Docketing Case No.: 10-0176-EL-ATA

Notes: I am very unhappy that the cost was raised from 4.7 cents per kWh to 6.41 cents per kWh in the past year. This is a huge increase (in excess of 30%). This is terribly unfair. How can this gouging of the consumer be justified? How many people have seen their take home wage increase over 30% in one year? Not real likely.
Is this increase permanent? What can be done to fight this?

Please docket the attached in the case number above.
