REBUTTAL TESTIMONY OF

GREGORY M. TOTH

ON BEHALF OF

OHIO EDISON COMPANY
THE CLEVELAND ELECTRIC ILLUMINATING COMPANY
THE TOLEDO EDISON COMPANY

2.	O.	PLEASE ST	ATE YOUR NAMI	E AND BUSINESS	ADDRESS?

- 3 A. My name is Gregory M. Toth. My business address is FirstEnergy Corp.
- 4 ("FirstEnergy"), 76 S. Main St., Akron, Ohio 44308.

5 Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?

6 A. I am employed by FirstEnergy Service Company as Consumer Products Lead.

7 Q. ON WHOSE BEHALF ARE YOU TESTIFYING IN THIS PROCEEDING?

- 8 A. I am testifying on behalf of Ohio Edison Company ("OE"), The Toledo Edison
- 9 Company ("TE") and The Cleveland Electric Illuminating Company ("CEI")
- 10 (collectively, "Companies"). Unless otherwise stated, my testimony equally
- applies to all three Companies.

12 Q. PLEASE SUMMARIZE YOUR EDUCATIONAL AND PROFESSIONAL

- 13 **BACKGROUND.**
- 14 A. I received a Bachelor of Science degree from the University of Findlay in
- Psychology, and I joined FirstEnergy Service Company in 2002.
- I am the chairman of the Residential and Low Income Subcommittee of
- the Companies' Collaborative for energy efficiency and demand side management
- 18 (the "Residential Subcommittee").

19 Q. WHAT ARE YOUR RESPONSIBILITIES AS CONSUMER PRODUCTS

- 20 LEAD IN THE CUSTOMER SERVICE AND ENERGY EFFICIENCY
- 21 **GROUP?**
- 22 A. As Consumer Products Lead, I am responsible for the creation, execution, and
- 23 management of FirstEnergy's strategy for consumer products services, energy

efficiency, residential programs and customer satisfaction for customers across

Ohio, Pennsylvania and New Jersey. This includes new business development,

partner relations, communications, advertising, and promotional initiatives.

4 Q. WHAT IS THE PURPOSE OF YOUR REBUTTAL TESTIMONY?

The purpose of my rebuttal testimony in this proceeding is to respond to statements made by Daniel J. Sawmiller on behalf of The Ohio Consumers'

Counsel ("OCC") concerning sunk costs related to the Compact Fluorescent Lighting ("CFL") program approved by the Commission on September 23, 2009, which I will refer to as the "Approved CFL Program."

10 Q. DOES MR. SAWMILLER CHALLENGE THE SUNK COSTS OF THE

APPROVED CFL PROGRAM THAT ARE INCLUDED IN THE

PORTFOLIO PLAN?

11

12

13

14

15

16

17

18

19

20

21

22

23

A. He challenges three line items of these costs. First, he criticizes four months of charges totaling approximately \$120,000 that the Companies incurred from December 2009 through March 2010 to store the CFL bulbs in warehouses. Second, he criticizes the amount the Companies spent on marketing and advertising costs for the Approved CFL Program, which he describes as "a mere \$427,000 of the \$1.8 million costs allocated for marketing." Third, he objects to "management costs" as unjustified, but does not identify the amount of these costs.

I will discuss each of Mr. Sawmiller's recommendations and the reasons why they should be rejected in more detail below. In order to do that, I need to provide a timeline.

Q. WHAT IS THE TIMELINE?

A.

On July 9, 2009, the Companies filed an application with the Commission requesting approval of a program that would provide for direct distribution – via several distribution channels – of 3.75 million CFL bulbs to customers in 2009. Because the Companies intended to apply the energy savings from this program toward satisfying their 2009 energy efficiency benchmarks, the Companies requested that the application be approved no later than thirty days from the date of filing.

On September 16, 2009, the Companies submitted a letter to the Commission stating that the CFL program had been refined as a result of several factors, including discussions with Staff and several intervenors in the Collaborative and the decreasing amount of time remaining in 2009 to realize the benefits of the program. One refinement was to push the CFL bulbs out to customers before the end of 2009 using direct distribution (door-to-door and postal) to customers. On September 23, 2009, the Commission approved the program, as refined, and agreed that the costs of the program were not unreasonable. The Company then purchased 3.75 million CFL bulbs and immediately began to ramp up staging and delivery processes so that the energy saving benefits of the Approved CFL Program would be obtained in 2009.

On Oct. 7, 2009, the Commission asked FirstEnergy to postpone deployment of the Approved CFL Program. On Oct. 8, 2009, OCC filed an application for rehearing. For the next ten days while discussions concerning the program were on-going, the Companies continued to pre-stage CFL materials at

the warehouses so that deliveries could be commenced immediately upon receipt of notice from the Commission to resume the program. On October 18, 2009, the Companies ceased staging operations and began preparing their CFL inventory for storage pending redesign of the program.

On November 4, 2009, the Commission granted rehearing of its September 23, 2009 Order and directed the Companies to redesign the program by November 30, 2009. The Companies requested an extension on November 24, 2009, which was granted until December 15, 2009, to allow the Companies to file their redesigned program with their Energy Efficiency & Peak Demand Reduction Program Portfolio (the "Plans"). On December 15, 2009, the Companies filed the redesigned CFL program (the "Redesigned CFL Program"), as Appendix E to the Plans.

Q. WHAT WERE THE PROJECTED COSTS OF THE APPROVED CFL PROGRAM?

- 15 A. The Companies projected that the cost of the Approved CFL Program would be \$13.1 million.
- 17 Q. WHAT IS THE TOTAL COST INCURRED OF THE APPROVED CFL
 18 PROGRAM?
- 19 A. From program inception, \$9,113,856 has been spent on the development of the
 20 Approved CFL Program.
- Q. DOES MR. SAWMILLER OBJECT TO THE COMPANIES' RECOVERY

 OF ALL COSTS OF THE APPROVED CFL PROGRAM?

1

2

3

4

5

6

7

8

9

10

11

12

A. No. There were substantial costs that the Companies incurred that no party has questioned. The costs incurred for the Approved CFL Program include, among other things, the following: purchase of the CFL bulbs, manufacturing of the bags and boxes required for shipment and delivery, welcome letter and usage instructions, preparation work for delivery, warehousing, advertising and marketing, postage, labeling, measurement and verification, and community outreach. Mr. Sawmiller questions only a portion of these costs.

8 Q. ARE ALL OF THESE COSTS INCLUDED IN THE PORTFOLIO PLAN?

A. Only in part. Upon termination of the Approved CFL Program, the Companies negotiated substantial reductions from vendors and reduced or eliminated costs to the extent possible. In addition, the Companies worked exhaustively to roll as much of these costs as possible into the Redesigned CFL Program. For example, the largest cost element was the cost of the CFL bulbs themselves, and the CFL bulbs will be used in the Redesigned CFL Program. However, certain costs were "sunk," meaning that they were reasonably incurred to implement the Approved CFL Program, but do not directly contribute to the Redesigned CFL Program. Even with these sunk costs included, the cost included in the Plans for the Approved CFL Program and the Redesigned CFL Program is \$13.1 million.

Q. IS MR. SAWMILLER CORRECT THAT FIRSTENERGY'S

20 WAREHOUSING COSTS FROM DECEMBER 2009 THROUGH MARCH

21 **2010 WERE AVOIDABLE?**

A. No. The actual warehousing cost during the period in question is \$120,000, or approximately \$30,000 per month. The original estimate was \$60,000 per month,

9

10

11

12

13

14

15

16

17

18

19

but FirstEnergy's CFL vendor was successful in reducing the price by reorganizing the material in storage and negotiating with the warehouse facility. Under the Redesigned CFL Program, the Companies anticipate that they will need to warehouse the CFL bulbs for up to 24 months. As redesigned, it would be impossible to distribute all the 3.75 million CFL bulbs from the warehouses before the end of March 2010. Thus, this \$120,000 cost is a necessary element of the Redesigned CFL Program.

Q. HOW DO YOU YOUR RESPOND TO MR. SAWMILLER'S STATEMENT

THAT THESE WAREHOUSING COSTS WERE CAUSED BY

FIRSTENERGY'S DECISION TO LAUNCH THE REDESIGNED CFL

PROGRAM AS PART OF THE COMPANIES' PLANS?

Mr. Sawmiller's statement is based on the mistaken assumption that the Companies could have and should have launched the Redesigned CFL Program immediately after the Residential Subcommittee reached consensus on its general terms. The Companies believed in November, and continue to believe today, that launching the Redesigned CFL Program as one component of the Plans will result in greater acceptance by customers. Indeed, this was discussed with participants in the Residential Subcommittee meetings held during the redesign in November, 2009. There was general agreement, although not universal agreement, that the Companies should not rush to implement the new program without Commission approval but should, instead, launch the Redesigned CFL Program as one component of Commission-approved Energy Efficiency & Peak Demand Reduction Program Portfolios.

Α.

4		PROC	GRAM?						
3		THE	SUNK	MARKETING	COSTS	OF	THE	APPROVED	CFL
2		THE	COMPA	NIES SHOULD	BE PREC	CLUD	ED FR	OM COLLEC	TING
1	Q.	HOW	DO YOU	U RESPOND TO	MR. SAW	MILI	LER'S S	STATEMENT	ГНАТ

Mr. Sawmiller appears to argue that the Companies should have spent all of the \$1.8 million budgeted for marketing and advertising, instead of a "mere" \$427,000. In fact, the budget for these services in the original plan was \$1.9 million, and the Companies were on track to spend that amount based on their roll out introduction campaign and support campaigns planned after launch. At the time the program was terminated, the Companies had committed to over \$900,000 in advertising and marketing for the launch itself. The "mere" \$427,000 referenced by Mr. Sawmiller is an estimate, at one point in time, of advertising and marketing costs that could not be negotiated down or transferred to the Redesigned CFL Program. We managed to reduce these sunk costs to \$405,140.

The \$405,140 in costs represents expenses for marketing and advertising the program to customers, which includes, among other items, artwork design and layout, development costs, and advertising buys for print and radio media, much of which were specific to the Approved CFL Program. Cost detail is summarized, with supporting documents, and attached as Exhibit GMT-1.

HOW DO YOU RESPOND TO MR. SAWMILLER'S POSITION THAT 20 Q. THE COMPANIES SHOULD NOT RECOVER THEIR MANAGEMENT 22 **COSTS?**

9

10

11

12

13

14

15

16

17

18

19

21

A.

- A. It is unclear what Mr. Sawmiller is referencing. One line item of costs provided to the Residential Subcommittee participants is \$225,000 for the services of fifteen management employees from the Companies' CFL vendor: ten supervisors, three managers and two operations managers. This invoiced amount breaks out into three categories of costs, as estimated by the vendor:
 - \$40,750 for rescheduling the distribution formula on five occasions during the redesign due to delaying start dates, which compressed actual delivery days lower to meet the scheduled deadline. This is a very complex activity involving proprietary scheduling software utilized by the vendor, and the vendor's ability to perform these distribution formulas is a key reason why it was retained.
 - \$31,250 for project management costs beginning September 23, 2009, which includes supervision of warehousing and safe storage of materials, plus the management of the reorganization of materials to lower storage cost by half.
 - \$153,000 for development and operational planning required before launch, including procurement of materials, staffing, facilities, professional services, trucks, uniforms, logistics, measurement and verification and safety. The vendor started providing these services in May, 2009, as to the development of the CFL program filed with the Commission on July 9, 2009, and continued to provide services through the design and implementation of the Approved CFL Program.
 - Q. HAD THE PROGRAM NOT BEEN APPROVED BY THE COMMISSION,
 WOULD THE COMPANIES HAVE BEEN OBLIGATED TO PAY THE

VENDOR FOR SERVICES PROVIDED BETWEEN MAY AND

SEPTEMBER, 2009?

- A. No. The vendor assumed the risk of not recovering any costs should the program not be approved.
- 5 Q. ARE THERE ADDITIONAL EXAMPLES OF THE SERVICES
 6 PROVIDED BY THE VENDOR'S MANAGEMENT EMPLOYEES?

The CFL vendor leadership team and other senior staff at the vendor were far more involved than anticipated in the communication between the Companies and the vendor staff, the coordination of services, rescheduling of staff, logistical considerations and negotiations, and communication with suppliers. Management services also included evaluation and analysis of the work that went into preparing documents for the Redesigned CFL Program, specifically the quantification of services reconciliation.

Moreover, the CFL vendor's call center was expected to receive possibly 100 to 200 calls per day for the original CFL plan. Due to the publicity surrounding the Approved CFL Program, the vendor received thousands of calls, and many of them were not inquiries as expected but calls from concerned utility customers. The impact was threefold: management had to hire more staff immediately and train them on the specifics of the project. More impactful, however, was working with the staff to teach them how to effectively handle these unexpected confrontational calls, and management was required to speak to many of these callers who demanded their call be escalated. In addition, the phone system was not set up for this type of volume and the strategy for forwarding calls had not

- contemplated these volumes. As a result, management had to bring in the phone vendor, define the vendor's new requirements, add voice mail boxes for the volume and then train additional core staff on how to assist these callers.
- Q. IS THERE ANOTHER POSSIBLE LINE ITEM THAT MR. SAWMILLER
 IS CHALLENGING UNDER THE HEADING OF MANAGEMENT
 COSTS?
- A. He may also be referencing the Companies' costs for the personnel services of the

 CFL vendor who provided services beginning September 23, 2009, which totaled

 \$630,000. The Companies believe this cost was reasonable, given the demands

 placed upon the vendor by the ramp-up, suspension, and de-staging required

 following the Commission's approval of the Approved CFL Program on

 September 23, 2009.

13 Q. WHAT WORK WAS PERFORMED BY THE CFL VENDOR'S 14 PERSONNEL?

The CFL vendor hired approximately 100 employees to support the CFL program.

The work performed falls into three segments. First was the ramping up of the Approved CFL Program prior to the planned launch date of October 10, 2009, which included receiving the CFL bulbs at the warehouses, pre-packaging the materials for distribution to homes, preparation work and setup for the scheduled beginning of delivery to homes. This also included community outreach and notification to public officials of delivery personnel being in the area, set up and testing of the GPS delivery tracking system and quality control measures, final staff training including safety procedures and customer interaction protocols, and

15

16

17

18

19

20

21

22

23

A.

area delivery trucks being loaded and presorted for each neighborhood. Between October 10, 2009 and October 18, 2009, while the Approved CFL Program was suspended on a day-to-day basis, the vendor's employees actually accelerated prestaging of additional material for delivery because of the anticipated shorter delivery window. This included continuing to receive delivery of CFL bulbs at the warehouses.

Upon receiving the hold order on October 18, 2009, the vendor's employees un-staged 100% of the prepackaged materials and began securing the items for storage. This was required by the warehouse facilities because the materials occupied extensive floor space and were not suitable for pallet storage. The employees repackaged the materials so they would be suitable for use in sending to retail outlets and community agencies consistent with the Redesigned CFL Program, as well as maintaining the direct shipping setup for future use. They secured the inventory, took full counts of all materials and condensed the volume of product, which lowered our storage requirements and reduced warehousing cost. For all the handling, packaging, re-packaging, and unpackaging required for the 3.75 million CFL bulbs, the Companies paid on a unit basis of only \$0.16 per bulb.

Q. DOES THIS CONCLUDE YOUR REBUTTAL TESTIMONY?

A. Yes, it does.
