of Paulding Wind Farm II LLC for a Certificate)
to Install Numerous Electricity)
Generating Wind Turbines in)
Paulding County, Ohio)

Case No. 10-369-EL-BGN

NOTICE OF FILING RESPONSE TO STAFF DATA REQUEST

Paulding Wind Farm II, LLC ("Paulding Wind") hereby gives notice of its filing of a response to Staff's data request. The Staff requested the following:

REQUEST: Please provide GIS data showing most current project layout including: turbine locations, access roads, collection lines, substations, laydown yards, and met towers.

In response to this data request, Paulding Wind is submitting with this pleading a map showing the current project layout, including current turbine locations, access roads, collection lines, substations, laydown yards, and met towers. Due to the size and density of the data, this information has been supplied to the Staff as GIS data contained in electronic format. A paper map designated as Attachment A is being provided for posting on the Commission's website which is the sum of the GIS data.

The current project layout mirrors the layout presented in the Application adjusted for certain revisions including the elimination of certain extra locations. The Application proposed sites and studies for 109 turbines, though as detailed in the Application, Paulding Wind intends to only construct 83 to 100 turbines depending on the model of turbine selected. Extra locations were studied and made a part of the Application so that as public and Staff input was received and considered by Paulding Wind, less attractive sites could be dropped while maintaining the

designed capacity. Paulding Wind has provided notice to the Board in separate filings that it has determined not to develop turbine locations 6, 7, 8, 9, 10, 11, 27, 28, 30, 60, and 108. Thus, the accompanying layout contain 98 turbine locations.

Respectfully submitted,
