Liquidity Facility (if not already replaced or terminated) or, if applicable, any Liquidity Facility (unless earlier terminated) may be terminated, in whole or in part, following the date of conversion of such series of variable rate Authority Bonds. It is expected that the fees with respect to any Bank Liquidity Facility or Liquidity Facility would not exceed approximately 400 basis points.

In order to obtain terms and conditions more favorable to Applicant or to provide for additional liquidity or credit support to enhance the marketability of the Authority Bonds (including variable rate Authority Bonds), Applicant may desire to obtain bond insurance with one or more insurance companies (including municipal bond insurance companies) or other financial institutions to be selected by Applicant from time to time. Applicant would use bond insurance only if it would be anticipated to reduce Applicant's cost of financing.

The Applicant's obligations with respect to any Authority Financing Agreement or Authority Bonds (or any related Credit Enhancement (as defined below), Bank Liquidity Facility or Liquidity Facility) may be secured by a mortgage or other secured bonds or other debt issued by Applicant. Any such bonds or other debt would correspond directly with the related Authority Financing Agreement and series of Authority Bonds (including in principal amount), and any payments made with respect to the related Authority Bonds would be considered also as payments made with respect to such bonds or other debt. Accordingly, any such bonds or other debt would not themselves separately count against or otherwise reduce the financing authority available to Applicant, over and above the effect of the related Authority Bonds and Authority Financing Agreement.

C. Credit Facilities

Any Credit Facility will be for periods of not more than ten (10) years, and Applicant may in connection with any Credit Facility issue notes ("Credit Notes") that will mature not later than the maturity or termination date with respect to such Credit Facility. The commitment or facility fees on the unused portion of any line of credit in connection with any Credit Facility will not exceed 1.50% per annum. Other fees and commissions will not exceed 4.0% of such Credit Facility. The interest rate applicable to a loan under any Credit Facility (including with respect to any Credit Note) (excluding any adjustment that may be required to take into account changes in reserve or capital adequacy requirements or other requirements of law which add to a lender's cost in making or maintaining the loan or reduce its return thereon, or, in the case of foreign banks, withholding taxes) will not exceed (i) the most recently available London Interbank Offered Rate for U.S. dollar deposits of similar duration by 450 basis points; (ii) the then offered rate for certificates of deposit by a selected U.S. major money center bank plus 450 basis points; or (iii) the then prime rate of a selected U.S. major money center bank plus 350 basis points, unless a pricing option based on one or more of these benchmarks is not then available to Applicant. In that case, the interest rate applicable to a loan under any Credit Facility (including with respect to any Credit Note) will not exceed the lowest of the pricing options based on those benchmarks that are available.

D. General

1. Lender Assignments and Participations

A lender under a Proposed Agreement or otherwise with respect to a Note or Credit Facility may desire to assign, or to sell participations in, all or any part of its interests under such Proposed Agreement or such Note or Credit Facility (including with respect to any Credit Note or any of the loans thereunder) to other commercial banks, financial institutions or institutional

investors. Such assignee would have the same rights, benefits and obligations under such Proposed Agreement and such Note or Credit Facility (including with respect to any Credit Note) as the assigning lender.

2. Restrictive Covenants

In connection with the sale or entering into of any of the Notes, the Authority Financing Agreements or the Credit Facilities, Applicant may agree to restrictive covenants which would prohibit it from, among other things: (i) creating or permitting to exist any liens on its property, with certain stated exceptions; (ii) creating indebtedness except as specified therein; (iii) failing to maintain a specified financial condition; (iv) entering into certain mergers, consolidations and dispositions of assets; (v) permitting certain events to occur in connection with pension plans; and (vi) terminating or replacing the Inter-Company Power Agreement among Applicant and the Sponsoring Companies or amending, modifying or waiving certain provisions thereof. In addition, Applicant may be required to prepay the Notes, the Authority Bonds or amounts borrowed under the Credit Facilities after certain specified events, including an ownership change.

3. Credit Enhancement

Applicant may provide certain of the Notes, the Authority Financing Agreements, the Authority Bonds, or the Credit Facilities some form of credit enhancement such as a letter of credit, bond insurance, surety bond or other insurance ("Credit Enhancement") if deemed advisable. Applicant would use Credit Enhancement only if it would be anticipated to reduce Applicant's cost of financing.

4. Revised Code § 4905.401

Any Note, Authority Financing Agreement, or Credit Facility (including any Credit Note) with a maturity or duration of twelve (12) months or less issued or entered into by Applicant pursuant to the authority granted to it by the Commission as requested by this Application will not be considered to limit the authority that Applicant may have pursuant to Section 4905.401 of the Revised Code to issue, without authorization of the Commission, notes or other evidence of indebtedness payable at periods of not more than twelve (12) months.

FOURTH: Applicant proposes, with the consent and approval of your Honorable Commission, to utilize interest rate management techniques and enter into Interest Rate Management Agreements. Such authority will allow Applicant sufficient alternatives and flexibility when striving to reduce its effective interest cost and manage interest cost on financings.

A. Interest Rate Management Agreements

The Interest Rate Management Agreements will be products commonly used in today's capital markets, consisting of "interest rate swaps," "caps," "collars," "floors," "options," or hedging products such as "forwards" or "futures," or similar products, the purpose of which is to manage and minimize interest costs, Applicant expects to enter into these agreements with counterparties that are highly rated financial institutions. The transactions will be for a fixed period and a stated principal amount, and may be for underlying fixed or variable obligations of Applicant. Applicant will not agree to any covenant more restrictive than those contained in the underlying obligation.

B. Pricing Parameters

Applicant proposes that the pricing parameters for Interest Rate Management Agreements be governed by the parameters contained herein, Fees and commissions in connection with any

Interest Rate Management Agreement will be in addition to the above parameters and will not exceed 2.0% of the amount of the underlying obligation involved.

C. Accounting

Applicant proposes to account for these transactions in accordance with generally accepted accounting principles.

D. Commission Authorization

Since market opportunities for these interest rate management alternatives are transitory, Applicant must be able to execute interest rate management transactions when the opportunity arises to obtain the most competitive pricing. Thus, Applicant seeks approval to enter into any or all of the described transactions within the parameters discussed above prior to the time Applicant reaches agreement with respect to the terms of such transactions.

If Applicant utilizes Interest Rate Management Agreements, Applicant's annual long-term interest charges could change. The authorization of the Interest Rate Management Agreements consistent with the parameters herein in no way relieves Applicant of its responsibility to obtain the best terms available for the product selected and, therefore, it is appropriate and reasonable for this Commission to authorize Applicant to agree to such terms and prices consistent with said parameters.

The authorization which Applicant requests herein to enter into Interest Rate Management Agreements is consistent with the authority granted by your Honorable Commission to Applicant in Case No. 08-1286-EL-AIS.

FIFTH: The issuance of the Notes and entering into of the Authority Financing Agreements and the Credit Facilities (and issuance of any Credit Notes thereunder) will be effected in compliance with all applicable indenture, charter and other standards relating to debt and equity securities and capitalization ratios of the Applicant.

SIXTH: Applicant, in compliance with Section 4905.40 of the Revised Code, proposes to apply the net proceeds realized from the sale of the Notes, from Authority Financing Agreements and from borrowings under the Credit Facilities (and issuance of any Credit Notes thereunder), together with any other funds that may become available to Applicant, (i) to finance coal, material and supply inventories at its Kyger Creek and Clifty Creek Plants and pay its general obligations, (ii) to repay, refinance or redeem short and long-term debt, and (iii) to pay any expenditures incurred in connection with the compliance with environmental regulations of the Ohio and United States Environmental Protection Agencies. Such environmental compliance efforts include analysis, engineering, design work, and construction of flue gas desulfurization systems and landfills at its Kyger Creek and Clifty Creek Plants in connection with the Applicant's Clean Air Act Title IV and Clean Air Interstate Rule/Clean Air Mercury Rule compliance plans (the "FGD Project"). The current anticipated total cost of the FGD Project is approximately \$1,250,000,000, of which approximately \$900,000,000 has been expended so far.

* * *

WHEREFORE: Applicant prays for authority from your Honorable Commission, from January 1, 2010 through December 31, 2010, (i) to enter into one or more Proposed Agreements and to issue one or more Notes in the manner set forth herein, with a maturity of not less than nine (9) months and not more than sixty (60) years, to enter into Authority Financing Agreements in the manner set forth herein with a maturity or other term of not more than sixty (60) years, and to enter into one or more Credit Facilities (which may include increasing the amount available for borrowing under Applicant's existing revolving credit arrangement) and issue one or more Credit Notes in the manner set forth herein with a duration or maturity of up to ten (10) years, or any combination thereof; in the aggregate principal amount with respect to all

Notes, Authority Financing Agreements and Credit Facilities outstanding at any time of up to \$600,000,000, and to apply the proceeds thereof, all as proposed and described in this Application, (ii) to provide for any of the Notes, Authority Financing Agreements, Authority Bonds or Credit Facilities (including any Credit Notes) to receive some form of Credit Enhancement, if deemed advisable by Applicant, and (iii) to enter into Interest Rate Management Agreements within the parameters proposed and described in this Application.

Applicant prays for all other and further relief necessary and appropriate in the premises.

Respectfully submitted this 21st day of October, 2009.

OHIO VALLEY ELECTRIC CORPORATION

By David L. Hart

OFFICER'S CERTIFICATION

A review of the affairs and activities of Ohio Valley Electric Corporation and its wholly-owned subsidiary, Indiana-Kentucky Electric Corporation (the Companies), during the quarters ended June 30, 2009 and 2008, has been made under my supervision, and in my opinion, the unaudited financial statements for these periods present fairly the financial conditions of the Companies as of June 30, 2009 and 2008, and the results of the operations, thereof, in accordance with generally accepted accounting principles consistently applied throughout the period. To the best of my knowledge and belief, there has been no Potential Default, Default, or Event of Default by the Companies and the Companies are in compliance with the covenants of the current debt agreements.
