COMPLAINT DESCRIPTION:

This relates to case number 10-0330. Someone step on First Energy. I can't believe that they can come out now requesting a \$390 million increase in distribution charges after just getting a \$137 million increase in January 2009. Break up the monopoly and save all electric users from this snake. We, who live in all electric homes in particular, are stuck with homes we can't sell or afford to live in any more. Since Washington is giving money away to so many causes, how about insisting that First Energy get some of those bailouts and stimulus packages. Within the last two years I have bought a brand new heat pump, a resistive furnace, and an electric hot water tank, all energy efficient, to conserve energy. I spent thousands of dollars and what do I get? Higher electric bills and deeper in debt. Please stop the apparent greed. Apparently if one uses less energy, we have to have higher rates so that First Energy still makes big bucks. Sincerely, A fed up all electric home owner
