

11/2/09

To the OPSB concerning Everpower Renewables
Project in Champaign Co., Ohio.

Please hear our voices. Please take a long,
serious look at the research that has been done by
people not connected to the money surrounding
this project.

Dr. Nina Pierpont is one of those voices. A pediatrician
in Malone, Franklin Co., NY, her credentials are
impressive — a graduate of Yale, Princeton, John Hopkins,
and Dartmouth. As a medical doctor with a background
in ecology, she has done extensive research on the effects
of wind turbines on the people who live near them.

Her conclusion on safe setbacks is 1.25 miles from homes.
Everpower is proposing 941' set back from our homes.
It is far more honorable to error on the side of caution
(supported by valid research) than to endanger the health
and well being of many citizens. Please hear our voices.

Thank you for your time & consideration,
Lori Forrest
