Re: Sprint Communications Company L.P. Ohio Tariff PUCO No. 3  
Docket No. 90-9015-TP-TRF Case No. 09-0957-TP-ATA

Dear Ms. Jenkins:

Enclosed for filing are the final pages of Sprint Communications Company L.P. Ohio Tariff PUCO No. 3. The final pages are:

2nd Revised Page 3 TOC	Original Page 6-10.1	2nd Revised Page 6-16
2nd Revised Page 4 TOC	2nd Revised Page 6-11	2nd Revised Rate Page 8-4

2nd Revised Page 6-10	Original Page 6-11.2	Original Rate Page 8-5.1

This filing:

- introduced Toll Free 8YY Transit Traffic Service. This service transports Toll Free traffic originated by a third party that is not an end user or other user of the Company's local exchange or exchange access service through its wire center to an IXC customer. The connection can be either directly or indirectly connected.
- clarified how local switching rates are applied to customers. The tariff currently has the same rate whether the customer is directly or indirectly connected. The proposed tariff changes separate the offering and provide a lower rate if the customer direct connects.
- inserted the ILEC's rates for Switched Transport services.
- made minor text changes in the Toll Free Database Access Service Description.

This filing was effective November 15, 2009. Should you have any questions, please do not hesitate to call me.

Sincerely,

## ACCESS SERVICE

6. Switched Access Service (Cont'd)6.2 Provision and Description of Switched Access Service Arrangements (Cont'd)

## 6.2.2 Toll Free Database Access Service (TFDBAS) (Cont'd)

## (A) Description (Cont'd)

Unless prohibited by network considerations (e.g., different dialing plans), the customer's Toll Free Database Access Service (TFDBAS) traffic may, at the option of the customer, be combined in the same trunk group arrangement with the customer's non toll free database switched access traffic except as follows. Combining Toll Free Database Access Service traffic with the customer's direct routed switched access traffic will be allowed only when the end office is equipped to perform the toll free database query. When required by network considerations, a separate trunk group must be established for Toll Free Database Access Service.

(C)  
|  
(C)  
  
(C)  
  
(C)

When Toll Free traffic is combined in the same trunk group arrangement with other traffic, usage for the Toll Free Database Access Service traffic will be aggregated with the other traffic for billing purposes. When separate trunk groups are provided for Toll Free Database Access Service, usage will be provided separately.

The Federal Communications Commission ("FCC") has concluded that hoarding, defined as the acquisition of more Toll Free numbers than one intends to use for the provision of Toll Free service, as well as the sale of Toll Free numbers by a private entity for a fee, is contrary to the public interest in the conservation of the scarce Toll Free number resource and contrary to the FCC's responsibility to promote the orderly use and allocation of Toll Free numbers.
