Docketing Case No.: 10-0176-EL-ATA

Notes: When we started our home in 2004 we research everything. We decided to go geothermal and go all electric, the upfront cost was significantly higher but we were told we would get a discount for going all electric. Now 6 years later it was decided that we along with others who made this decision would no longer receive the discount we were promised. What is this world coming to? You can not trust anyone and everything is subject to change depending on how big the company is and how greedy they decide to become. Why can't honest people who work and pay their bills be treated with some respect? We were promised this and we made our choice on that promise, what is the problem? The CEO is not getting a big enough bonus! Do we have to pay for a golden umbrella for an upper executive to leave? I mean really, why do the working American people always have to pay for large corporation mistakes? It should be black and white we were given a choice we made the choice on a false deal, I would say that is fraud. Please add my name to the list of people who want the decision put back to the original agreement. Thank You Joe and Robin Martorana
