QUESTION DESCRIPTION:

Regarding restoration of "Electric Heat Rates" to residential customers... Has anyone spoken up with reference to the TIMING of the rate-restoration being [inadvertently] another PENALTY to those customers? Explanation: The "Seasonal Rate" always went UP in the summertime (June-July-Aug-Sept) and resulted in a considerably HIGHER per-KWH rate for electric heat customers during those four months. Come September, the rate would automatically be drastically reduced for eight consecutive months. Please, let's not "shoot ourselves in the foot" on account of BAD TIMING ! Furthermore, many electric heat customers (including myself) were privileged to have the "Time-of-Day" rate (AKA "Time-of-Use" rate), and would request THAT rate as our first choice, but would accept the "Seasonal" rate as an alternate choice. Last, but not least: What about restoration of RATE-22, which became extremely popular as an Electric-Heat-Rate for commercial accounts, including numerous church buildings? Those occupancies have been subjected to penalties every bit as unfair as those imposed on residential properties !
