Re: Case No. 07-464-TP-UNC
Case No. 90-5032-TP-TRF

Dear Ms. Jenkins:

On September 1, 2010, tariff pages for the Ameritech Operating Companies were filed with the Federal Communications Commission under Transmittal No. 1671. This filing in the FCC No. 2 Tariff became effective on September 16, 2010.

The filing was made by AT&T to introduce modifications to the letter of authorization requirements for subtending carriers ordering Telephone Company services over facilities used to provide Telephone Company services to a host carrier. Text changes are also proposed to clarify that "Customer" is a defined term.

These tariff pages can also be viewed on the FCC website at <http://svartifoss2.fcc.gov>. Once you have accessed the page, please follow the following steps to access this filing:

1. Click on FCC Electronic Filing and Public Access Systems.
2. Click on Electronic Tariff Filing System (ETFS).
3. Click on Public Access.
4. Click on the Browse Filed Tariff Documents block.
5. Click on the Browse Filed by an ILEC block.
6. Click on Ameritech Services.
7. Click on FCC 2 - Access Services.
8. Locate tariff pages for Transmittal No. 1671 and click on the block showing "Acrobat PDF" (third column from the left).

This process will provide you with the specific pages filed by SBC for Ohio.

Should you have any questions or require additional information, please contact me at 223-8184.

Very truly yours,

Susan Drombetta
Area Manager-Regulatory Affairs

September 1, 2010

Transmittal No. 1721

Ms. Marlene H. Dortch
Secretary
Federal Communications Commission
Washington, D.C. 20554

This filing is being made on a streamlined basis on 15 days notice under Section 204(a) (3) of the Communications Act.

Attention: Wireline Competition Bureau

The accompanying tariff material, issued by Ameritech Operating Companies (Ameritech) and bearing Tariff F.C.C. No. 2, is sent to you for filing in compliance with the requirements of the Communications Act of 1934, as amended.

This filing, scheduled to become effective September 16, 2010 consists of the tariff pages as indicated on the following Check Sheets:

<u>Tariff F.C.C. No.</u>	<u>Check Sheet Revision No.</u>
2	1557th Revised Page 1
	307th Revised Page 1.2
	288th Revised Page 1.3
	130th Revised Page 1.7

With this filing, Ameritech is proposing to introduce modifications to the letter of authorization requirements for subtending carriers ordering Telephone Company services over facilities used to provide Telephone Company services to a host carrier. Text changes are also proposed to clarify that “Customer” is a defined term.

Supporting information discussed under Section 61.49 of the Commission’s Rules, to the extent applicable, is included with this filing in the attached Description and Justification.

In accordance with Section 61.14, this transmittal letter and associated attachments are being filed electronically today via the Federal Communications Commission’s Electronic Tariff Filing System (ETFS) in compliance with the electronic filing procedures.

Payment in the amount of \$815.00 has been electronically transmitted to the US Bank in St. Louis, Missouri, in accordance with the fee program procedures. The Form 159 is being transmitted electronically via ETFS as a proprietary document. These actions have been committed on the date established as the issued (filed) date as reflected above.

Wireline Competition Bureau

September 1, 2010

Personal or facsimile service petitions against this Transmittal, as required under Section 1.773(a)(4) of the Commission's Rules, should be sent to Scott Murray, Area Manager – Rates/Tariffs, 311 S. Akard St., Room 1940.04, Dallas, TX 75202, facsimile number (214) 858-0639. All other correspondence and inquiries concerning this Transmittal should be addressed to Debra L. Clemens, Director-Federal Regulatory, (202) 457-3066, 1120 20th Street, N.W., Suite 1000, Washington, D.C. 20036.

Sincerely,

A handwritten signature in cursive script that reads "Patrick R. Doherty". The signature is written in black ink and is positioned below the word "Sincerely,".

ACCESS SERVICE

5. Ordering Options for Switched and Special Access Service (Cont'd)

5.2 Access Order (Cont'd)

- When Feature Group D Switched Access Service is ordered for use with Public Switched Digital Service (PSDS), the Customer must specify the PSDS serving office and the PSDS Local Switching Capability. Feature Group D trunks used with PSDS may be routed either directly or through an access tandem. When required by technical limitations, a separate trunk group will be established for Feature Group D used with PSDS. (T)
- When a Customer orders Switched Transport, the Customer is responsible to assure that sufficient access facilities have been ordered to handle its traffic. When Feature Group D Switched Access Service is ordered with the Tandem Signaling Optional Feature, the Customer shall specify the number of one-way originating and/or one-way terminating trunks to the Telephone Company end offices. The number of trunks required may be determined by the Customer in the following manner. For each day the Customer shall determine the highest number of trunks in use for a single hour. The Customer shall, for the same hour period (i.e., busy hour), pick the twenty consecutive business days in a calendar year which add up to the largest number of trunks in use. The Customer shall then determine the average busy hour trunks by dividing the largest number of trunks in use figure, for the same hour period, for the consecutive twenty business day period by 20. This computation shall be performed for each end office and/or access tandem the Customer wishes to serve. (T)
- When a Customer orders a new Switched Access Service, they must specify whether the service will be transported over new or existing Switched Transport services. If the service will be transported over existing Switched Transport services, these services must have a compatible interface and sufficient capacity for the new service. If the Switched Access Service is to be transported over new Switched Transport facilities, the additional information specified in Section 5.2(A) following must also be supplied. (T)
- When a Customer orders Switched Access Services with Dual Carrier Tandem Routing option, as set forth in 6.3.1(A)(3) following, the Host Subscriber and the Service User must coordinate with each other the design, testing and maintenance of the service. The Service User must provide to the Telephone Company the connecting facility assignment (CFA) and the billing account number of the Host Subscriber. Additionally, the Service User must: (i) obtain a letter of authorization for the Shared Network Arrangement from the Host Subscriber, and (ii) provide a written copy of the letter of authorization to the Telephone Company if a dispute arises with respect to the authorization for the applicable Services. (T)
(C)

(This page filed under Transmittal No. 1721)

5. Ordering Options for Switched and Special Access Service (Cont'd)

5.2 Access Order (Cont'd)

(A) Shared Network Arrangement

A Shared Network Arrangement is a service offering that enables a Customer (the "Service User") to connect subtending services to the multiplexed service of another Customer (the "Host Subscriber"), with the Telephone Company maintaining separate records and billing for each. Each Customer will be billed for those rate elements associated with its own portion of the service configuration. Under no circumstances will the rates or charges for individual rate elements be split. This offering is limited to service configurations where a Service User obtains subtending circuits from a Host Subscriber's multiplexed service. (T)
(T)
(T)
(C)

Under the Shared Network Arrangement, the Telephone Company may share record information with the Host Subscriber pertaining to the services of other users of the shared network. Such disclosure will be under the sole discretion of the Telephone Company as is necessary to perform billing reconciliations and/or functions required in connection with maintaining account records.

(1) Establishing a Shared Network Arrangement

When establishing Special Access Service under a Shared Network Arrangement, the Host Subscriber and the Service User must coordinate with each other the design, testing and maintenance of the service; additionally, the Service User must provide to the Telephone Company the Connecting Facility Arrangement (CFA) and the High Capacity Billing Account Number (HBAN) of the Host Subscriber. The Telephone Company will undertake to connect the Service User's circuits to the Host's service, and to establish and maintain separate billing for the Service User's portion of the service, provided that the Service User must: (i) obtain a letter of authorization for the Shared Network Arrangement from the Host Subscriber, and (ii) provide a written copy of the letter of authorization to the Telephone Company if a dispute arises with respect to the authorization for the applicable Services. (D)
(C)
|
(C)

(a) Cascading Shared Network Arrangement

In the event that the Service User is requesting a subtending circuit from a Host Shared Network Arrangement with a third-party Host Subscriber (a Cascading Shared Network Arrangement), the Service User must also obtain and provide to the Telephone Company the appropriate HBAN and CFA of the third-party Host Subscriber, in order to identify the complete circuit for purposes of maintenance and testing continuity. (C)
(C)

In a Cascading Shared Network Arrangement, it is the third-party Host Subscriber's responsibility to notify the Host Subscriber of the cascading Service User and provide them with the cascading Service User contact information prior to the third-party Host Subscriber's Shared Network Arrangement with the cascading Service User.⁽¹⁾ (C)
(T)
(T)
(C)

The Service User (including a cascading Service User) will have Special Access Service under the Shared Network Arrangement, as long as (1) the applicable letter of authorization establishing the Service User's rights to participate in the Shared Network Arrangement has not been withdrawn by the Host Subscriber (or third-party Host Subscriber), and (2) the Host Subscriber maintains the Shared Network Arrangement.⁽¹⁾ (T)
(C)

(1) This regulation only applies to Customers purchasing Shared Network Arrangement after 05/26/06. (T)

(This page filed under Transmittal No. 1721)

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.3 Local Switching Optional Features

Following are descriptions of the various optional features that are available in lieu of, or in addition to, the standard features provided with the Feature Groups.

6.3.1 Common Switching Optional Features

(A) Alternate Traffic Routing

(1) End Office Alternate Routing When Ordered in Trunks

This option provides an alternate routing arrangement for Customers who order in trunks and have access for a particular Feature Group to an end office via two routes: one route via an access tandem and one direct route. The feature allows the Customer's originating traffic from the end office to be offered first to the direct trunk group and then overflow to the access tandem group. It is provided in suitably equipped end offices and is available with Feature Groups B and D. (T)

(2) Multiple Customer Premises Alternate Routing

This option provides the capability of directing originating traffic from an end office (or appropriately equipped access tandem) to a trunk group (the "high usage" group) to a Customer designated premises until that group is fully loaded, and then delivering additional originating traffic (the "overflowing" traffic) from the same end office or access tandem to a different trunk group (the "final" group) to a second Customer designated premises. The Customer shall specify the last trunk CCS desired for the high usage group. It is provided in suitably equipped end office or access tandem switched and is available with Feature Groups B, C and D. (T)

(3) Dual Carrier Tandem Routing

This option provides an alternate routing arrangement that allows originating tandem routed traffic to be routed to the Customer premises of a Host Subscriber. The Service User must provide to the Telephone Company the connecting facility assignment (CFA) and the billing account number of the Host Subscriber. Additionally, the Service User must: (i) obtain a letter of authorization for the Shared Network Arrangement from the Host Subscriber, and (ii) provide a written copy of the letter of authorization to the Telephone Company if a dispute arises with respect to the authorization for the applicable Services. Alternate routing can be accomplished using either Multiple Customer Premises Alternate Routing, described in (2) above, or Service Class Routing, described in 6.3.1(N), following. (T)
(C)

If the host carrier's serving wire center is different from the subtending carrier's serving wire center, both carriers must order Tandem Switched Transport between the end office(s) and the access tandem and Direct Transport from the tandem to both serving wire centers. (C)

(This page filed under Transmittal No. 1721)

ACCESS SERVICE**6. Switched Access Service (Cont'd)****6.3 Local Switching Optional Features (Cont'd)****6.3.2 Transport Termination Optional Features (Cont'd)****(D) Tandem Signaling (Cont'd)**

The tandem signaling Customer must obtain a letter of authorization from the FGD Customer specifying that their traffic will be routed via an alternate access tandem provider. Additionally, a written copy of the letter of authorization must be furnished to the Telephone Company if a dispute arises with respect to the authorization for the applicable Services. Tandem Signaling can be provided for MF (In-Band) or SS7 (Out-of-Band) Signaling. Customers requiring Tandem Signaling via SS7 must purchase Signal Transfer Point (STP) Access in accordance with 6.1.3 preceding or interconnect to the Telephone Company's SS7 network via a third-party's SS7 Network.

(C)

(C)

800 calls originating at end offices not equipped with the Service Switching Point (SSP) functionality must be routed via the Telephone Company Access Tandem and may not be routed through an alternate access tandem.

Overflow or alternate routing is provided according to 6.3.1 preceding, but the Customer may not use the Telephone Company and the alternate access tandem provider as the primary route for traffic with the same CIC.

(T)

6.3.3 Dedicated Access Line Termination Optional Features**(A) Dialed Number Identification Service (DNIS)**

This option permits a Customer's end user with multiple telephone numbers in the same service group to identify the specific telephone number which was dialed by the calling party. Identification is accomplished by outpulsing four digits which distinguish the dialed number to the Customer premises equipment at the end user's location. The digits are outpulsed to the end user premises over the Dedicated Access Line (DAL). All DALs in the same service group must be equipped for DNIS. The number of dialable telephone numbers accessing a service group equipped for DNIS can not exceed the number of DALs in the service group. DNIS is provided with either reverse battery or E&M type supervisory signaling at suitably equipped WATS serving offices.

ACCESS SERVICE

7. Special Access Services (Cont'd)

7.4 Rate Regulations (Cont'd)

7.4.17 Multiplexer Cross-Connection

Multiplexer Cross-Connection (MCC) will be charged per cross-connect per central office, where the cross-connection is performed. If MCC is provided between two Telephone Company offices where multiplexing is performed, Channel Mileage and Channel Mileage Terminations for the lower speed service will apply between the two central offices along with one MCC charge per cross-connect per central office.

When one service is cross-connected to another service, the two cross-connected services are treated separately for service performance measurement and service interruption credit purposes.

If two Customers are involved, the Host Subscriber will be responsible for the entire billing of MCC. The Service User must submit to the Telephone Company the DS1 and/or DS3 system and channel assignment information for the lower speed services being cross-connected. Additionally, the Service User must: (i) obtain a letter of authorization from the Host Subscriber, and (ii) provide a written copy of the letter of authorization to the Telephone Company if a dispute arises with respect to the authorization for the applicable Services.
