**Re: Heartland Wind Energy LLC
OPSB Case No. 09-1066-EL-BGN**

Dear Mr. O'Dell:

This letter shall serve as official notice that we have selected the Gamesa G90 2.0 MW wind turbine for construction in this project, as required in condition #6. In a related matter, condition #44 regarding an updated acoustical analysis is no longer applicable.

Regarding condition #8, the Stoneco Quarry will be the location of a temporary batch plant, if it is available for our use.

Also, regarding condition #53, we have conscientiously avoided impacts to local airports when siting our wind turbines, and the Determinations of No Hazard (DNH) that the project has received from the FAA and forwarded to you previously are evidence that there will be no alterations to the operations, operating thresholds/minimums, or landing/approach procedures and/or vectors by the siting, operation, maintenance, or decommissioning of the facility. Therefore, this condition is not applicable to the project.

Sincerely,

Dan Litchfield
