Notes: We have an all electric home buildt in 1987, purposely, due to incentives. At that time we also installed a computer system to monitor our electric comsuption & demand. We religiously adhered to it's guidance maintaining a load level @ 5, thus achieving affordable electricity. Since the new billing structure is in place our bill for the same useage has doubled. We are on a fixed income now & planned our budget around the rates Ohio Edison agreed to initially. It is a matter of our survival that your agency steps in to rectify this injustice. Thank you, Karen A Bissell
