Account # 110017166122.42318Apples WY

We are a customer of Ohio Edison as proved by the attached statement.

We find it unfair and unjust ruling by the PUCO to allow Ohio Edison to drop our demand controller rate therefore increasing our bill by 35% in an economically oppressed environment. You, the PUCO, are supposed to protect us from dramatic increases that affect our ability to economically survive. The demand controller did protect against additional generation capacity which effectively helped with the "Green" movement. In eliminating the use of this mechanism, without our consent or knowledge, you go against all that is "green". We were willing to sacrifice hot showers and a warm house to try and conserve energy and now we are being punished by an increase of \$100 a month. Attached please find a spreadsheet with the increase of electric spent over the last year when the demand controller was, without our knowledge(we cannot afford a newspaper) disconnected.

We would like to reenact the protective rate of a demand controller so we can continue to support to protect the environment with the "Green" attitude of reduced energy consumption. We should be rewarded for our efforts to conserve energy and not penalized so we don't have to build additional generation for peak demand.
