Docketing Case No.: 10-0176-EL-ATA

Notes:

RE: PUCO Case No. 10-176-EL-ATA As part of Citizens for Keeping the All Electric Promise, I want to be sure the PUCO is not again duped by First Energy. Their current response to the PUCO March 3, 2010 directive is inadequate for a long term solution, it is far too easy for First Energy to deceptively raise the rates yet again by simply raising the base rate. We all want a Permanent solution. First Energy made a business decision to

offer the All Electric Rate when it suited them, and now they simply want to renege when it doesn't. We also want to stop spreading the deceptive lie that First Energy has postulated that other customers are subsidizing us, that has never been true. Here is what we want as a permanent solution: 1) A permanent, "all-electric rate" differential/discount. The rate must be equivalent to the pre-2007 declining rate. We are willing to pay the standard residential rate during the months of June, July, and August only. 2) The all electric discount must be attached to the HOME and NOT just the owner. We must be able to sell our homes at market prices and not be penalized for being All Electric. 3) The All Electric Rate must be given to EVERY all electric HOME. 4) The discounted rates given to load management and water heating customers must also be honored. 5) First Energy MUST NOT raise the rate of any other customer to offset the all-electric, load management, and water heating discounts. As stated above, First Energy made a business decision to offer these rates, therefore the discounts need to come out of profits. Bad management should not be rewarded. 6) First Energy must refund in FULL the overcharges made between May 2009 and March 2010.

Please docket the attached in the case number above.
