Re: First Energy Case #10-176-EL-ATA

Dear Commissioners:

When we purchased our home, we did not like the fact that it was "All Electric". To Encourage us to buy the former owner told us its a much cleaner heat & energy efficient as you will always get this "All Electric" Discount. Your Electric Bill will be affordable. Over the years we got use to the Home and the Electric bill was reasonable. Last year our Heat Pump died; therefore, we had to purchase a new Furnace & Heat pump. A large unexpected Expense; but in the future it will pay for itself with Savings in Energy.

After the Holidays we were actually looking forward to seeing the savings in our Electric Bill. When I opened January's bill, I almost fell over. We didn't even put up spotlights or as many Christmas lights this year. Our Usage was down from last year but the bill more than doubled. This is Absurd! February's bill the same. Like many "All Electric" Home owners this is unjust. How are people ~~suppose~~ to buy items & help the economy, when all of a sudden their utility bills are like a second mortgage. Help!!

Sincerely,

Terry King
